Mentally Retarded:			
Total admissions-----	-	-	-
Total net releases-----	8	8	11
Net transfers to other hospitals----	1	1	75

Buildings with a capacity of 276 beds are scheduled for deactivation in March, 1960.

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients; and (3) the establishment of an after-care facility.

To accomplish these changes and to meet workload requirements, a total of 16 new positions are included and listed below under "Proposed New Positions". These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis (see page 373). Changes in price and population have been reflected where appropriate.

1 psychiatrist, 1 senior psychiatric social worker and 1 intermediate typist-clerk position are to be abolished to maintain the overall authorized level of service based on estimated workload.

The positions to be eliminated represent further adjustments resulting from a decreasing population in connection with the deactivation of facilities in the current year.

12					
13					
14	<b>GENERAL ANALYSIS</b>				
15	<b>Objectives</b>				
16	Napa State Hospital provides care and treatment for mentally				
17	ill patients, alcoholics, narcotic addicts, epileptics without men-				
18	tal retardation, minors and juvenile court observation cases				
19	committed under Section 740.5 of the Penal Code and serves				
20	primarily the Counties of Marin, Solano, Contra Costa, San				
21	Francisco, Alameda, Sonoma, and Napa.				
22					
23	<b>Program and Performance</b>				
24	The level of care and treatment techniques utilized at this				
25	hospital are comparable to those employed at the other state				
26	hospitals for the mentally ill operated by the department and				
27	emphasize treatment rather than custody. A large tuberculosis				
28	treatment unit is maintained and cares for all mentally ill				
29	patients in the northern part of the State suffering with this				
30	disease; a juvenile unit is located on the grounds where a				
31	specialized program is conducted; and a special program for the				
32	treatment of alcoholics is available.				
33	The total performance of the hospital is best measured by the				
34	number of admissions and net releases which is set forth in				
35	tabular form as follows:				
36		1956-57	1957-58	1958-59	
37	Total admissions-----	3,320	3,625	3,813	
38	Total net releases-----	3,306	3,558	3,838	
39	Net transfers from other hospitals---	251	—26	—90

## GENERAL ANALYSIS

GENERAL ANALYSIS				
Objectives		1956-57	1957-58	1958-59
Patton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily serves the Counties	Total admissions -----	2,878	2,954	2,905
	Total net releases -----	2,710	2,861	2,811
	Net transfers to other hospitals -----	109	218	26

## Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasized treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the southern part of the State afflicted with this disease.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

<sup>a</sup> Composed of savings in salaries and wages, \$175,438; operating expenses, \$135,318; equipment, \$14,102; and loss in reimbursements, \$3,599.

<sup>b</sup> Composed of savings in operating expenses.

The 2 ward buildings of 1,072 capacity under construction are scheduled for activation in March 1960. These buildings less bed reductions due to remodeling projects, required to provide adequate bed and day room areas, will provide a net increase of 1,010 beds in the current year. Overcrowding will be eliminated by the activation of the new ward buildings.

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients; and (3) the establishment of an after-care facility. To accomplish these changes and to meet work-

<sup>a</sup> Composed of savings in salaries and wages, \$87,879; operating expenses, \$103,386; equipment, \$1,198; and excess reimbursements, \$11,208.

<sup>b</sup> Composed of savings in operating expenses.

Department of Mental Hygiene

STOCKTON STATE HOSPITAL—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	
1	GENERAL ANALYSIS				
2	Objectives				
3					
4					
5	Stockton State Hospital provides care and treatment for				
6	mentally ill patients, alcoholics, narcotic addicts, and epileptics				
7	without mental retardation and serves primarily the Counties				
8	of Sacramento, Amador, Alpine, Alameda, Contra Costa, San				
9	Joaquin, and Calaveras.				
10					
11	Program and Performance				
12					
13	The level of care and treatment techniques utilized at this				
14	hospital are comparable to those employed at the other state				
15	hospitals for the mentally ill operated by the department, and				
16	emphasize treatment rather than custody. An after-care facility				
17	is operated by this hospital, which extends psychiatric, medical,				
18	and therapy treatment as necessary, allowing patients to return				
19	to their homes at night.				
20	The total performance of the hospital is best measured by				
21	the number of admissions and net releases which is set forth				
22	in tabular form as follows:				
23					
24					
25					
26					
27					
28					
29

Total net releases	2,835	2,586	2,670
Net transfers to other hospitals	91	160	229

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, a total of 18 new positions are included and listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis (see page 373). Changes in price and population have been reflected where appropriate.

## GENERAL ANALYSIS

## Objectives

Fairview State Hospital serves the southern counties of the State by providing care and treatment for mentally retarded patients in that area.

## Program and Performance

The level of care and treatment techniques utilized at this relatively new hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows. As this is a new institution, actual statistics are available for 1958-59 only.

	1956-57	1957-58	1958-59
Total admissions -----	-	-	150
Total net releases -----	-	-	13
Net transfers from other hospitals -----	-	-	446

This hospital was activated in the 1958-59 fiscal year, with the first patients being admitted during January, 1959. Patients

were admitted at a rate of approximately 100 per month and a resident population of 583 was reached on June 30, 1959. Additional facilities, providing a total of 1,190 beds, will be activated during the current year which will increase the hospital's rated bed capacity to 1,946 as of June 30, 1960. No additional bed capacity is planned for activation during the budget year, however 700 additional beds already funded will be activated during 1961-62. Admissions are scheduled to produce a resident population of 1,665 as of June 30, 1960 and 2,000 as of June 30, 1961.

The major program changes are directed toward increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies.

To accomplish these changes and meet workload requirements, a total of 34.3 new positions are included and listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. (See page 373.) Changes in price and population have been reflected where appropriate.

GENERAL ANALYSIS								
Objectives								
Pacific State Hospital provides care and treatment for mentally retarded patients principally from the southern counties of the State.								
Program and Performance								
The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing the patients to return to their homes at night.								
The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:								
						1956-57	1957-58	1958-59
Total admissions						314	340	337
Total net releases						242	153	149
Net transfers from other hospitals						7	—18	—214
The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing

### GENERAL ANALYSIS

## Objectives

Porterville State Hospital provides care and treatment for mentally retarded patients primarily from the center and southern counties of the State.

## Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1956-57	1957-58	1958-59
Total admissions -----	514	226	220
Total net releases -----	211	197	167
Net transfers from other hospitals--	—12	13	—71

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, a total of 8 new positions are included and listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the Departmental Summary and General Analysis (See page 373). Changes in price and population have been reflected where appropriate.

1 psychiatrist and 1 senior psychiatric social worker position are to be abolished in order to maintain the overall level of service based on estimated workload.

<sup>a</sup> Composed of savings in salaries and wages, \$72,699; operating expenses, \$116,131; equipment, \$4,025; and excess reimbursements, \$1,478.

<sup>b</sup> Composed of savings in operating expenses.

## GENERAL ANALYSIS

## Objectives

Sonoma State Hospital provides care and treatment for mentally retarded patients principally from the northern counties of the State.

## Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1956-57	1957-58	1958-59
Total admissions-----	188	175	468
Total net releases-----	174	141	225
Net transfers to other hospitals-----	10	20	—58

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding pro-

fessional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, a total of 22 new positions are included and listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. (See page 373.) Changes in price and population have been reflected where appropriate.

1 senior psychiatric social worker and 1 intermediate typist-clerk positions are to be abolished to maintain the overall authorized level of service based on workload. In addition, 3 farm-hand and 2.5 seasonal help positions are to be abolished as a result of the discontinuance of the orchard portion of farming activities in the beginning of the 1960-61 fiscal year.

15	GENERAL ANALYSIS				
16	Objectives				
17	The Military Department includes: the California National				
18	Guard, to help guarantee internal security of the State and				
19	provide an organization prepared in an emergency to become				
20	a part of the active federal military forces; and the California				
21	National Guard Reserve, to provide for defense and security of				
22	California while the California National Guard is in active				
23	federal service.				
24	Program and Performance				
25	The primary programs of the Military Department are the				
26	operation of the California Army National Guard and the				
27	California Air National Guard. Within these programs the				
28	State provides a personnel procurement program which enters				
29	the field of selection and appointment of officers and warrant				
30	officers and recruitment of enlisted personnel; maintains records				
31	of the military history of individuals, recording personnel				
32	actions, verification of service or deeds, and qualifications for				
33	federal retirement; publishes orders and directives on policies				
34	and procedures affecting the military; determines locations of				
35	organizations and units allocated to the State; provides for				
36	training, in conformance with the discipline prescribed by the				
37	Department of the Army and Department of the Air Force;				
38	operates army officer candidate schools at Glendale and Stock-				
39	ton; prepares plans for use of National Guard as state mili-				
40	tary forces and uses such forces as required for emergency				
41	situations, such as flood duty and fire fighting; participates in				
42	the air defense program of the United States both in missiles				
43	and aircraft; maintains and operates armories, airfields, rifle				
44	ranges, supply points, repair and other facilities; establishes				
45	priorities for the use and distribution of federal funds, equip-				
46	ment, and supplies; and administers federal funds in excess of				
47	\$19,000,000 allocated to California covering pay, schools, uni-				
48	forms, equipment, material, and supplies.

85					

The California National Guard Reserve program encompasses all the activities of the California Army National Guard except for the officer candidate schools and those activities financed from federal funds. All activities are conducted at a reduced level compared to the National Guard operation, due to the cadre nature of the organization.

The following tables show personnel strength, units, and installations of the state military forces:

	Actual 1958-59	Estimated 1959-60	Estimated 1960-61
National Guard:			
Ground Forces:			
Personnel -----	20,500	20,750	21,210
Units -----	284	263	261
Air Force:			
Personnel -----	4,500	4,625	4,638
Units -----	40	40	40
Reserve Forces:			
Personnel -----	625	630	644
Units -----	33	33	33
Installations:			
Ground Forces:			
State-owned -----	99	103	107
Leased -----	52	55	50
Air Force:			
Flying bases -----	4	4	4
Other bases -----	3	3	3

Included in the budget are 2 additional positions; 1 maintenance man for the additional army air installation at Sacramento necessary to house a helicopter operation; and 1 switchboard operator for headquarters staff in Sacramento, required due to moving into quarters not served by the state switchboard.

## GENERAL ANALYSIS

## Objectives

This regulatory and tax collection agency is responsible for issuing the license which is required for each motor vehicle operated in California, issuing the license to the qualified individual to operate motor vehicles on public roads, and ascertaining the financial responsibility of individuals involved in motor vehicle accidents.

## Program and Performance

The department operates through 4 divisions headquartered in Sacramento. Branch offices are maintained in principal cities of the State and part-time service is provided to many communities by traveling crews. Through these media the department's basic functions are: the registration and titling of vehicles; the examination of applicants for and the issuance of drivers' licenses; the collection of fees; the maintenance of records in accordance with the laws; the administration of the driver improvement program; the administration of the Financial Responsibility Law; the licensing and control of driving schools and driving instructor services; the licensing of motor vehicle dealers, sales-

men, wreckers, manufacturers and transporters; and the investigation and enforcement of laws pertaining to the registration of vehicles and of driver licensing.

As an economy measure, 186.5 positions and other expenses at a savings of \$1,153,622 have been eliminated from the current budget, and 180.5 existing positions are to be eliminated, and other expenses further reduced, at a savings of \$768,443 in the 1960-61 fiscal year. Chapter 1454, Statutes of 1959, charges this department with the registration of small boats. A total of 73.2 man-years of temporary help in the current year, and 38.3 positions continued in the 1960-61 fiscal year, will be required to register this State's estimated 280,000 small boats. The following are the major workload factors for this department:

	Actual 1958-59	Estimated 1959-60	Estimated 1960-61	
Registrations -----	8,013,890	8,393,000	8,802,000	409,000
				(4.9%)
Drivers' licenses - - -	2,278,989	2,725,170	3,322,640	597,470
				(21.9%)

## DEPARTMENTAL ADMINISTRATION

## Objectives

The director is responsible for the administration of all sections of the California Vehicle Code not delegated to the Department of California Highway Patrol. He establishes departmental policy and directs the work of the 4 divisions.

The Division of Administration is responsible for planning, organizing and directing the administrative sections of the department.

## Program and Performance

The Division of Administration provides the director with information on fiscal expenditures; develops budget planning for current and long-range fiscal requirements; accounts for all revenues derived from the department's fee-collection activities

and all property owned by the department. Department-wide service activities consist of assisting the director and the division chiefs in personnel matters, including in-service training. Real property rentals are located, negotiated, and executed for the department. Supplies, including license plates and tabs, are purchased, stored, and distributed. Departmental programs and procedures are analyzed toward effecting more efficient and economical administration. Departmental communication and information request services are co-ordinated among the divisions both in Sacramento headquarters and field offices.

As an economy measure, 7 positions have been eliminated from the current budget, and 3 existing positions are to be eliminated in the 1960-61 fiscal year.

48	DIVISION OF REGISTRATION						
49	Objectives						
50	This division is responsible for the administration of the						
51	provisions of the Vehicle Code relating to the following: Is-						
52	suance, suspension, and revocation of vehicle registrations;						
53	issuance of certificates of ownership for all vehicles; licens-						
54	ing and suspension of automobile, truck and trailer manufactur-						
55	ers, transporters, dealers and wreckers; assessment of vehicles and						
56	collection of vehicle license fees.						
57	Program and Performance						
58	This division registers approximately 8,800,000 vehicles in						
59	the State during the 1960-61 fiscal year. Accomplished through						
60	the processing and service units, vehicle registration affords a						
61	system of ready identification and control, provides a means						
62	of establishing ownership of vehicles, and provides the mech-						
63	anism for collecting motor vehicle fees. This division has in						
64	its Sacramento files a history of every motor vehicle registered						
65	in California. The records are maintained under the registered						
66	owner's name in alphabetical order, under the license numbr						
67	in numerical sequence, and by engine or identification numbr						
68	in numerical sequence. The Automation Section of this divisio						
69	employs punched cards to record all data concerning all regis						
70	tered vehicles. As the fees are changed from year to year, th						
71	mechanical equipment is used to redate the vehicles, and prepa						
72	potential registration cards which are mailed in advance						
73	the renewal period.						
74	The investigation of automobile dealers and wreckers						
75	accomplished by this division through the use of trained i						
76	vestigators. They also serve briefs for the department, colle						
77	fees in the event of improper or inadequate payments, an						
78	perform other allied investigative functions, among them bei						
79	the licensing and regulation of salesmen and the enforce						
80	of the registration compliance program.						
81	As an economy measure, a total of 51.5 man-years we						
82	eliminated from the current budget. In addition, 80 existi						
83	positions are to be eliminated in the 1960-61 fiscal year.						
84	<sup>a</sup> 1 position established in 1959-60 and extended in 1960-61 for purposes of Chapter 1454, Statutes of 1959.

## DIVISION OF DRIVERS LICENSES

## Objectives

This division is responsible for the issuance of all original drivers' licenses, the renewal of expiring licenses, the maintaining of driving histories of all drivers, the direction of the driver improvement program, and the administration of the State's financial responsibility laws.

## Program and Performance

This division licenses and maintains a post licensing control of approximately 8,200,000 drivers. It is estimated that approximately 3,300,000 original and renewal licenses will be issued in 1960-61 fiscal year. The drivers license file contains more than 30,000,000 driver record documents. The licensing function is accomplished primarily by clerical forces in handling applications as received from the field offices.

Driver improvement includes the general function of post licensing control of drivers with problems that cause their records to show that they are a hazard to themselves or the general public. The mandatory actions are those spelled out in the law requiring automatic action after certain specific convictions, such as drunken driving and certain other offenses

including felonies. Discretionary actions are provided for habitual violators. The discretionary provision is extended to physical or mental disabilities which would result in danger to the individuals themselves or to the general public. To carry out these functions the division uses re-examination, interviews, investigations, warnings and hearings before a referee. Under this discretionary program the division endeavors to improve poor driving habits and attitudes.

The division is also responsible for the administration of the financial responsibility laws. It is the purpose of this function to provide reasonable assurance that persons suffering bodily injury or property damage in motor vehicle accidents are compensated by those responsible for such injury or damage. Drivers who fail to meet their financial obligations by insurance or otherwise, are deprived the privilege of operating a motor vehicle, and their vehicle registration may be suspended for the same cause.

As an economy measure, a total of 20 positions have been eliminated from the current budget, and 85 existing positions are to be eliminated in the 1960-61 fiscal year.

<sup>a</sup> 14.7 positions established in 1959-60 and 14.2 positions extended in 1960-61 for purposes of Chapter 1454, Statutes of 1959.

<sup>b</sup> 17.3 positions established in 1959-60 and 7 positions extended in 1960-61 for purposes of Chapter 1454, Statutes of 1959.

DIVISION OF FIELD OFFICE OPERATIONS							
Objectives							
This division provides a state-wide network of field offices responsible for examining applicants for drivers' licenses, issuing vehicle licenses, receiving, processing and accounting for applications and fees for both vehicle registration and driver license, providing information on Financial Responsibility Laws, brief service and driving school licensing.							
Program and Performance							
This division maintains 133 permanent full-time offices and 30 travel crews serving smaller and isolated communities. Complete vehicle registration and driver licensing services are provided in the permanent offices. Trained examiners are used in the travel crews to provide driver licensing service. Applicants for driver licenses are required to submit to a written test of their knowledge of the Vehicle Code, a vision screening test, an actual demonstration of their ability to operate a vehicle, and their ability to read simple English. A \$3 application fee entitles the applicant to 3 tests within 6 months. Complete registration service is available in all permanent branch offices located in all principal cities of the State. In addition, during the annual registration renewal period service on potential registration cards is offered at approximately 150 banks. Certain registration services are also rendered by automobile clubs. Traveling registration crews visit many other points for stated periods as a convenience to the public. Many field offices serve as headquarters for the motor vehicle investigators and driver improvement analysts.							
As an economy measure, 108 positions were eliminated from the current budget, and 14 existing positions are to be eliminated in the 1960-61 fiscal year.

24					
25	GENERAL ANALYSIS				
26	Objectives				
27	Fundamental objectives of the department are the protection,				
28	propagation, preservation, and investigation of the State's fish				
29	and game resources, including ocean fisheries and marine				
30	products, for the utilization of and general benefit and recrea-				
31	tion of the people of California.				
32					
33	Program and Performance				
34	The director, under general policies established by the Fish				
35	and Game Commission and as prescribed by statute, administers				
36	the department and its program. Included in the department				
37	are the Wildlife Conservation Board and the Marine Research				
38	Committee.				
39	For purposes of administration and operation the department				
40	is organized into several functions corresponding to its major				
41	activities. General policy direction is provided by the Fish				
42	and Game Commission. The commission is composed of 5 members				
43	appointed by the Governor. In addition to establishing general				
44	policy they regulate the taking of fish and game by promulga-				
45	tion of regulations establishing open and closed seasons; bag				
46	and possession limits; and areas for the taking of fish and				
47	game. The commission also regulates commercial fishing to				
48	insure the taking and delivery of fish in a wholesome and sani-				
49	tary condition and to prevent deterioration and waste of fish.				
50	The 1959-60 fiscal year budget authorized increased emphasis				
51	in several areas of departmental responsibility. Work in these				
52	areas has been started and is progressing satisfactorily. Func-				
53	tional cost information, an important administration tool and				
54	public information aid, will give a dollar measurement of the				
55	department's programs and functions and materially assist man-				
56	agement in decision making. It will also serve a very useful pur-				
57	pose in evaluating program performance for budget purposes.				
58	The department's water projects function also received addi-				
59	tional support for increased workload responsibilities. This				
60	workload was recognized in the department's 1957 license fee				
61	increase. The workload since that time has continued to increase				
62	as has the extreme importance of retaining a current status of				
63	water problems. A notable achievement in this area was the				
64	successful prosecution of a San Francisco Bay pollution case.				
65	Expansion of this function to fulfill increasing workload de-				
66	mands is provided in the 1960-61 Budget.				
67	The salmon marking program authorized by legislative action				
68	early in 1959 and implemented in the 1959-60 Budget Act, has				
69	had 1 year of experience. Expansion of this program designed				
70	to conserve and replenish the State's salmon resource is provided				
71	for in the 1960-61 Budget.				
72	Co-operative work with other state agencies using the conser-				
73	vation camp program has been initiated with stream clearance				
74	on the Noyo River and the San Lorenzo River and is continued				
75	in the 1960-61 Budget.				
76	The 1960-61 Budget is based on a partial implementation of				
77	the department's 5-year wildlife conservation plan which was				
78	approved in July 1959.				
79	This plan is designed to enhance and increase some existing				
80	species, introduce new species, and to give added protection				
81					
82	a Federal grants and expenditures therefrom are not included in overall budget totals.				
83					
84					
85					

against increasing pressures of civilization on other wildlife resources.

Following are major subjects proposed in the conservation plan:

1. Reorganization and expansion of water projects activities.
2. Reorganization and expansion of pollution control activities.
3. Administrative and operations procedure improvement.
4. Development of better fishing on reservoirs.
5. Inland fish habitat improvement.
6. Salmon-steelhead conservation program.
7. Sea lion research project.
8. Ocean fish habitat improvement.
9. Efforts to eliminate illegal market hunting and fishing.
10. Increased emphasis on training.
11. Use of conservation camps.
12. Youth conservation education program.
13. Litterbug campaign.
14. Hunter safety training program expansion.
15. A 5-year plan for the Wildlife Conservation Board.
16. Increasing opportunity to hunt on private lands.
17. Expanded land withdrawal program.
18. Introduction of exotic game birds.
19. Game habitat improvement.

Major program augmentations in the 1960-61 Budget recognize the importance of problems relating to water use and water pollution. These problems have become extremely important in the department's operations. They have also become very complex requiring special organization and administrative attention and the employment of personnel with specialized or technical knowledge and skills. Staffing both in headquarters and in the regions in this program area has been inadequate both from the standpoint of numbers of employees and specialized skills needed. Essentially all of the work on water projects and pollution control in the regions has been accomplished at the expense of other programs to which the personnel were originally assigned. This budget provides additional staffing for workload needs and organizational improvement in the Headquarters Office and in the 5 regions. Basically the plan changes the present Water Projects Section in headquarters to a Water Projects Branch with 2 sections, 1 handling water use projects and the other handling pollution control at the staff level. At the regional level water use and pollution problems are placed under a water projects supervisor and staffing is provided according to the existing and forecasted workloads. A fisheries biologist IV position is added to the headquarters staff to provide for water projects review co-ordination work as well as for the increased workload requirements in this area. In addition an associate hydraulic engineer is added to assist in technical problems now handled on a consultant basis. 1 clerical position is provided to aid these 2 technical positions. 11 technical positions and 5 clerical assistants are added to the regional organization to provide for the workload increases that have occurred in the regional area of responsibility in the water use and pollution areas.

## DEPARTMENT OF FISH AND GAME—Continued

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

To accomplish efficiently the planning task, a planning officer having direct responsibility for spelling out department programs and objectives is provided. This fulfills a need for a position responsible to the director for developing and recommending the objectives, policies, plans and programs of wildlife management and research which will best accomplish the sound preservation, conservation and propagation of wildlife in California. Such responsibility in the past has been vested in many top management areas.

Further administration and operation improvement is provided by the addition of an assistant administrative analyst, an assistant budget analyst, a training assistant for safety training, plus related clerical assistance. The assistant administrative analyst position will provide for preparation and maintenance of the department operational manual which is used to set forth policies, operational procedures, organizational responsibilities, standards and management controls. An assistant budget analyst will provide workload relief and strengthen supervision of the budget section in the accounting office. This position will also provide better daily budgetary administration and control. A training assistant is provided for safety training. One of the most important of several inservice training needs is emphasis on safety training. It is anticipated that savings from a lower accident and death rate related to job accidents will in 2 years offset the cost of this position. 5 clerical positions are provided; 1 will render clerical assistance to the planning director and 1 will work with the assistant training officer. 3 positions are justified by workload increases in the administration section clerical pool. The cost accumulation program, increased license work arising from legislative changes, budget preparation, and control documents have substantially increased the clerical pool workload. In addition, demands from the other headquarters functions for assistance in meeting deadlines has added workload.

In the staff operations function other changes are contemplated in addition to the water projects program area previously discussed. In the Inland Fisheries Branch 3 fisheries biologist positions, seasonal aid and related expenses are provided for investigations designed to establish a satisfactory Lake Tahoe fisheries. Fishing pressures caused by population increases in the Tahoe area have materially increased the long-time need for the proper development of the full potential of this lake. Due to the unique characteristics of the body of water, management techniques developed for other waters of the state are not applicable in Lake Tahoe. In addition, 2 fisheries biologists, seasonal aids and related expenses are provided as the first step in a 5-year plan to improve cold water reservoir management. California's fisheries management of these reservoirs has been primarily limited to stocking with fingerling trout. More knowledge concerning management methods designed to supply adequate fishing for the least expense is necessary. The additional staffing will provide manpower to accomplish this important investigation of a fisheries potential which is not currently being fully developed.

In the Game Management Branch, 5 positions and related expenses formerly funded from Federal Aid Pittman-Robertson funds as project leaders are transferred to Support. The department originally established these positions as project leaders; however, their primary function is that of staff officers for the Game Management Branch. Each in his respective field coordinates statewide programs, assists the regions with management problems and assists in training field personnel in the management techniques developed on research projects.

Federal aid funds are reduced in 1960-61 due to 1959-60 being the last year of a special 5-year allocation of accumulated funds. This has been worth approximately \$100,000 annually to California. The addition of Hawaii and Alaska as states reduced the allocation to California by approximately 8 percent. The department has also reduced federal aid research projects, consolidated funding for waterfowl management areas in an effort to reduce expenditures, however, the entire reduction cannot be absorbed without a serious reduction in service.

In the Wildlife Protection Branch a warden captain and related expense is provided to plan and conduct a comprehensive training program for all wardens on all phases of law enforcement work.

In addition 2 wardens and related expenses are provided for added emphasis on an undercover program. This emphasis is necessary to control commercial activity in waterfowl, striped bass, salmon, abalone and other wildlife and fish species.

In the Marine Resources Branch 4 positions and related expenses in the former federal aid Sacramento and San Joaquin River salmon project are proposed for transfer to support to further strengthen the salmon program initiated in the 1958-59 fiscal year. Dingell-Johnson funds may be used only for sport fisheries work, and a very large share of the benefits from departmental salmon work will be derived by the commercial fishery. The salmon and steelhead section should act as 1 unit and should be administered in the same manner.

In addition the Marine Resources Branch program was strengthened by the following means:

## A. Spawning Stock Survey and Management Co-ordination

1 additional fish manager position and seasonal aid time plus operating expenses and equipment is provided for increased emphasis on enumeration of all adult salmon in the stream system of California. This staffing will also allow for closer work with stream gravel removal operators to assure that adequate stream gravel beds are left for salmon spawning areas. Closer contact with water districts to assure adequate water flows will also be made possible.

## B. Ocean Sampling and Downstream Marking

The augmentation to this program with additional seasonal aids follows the plan submitted for the marking program, first commenced in the spring of 1959, following legislative direction that such a program be undertaken.

## C. Radioactivity

To intensify the organic sampling of water products discharged into coastal waters by industries using radioactive isotopes additional manpower of seasonal aids will be required. Heavy nuclear use areas concerned with the salt water cooling reactors and salt water conversion plants will require intensive sampling to properly evaluate the effect of these industries on the fisheries resources.

## D. Headquarters Staff Operations

For direct supervision and guidance of the salmon-steelhead program 1 marine biologist position with clerical assistance is provided. Considering the magnitude, importance, and emphasis placed on this program general supervision as now possible by the branch chief, with his many other duties, is not sufficient for this complete program.

## E. Sea Lion Depredation Investigation

Funds are included to provide for a study to gain basic biological and food habits information on the sea lion. Investigation, by a contractual arrangement, will be made of the food habit distribution and food habit relationship of the sea lion to commercial and sport fish populations.

Provision is also made in the staff operation function for a statewide frequency change in the departmental radio net as required by the Federal Communications Commission.

In the Marine Resources Operations Branch, because of a decline in the resources of the Marine Research Committee, a position previously funded by contract with the committee is carried as part of the general support program in order that the reporting of work currently in process can be completed. In addition 1 marine biologist is provided to handle special short-term and nonrecurring problems in the fields of research and management. Interruption of personnel on long-term projects to handle these short-term and special requests is not an efficient use of manpower and results in undue delays in completing projects. 1 biologist is provided for closer surveillance of the shrimp fishery and for workload connected with the oyster industry. Both of these industries have experienced growth the last few years and additional management time is needed. 1 full-time clerical assistant to the technical staff at the Eureka laboratory is provided and a half-time clerk, authorized on a temporary basis, is deleted. Increased activity and the need to provide full-time coverage of this office can best be satisfied with a full-time position. 2 positions—a statistician and a research assistant—are provided at the Terminal Island facility to process data which has been collected. This material should provide a valuable resource management tool. On a number of species data has been collected, and interpretation in order that it can be used by management is necessary. Increased automation is needed to improve research techniques.

In addition to the water projects and pollution areas the following changes are provided in the regional organization. Temporary help is increased 1.9 man-years in Region I for clerical workload, to assist at the Pine Creek Egg Collecting Station, and to aid in public shooting areas. In Region II, 1.7 man-years of temporary help is added for assistance in handling

37							
38	REGIONAL OPERATIONS						
39	Objectives						
40	Regional offices were established in the department to relieve						
41	the central staff of an enormous volume of administrative work.						
42	The hunting and angling public come in contact with the de-						
43	partment through the regional offices which are located at						
44	Redding, Sacramento, San Francisco, Fresno, and Los Angeles.						
45	These officers provide staff familiar with problems of the locality						
46	and co-ordinate with a headquarters group responsible for state-						
47	wide planning and research. Through decentralization, local						
48	supervisors of the various functions are located in the field						
49	where they can take action based on intimate knowledge and						
50	fieldwork.						
51	Program and Performance						
52	In general the regional program, in addition to a headquarters						
53	function, includes inland fisheries, game management, and wild-						
54	life protection. The activities of the inland fisheries operations						
55	are concentrated on hatcheries, stream improvement, fisheries						
56	investigation, and local water development problems. The activi-						
57	ties of the game management program in the field include al-						
58	phases of research, applied research, and management of big						
59	game and upland game. Field operation of the patrol is under						
60	the wildlife protection function. This latter function also super-						
61	vises hunter safety programs, educational programs, and many						
62	field maintenance responsibilities. Direct costs of regional opera-						
63	tions by function, excluding employees' retirement, are as						
64	follows:						
65					1958-59	1959-60	1960-61
66	Headquarters -----				\$556,163	\$555,234	\$568,000
67	Inland fisheries -----				2,026,680	2,267,447	2,462,100
68	Game management -----				1,134,060	1,173,530	1,161,911
69	Wildlife protection -----				2,429,458	2,550,224	2,626,377
70							
71	Totals -----				\$6,146,361	\$6,546,435	\$6,818,399
72	REGION 1						
73	SALARIES AND WAGES

42	TROUT MANAGEMENT STUDY						
43	This project is being greatly reduced because the major portion of the research work will be completed during the 1959-60 fiscal year, and most of the personnel and funds are being diverted to the new project on the experimental management of warmwater reservoirs. During the 1960-61 fiscal year this project will be aimed toward the completion of experiments designed to show which species, size, and strains of trout are best suited for lakes of the type found in the Lakes Basin Recreation area of Sierra County. During the 1960-61 fiscal year it is estimated that this project will receive the following emphasis:						
44	Field tests to determine survival, growth, and general suitability of different strains of brown trout, rainbow trout, and eastern brook trout..... 40%						
45	Analysis of data and preparation of final reports on the work of this project..... 60%

EXPENDITURE DETAIL BY PROJECT—Continued								
OCEAN FISH HABITAT DEVELOPMENT								
<p>The purpose of this study is to increase the yield of marine sport fishes through the development, testing, and application of methods for the restoration and improvement of their environment. During the 1960-61 fiscal year it is estimated that the program will receive the following emphasis:</p> <p>Development, installation, and evaluation of devices to increase and concentrate marine sport fishes in order to improve the angler harvest. Scuttled ships, boats, old car bodies, rock, concrete rubble, and other objects or material will be used to create artificial fishing banks. This also includes an evaluation of the effect of offshore oil-well drilling on marine life.....80%</p> <p>Establish new kelp beds on artificial fishing banks and on existing apparently suitable areas where kelp beds are absent.....10%</p> <p>Miscellaneous development work including obtaining of access areas, introduction and transplantation of fishes and related work.....10%</p>

24	Totals, Ocean Fish Habitat Development -----				\$28,117	\$31,600	\$33,000	
EXPERIMENTAL MANAGEMENT OF WARMWATER FLUCTUATING RESERVOIRS <sup>a</sup>								
<p>The objectives of this proposed new project are to develop and evaluate effective management techniques that will maintain good fishing in new warmwater impoundments, such as Lake Berryessa, Folsom Lake, and Nacimiento Reservoir; and raise production and/or yields of game fishes in older reservoirs, such as Millerton Lake. This project is scheduled to begin on July 1, 1960. Typical warmwater reservoirs will be selected as test waters. The present characteristics of the fishery and fish population in each test water will be determined by means of creel census and population sampling with nets, traps, chemicals or other means. Data collected during 1960-61 will serve as baselines from which changes in the fishery and fish populations due to experimental management practices, may be evaluated. Some of the experimental management techniques to be used include: (1) Introduction of new game fish species. (2) Introduction of forage organisms. (3) Manipulation of existing fish population by partial chemical treatment or other means. (4) Fertilization. (5) Different types of angling regulations. (6) Introduction of brush shelters or other devices to concentrate fish. (7) Application of any new techniques discovered during the course of the project that would appear to hold promise in increasing production or the yield of warmwater fishes such as black bass, catfish, crappie, and sunfish.</p>

## MARINE RESEARCH COMMITTEE

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
1	SUMMARY				
2					
3					
4	TOTAL EXPENDITURES				
5	Support ( <i>Fish and Game Preservation Fund</i> )-----	\$175,897	\$212,636	\$99,880	—\$112,756
6					(—53%)
7					
8					
9					
10	Objectives				
11	Objectives of the Marine Research Committee are the devel-				
12	opment of commercial fisheries of the Pacific Ocean and of ma-				
13	rine products susceptible to being made available to the people				
14	of this State.				
15					
16					
17	Program and Performance				
18	Research projects are selected by the 9-member committee				
19	which includes 5 members actively engaged in the sardine in-				
20	dustry, at least 1 representative of organized sportsmen's groups,				
21	and at least 1 representative of organized labor.				
22	Research is financed from a privilege tax of 5 cents per 100				
23	pounds of sardines, Pacific and jack mackerel, squid, herring				
24	and anchovies. Chapter 429, Statutes of 1959, extended the priv-				
25	ilege tax for an additional 2-year period which will expire De-				
26	cember 31, 1961.				
27	Carrying out of research projects selected by the committee				
28	is accomplished by contracting with other public and private				
29	agencies. The principal agencies whose services are utilized are				
30	the United States Fish and Wildlife Service, Scripps Institute				
31	of Oceanography and the Department of Fish and Game.				
32	Principal research and investigations sponsored by the com-				
33	mittee have concerned the Pacific Sardine Fishery which de-				
34	clined to a very low ebb in 1947-48. It was during this period				
35	the Marine Research Committee was formed by the Legislature.				
36	The committee has devoted a major share of its revenue to sar-				
37	dine investigations in an effort to restore this fishery.				
38	In addition to sardine research, the committee sponsors re-				
39	search and investigations of mackerel, anchovy, herring and				
40	related species; studies of oceanographic factors, including food				
41	habits, relating to the life history of these fish; and assesses the				
42	abundance and distribution of the various species.				
43	The budget proposed for 1960-61 continues these investiga-				
44	tions and research projects at a much reduced level. The re-				
45	duced level of expenditure results from a decrease in revenue				
46	brought about by a diminished cannery demand for the specified				
47	species of fish.				
48	Staff assistance to the committee is provided by contract				
49	with the Department of Fish and Game. The committee has				
50	requested participating contractors to revise their current year				
51	budgets and has informed them of the fund availability for				
52	1960-61. In line with this reduction, the Department of Fish				
53	and Game as one of the participating contractors will continue				
54	1 position in 1960-61 as part of the general support program				
55	in order that the reporting of work currently in progress can				
56	be completed.

9					
10	GENERAL ANALYSIS				
11	Objectives				
12					
13	Under provisions of the Wildlife Conservation Law of 1947				
14	the board is authorized to acquire, restore, and maintain in a				
15	high state of productivity areas which can successfully sustain				
16	wildlife and provide adequate and suitable recreation for the				
17	people of the State. To accomplish this end the board may				
18	study and investigate suggested programs.				
19					
20	Program and Performance				
21					
22	The board is composed of the Director of Finance, the Direc-				
23	tor of Fish and Game and the President of the Fish and Game				
24	Commission. The board is advised by a joint interim investigat-				
25	ing committee consisting of 3 Members of the Senate and 3				
26	Members of the Assembly. Annually \$750,000 is transferred to				
27	the Wildlife Restoration Fund from license fees collected for				
28	conducting horse races. The board is charged with the admini-				
29	stration of this fund.

## GENERAL ANALYSIS

## Objectives

The principal functions of this division are to provide office facilities and staff services for the director; provide accounting, personnel, budgetary, administrative analyses, and property services to the divisions of the department and other related agencies under contract; and co-ordinate the department's conservation education program.

## Program and Performance

Conservation, development, and utilization of the State's primary natural assets in the fields of forest, mineral, soil, and recreational resources comprise the program of the department.

This division, in addition to providing administrative and office services, assists the director through the exercise of a review function with regard to departmental budgetary, fiscal, and personnel operations, and provides consultative and advisory services on operating and financial matters for the several divisions of the department, the Committee for the Development of the California Public Outdoor Recreation Plan, and the State

Water Pollution Control Board. The 1959 Session of the Legislature placed the Recreation Commission in the Department of Natural Resources and the staff of the commission was transferred to form the Division of Recreation. Cost of the services afforded by the Division of Administrative Services is distributed and charged to the special fund divisions of the department and other agencies on a pro rata basis.

The budget proposed for the 1960-61 fiscal year reflects an administrative reorganization of the director's office necessitated by the continued growth of the department. It is proposed to add 1 position of assistant to the director for the co-ordination of divisional planning and formulation of advance planning on the departmental level. Reclassification of the administrative service officer III to assistant director (management) is proposed to act as business management adviser to the director and to direct personnel, fiscal and management analysis functions of the department. An administrative assistant II is proposed to assist the deputy director in performing the increased responsibilities placed on the deputy.

a Grants received under the federal Clarke-McNary program are deposited and expended in the General Fund.

b A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals. For a statement of fund condition of the Small Craft Harbors Revolving Fund see Local Assistance for Public Works. For a statement of fund condition of the Soil Conservation Development Fund see the Appendix.

## DIVISION OF ADMINISTRATIVE SERVICES—Continued

SUMMARY AND GENERAL ANALYSIS				ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61		
GENERAL ANALYSIS—Continued								
Program and Performance—Continued								
Heretofore the Divisions of Beaches and Parks and Forestry have reported directly to the director. Under the proposed reorganization these divisions would report through the deputy director.				2 intermediate typist-clerk positions are proposed in the personnel section to handle the increased workload caused by the continued increase in the number of employees in the divisions of the department.				
A senior administrative analyst position is proposed, reporting to the assistant director (management), to make the more difficult and complex studies of the departmental and divisional organization, administrative policies, practices, procedures, and operations.				Temporary help in the amount of 1.1 man years is proposed as follows: 0.5 man-year in the director's office to provide clerical assistance during the General Legislative Session and 0.6 man-year in the machine section to assist with increased invoicing workload.				
2 stenographer-clerk positions are proposed for clerical assistance to the assistant director (planning) and the administrative assistant II.				A position of junior-intermediate clerk is to be abolished as a result of the conversion of the department's property accounting records to tabulating machine operation. A second position is scheduled to be abolished in the subsequent budget.

GENERAL ANALYSIS

Objectives

The State Park System has 3 essential objectives. They are to acquire and develop those recreation areas that are of statewide importance, to preserve for public enjoyment and education outstanding scenic areas of the State, and to acquire, restore and preserve significant historic sites and buildings.

Program and Performance

Under general policies established by the State Park Commission for the guidance of the Director of Natural Resources and the chief of the division, the State Park System is administered by the Division of Beaches and Parks. The commission consists of 7 members appointed by the Governor with the advice and consent of the Senate for 4-year staggered terms.

Major efforts of the division are concentrated on the extensive acquisition and development program authorized by recent legislative acts and appropriations. The majority of these appropriations are available until June 30, 1961.

Besides the large number of new beach and inland park areas and the expansion of existing parks and historical monuments, the program includes operation of Hearst Castle, the roadside rests, Redwood Highway relocation, historic ships program, and 4 proposed museum facilities.

The expanded acquisition and development program established in 1956 and 1957 was financed from the large State Beach and Park Fund surplus derived from the release of impounded tidelands oil revenues. The Legislature subsequently increased the division's allocation from the State Lands Act Fund to \$12,000,000 annually (Chapter 2367, Statutes of 1957) to finance this program and provide for continuing operation and maintenance of the growing State Park System. However, except for the 1958-59 year, the division has not received the authorized maximum amount because of a shortage in resources of

the State Lands Act Fund and it is estimated that the maximum amount will not be received for either the 1959-60 or 1960-61 fiscal year. Since previously authorized appropriations were based on the \$12,000,000 maximum revenue being received, the State Beach and Park Fund will have insufficient revenues to finance all appropriations therefrom.

The support budget proposed for the 1960-61 fiscal year provides personnel, equipment, and operating funds for increased workload of the division. The acquisition of new areas requiring protection and operation and increased public use and attendance at existing parks, beaches, and historical monuments account for the principal budget increases. Examples of areas being developed and placed in operation include Colorado River State Park, Paradise Park, San Francisco Maritime Museum, Jack London Home, Frank's Tract, Henry W. Coe Ranch, Woodson Bridge, Bodie, and Leo Carrillo Beach.

The budget also reflects an administration reorganization which provides for the decentralization of certain development and planning functions formerly performed in the Sacramento headquarters. This decentralization which affected 15 positions in 1959-60 will provide better service for currently acquired parks. The decentralization program will include 18 positions in 1960-61. To provide advance planning staff in Sacramento headquarters, 6 positions are added. This staff will be necessary to fulfill the investigations, studies, surveys and generalized plans provision now required by statute for all new area acquisition and major development proposals as well as centralized review.

Provision is made for the maintenance and adequate custody of Squaw Valley State Park after the Eighth Winter Olympics is concluded. In addition, \$1,000,000 is provided for allocation to the Division of Beaches and Parks for expanded operation of the facility during the 1960-61 fiscal year.

ADMINISTRATION

Program and Performance

The administration program includes staff and funds for operations of the State Park Commission; the chief of the division; and provides for divisional business management activities.

SALARIES AND WAGES

(See page 254, Salary Supplement)

Park Commission:

Executive secretary -----	0.6	-	-	\$5,046	-	-
Clerk -----	1	1	1	4,980	\$5,232	\$5,232
<b>Executive:</b>						
Chief of division -----	1	1	1	14,031	13,200	13,800

MAINTENANCE AND OPERATION—DISTRICT HEADQUARTERS						
Program and Performance						
<p>For administrative and operational purposes the State is divided into 6 districts under the general direction of a deputy chief. Each district is directly supervised by a district superintendent (state park ranger VI) who is responsible for the operation and maintenance of state park facilities in his district for the beneficial use of the public. All matters pertaining to the staffing, operations, planning and development of park units are administered and co-ordinated through the district headquarters. Districts are assisted in the historical and conservation fields and with the acquisition of property by divisional staff headquartered in Sacramento. Statewide aspects of the districts' planning and development program are under direction of the divisional development staff in Sacramento.</p> <p>To provide more effective park planning and development services at the district level a staff of 10 positions is proposed under the direction of a state park ranger V. The staff would consist of 3 architectural positions, 1 engineering position, a 3-man survey team, and 3 positions for technical and clerical support</p>						
<p>assigned to each district headquarters office. A majority of the positions not already budgeted in the districts will be made available by decentralizing technical services positions from Sacramento. The remaining positions needed to complete this staffing are requested in this budget, consisting of 5 state park rangers V, 5 drafting aids II, and 6 intermediate stenographer-clerks.</p> <p>2 state park rangers III are proposed: 1 each in District I and District IV to provide administrative assistance to the district superintendent. These positions would act as liaison officers between the Division of Beaches and Parks and other private and governmental agencies.</p> <p>A carpenter position is proposed for District I headquarters to maintain the many unique wooden structures and supervise work to be done on force labor account in the district development program.</p> <p>An intermediate account clerk is proposed for District VI to handle increased workload.</p>

## MAINTENANCE AND OPERATION—FIELD SERVICES

## Program and Performance

Field services includes the park unit supervisors; park ranger and park attendant staffs; and the various specialized technicians needed for continuing operation and maintenance of the State Park System. Types of facilities provided include ocean beaches, lakes and reservoirs, inland and mountain parks, historical monuments, and roadside rests.

The following additional positions with related operating expenses and equipment are proposed for the 1960-61 fiscal year to provide operating personnel necessary to staff new and existing state park units and facilities:

## 1. Positions proposed for opening and operating new or enlarged units:

- a. Salton Sea—1 state park ranger III, 1 state park ranger I, 1 state park attendant, 6 man-months seasonal beach lifeguard, and 18 man-months of seasonal park aid. This staff is provided for the added 177 campsites.
- b. Colorado River—1 state park ranger III, 1 state park ranger I, 1 state park attendant, and 12 man-months of seasonal park aid are provided for minimal operation of this newly acquired area.
- c. Paradise Park—1 state park ranger III, 1 state park ranger I, 2 state park attendants, 6 man-months of seasonal beach lifeguard and 8 man-months of seasonal park aid are provided for the minimal operation of this newly acquired facility.
- d. San Francisco Maritime Museum—1 state park ranger III, 1 state park ranger I, 2 state park attendants, 1 restoration and maintenance supervisor, 1 shipwright-joiner, repair and restoration, 24 man-months seasonal shipwright and 24 man-months seasonal park aid are provided to place on public display the historic ships being acquired and refurbished.
- e. Jack London Home—1 state park ranger II, and 1 state park attendant are provided for this newly acquired facility.
- f. Frank's Tract—1 state park ranger II and 1 state park ranger I are provided for this newly acquired area.
- g. Henry W. Coe—1 state park ranger II and 1 state park ranger I and 16 man-months seasonal park aid are provided for this newly acquired area.
- h. Woodson Bridge—1 state park ranger II and 6 man-months seasonal park aid are provided for this new area.
- i. Bodie—1 state park ranger II, 1 state park ranger I, and 6 man-months seasonal aid for protection and state supervision of this new park unit.
- j. Leo Carrillo Beach—1 state park attendant, 6 man-months seasonal park aid, and 6 man-months beach lifeguard supervisor are provided to staff additional

facilities scheduled for completion by the 1960-61 fiscal year.

- k. Silver Strand—1 state park attendant, 1 beach lifeguard supervisor, 15 man-months seasonal park aid and 20 man-months seasonal beach lifeguard are provided for staffing new developments at this enlarged park unit.
2. Staffing for existing areas on the basis of workload and completed facilities.
  - a. Hearst Castle—4 state park rangers I, 3 state park attendants, 1 senior accountant clerk, 1 intermediate typist-clerk, 2.9 seasonal historical monument guides, groundsman, 2 janitors, and 60 man-months of seasonal park aid are proposed to increase service to the public at this high attendance area.
  - b. Folsom Lake—2 dispatcher-clerks, 1 carpenter, 1 junior stenographer-clerk, and 6 man-months seasonal park aid are provided for adequate radio coverage for large widely separated areas in the park and for new area to be maintained.
  - c. State park ranger I—1 each at Anza-Borrego Desert and Cuyamaca Rancho.
  - d. State park attendants—1 each at Clear Lake, Samuels Taylor, Sonoma State, Van Damme Beach, D. L. Bliss and Emerald Bay, Natural Bridges, Plumas-Eureka, San Mateo Beaches, Angel Island, and Pismo Beach.
  - e. Beach lifeguard supervisor—1 provided at Millerton Lake and 6 man-months provided at Pismo Beach.
  - f. Seasonal beach lifeguard man-months for Benbow Lake (6), Richardson Grove (4), Emma Wood (4), Tomale Bay (5), San Mateo Beaches (5), and Atascadero (6) for necessary protection of the public.
  - g. Seasonal park aid man-months are provided as follows on the basis of workload requirements: Humboldt Redwoods (32), Richardson Grove (15), Standish-Hickey (24), Brannan Island (17), Henry Cowell (9), San Mateo Beaches (10), Salinas River (4), Emma Wood (8), Morro Bay (6), San Clemente (12).
  - h. Other miscellaneous staffing—1½ man-months seasonal historical monument guide for Cuyamaca Rancho.

In addition staffing has been provided for divisional utilization of conservation camp program services as follows: 1 junior assistant landscape architect, 1 state park ranger I, 1 state park attendant, and 1 tractor operator-laborer.

Also \$10,000 is included in operating expenses to continue the ecological studies on the redwoods by contract with the University of California previously financed from funds available for the Redwood Highway relocation.

## GENERAL ANALYSIS

## Objectives

The primary mission of the Division of Forestry is the protection of over 40,000,000 acres of state and private lands having statewide interest with regard to timber production, rangelands, recreational uses, and watershed values. The various land management programs include the prevention and suppression of fires; the administration and enforcement of forest practice rules; forestry advisory services; range improvement programs; production of nursery stock for public planting, wind-breaks, soil erosion control and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in co-operation with federal agencies and private owners; and co-operation with the Federal Government on forest surveys.

The division directly provides fire protection for approximately 31,000,000 acres of state-owned and private lands. 5,000,000 acres are protected under a contract arrangement with the United States Forest Service and 4,000,000 acres are protected through contracts with 6 counties. In addition to the fire protection provided for lands of statewide interest, the division protects about 6,000,000 acres of rural agricultural land under contracts providing for reimbursement of costs from 25 counties.

## Program and Performance

New and more critical problems in the management and protection of California's wild land areas have been brought about by the pressures of a continually growing population. The use of wild land areas for permanent and summer homesites and for recreational purposes has increased greatly during the past few years. Along with the increased use of these lands, the values for timber and rangelands and for watershed purposes have also increased with the demands of a growing population. Because of these expanding uses and pressures, the division revised its basic fire plan in 1956 to provide personnel, equipment and facilities planned to meet statewide needs. The first

step toward implementing the "1956 Fire Plan" was taken in the 1957-58 Budget when approximately \$2,000,000 was added to the division's budget to provide one-fourth of the additional personnel and equipment needed as established by the plan. Since the division was in the middle of the fire season when the additional funds became available on July 1, 1957, the full program increase could not be put into effect at that time as the movement of personnel to new assignments would have seriously affected the striking ability of fire control forces. Major moves to implement the program were, therefore, made at the close of the fire season. Further additions to the staff and facilities were also provided in the 1958-59 and 1959-60 Budgets. Increases proposed for 1960-61 are to provide for the accelerated Conservation Camp programs, and in addition to extend the initial attack aerial tanker program. As of July 1, 1960, it is estimated that 1,650 Department of Corrections inmates and 265 Youth Authority wards will occupy 22 permanent conservation camps and 3 "Spike" camps. In the 1960-61 fiscal year, 5 additional permanent camps and 3 mobile camps will be completed. The initial attack aerial tanker program started on a trial basis in 1958-59 and was budgeted for 3 districts in 1959-60. The 1960-61 proposal provides \$318,000 for the air attack program which will be extended to all 6 administrative districts. The specific increases are discussed in detail under the appropriate budgetary functions.

Several of the division programs which affect the national interest are reimbursed under grants from the Federal Government. Under terms of the Clarke-McNary Act the State will receive approximately \$1,185,000 during 1959-60 and \$1,144,000 during 1960-61 for fire protection on timberlands and primary watershed areas. \$17,000 will be received each year for co-operating in forest planting and about \$29,000 is provided each year to assist in forestation of denuded or understocked timberlands.

## ADMINISTRATION

## Program and Performance

The fire control section co-ordinates the statewide fire fighting forces both within the division and with other fire control organizations. In addition it is responsible for forest fire research, equipment development and maintenance, fire plans, communications, and fire statistics. Recent increases in personnel have permitted the division to expand its fire research program, to analyze and adapt new developments to field activi-

a Grants received under the federal Clarke-McNary program are deposited in and expended from the General Fund. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in forestation of timberlands.

## Program and Performance—Continued

ties, and to strengthen co-ordination of division forces with those of other agencies. The position of meteorologist II is proposed for 1960-61 to enable the division to develop fire weather information. This will permit advance forecasting of weather changes that influence fire behavior and contribute to blowup conditions. In addition a forestry equipment engineer is added because of increased workload which has developed because of the accelerated conservation camp program.

The business management section is responsible for the budget development, fiscal control, procurement agreements, and personnel matters. The section also supervises the activities of the Davis warehouse and shops.

The engineering and conservation camps section prepares administrative and fire control maps for the division's area of responsibility. In addition they prepare construction plans and give guidance and supervision to the capital outlay and maintenance program. The section also co-ordinates the activities of the forestry camp program and develops standards for construction and maintenance of roads, firebreaks, and telephone services.

The training section which is responsible for operation of the 2 training centers and other in-service training programs is continued at the current level.

The fire prevention education function co-ordinates the fire prevention program with other co-operating governmental agencies, industrial firms and citizen groups. It is also responsible for the law enforcement program of the division involving both civil and criminal cases.

In the field of education the division utilizes all major types of public contacts, including television, radio, and motion pictures. Motion picture films for television and other educational media have been developed including television spot announcements providing different fire prevention messages and others for motion picture theater use. These films are distributed to theaters and television stations throughout the State.

Efforts are continuing toward development of a fire research program to devise methods for reaching the group of people whom statistics reveal are causing the majority of man-caused fires. A recently initiated program of hazard reduction surveys is also continuing as a forerunner to the development of new plans and procedures. In addition, planning and co-ordination for the enforcement of forest and fire laws under direction of the law enforcement coordinator is progressing as planned.

The addition of 1 forest fire prevention officer is proposed for 1960-61. The need for this position is based on increased workload in the law enforcement program.

The forest management unit is divided into 3 functions consisting of Management of State Forests, Forest Practice, and Service Forestry, and deals primarily with the programs concerning the management of the timber resources on private land within the State of California. The prime objective is to assist private landowners in attaining sustained yield forest management programs and to return to full production those timber producing lands that are presently understocked or devoid of timber.

The division is responsible for the administration of 8 state forests. 3 of these forests are of sufficient size to be managed as demonstration units to illustrate proper sustained yield, forest management techniques, and to be utilized in forest management research. In the orderly conversion of these managed forests

from old growth to sustained yield second growth stands, the State presently realizes annual revenue in excess of \$485,000 from timber sales.

The subfunction of Forest Practice administers the forest practice rules which govern logging practices on privately owned timber lands. The addition of 1 forest technician is proposed for the 1960-61 fiscal year to handle increased workload originating in the revised Forest Practices Act of 1957 which established a timber owner and timber operator permit system. In addition the position will assist in workload developed from the expanded research program of the division.

The subfunction of Service Forestry provides technical advice to small timberland ownerships throughout the State, in an effort to teach the owners proper management techniques. The service foresters provide technical assistance for the federal co-operative programs concerned with the Soil Bank and the Agricultural Conservation Program. Due to the interest in the federal co-operative programs and the realization of the true worth of the timber on small ownerships, the division is receiving an ever-increasing number of requests for assistance from private owners. During the 1959-60 and 1960-61 fiscal years no change is provided in personnel but it is believed that requests for service will continue to grow. This Service Forestry program is partially reimbursed by a grant from the Federal Government in the amount of \$27,000 under the Co-operative Forest Management Act.

Range improvement personnel are responsible for providing technical assistance to private landowners in the conversion of brushlands to more productive range types in order to increase the carrying capacity of the California rangelands.

Range improvement technicians advise private landowners regarding the most effective and economical methods to apply in converting brushlands. They also supply information concerning the adaptability of the various soil types for rangeland conversion and the recommended species of forage plants to be sown to achieve the most effective sustained results.

Demonstration ranges are maintained in co-operation with private landowners to study and demonstrate the effects of conversion by mechanical means, chemical sprays, controlled use of fire, and various combinations of these methods.

In co-operation with regular fire control forces, continuing experiments are being conducted to provide an adequate and economical method of attaining a satisfactory burn during the relatively nonhazardous periods of the year.

Emergency revegetation projects to prevent serious erosion and flood damage on critical watersheds that have been denuded by fire are also carried out under this function. These reseeding projects are financed on a matching fund basis by the State and private landowners or local political subdivisions concerned.

The state nursery program provides for operation of a nursery located near Davis and for 3 branch nurseries located at forestry conservation camps. The nurseries provide stock for public planting, windbreaks, soil control, and reforestation purposes. 1 lead groundsman and 1 clerical position are being provided at the Davis Nursery and will be largely financed by the substitution of existing temporary help. Increased workload and the need for better supervision at the nursery justify the positions.

## FOREST PROTECTION—DISTRICT HEADQUARTERS

## Program and Performance

The Division of Forestry is divided into 6 administrative districts with activities in each district co-ordinated through district headquarters under the direction of a deputy state forester. Besides providing general direction for all forestry activities, the district headquarters provides services of specialists in forest fire prevention, law enforcement, engineering, construction, and automotive maintenance.

The forest ranger units receive direction and guidance in all activities from the district deputy state forester. His staff and ranger unit programs are developed and administered from this headquarters. The various specialists assist the ranger units in providing an efficient and effective program operation.

The following additional positions are proposed for the 1960-61 fiscal year in order to provide staff for necessary workload requirements:

- a. 2 forest fire fighter foreman, 1 in District II and 1 in District V to provide relief dispatchers in accordance to the

1956 fire plan. With the addition of these 2 positions each administrative district will have a designated relief dispatcher.

- b. 5 intermediate stenographer-clerk are proposed for all districts with the exception of District V based on the increased workload that has developed as a result of the expansion of the conservation camp program.
- c. 18 man-months of camp crew cook and 18 man-months of food service assistant are provided for the training center at Ramona and Sutter Hill. To date cooking has been done by fire control personnel with the sacrifice of duties in other areas.
- d. 1 forest ranger I is provided in District V as a conservation camp program coordinator. With the addition of this position each administrative district will have such a position.

## FOREST PROTECTION—FIELD SERVICES

## Program and Performance

This function provides for the operation of fire suppression camps, forest fire lookouts, and county headquarters offices. The prime objective is to provide trained suppression crews to make efficient initial attack on forest and brush fires and to provide a flexible organization to develop into the required manpower needs to deal with large campaign fires. In addition, field administrative personnel are active in all programs of the division in forest and range management.

The 30 ranger units in the division operate 230 fire suppression stations, 79 lookouts, and utilize 35 patrolmen for the protection of over 31,000,000 acres of state lands, private lands, and intermingled federal lands under the division's direct protection.

It is proposed to implement the initial aerial tanker program in all districts in 1960-61. Operating expenses reflect a \$148,000 increase due to rental of airplanes for this program.

The following positions for the 1960-61 fiscal year are proposed in order to meet workload:

a. 1 intermediate stenographer-clerk is proposed for the Tehama Ranger Unit. This position is based on increased

workload and is in accordance with the 1956 Fire Plan.

b. 12 forestry equipment operators are included in the 1960-61 proposed budget to operate existing and proposed new bulldozer units. 5 new bulldozer and transport units at a cost of \$175,245 are proposed in the budget. These units are proposed as implementations to the 1956 Fire Plan.

c. 3 man-months of forest fire lookout to become effective in the spring of 1961 is being proposed to man the Red Mountain Lookout recently abandoned by the United States Forest Service. High value state responsibility land justifies the addition of this help.

Total proposed equipment purchases for 1960-61 total \$570,000 more than in the current year. Of this increase \$180,000 is attributable to radio purchases which were charged to the administration function in the current year. \$175,000 is proposed to purchase 5 bulldozer and transport units as mentioned above. A \$200,000 increase is reflected in automotive replacement to enable the replacement of an increased number of fire trucks.

## FORESTRY CONSERVATION CAMPS

## Program and Performance

The forestry camps are operated in co-operation with the Department of Corrections and the Department of the Youth Authority. The Division of Forestry is responsible for determining the need for a camp in a given area and for the construction of such camps. Under existing agreements the division is responsible for the work program and the supervision of the inmates during the working day. In addition to the work program the camps provide added manpower for forest protection and fire-suppression work.

As of July 1, 1960, it is estimated that 1,650 Department of Corrections inmates and 265 Youth Authority wards will occupy 22 permanent conservation camps and 3 "spike" camps. In the 1960-61 fiscal year it is estimated that 5 additional permanent camps and 3 mobile camps will be completed. Of this group of new facilities 1 known as Washington Ridge (Nevada County) is for the Youth Authority. The remaining new camps to house Department of Corrections inmates are known as Alder (Del Norte County), Intermountain (Lassen

<sup>a</sup> 10 forester positions assigned to Squaw Valley protection unit, and fully reimbursed by the California Olympics Commission, are not continued in the 1960-61 fiscal year.

County), Mountain Home (Tulare County), and Don Lugo (San Bernardino County). The Mountain Home camp replaces an existing small camp also known as Mountain Home.					As a result of a decrease in inmate work crew payments operating expenses are approximately \$1,000,000 lower in 1960-61 than in the current year.		
In accordance with the accelerated camp program 67 positions are included in the 1960-61 Budget proposal. The positions will be filled as the individual camps are activated. In addition foreman positions are provided for coverage of continued population expansions.					This decrease reflects a change in the interdepartmental agreement between the Department of Corrections and the Department of Natural Resources relating to the cost of inmate service.

AGRICULTURAL FIRE PROTECTION

Program and Performance

The Division of Forestry contracts with certain counties to provide fire protection for local rural agricultural areas known as Zone 3 lands. The State is reimbursed for these expenditures.

## Department of Natural Resources

## WATERSHED PROTECTION BY CO-OPERATING COUNTIES

The counties listed below receive payments from the State for the prevention and suppression of fires in areas of state responsibility. Payments are based on the level of service which the Division of Forestry provides for similar areas directly protected. The increased payments are computed on the level of service proposed for state-protected areas for the 1960-61 fiscal year.

26	Kern County -----	\$314,096	\$315,902	\$336,580	
27	Los Angeles County -----	419,921	425,626	458,987

29	San Mateo County -----	98,806	98,224	102,852	
30	Santa Barbara County -----	150,339	151,599	163,554	
31	Ventura County -----	154,644	156,262	169,031	
32					
33	Totals, Watershed Protection by Co-operating Counties -----	\$1,237,520	\$1,248,020	\$1,337,638	\$89,618 (7.2%)

## PRIVATE LAND PROTECTION BY UNITED STATES FOREST SERVICE

For payment to the United States Forest Service for protection of state and private lands based upon acreages of state responsibility land inside and adjacent to national forests offset by national forest land protected by the Division of Forestry. The increased payment proposed for 1960-61 is to support a fire crew organization which will provide a level of fire protection equivalent to that provided for state lands directly protected by the division.

46	Contract with United States Forest Service -----	\$960,958	\$992,178	\$1,062,126	\$69,948 (7%)
----	--	-----------	-----------	-------------	------------------

## WHITE PINE BLISTER RUST CONTROL

51	Payments to United States Department of Agriculture to match				
52	federal expenditure for the control of white pine blister rust				
53	disease. Current expenditure level is maintained to provide				
54	for a maintenance type operation with a minimum of new				
55	area being treated -----	\$93,415	\$94,600	\$97,000	\$2,400 (2.5%)

## EMERGENCY FIRE SUPPRESSION AND DETECTION

Additional manpower and equipment for detection and suppression of forest fires in emergency situations beyond the ability of the regular crews are provided by this item. Because of the unusual severity of the current fire season, additional funds amounting to \$700,000 have been provided from the general emergency fund.

67	SALARIES AND WAGES

## GENERAL ANALYSIS

## Objectives

The primary objective of this division is to serve and assist the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State. As required by law, the division also maintains and operates a mineral museum, laboratory, and library in San Francisco and licenses purchasers of gold and silver.

## Program and Performance

As the means of accomplishing its objectives the division encourages and makes special studies of the mineral resources and mineral industries of the State. The results of these studies are published for distribution to libraries and for sale to the public. Typical geological and mineralogical specimens are collected and displayed, and with its library and laboratory the agency serves as an information bureau for the mining industry and the public.

The budget proposed for general operations in the 1960-61 fiscal year provides a business service officer to handle the administrative workload of the division. Addition of the mineral research and field study function in 1959-60 has increased workload in this area. Increased space rental rates in the San Francisco office account for a significant rise in operating expenses.

Expansion of the mineral research and field study function is projected for the 1960-61 fiscal year. The first staff for this function was provided in a budget augmentation by the Legislature in 1959-60. The increased staff of 5 positions and related operating expenses and equipment will represent the second year phase of this 5-year program to modernize and expand the division's facilities. This function consists of an expanded program of research and field studies on mineral utilization, beneficiation of ores, geologic mapping, mineral commodities, petrography and mineralogy, and mining methods and problems.

GENERAL ANALYSIS

Objectives

Supervision of the method of drilling and maintenance of oil wells in order to prevent waste and damage to oil and gas deposits and to prevent contamination of fresh water resources is the primary responsibility of this division.

The division is also responsible for a program to arrest or ameliorate the subsidence and compaction of land resulting from oil and gas production.

Program and Performance

Under direction of the state oil and gas supervisor, the divi-

sion is organized into 6 districts, each supervised by an oil and gas engineer. Oil and gas engineers inspect all oil and gas wells and collect necessary information to determine the presence and source of water in the oil sands and the location and extent of strata bearing water. This information is used to advise operators of the best means of protecting the oil and gas sands, the water-bearing strata, and surface waters. It is also the basis on which the agency orders necessary tests or repair work at wells.

General workload factors affecting the division are set forth below:

	1955-56	1956-57	1957-58	1958-59	1959-60	1960-61
New producing wells-----	1,765	1,780	1,484	962	1,100	1,200
Producing and potential wells-----	41,232	43,360	44,719	45,500	45,700	45,900
Oil well inspections-----	4,214	3,992	3,685	2,972	3,200	3,400
Approvals to drill, rework, or abandon-----	4,628	4,693	4,197	3,175	3,400	3,700
Well reports written-----	9,191	8,967	8,178	6,391	6,860	7,350
Technical articles written-----	12	17	17	17	17	17
Total number of maps-----	80	90	100	105	110	115
Waterflood projects-----	30	45	60	70	80	90

The General Operations portion of the division's program is supported by an annual assessment against oil and gas producers based on the amount of petroleum produced and gas produced and sold. The assessment program is administered by the Department of Natural Resources and the funds are deposited in the Petroleum and Gas Fund.

With minor adjustments for price level and operation changes and the necessity to budget for the replacement of several automobiles during the 1960-61 fiscal year, the proposed budget continues the existing level of service for the general operations.

A second area of service and responsibility, Subsidence Abatement Operations, was added to the division's program by Chapter 73, Statutes of 1958. This act provides for the initiation and enforcement of a program for co-operative development and unit operation of oil and gas pools in certain subsidence areas and for their repressuring in order to arrest or ameliorate the sub-

sidence and compaction of lands overlying or immediately adjacent to producing pools.

To finance initial operations under the act, the Subsidence Abatement Fund was created and an appropriation of \$250,000 was made from the California Water Fund with provision for repayment. This repayment is scheduled for the 1959-60 fiscal year. Chapter 73, Statutes of 1958, as amended by Chapter 1877, Statutes of 1959, further provided that the Department of Natural Resources could levy assessments on well operators included in the subsidence area to offset costs of necessary hearings, unit operations and repressuring authorized by the act. Funds received from these assessments are deposited in the Subsidence Abatement Fund. With minor adjustments in price level, the proposed budget continues the existing level of service for the subsidence abatement operations.

## GENERAL ANALYSIS

## Objectives

The Recreation Division, in accordance with policies established by the Director of Natural Resources, and upon recommendation of the Recreation Commission helps the State and its communities to develop and utilize recreation areas, facilities and programs, formulates policies and aids in the coordination of local, state and federal recreation activities.

In accordance with Chapter 1808, Statutes of 1959, the staff and property of the Recreation Commission has been transferred to the Department of Natural Resources and established as the Division of Recreation. The division is administered by a chief appointed by the Governor, subject to confirmation by the Senate. The chief of the division serves at the pleasure of the Governor. The Recreation Commission is an advisory body consisting of 7 members appointed by the Governor. The commissioners serve for staggered 4-year terms.

## Program and Performance

Upon request, the staff provides technical services to recreation agencies of unincorporated communities, cities, counties, recreation and park districts, school districts, voluntary organizations, universities and colleges, and state agencies.

Surveys of recreation needs and studies of the feasibility of special recreation districts are conducted upon the request of governing bodies.

The division makes periodic inventories of public facilities and programs that exist or may be needed and publishes findings in compilations, annual report to the Governor, operating guides and directories.

The existing level of service is continued for the 1960-61 fiscal year.

## GENERAL ANALYSIS

## Objectives

The division was created by Chapter 2362, Statutes of 1957 (Sections 5801 to 5882 of the Public Resources Code), to implement the State's small craft harbors program. The division may prepare plans for, and acquire, construct, develop and improve small craft harbors, facilities in connection therewith, and connecting waterways. The agency is to assist cities, counties, and harbor districts in small craft harbor and waterway developments. All financial assistance given by the division is on a loan basis.

Subsequently Chapter 1454, Statutes of 1959 provides for 4 related programs: small craft registration, accident reporting, equipping regulation, and operating regulation. The registration program will be accomplished by the Department of Motor Vehicles although the Small Craft Harbors Commission must adopt the rules and regulations governing the program. The original application and subsequent application related to the

registration program are forwarded to the Department of Natural Resources by the Department of Motor Vehicles for retention as public records.

## Program and Performance

The general policies guiding the division are set by the 7-member Small Craft Harbors Commission. The commissioners are appointed by the Governor with the advice and consent of the Senate, and they serve staggered 4-year terms. Funds for the harbor development and local aid programs are available in the Small Craft Harbors Revolving Fund. In addition to the foregoing, the program of the commission and the division is funded from a \$5,000,000 advance from the Investment Fund which is available for construction loans. These funds were provided by Item 421.5, Budget Act of 1958. In addition the commission has

<sup>a</sup> Composed of savings in salaries and wages, \$3,267; operating expenses, \$358; and equipment, \$220.

<sup>b</sup> Composed of savings in salaries and wages, \$2,889; and operating expenses, \$1,010.

<sup>c</sup> A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals. For a statement of fund condition see Local Assistance for Public Works.

pal as established by the commission. The details of these programs are included in the Local Assistance Section of this budget.

During the current year initial staff for the regulation and registration functions was provided from an appropriation in Chapter 1459, Statutes of 1959. This staff includes 5 man-years for the regulation function, 3 man-years for registration application file maintenance, and 1 man-year for liaison work between the Small Craft Harbors Commission, the Department of Motor Vehicles, and the Department of Natural Resources. These 9 man-years are continued in the budget year.

## GENERAL ANALYSIS

## Objectives

The division assists in the organization and operation of soil conservation districts and, under policy direction of the State Soil Conservation Commission, co-ordinates the planning of the "small watershed" program under Public Law 566. In addition the division authorizes purchases of equipment from the Soil Conservation Development Fund for soil conservation work for rent or sale to districts.

## Program and Performance

Workload of the division is divided between the nontechnical and the technical types of assistance to the various soil conservation districts organized in the State. Nontechnical assistance generally covers advice and guidance on district administration, with suggestions and encouragement for suitable soil conservation activities. Staffing for this phase is based on 1 soil conservationist position for each 12 existing districts as of the beginning of the fiscal year. The addition of one supervising soil conservationist is proposed for the 1960-61 fiscal year to provide adequate field supervision of conservationists in the northern half of the State as well as of a senior conservationist at Fresno. The new position will also provide supervision of the drafting unit and equipment section. The existing senior soil conservationist position will retain supervision of 6 associate soil conservationists at widely separated geographical points in the southern half of the State. 1 clerical position is proposed for Sacramento headquarters as a result of increased workload.

The technical phase of assistance is performed in conjunction with the provisions of Public Law 566, as amended by Public Law 1018. The division is authorized 2 small watershed plan-

ning teams which with a United States Soil Conservation Service planning team, will do planning work for small watershed projects, including upland management and diversion structures, for which the commission has approved an application. The purpose of the state-supported planning teams is to more quickly establish the state eligibility for federal funds to be used for financing flood control structures up to a maximum of 5,000 acre-feet capacity. The structures may have a capacity up to 25,000 acre-feet including water conservation features if the cost of the water conservation features is borne by local interests.

The division staff has assisted the commission in the administration of the assistance program provided in Section 6816.1 of the Public Resources Code. This program provides grants to local soil conservation districts for various projects which will advance the conservation of soil and water on agricultural, forest, range, or watershed lands. For this purpose \$100,000 has been appropriated annually. Many requests have been received for assistance. After review, 51 grants have been authorized and \$292,000 of available funds have been allocated, and are reported in the Local Assistance Section of this budget.

Since July 1, 1954, the funds provided by the State to match those of the United States Department of Agriculture in support of the Pleasanton Plant Materials Center have been appropriated from the Soil Conservation Development Fund. This annual allocation of \$35,000, coupled with the transfer of \$400,000 from the Development Fund to the General Fund in 1958 and the unrecovered overhead expense for administrative purposes, has practically depleted that fund. It is proposed to provide the State's portion of the support of the Pleasanton Plant Materials Center from the General Fund in 1960-61.

<sup>a</sup> A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals. For a statement of fund condition see Local Assistance for Public Works.

<sup>b</sup> Composed of savings in salaries and wages, \$2,938; operating expenses, \$1,055; equipment, \$774; and increased reimbursements, \$646.

<sup>c</sup> The expenditures of this fund are not included in the overall budget totals.

## GENERAL ANALYSIS

## Objectives

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

## Program and Performance

During the past year and continuing into the current year the department has instituted a major reorganization so as to adapt to the changing public health program and to provide more effective operation. The Division of Community Health Services now includes the Bureau of Nursing, Medical Social Service, Health Education and Contract Services and is responsible through district administrative officers for statewide co-ordination of consultation. In recognition of the increased importance of research in the public health field, a Division of Research has been created. Sanitation consultation functions have been consolidated directly under the chief of the Division of Environmental Sanitation. The overall administrative structure of the department has been strengthened by the addition of an assistant director.

Programs carried on by the department and recent developments in these programs are summarized briefly as follows:

The radiation program added by the 1959 Legislature has been implemented and a radiation core unit has been established.

Air quality standards have been established for ambient air and for automobile exhaust. Modification of these standards will be made as further data is acquired from research and investigations now in progress.

The Cancer Advisory Council has been appointed and the program for the prevention of quackery directed by the 1959 Legislature (Chapter 2021, Statutes of 1959) is being implemented and is included as a part of the regular support program of the department. This program presently has a termination date of December 31, 1965.

An alarming increase has occurred in occupational disease attributed to agricultural chemicals and the incidence of venereal disease, polio and polio-like diseases has shown an increase indicating the necessity for continued effort in the control of these diseases.

The department has continued to work closely with the Cali-

fornia Hospital Association, practicing physicians, and other official health agencies in connection with control of staphylococcal infections. The development of strains which are resistant to the antibiotics has presented a particularly difficult control problem.

The Division of Alcoholic Rehabilitation has continued to work closely with its advisory committee, physicians, and all interested groups.

The department is continuing its program of providing consultative services to local health departments particularly in the fields of maternal and child health, tuberculosis, public health nursing, medical social service, mental health, nutrition, vector control and dental health. Field studies and consultation are provided in industrial disease, chronic disease, and water and sewage sanitation, and disposal of radiological wastes.

The Vital Records Program provided registration and certified copies of birth, death and marriage records.

A Crippled Children Program is operated in co-operation with local health and welfare departments. This program is partially supported by a state subvention and provides medical care for crippled children whose parents are unable to provide needed services. It now includes nephrosis and residual effects of polio.

Licensing programs are operated for hospitals, laboratories and laboratory technicians, audiometrists, canneries and a number of related food producing establishments.

The Food and Drug Inspection Program continues to provide protection from adulterated foods, drugs and beverages.

The enforcement of the Kosher Food Labeling Act (Section 383b of the Penal Code) which was first funded by Chapter 2409, Statutes of 1957 is now included as a part of the regular support program of the department.

The Health Education Program stimulates education in the health field by consultation to departmental staff and local agencies and the development of media.

This 1960-61 Budget proposes no new programs. However 26 additional positions, based on workload, are included in the following divisions: Administration 7.5, Preventive Medical Services 5, Alcoholic Rehabilitation 3.5, and Laboratories 10. These new positions are discussed at greater length under the appropriate division.

## DIVISION OF ADMINISTRATION

## Objectives

The Division of Administration, including the director's office, the Bureau of Business Management, the Bureau of Personnel and Training, Management Analysis and the Bureau of Vital Statistics and Data Processing, provides administrative direction and staff services for the department with consultation to local health departments in these fields.

## Program and Performance

Business services for the department are centralized in the Bureau of Business Management and include general administrative and operative services, stockroom, mail and messenger service, operation of building and telephone switchboard, accounting, budget preparation and control, licensing, purchasing, a car pool of specialized vehicles, field audit of public health

subvention programs, and fiscal consultation to local governmental agencies on subventions.

The Bureau of Personnel and Training has a dual responsibility; first, to develop and administer a comprehensive personnel management program, including employee relations, a classification and salary plan, a recruitment and placement program, and other related personnel services; second, to initiate and carry out a training program, including accredited university training, employee orientation, technical refresher courses, and administrative and supervisory training. Institutes and seminars are organized and conducted to increase the competence of professional staff members in the State Department of Public Health and in local health departments. Stipends are granted for advanced training in the field of public health. Local health officers are assisted on personnel and training problems. Also

<sup>a</sup> Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

## DIVISION OF PREVENTIVE MEDICAL SERVICES

## Objectives

The Division of Preventive Medical Services is responsible for the medical, hospital, and other services necessary for the prevention of disease.

## Program and Performance

The division consists of 9 units; Maternal and Child Health, Crippled Children, Acute Communicable Diseases, Chronic Disease Control, Prevention of Blindness, Adult Health, Nutrition, Mental Health, and Hospitals.

A program of maternal and child health services includes studies and investigations of child health problems, and provides technical consultation to local health departments, hospitals, maternity homes, schools, physicians and other professional groups.

The program for crippled children provides consultation and assistance to the counties in their operation of a crippled children program including:

1. Establishment of standards for care, and consultation in the maintenance of such standards.
2. Provision of funds for diagnostic services and care.
3. Planning and consultation in the provision of treatment and rehabilitation services.
4. Maintenance of records of children receiving services.

In the communicable disease field, surveillance is maintained on all communicable diseases which are significant to public health in California. Clinical and administrative consultation is provided to local agencies both on a routine and emergency basis, and epidemiological field investigations are conducted.

Tuberculosis control is accomplished by a subsidy program to local tuberculosis sanatoria, operation of a hospitalization program for recalcitrant tuberculosis patients, inspection of tuberculosis sanatoria and hospitals, and consultation to local agencies in case finding, clinic, and public health nursing services.

The program in chronic disease control, including the investigation of the medical aspects of air pollution, consists of:

1. Consultation to local health agencies, hospitals, and private physicians with regard to preventive measures, and early identification of chronic diseases.
2. Demonstration and evaluation of specific chronic disease control services.
3. Epidemiologic investigations and special studies of the public health significance of chronic diseases.

The occupational health program of the department consists of:

1. Assistance to local health departments in developing preventive health programs for detecting, preventing and correcting health hazards in industry.
2. Consultation and educational programs to professional, industrial and labor groups interested in occupational study of industrywide problems affecting large segments of working population.
3. Analysis of occupational health statistics.
4. Direct services to industry in study of occupational health hazards where other resources are not available.
5. Maintenance of environmental surveillance of radiation sources, collection of data and interpretation of significant fluctuations in radiation levels, observation of radiation users facilities and practices, and assisting in site location and other safety factors of reactor developments.

Consultation and advisory services are provided to the staff of the state and local health departments to help them to meet mental health problems associated with public health practices.

A subsidy program for the construction of general hospitals, nursing homes, diagnostic and treatment centers, chronic disease hospitals and rehabilitation centers is administered by the Bureau of Hospitals. It also establishes standards for hospital and related facilities, inspecting and licensing these institutions and providing limited technical consultation to them.

DIVISION OF PREVENTIVE MEDICAL SERVICES—Continued							
Program and Performance—Continued							
Technical and administrative assistance in nutrition services are provided local health agencies, as well as assistance in recruitment and training of staff.							
The 1960-61 Budget proposes 5 new positions within this division, as follows:							
In the Bureau of Crippled Children Services an additional medical officer is required for consultation because of caseload increases, inclusion of poliomyelitis coverage, and the new and increasingly complex techniques of treatment; a chief therapist is proposed to co-ordinate and direct the activities of the six supervising therapists who presently are reporting directly to the bureau chief.							
In the Bureau of Adult Health 1 clerical position is requested to collect and tabulate the information made available by field studies.							
In the Bureau of Hospitals, because of the increasing number of hospitals being built, 2 supervisor positions are proposed to provide more effective co-ordination of the planning and licensing functions.

## DIVISION OF ALCOHOLIC REHABILITATION

## Objectives

This division engages in the treatment and rehabilitation of alcoholics and investigates and studies all phases of the rehabilitation of alcoholics, and all factors necessary to the reduction and prevention of chronic alcoholism and other excessive uses of alcohol.

2. Experimental methods of treating alcoholics.
3. Followup studies to evaluate the effectiveness of treatment methods.
4. Studies related to the causation of alcoholism.

## Program and Performance

The present program consists of research, education and treatment. Research is conducted both by the staff of this department and by contractual arrangements with other agencies in the following areas:

1. The nature of alcoholism and the metabolism of alcohol in the human body.

Educational and public information programs include the publication of a monthly bulletin, dissemination of appropriate information, distribution of pertinent literature and sponsorship of training institutes. Treatment of alcoholics is conducted through the support of 7 pilot community clinics.

1 analyst position and 2 man-years of interviewer time are proposed for 1960-61 only, based on the workload in the followup study. A half-time clerk is proposed for the processing of clinic evaluation data.

<b>DIVISION OF LABORATORIES</b>							
23	<b>Objectives</b>						
24	This division provides laboratory services to the department and to local areas without laboratories; consultation, investigation and reference service for local laboratories; and statewide regulation of laboratories and laboratory technicians.						
25	<b>Program and Performance</b>						
26	Individual laboratories are maintained in the fields of sanitation and radiation, industrial hygiene and air pollution, food and drug, virus and rickettsial diseases and microbiology.						
27	The field services section provides consultation, inspection and licensing of hospital, clinical, and local health department laboratories, laboratories using animals, firms producing biologics, and bone and artery banks.						
28	10 new positions are proposed in the 1960-61 Budget of this division.						
29	An assistant chief is proposed in the microbiology laboratory to meet the increased workload in methodological development.						
30	Poliomyelitis and adenovirus diagnostic testing workload require the addition of 2 microbiologists and 1 laboratory assistant. In the Los Angeles branch of the laboratory 3 chemists and 1 laboratory assistant are proposed to meet increased workload in the sanitation, food and drug and industrial hygiene field.						
31	2 clerks are proposed for the divisionwide clerical workload added by the above technical positions.

21							
22	Objectives						
23							
24							
25	This division has the primary responsibility for the services						
26	necessary to provide a healthful environment for the people of						
27	California.						
28	Program and Performance						
29							
30	The division consists of: Bureau of Air Sanitation, Bureau						
31	of Sanitary Engineering, Bureau of Vector Control, and Bureau						
32	of Food and Drug Inspection, including a Cannery Inspection						
33	section.						
34	The Bureau of Sanitary Engineering administers a program						
35	of consultation, inspection, and regulation in the fields of sew-						
36	age disposal, industrial waste disposal, water supply, sanitation						
37	of bathing places and recreational areas, and water contamina-						
38	tion, inspection of radioactive waste sources, and evaluation of						
39	the public health hazards of radioactive waste disposal and use						
40	of isotope tracers.						
41	The program of the Bureau of Air Sanitation includes 2						
42	phases: the investigation of the effects of air pollution, and						
43	assistance to local agencies in the measurement and control of						
44	air pollution and its effects. As a part of this program an air						
45	monitoring network is maintained in co-operation with local						
46	air pollution authorities. The 1959 Legislature added 2 respon-						
47	sibilities; Chapter 200 requires establishment of standards for

maximum allowable contaminants in motor vehicle exhaust. Chapter 835 requires establishment of standards for quality ambient air.

The Bureau of Food and Drug Inspection insures the purity of foods and drugs in California by an inspection program of the manufacturing, wholesale and retail outlets throughout the State. This program not only removes particular lots of food and drugs from consumer channels, but operates to provide long-range program of correction and prevention of unsatisfactory environmental conditions. It also has responsibility for enforcement of Section 383b of the Penal Code (enforcement of kosher food labeling) and investigates fraudulent cancer devices.

Under this division canneries are licensed and inspected to provide sanitary operation and prevent the occurrence of botulism.

A field program is maintained by the Bureau of Vector Control to stimulate adequate local vector control programs; epidemic surveys are conducted to determine the existence of vector-borne disease hazards and control techniques; and methods and equipment are evaluated and demonstrated.

No additions to the staff of this division are proposed in 1960-61.

## DIVISION OF DENTAL HEALTH

## Objectives

This division has responsibility for the administration of the program to protect and improve the dental health of the public.

## Program and Performance

The program is implemented by advisory and consultative

services to local health departments, community groups, agencies and educational institutions; epidemiological studies of dental diseases; and promotion of training, clinical facilities, and public health preventive measures such as water fluoridation.

No increase in program or staff is proposed in 1960-61.

## DIVISION OF COMMUNITY HEALTH SERVICE

## Objectives

This division has the responsibility of integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, provision of local health services under contract to areas without organized health departments, and for the provision of nursing, medical social work, and health education consultation and services to the state and local health departments.

## Program and Performance

Liaison is maintained with each of the individual local health departments, with the Conference of Local Health Officers and

all other divisions and bureaus of this department. A minimal public health program is operated under contract with small counties who do not maintain their own health departments. The program for residency training in public health is co-ordinated in this division. The bureaus of Medical Social Work, Nursing, and Health Education provide recruiting, training, consultation and technical and administrative assistance to local health departments. Information and education services are furnished for the balance of the department.

No changes in program are proposed for 1960-61.

<sup>d</sup> 2 positions to be transferred to Bureau of Public Health Contract Services.

unsolved health problems and a strong belief that application of effort and imagination will produce significant results in the control of many of the diseases comprising current health problems, coupled with the availability of funds for health research, indicated the necessity for this activity. The division will co-ordinate requests for funds from other than state sources to insure that the most important areas are investigated. The creation of this division will stimulate the research in public health problems and materially assist in the earlier solution of our public health problems.

The program for 1960-61 is continued at the current level.

## SPECIAL PROJECT ACTIVITIES

## Objectives

Research, investigations, demonstrations, and special services of value to the development of the California public health program for which funds can be obtained from the Federal Government or private foundations are conducted by the department.

## Program and Performance

Numerous organizations interested in furtherance of public health make funds available to the department for activities not financed by the State. Each special activity must be related to public health needs in California or be related to investigations or research being conducted by the State. Projects financed by nonstate funds include overhead charges to reimburse the State for additional costs incurred. The expenditures of and

reimbursements for these programs are not included in budget totals.

Known activities are listed indicating the type of activity and source of funding. Since project fiscal years may not coincide with the state fiscal year, projects are assigned to the one which most nearly coincides with the project fiscal year.

Previously these projects have been combined with the regular state-financed portion of the program of the Department of Public Health. To make this presentation more meaningful all special projects have been deleted from the regular program and are shown separately for the first time. A list of these projects, with the source of funding as well as the usual category breakdown, is shown below.

<sup>a</sup> Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

<sup>b</sup> Composed of savings in salaries and wages, \$106,841; operating expenses, \$144,671; equipment, \$87,976; increased reimbursements, \$57,030; savings in other current expenses, \$4,159.

<sup>c</sup> Fund availability of Chapter 2409, Statutes of 1957, expires September 11, 1960.

<sup>d</sup> Composed of savings in operating expense.

## SPECIAL PROJECT ACTIVITIES—Continued

## BUREAU OF MATERNAL AND CHILD HEALTH

*Child Health Research Unit* (Children's Bureau, Department of Health, Education, and Welfare)

The unit has instigated study into the epidemiology of the causes of major child health problems, as well as providing technical assistance to state and local special studies. Evaluation by this unit includes such areas as the State Child Health Conference and hearing conservation projects, practices in maternity hospitals, preschool vision and hearing testing, and accident prevention techniques.

*Epidemiology of Childhood Accidents* (National Institutes of Health)

Investigates the correlation of certain environmental and behavioral factors to the incidence of accidents among children under 15 years. This study is designed to describe factors associated with various types of accidents, and to determine whether these factors are associated more with "accident" children than with "nonaccident" children.

*Epidemiology of Reproductive Loss* (National Institutes of Health)

This project seeks to test methods for determining the rela-

tionships between certain factors affecting pregnant women, particularly early in pregnancy, and the frequency of infant deaths and malformed children. The methods of this project will be applied to develop a large scale co-operative study in California on reproductive loss.

*Maternal and Child Health Postgraduate Training* (Children's Bureau, Department of Health, Education, and Welfare)

This project is to enable the School of Public Health, University of California, to strengthen its curricula for all candidates for the M.P.H. degree, and to offer a number of training grants for physicians and nurses wishing to specialize in maternal and child health or school health administration.

*Kauai Pregnancy Study* (Children's Bureau, Department of Health, Education, and Welfare)

This project, operated by the University of California, is to determine the incidence of fetal deaths among all women in a community; investigate the medical, social, and psychological factors that may influence fetal deaths, premature births, etc., and the factors and conditions associated with favorable pregnancies.

## BUREAU OF CRIPPLED CHILDREN SERVICE

*Regional Congenital Heart Program* (Children's Bureau, Department of Health, Education, and Welfare)

Provides children in the western region with congenital heart disease with necessary diagnosis and treatment. These services are provided in California at centers where medical staff are continually at work developing and improving such diagnostic and treatment procedures; only in such centers can such service be made available to children in the less populous surrounding states.

*John Tracy Clinic* (Children's Bureau, Department of Health, Education, and Welfare)

This project is exploring the medical and audiological needs of preschool children with hearing defects, in an attempt to re-examine existing diagnostic categories and develop appropri-

ate audiological programs to fit them.

*Prosthetics for Child Amputees* (Children's Bureau, Department of Health, Education, and Welfare)

The School of Medicine at the University of California at Los Angeles conducts this project to prepare and evaluate prosthetics suitable for the growing child, perform basic research in prosthetics, and disseminate findings through teaching and written material.

*Cerebral Palsy Training* (Children's Bureau, Department of Health, Education, and Welfare)

This project, conducted at Stanford University, was a short-term training course for physicians and therapists introducing them to new techniques in the treatment of children afflicted with cerebral palsy.

## BUREAU OF CHRONIC DISEASE CONTROL

*Medical Aspects of Air Pollution* (Bureau of State Services, Public Health Service)

To obtain data concerning respiratory and other disorders, a sample was taken suitable for comparing the California Health Survey with the National Health Survey. It is to be analyzed according to the probable air pollution exposures of the populations.

*Female Cancer Incidence* (American Cancer Society)

As a natural extension of a lung cancer study done among men, this project used questionnaires of the wives of these men, which listed smoking habits, residence history, husband's occupation, etc., with the purpose of matching the information to recorded deaths of women by lung cancer.

*Chronic Disease Epidemiology* (Rockefeller Foundation)

The purpose of the grant was to develop a core group of epidemiologists to conduct studies in the field of chronic disease. Among the studies the group participated in were in the field of lung cancer, alcoholism, air pollution and the California Health Survey.

*Cancer Chemotherapy* (National Institutes of Health)

The project provides a data collection center for California's part in a national chemotherapy evaluation program in cancer. It is a part of the California Tumor Registry. Newly reported cases of cancer are registered, and previously reported cases are followed. Quality control is maintained on the abstracting of cases in hospitals, and the necessary mechanical procedures are carried out to prepare punch cards for the Cancer Chemo-

therapy National Service Center. This provides the basic data for many other cancer studies.

*Human Population Laboratory* (National Institutes of Health)

One population will be carefully defined for intensive study with attention focused on its personal characteristics and behavioral patterns to determine how these are related to the development of disease in this population. Epidemiologic studies of several chronic diseases and their interrelationship is being studied.

*Puffmeter* (National Institutes of Health)

The epidemiological usefulness of this simple flowmeter is being tested with particular reference to possible changes in physiological pulmonary function in populations exposed to varying levels and types of air pollution.

*Twins Study* (National Academy of Sciences)

This project provided information as to the role of heredity in disease, as determined by studies of mature twins. Birth records of white male twins born during the period 1917-1927 were supplied to the National Research Council for a study of heredity and disease.

*Cancer Monograph Tabulation* (National Institutes of Health)

Tabulations describing in detail some 200,000 cases of patients with neoplasm, who were reported to the Tumor Registry, are being supplied to the Cancer End Results Program. These tabulations are to correlate variables such as age, sex, treatment, etc., with the survival experience of the patients.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (Filled)	59-60 (Auth.)	60-61 (Auth.)			

## SPECIAL PROJECT ACTIVITIES—Continued

## DIVISION OF ALCOHOLIC REHABILITATION

*Drinking Patterns* (National Institutes of Health)

An exploratory study to develop valid methods of eliciting, measuring, and analyzing patterns of alcoholic beverage usage and associated conditions. The way in which alcoholic beverages are consumed; i.e., where, when, why, with whom, rather

than the amount consumed, is to be studied with the intent of developing hypotheses which relate drinking patterns and attitudes to socio-economic data, general health, and general parental, marital, and cultural beliefs regarding alcoholic consumption.

## DIVISION OF LABORATORIES

*"P" Spectrometer* (National Institutes of Health)

Under this project a Goetz P-Spectrometer was purchased to sample and separate atmospheric aerosols for the purpose of measuring and recovering tiny particles contained in the air for chemical characterization.

*Viral Disease Study* (National Institutes of Health)

A study of the etiology, immunology and epidemiology of viral diseases. New means are being sought to diagnose certain viral diseases in order to facilitate epidemiological studies of them; the role of other viruses in the causation of human diseases is being evaluated.

*Polio and Virus Study* (Bureau of State Services, Public Health Service)

Reports are furnished to the U.S. Communicable Disease Center on poliomyelitis diagnosis and investigation carried on in an attempt to ascertain the etiology of polio and related viral diseases.

*Encephalitis Study* (Rockefeller Foundation)

A general study of arthropod-borne virus diseases is being conducted, as well as investigation of clinical cases of suspected arthropod-borne viruses in man and animals.

*Influenza Project* (Department of Defense)

Company units on an Army post are being inoculated with vaccines containing respiratory disease agents, to determine what effect such vaccines have on the infection rate among test groups. Persons with respiratory diseases admitted to the post hospital are given serology tests to ascertain what viral disease agents are present in the post population.

*Complement Fixation Test* (National Foundation)

Complement-fixing antigens from attenuated strains of polio viruses are being prepared and evaluated to ascertain whether strain differences exist between virus types by complement-fixation; better methods of inactivating antigens are being sought.

## BUREAU OF VECTOR CONTROL

*Organo-phosphorous Resistant Mosquitoes* (National Institutes of Health)

A study of mosquitoes resistant to organo-phosphorous insecticides, which are the primary control agents at this time. The physiological basis for organo-phosphorous resistance is being sought by comparing strains of mosquitoes which are, and are not, resistant to such insecticides.

*Blue-green Algae* (National Institutes of Health)

An inquiry into the toxic effect upon mosquito larvae of blue-green algae found in rice fields. The mode of action and antagonistic effect of blue-green algae upon mosquito larvae, as well as the nutritive requirements of these algae, are being studied to determine the feasibility of encouraging their growth to reduce the mosquito population.

## BUREAU OF PUBLIC HEALTH SOCIAL WORK

*Medical Social Work Training* (Children's Bureau, Department of Health, Education, and Welfare)

Under this training program, more public health content is incorporated into the graduate study for the medical social worker at the University of California as well as a year of

internship in a public health department under the supervision of a qualified medical social worker. Scholarship assistance is provided through stipends for graduate students, and internships for those continuing in public health.

## DIVISION OF RESEARCH

*Administrative Research and Training* (Kellogg Foundation)

Mechanisms designed to stimulate, promote, co-ordinate, and evaluate public health administrative research activities are developed and tested. In co-operation with other units in the department and with local agencies, the project director encourages and co-ordinates administrative research activities, and participates in existing studies in administrative research, giving consultation in project design and development. In co-operation with the School of Public Health of the University of California,

areas of study in public health administration valuable to student and faculty are sought out.

*Training Program for Epidemiologists* (National Institutes of Health)

Persons from various professional disciplines receive orientation and practical training in epidemiology as a supplement to academic studies. A unique opportunity is also offered for participation in interdisciplinary study of public health problems in an operating health agency.

ercise is by delegation from the director. The other 2 division chiefs head divisions (Division of San Francisco Bay Toll Crossings, Division of Contracts and Rights of Way) which were created by order of the director, rather than by statute.

The director also exercises important policy-making responsibilities over the highway program as chairman of the California Highway Commission, to which the Legislature has given important authority and responsibility which includes determining the state highway budget and the exact location of state highway routes within legislative guidelines, and for authorizing condemnation of property for highway use.

The director is also a member and secretary of the California Toll Bridge Authority, a largely ex-officio body which is concerned with authorizing, financing and constructing toll crossings of San Francisco Bay. The department provides all of the staff work for the authority.

The State Highway Fund and the Architectural Revolving Fund are charged on a pro rata basis for the cost of entire departmental administration.

## GENERAL ANALYSIS

Under the direction of the State Architect, the Division of Architecture provides a pool of technical and professional civil service employees to prepare the designs, plans, specifications and cost estimates, together with all other studies relating thereto, for all buildings, structures, and utility systems to

be used by all state agencies and institutions except the University of California and the San Francisco Port Authority. Its second major function is the checking of plans for structural safety and the supervision of public school building construction.

## SUPERVISION OF PUBLIC SCHOOL BUILDING CONSTRUCTION

## GENERAL ANALYSIS

This unit checks and approves plans and specifications for all new public school building construction and for all alterations and additions exceeding \$10,000 in estimated cost. By authority of the Field Act (Sections 15451 to 15465, inclusive, of the Education Code), the division is responsible for the checking and approval of all public school building plans, including alterations, and for the inspection of such projects during construction to make certain that public school buildings are properly designed to meet all safety requirements, including earthquake, fire, panic and storm. The unit is entirely self-supporting in that all funds appropriated for the support of the unit are from the Public Building Fund which, in turn, is supported by fees charged for services rendered by the division

in connection with the checking of plans and specifications and supervision of construction. The fee schedule is established in Title 21, California Administrative Code.

During the current year, \$50,000 was budgeted for research on various projects primarily concerned with advancing the art of safe and economical public school building construction.

This 1960-61 Budget proposes a continuation of this research program and will require \$50,000 for this purpose.

A nominal increase is budgeted for services of the State Fire Marshal who assigns deputy state fire marshals to the Division of Architecture for the purpose of checking public school building plans for compliance with the fire and panic regulations.

ESTIMATED COSTS OF PUBLIC SCHOOL CONSTRUCTION  
IN CALIFORNIA

Local construction -----	\$145,335,475	\$145,000,000	\$145,000,000
State Aided Program:			
State funds -----	108,140,109	124,900,000	124,900,000
Local funds -----	13,128,274	15,100,000	15,100,000
Total State Aided Program -----	\$121,268,383	\$140,000,000	\$140,000,000
Totals, Public School Construction -----	\$266,603,858	\$285,000,000	\$285,000,000

Since the inception of the state-aided program in 1947, the State has authorized \$910.5 million to assist school districts in school construction. In addition, local districts have contributed \$303.5 million of local funds bringing the total construction under this program to \$1,214 million through December 1958. Present available funds are estimated to carry the State program through January 1961. Through December 1958,

23,800 classrooms had been constructed, seating 804,000 children.

The cost to the General Fund of debt service on the state-aided program is estimated at \$17,513,006 for 1960-61.

The costs of administering these programs are incurred in the Division of Architecture, Department of Education, and Department of Finance. They are summarized here for informational purposes:

ESTIMATED COSTS OF STATE OPERATIONS,  
PUBLIC SCHOOL CONSTRUCTION PROGRAM

Division of Architecture -----	\$1,177,237	\$1,268,200	\$1,217,278

## GENERAL ANALYSIS

## Objectives

The principal functions of the Division of Highways are to plan, construct and maintain the 14,682 miles of the state highway system. Other functions include various special studies in the transportation field and certain responsibilities in connection with county roads on the Federal-aid Secondary System, with the expenditure of state gasoline tax funds on city streets, and with supervision of the Outdoor Advertising Act.

## Program and Performance

The planning and construction of state highway improvements is carried as a continuous long-range planning program in accordance with policy established by the Legislature and is tailored to funds available from various sources, including federal aid, as provided by the Legislature and to statutory controls governing geographical distribution of construction ex-

penditures in the northern and southern county groups and within individual counties. Funds for construction and rights-of-way are allocated by the California Highway Commission in accordance with these statutory requirements and on the basis of priority of need to best serve traffic. The California Highway Commission is a statutory body of 7 members, 6 of whom are appointed by the Governor, with consent of the Senate, for staggered 4-year terms. The Director of Public Works serves as ex officio seventh member and chairman of the commission. The commission also has the responsibility for adopting the location of state highways on routes authorized by the Legislature, and for declaring certain routes as freeways.

This program is financed through the Highway Fund. The major sources of revenue to the fund are from fuel taxes, registration and weight fees, transportation tax, and federal subventions, summarized below.

## REVENUE SOURCES (State Highway Fund)

	1958-59 ACTUAL	1959-60 ESTIMATED	1960-61 ESTIMATED
Fuel License Tax (6¢ per gallon) <sup>b</sup>	\$229,013,246	\$241,200,056	\$254,006,196
Use Fuel Excise Tax (7¢ per gallon)	18,327,568	20,205,361	22,300,000
Transportation License Tax	9,725,202	10,265,839	11,835,000
Vehicle Registration, Weight Fees, Drivers' Licenses, etc.	50,543,723	58,618,103	51,640,158
Federal Aid:			
Major State Highways <sup>c</sup>	181,246,393	293,296,463	219,320,707
Federal-aid Secondary	13,081,083	8,748,783	8,388,160
Miscellaneous	23,290,405	14,762,428	1,252,000
Prior Year Adjustment	9,778,588	-	-
Total Revenues	\$535,006,208	\$647,097,033	\$568,742,221

<sup>a</sup> These employees are financed by toll bridge revenues.

<sup>b</sup> This is the amount of the 6-cent tax going to the State Highway Fund.

<sup>c</sup> For the major interstate highway system, primary and urban. Other federal aid is carried in federal aid miscellaneous.

1	GENERAL ANALYSIS—Continued			
2				
3				
4	Program and Performance—Continued			
5				
6	There are additional revenues which go directly to local agen-			
7	cies for highway purposes without going through the State			
8	Highway Fund. In 1958-59 this amounted to \$68,003,439. An			
9	additional \$64,108,440 was subvned from the State Highway			
10	Fund in 1958-59 to local agencies bringing the total revenue			
11	received by local agencies from these tax sources to \$132,111,879.			
12	Thus a total of about 22 percent of all revenue from these tax			
13	sources goes to local agencies for road purposes.			
14	Because the state highway program reaches into every corner			
15	of California, the division operates in the field through 11 dis-

Federal aid is available to local airports through Public Law 377. During the past year the commission, upon request, assisted in the preparation of federal aid applications for public airports, the airports receiving approximately \$5,300,000. The airports will receive an estimated \$6,700,000 during both the current and budget years. Other activities included aviation safety, promotion of public acceptance and use of air transportation through publications, maintenance of a film library, and radio and television presentations. Direct assistance is rendered to various state departments in advising on industry needs.

## GENERAL ANALYSIS

## Objectives

The commission was created by Chapter 1693, Statutes of 1953, to confer with a similar commission established by the State of Arizona to define a common boundary between the states along the Colorado River. Membership in the commission consists of the Attorney General, Director of Water Resources, Executive Officer State Lands Commission. One member of Senate, appointed by Senate Rules Committee and one member of Assembly, appointed by Speaker are advisors to the commission.

## Program and Performance

During the first years of existence research was undertaken into the history, hydrography, and the matter of land ownerships along the Colorado River. A preliminary report was rendered to the 1955 Legislature, and they in turn extended the life of the commission for 2 more years by Chapter 1679, Statutes of 1955. In 1955-56 problems such as channelization and transfers of land ownership were studied.

During 1956-57 further investigation of the necessity and the advisability for a compact between California and Arizona defining and relocating the common boundary was made; provision relating to relocation of the river channel by dredging and other means were made, and assistance and advice from members of Congress in securing United States consent to any boundary line agreed upon were undertaken.

In the same fiscal year, the commission secured passage of Proposition 19, a constitutional amendment permitting relocation of the existing boundary between the two states, and the President under Public Law 1025, Eighty-fourth Congress, appointed a representative who has participated in joint commission meetings held since 1957-58.

Very little progress toward a mutual agreement was made during 1958-59. However, at a meeting of representatives from both states in November, 1959, a degree of understanding was reached, and the necessary engineering work is again proceeding.

Work that remains to be done during the 1959-60 and 1960-61 fiscal years consists of arriving at an agreement and the adoption by the joint California and Arizona commissions of a fixed common boundary.

When the 2 state commissions reach an agreement, the following work must be performed: (1) new maps must be prepared; (2) control points must be set at key points along the river for the entire boundary line agreed upon; (3) the Legislatures of the 2 states must adopt a compact; (4) approval of the compact by Congress must be obtained; and (5) the boundary line adopted must be monumented along its entire course.

The budget continues the currently authorized level of service. Provision is made for the salary of an Executive Secretary with other technical and clerical services being furnished by the State Lands Division on a reimbursable basis.

<sup>a</sup> Composed of savings in salaries and wages, \$191; operating expenses, \$4,873; equipment, \$171; and reduced anticipated reimbursements, \$744.

## GENERAL ANALYSIS

The Golden Gate Authority Commission was created by Chapter 1714, Statutes of 1959. The commission consists of 7 members, who are residents of the San Francisco Bay area, appointed by and serving at the pleasure of the Governor. The commission is assisted by an Advisory Council of 14 members appointed by and serving at the pleasure of the Governor.

The commission is studying and investigating the advisability

of operating any or all of the bridges, port facilities and airports in the Bay area under a single agency. The commission plans to report its findings and recommendations to the 1961 Legislature.

To carry out the provisions of this statute, \$250,000 was appropriated by the Budget Act of 1959, Item 275.5, which is available during 1959-60 and 1960-61.

GENERAL ANALYSIS							
Objectives							
The Alcoholic Beverage Control Appeals Board provides administrative review for any person aggrieved by a decision of the Department of Alcoholic Beverage Control.				and whether the findings are supported by substantial evidence in light of the whole record. Meetings are held monthly in Los Angeles, San Francisco, and Sacramento to review appealed cases. The board meets bimonthly in Sacramento to discuss cases and approve decisions prepared by the legal counsel in accordance with instructions from the board.			
Program and Performance				Since the creation of the board in 1954 more than 1,134 cases have been decided. During 1958, 252 cases were appealed. The budget proposed for 1960-61 continues the current level of service.			
The appeals board, as provided in the Constitution, consists of 3 members appointed by the Governor and serve at his pleasure. The board determines whether the Department of Alcoholic Beverage Control has proceeded in the manner required by law, whether the department's actions are supported by the findings,

## GENERAL ANALYSIS

## Objectives

The California Districts Securities Commission is charged with the direction and supervision of certain fiscal and physical affairs of irrigation districts and other entities of the State of California.

## Program and Performance

The commission consists of the Attorney General, the State Engineer, the Superintendent of Banks, and 2 members appointed by the Governor for 4 years. In 1958-59 the commission reviewed and inspected the financial and physical condition of 170 districts, as compared to 152 in 1956-57 and 159 in 1957-58 and assisted district officials with respect to financial problems involving the incurrence of indebtedness and other matters affecting the financial soundness of their districts. Investigations are made by the staff to determine the engineering, economic, and financial soundness of proposals by districts to incur additional indebtedness through issuance of bonds or warrants or by contract with the Federal Government for water service, construction of facilities, or loans. The commission passes upon the incurrence of major indebtedness by irrigation districts, California water districts, and other districts and local agencies that request certification of bonds as legal investments pursuant to the Districts Securities Commission Act.

The commission passes upon the expenditure of bond funds during the period of acquisition or construction of district facilities. Co-operative assistance to banks, investment com-

panies, and other lending agencies is provided by making available to them factual information regarding the economic condition of the districts. This is of substantial importance to both the investment companies and the districts, for, when the financial soundness of a district can be supported, the credit of the district is strengthened and financing can be more readily secured at a reasonable rate of interest.

As a result of action by the 84th Congress, irrigation and water districts are eligible to obtain loans for construction of irrigation systems and other water projects on an interest-free basis. Districts under commission supervision must submit proposals for such loans to the commission for its approval which requires substantially the same degree of investigation as would be required in the case of financing by bonds. At present there are at least 22 irrigation and water districts which have initiated action to obtain such loans. This program started during 1957, and the commission has up to July 1, 1959, approved loans in excess of \$26,000,000. The program is expected to step up the rate of development of new lands in the State and will undoubtedly result in an increase in the workload of the commission.

Chapter 1752, Statutes of 1959 amended various sections of the Water Code relating to state financial assistance for local water development projects. The responsibility for approval of loans previously delegated to the District Securities Commission by Chapter 2052, Statutes of 1957 is now transferred to the Department of Water Resources.

## Department of Investment

## BANKING DEPARTMENT

Headquarters Office at San Francisco

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
<b>SUMMARY</b>				
TOTAL EXPENDITURES-----				
Support (Banking Fund)-----	\$606,398	\$747,320	\$826,217	\$78,897 (10.6%)
Personnel man-years-----	61.4	70	78	8

## GENERAL ANALYSIS

## Objectives

The primary objective of the Banking Department is to assure that the funds of the investing public are adequately safeguarded.

## Program and Performance

The main programs of the department are to grant licenses for new state banks or branches, examine all state banks annually and liquidate the affairs of banks when this becomes necessary.

Applications for new state banks or branches require surveys to determine: the competition offered by existing banks; the opportunity for profitable employment of the bank's funds; the

number of potential depositors; and the volume of banking business which the community may provide. Licenses are then granted or denied after a public hearing of all interested parties.

The staff examines each state bank and branch annually. The examination covers the condition and resources of the bank, the mode of management of its affairs, the actions of its board of directors, the investment and disposition of its funds, the safety and prudence of its management and the security afforded its depositors and creditors. The increased annual examination work is reflected in the increase in banking offices and the total resources of state banks as shown by the following figures:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Number of bank offices-----	443	445	464	494	544
Bank assets (millions)-----	\$6,269	\$6,759	\$7,290	\$8,019	\$8,821

5 additional examiners are proposed for the examination work based on the trend of recent years. A clerical position is provided in support of the examiner positions by the permanent extension of a temporary position.

The State Banking Department is supported by a tax on all state banks. This tax is assessed at a rate limited by law to 0.01 percent or less of the total resources, less secured deposits and

bills payable. The Banking Department is maintaining a reserve which is sufficient to pay the cost of operating the department without assessing any tax for a period of approximately 6 months. By careful administration tax reductions have been accomplished even though salaries were increased, new equipment purchased and the services of the department improved.

<sup>a</sup> For statement of fund conditions see Capital Outlay budgets of State Colleges; Fairs and Expositions Division; Department of Finance; and Wildlife Conservation Board.

<sup>b</sup> Chapter 1126, Statutes of 1959 places this revenue in General Fund effective June 29, 1959.

Personnel man-years -----	194.5	299.2	370	70.8

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Corporations is the protection of the California public from fraud in the sale of corporate securities. The division is also charged with responsibility for preventing fraud and usury, as well as unsound business practices, in industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents and retirement systems.

Program and Performance

Before many types of corporate securities can be offered for sale in California, application must first be made to this division. For the fiscal year ended June 30, 1959 there were 43,068 such permits or licenses issued pursuant to provisions of the corporate securities law. The division investigates properties, books and prospects of the applicants and a permit or license is issued or denied. It is estimated that 49,780 permits or licenses will be issued in 1959-60 and 55,750 in 1960-61. These increases are caused by more eastern money being invested in California, favorable tax laws, prosperity of the nation as a whole, and particularly of this State, and recovery from the 1957-58 recession.

Industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents and retirement systems are regulated by first issuing a

permit or license and second by conducting annual examinations in accord with law. In 1958-59 there were 2,368 licensees subject to regulation. It is estimated that there will be 2,618 such licensees in 1959-60 and 2,865 in 1960-61.

The 1959 Session of the Legislature provided the division with additional manpower and funds to expedite the issuance of corporate security permits and to instigate annual examinations of retirement systems, brokers and investment counsel. This program is currently being initiated and together with salary increases recently granted, accounts for the major portion of increased expenditures in the current and budget years. These increases are more than offset by additional revenues which were also provided by the 1959 Legislature.

This budget provides 56.5 additional positions to meet the increase in license and permit workload at the level of service authorized by the 1959 Legislature. On July 1, 1960 trading stamp companies will be subject to regulation by the division, as provided for by Chapters 2113, 2169 and 2170, Statutes of 1959. This budget proposes 2.5 positions for this purpose. The \$56,307 increase in rent for building space provides for a complete year's payment in 1960-61 for San Francisco State Building space, where no rent was paid prior to February 1, 1960, and an allowance statewide for space to be occupied by the 59 proposed new positions.

## GENERAL ANALYSIS

## Objectives

The purpose of the Department of Insurance is to protect insurance policyholders, rights of beneficiaries, and the general public in California.

## Program and Performance

The main programs of the department are to: license companies and individuals who engage in the insurance business.

<sup>a</sup> Composed of savings in salaries and wages, \$56,916; operating expenses, \$558; equipment, \$2,052; and excess reimbursement \$76,800.

<sup>b</sup> Composed of savings in operating expenses, \$41,396; and equipment, \$4,624.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	
1					
2					
3	Program and Performance—Continued				
4					
5	admit insurers to operate in California; grant permits to issue				
6	securities and make changes in capital structure; approve cer-				
7	tain types of policy forms; approve minimum workmen's com-				
8	pensation insurance rates; examine financial condition and pro-				
9	cedures of insurers through field audits and analysis of financial				
10	statements; take over the California affairs of insurers in				
11	financial difficulty for the purpose of liquidation or rehabilita-				
12	tion; investigate complaints against licensees; and check activ-				
13	ities of licensees for compliance with all insurance laws.				
14	Increased workload in the Compliance and Legal Division in				
15	the areas of applications for certificates to do business in				
16	California and for permits to issue securities and make changes				
17	in capital structure of insurance companies will require the				
18	services of an additional assistant counsel and stenographer-				
19	clerk to continue the current level of services. The Examination				
20	and Financial Analysis Division which is responsible for exam-				
21	ining the business affairs of all insurers, both foreign and				
22	domestic, doing business in this State has also experienced an				
23	increase in workload of approximating 20 percent since posi-				
24	tions were last added to the division staff in the 1953-54 fiscal				
25	year. At that time there were 691 insurance companies having				
26	assets of over 90 billion dollars. By 1958 the number of com-				
27	panies had increased to 727 with total assets in excess of 125				
28	billion dollars. This steady industry growth has been accom-				
29	panied by commensurate workload increases and has resulted				
30	in the curtailment of necessary out-of-state examinations of

## GENERAL ANALYSIS—Continued

insurance companies in co-operation with the National Association of Insurance Commissioners as well as delays in the examination of California companies. 7 additional insurance examiner positions are proposed to maintain the necessary examination schedule.

This budget provides for the continuation of 2 positions established in the current year to implement Chapter 1667, Statutes of 1959, which provides for regulation of credit life and credit disability insurance, and for 1 position to adjust tax rates on insurance premiums of foreign companies in compliance with Chapter 2120, Statutes of 1959.

Positions and funds budgeted for regulation of employee health and welfare programs which was made a responsibility of the Insurance Commissioner by Chapter 2167, Statutes of 1957, are not being projected for 1960-61 as this law is scheduled to terminate on June 30, 1960. In recognition of this termination, the department has not filled 5 authorized positions and will eliminate the remaining 16 positions by the close of the current fiscal year. Several hundred health and welfare organizations have been registered to date without disclosing any unethical practices.

The department is supported from license fees, examination fees, assessments, taxes and other revenues derived from the insurance business. The unencumbered balance in the fund at June 30th of each year in excess of \$2,000,000 is transferred to the General Fund.

## GENERAL ANALYSIS

## Objectives

The primary objective of the Division of Real Estate is to protect the general public in all matters relating to real estate, subdivisions, business opportunities, mineral, oil, and gas, and mortgage loan transactions handled through licensees and to provide funds for education and research in field of real estate.

## Program and Performance

The division issues an original license to real estate, business opportunity, and mineral, oil, and gas applicants after the applicant has passed a written examination. Licensees must take a

<sup>a</sup> Composed of savings in salaries and wages, \$59,537; operating expenses, \$19,800; equipment, \$12,118; and excess reimbursements, \$27,084.

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

written or oral examination before a license is renewed. Fiscal year figures show license examination totals at a higher level than had been anticipated. In the 1958-59 fiscal year, there were 213 more examination sessions given throughout the State than in 1957-58, an increase of 24.1 percent. The bulk of the

increase was accounted for by original license examinations, mostly salesmen, which were up 4,336, a 20.7 percent increase. This increase in original examinations in the past year will be reflected in the number of second examinations to be given in the current year.

	Actual				Estimated			
	1957-58		1958-59		1959-60		1960-61	
	Applicants	Passed	Applicants	Passed	Applicants	Passed	Applicants	Passed

2d examination	7,502	3,636	9,821	7,278	11,785	8,733	12,964	9,607
Oral	2,834	2,352	3,141	2,127	3,926	2,658	4,319	2,924
Totals	31,278	23,277	38,240	28,572	46,044	34,392	50,650	37,832

During 1958-59, 4,354 complaints against licensees, subdividers and advance fee operators were received as compared with 4,286 in 1957-58. Under the provisions of Chapter 2117, Statutes of 1959, the Real Estate Commissioner will require the form of advance fee agreements and all materials used in soliciting prospective owners and sellers to be used in the form and manner necessary to carry out the purposes of the statute. Each subdivision to be sold in California must be filed with this division. If after investigation it would work a fraud on the public to permit the sale, a stop order is issued. During 1958-59, 2,950 subdivisions were filed.

Many subdivisions are revived necessitating reinvestigation and amended reports to be written. During 1958-59, there were 3,917 reports. The law requires the Commissioner to investigate and write a report on out-of-state subdivisions offered for sale in California. Last year there were 40 such subdivisions filed with the division.

The burden on the division created by the new Real Property Loan Brokers Law, Chapter 1942, Statutes of 1959, will fall principally on the Audit Section of the division. It will be necessary for them to audit accounts of corporations, co-partnerships and individuals engaged in this business.

The auditing staff anticipates that a minimum of 8,130 man-hours will be required for auditing mortgage loan broker accounts in 1959-60 and 9,000 hours in 1960-61. They also anticipate 2,230 hours on subdivision accounts and 2,620 hours on brokers trust accounts in 1959-60; with 2,400 hours on subdivisions and 3,000 on brokers trust accounts in 1960-61. This is a total workload of 12,980 man-hours in 1959-60 and 14,400 man-hours in 1960-61. 2 additional auditors and 1 clerk have been provided in the current year and extended in the budget year to perform these additional audit responsibilities.

The Real Estate Commissioner administers a real estate education and research program, financed from the Real Estate Education and Research Fund established for the advancement of real estate education and research at the University of California, the state colleges, and the junior colleges. The state college and junior college programs are co-ordinated with the activities in real estate education and research at the University of California through the commissioner's office by means of the Commissioner's Real Estate Education and Research Advisory Committee comprised of representatives of the university, the colleges and the real estate industry. Hampered by a late start in the past year, the state colleges participated in real estate research to a limited extent; they now plan for more extensive activity in applied research on regional problems which have statewide significance.

The license survey completed for the 1958-59 fiscal year shows a total of 125,369 licenses of all types were issued and in effect as of June 30, 1959. This represents an increase of 5.1 percent over the 119,262 licenses issued and in effect on June 30, 1958. Percentagewise, the number of licenses increased at a faster rate than did California's population. A breakdown of all licenses issued and in effect as of June 30, 1959 shows 2,608 corporations, 1,936 partnerships, 878 limited salesmen, 64,777 salesmen, and 55,170 brokers.

This budget provides 3 additional professional positions and 5 clerical positions for the 1960-61 fiscal year to process the increased number of examinations given, subdivisions filed, licenses issued, and related workload of the division. The \$20,178 increase in rent for building space provides for moves to the new Los Angeles, San Francisco, Oakland and Fresno State Buildings during the current and budget years.

58					
59	<b>GENERAL ANALYSIS</b>				
60					
61	Objectives				
62					
63	The primary objectives of the Division of Savings and Loan are the examination of state-licensed savings and loan associations to determine their stability, their compliance with Savings and Loan Law and their financial condition. The purpose is to protect the funds of the investing public.				
64					
65	Program and Performance				
66					
67	This division annually licenses eligible associations and their agents and salesmen, and examines each association and its branches. Applications for licenses made to the division are the subject of examination and public hearings to determine issuance or denial. Because of the increasing number of associations and branches and their growing assets together with applications for new facilities, additional examiner personnel are required as are additional appraiser personnel to physically				
68					
69	appraise real properties securing loans made by the associations, so that the quality of examinations and appraisals need not be reduced.				
70	The increased workload trend is expected to continue through 1960-61 necessitating 8 additional examiner positions, 3 additional appraiser positions as well as additional related clerical personnel.				
71

## BOARD OF OSTEOPATHIC EXAMINERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------------------------------	-------------------	----------------------	---------------------	------------------------

## SUMMARY

TOTAL EXPENDITURES				
Support (Contingent Fund of the Board of Osteopathic Examiners)-----	\$59,604	\$65,973	\$68,067	\$2,094 (3.2%)
Personnel man-years-----	6.2	6.4	6.4	-

## GENERAL ANALYSIS

## Objectives

This board was established to maintain high standards for the osteopathic profession; to assist and protect licentiates and the public; and effect economies within the board consistent with effective administration and adequate policing.

## Program and Performance

The Board of Osteopathic Examiners was created by initiative measure in 1922 and consists of 5 members appointed by the Governor for 3-year terms from graduates of osteopathic schools who are licensed to practice in this State and have been citizens for 5 years preceding appointment. It is a licensing and policing agency which has the responsibility of licensing as physicians and surgeons, graduates of osteopathic schools meeting the requirements of Division 2, Chapter 5, Business and Professions Code.

The board receives applications for examination for licensure as a physician and surgeon, investigates and approves approximately 120 applications per year, conducts a 3-day written examination, generally once a year, processes the examination, grades and licenses those applicants who have passed the written examination and have completed a year of internship in an

approved hospital. Applicants may take the examination upon completion of their medical course, but a license may not be issued until they have completed a year of intern training. 8 licenses were issued to applicants who had passed the examination in 1958 and who had completed their intern training. 89 licenses were issued in 1958 to applicants who had passed the written examination the previous year and who had completed their intern training in 1958. The board also receives and investigates an average of 30 applications for physician and surgeon certificates by reciprocity each year. Credentials of approximately 15 licentiates were endorsed to other states during the year. 86 medical group or medical clinic permits were issued in the calendar year 1958. The board holds 3 meetings a year, keeps records of all proceedings, publishes an annual directory and makes an annual report to the Governor. Fees for the written examination, annual renewal and for the various licenses are receipted and deposited in the Contingent Fund. The board has approximately 2,500 licentiates. During 1958 the investigative staff made 186 investigations; there were 13 citations before the board, resulting in disciplinary action.

This budget continues the currently authorized level of service.

<sup>a</sup> Composed of savings in salaries and wages, \$48,678; operating expenses, \$1,146; equipment, \$1,521, and excess reimbursements, \$92.

## GENERAL ANALYSIS

## Objectives

To protect the public, health, welfare and safety by permitting only persons and firms of demonstrated knowledges and abilities to perform public services for compensation; to prevent unauthorized practices upon the public and to discipline those licensed who fail in their public trust.

## Program and Performance

The department is headed by a director, appointed by the Governor. Approximately 534 people are employed by the department and its member agencies.

<sup>a</sup> These funds are derived from assessments against other funds which expenditures are included in the overall budget totals.

<sup>b</sup> Expenditures and revenues of the Professional and Vocational Standards Fund are not carried into the budget totals, since the assessments against the various boards and the rent receipts for the building have been included as expenditures in the budgets of the respective boards and agencies.

## Department of Professional and Vocational Standards

## DEPARTMENTAL ADMINISTRATION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	------------------------------	-------------------	----------------------	---------------------

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

The member agencies of the Department of Professional and Vocational Standards are headed by boards of 3 to 13 members appointed by the Governor from among members of the particular profession or vocation regulated. The members usually serve overlapping 4-year terms.

In general, the agencies have authority to determine the qualifications of applicants for licenses, to give examinations and issue licenses, and to regulate licensees by means of inspections, investigations, and formal disciplinary action. Each agency employs a staff to assist with these functions. With minor exceptions, the cost of operation of the member agencies is paid by the fees collected from those engaged in the occupations regulated.

The departmental administration co-ordinates and supervises the administrative and financial affairs of 27 professional and vocational licensing agencies and the Division of Administrative Procedures. It performs centralized personnel, budgetary, and accounting operations for these agencies, and manages the Business and Professions Building and the Annex.

The administration budget for 1960-61 provides for a continuation of the same level of service, to which workload increases make necessary the addition of an associate counsel, and a senior legal stenographer as a complement to that position and the existing position of administrative adviser.

Request is made also for a personnel officer, which was administratively approved during the current fiscal year, due to

emergency conditions which had to be met. The position of business service officer was left vacant to finance the personnel officer position. As need still exists to fill the business service officer position, the personnel officer position is included as proposed new in the 1960-61 fiscal year.

The 1960-61 department budget provides for the following significant changes in program:

Agency	Program	Number of positions	Cost
Departmental Administration	Administrative and clerical	3	\$22,451
Board of Accountancy	Investigation	2	10,992
Board of Accountancy	Clerical	2	7,260
Athletic Commission	Investigation	2	14,712
Cemetery Board	Clerical	1	3,870
Contractors' License Board	Clerical	1	3,810
Board of Funeral Directors and Embalmers	Clerical	1	3,735
Board of Medical Examiners	Investigation	4	21,984
Board of Medical Examiners	Clerical	1	3,630
Board of Nurse Examiners	Investigation	2	11,556
Board of Nurse Examiners	Consultant	3	20,448
Board of Nurse Examiners	Clerical	4	17,382
Board of Pharmacy	Inspection	1	7,356

31	<b>BUSINESS AND PROFESSIONS BUILDING ANNEX</b>			
32	In accordance with the provisions of Sections 400 and 404 of			
33	the Business and Professions Code, the Business and Professions			
34	Building was constructed and is being operated by the Depart-			
35	ment of Professional and Vocational Standards as a self-sustain-			
36	ing enterprise. Out of the rentals received from state agencies			
37	occupying space in the building and fees paid by users of its			
38	parking facilities, are defrayed the cost of operating and main-			
39	taining the building. Generally, the remaining receipts are			
40	apportioned back to the agencies contributing to the cost of the			
41	building in proportion to their respective investments.			
42	Repayments to investing agencies are estimated on an accrual			
43	basis. Actual repayments are made semiannually, after the close			
44	of the period in which net rentals accrued.			
45	Department of Professional and Vocational Standards:			
46	Board of Accountancy-----	\$186,760	\$3,351	\$6,703

5	<b>GENERAL ANALYSIS</b>				
6	This division is responsible for coordinating and improving the quasi-judicial functions of the various licensing boards, including agencies not within the department itself. It furnishes trained hearing officers to any state agency conducting disciplinary proceedings, and it compiles and publishes the California Administrative Code, consisting of agency rules and regulations.				
7	The 1960-61 Budget provides for continuation of the existing level of service. The agency workload is indicated by the following figures:				
8		Actual		Estimated	
9		1956-57	1957-58	1958-59	1959-60

## GENERAL ANALYSIS

This board, which consists of 7 members appointed by the Governor for 4-year terms, licenses and regulates certified public accountants and public accountants.

2 additional investigator positions and 2 clerks have been provided to perform the duties which are being delegated to the staff by the board and committee. In addition, certified public accountant applications, and complaints assigned to investigation, are increasing significantly both in number and complexity. The increase in printing for the current year provides for a

register of accountants which has not been printed for 2 years. The agency workload is indicated by the following figures:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Total licentiates-----	32,881	24,729	24,760	25,000	25,000
Applications received--	4,000	4,213	4,255	4,300	4,400

72	Personnel man-years -----	3.5	4.8	4	—0.8

## GENERAL ANALYSIS

The Cemetery Board, which consists of 5 members appointed by the Governor for terms of 4 years, administers the Cemetery Act under which certain cemeteries and cemetery salesmen and brokers are licensed and regulated. This budget provides for 1 additional stenographer-clerk position, partially financed by a reduction in temporary help funds, for workload increases in

order to continue the existing level of service. These workload increases are indicated in the following table:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Total licentiates -----	1,612	1,812	2,221	2,512	2,729
Applications received -----	1,823	2,013	2,500	2,740	2,962

<sup>a</sup> Composed of savings in salaries and wages, \$273; operating expenses, \$2,015; and equipment, \$68.

------------------------------	-------------------	----------------------	---------------------	------------------------

## SUMMARY

<b>TOTAL EXPENDITURES</b>				
Support ( <i>Chiropractic Examiners' Fund</i> ) .....	\$72,224	\$76,965	\$79,686	\$2,721 (3.5%)
Personnel man-years .....	5.9	6.1	6.1	-

## GENERAL ANALYSIS

The board, which consists of the secretary of the board and 4 other members appointed by the Governor for terms of 3 years, examines, licenses, and regulates chiropractors in California. The annual expenditures of this board have exceeded revenues for several years. The accumulated surplus as of June 30, 1961, will provide for less than 3 months expenditures. As the original Chiropractic Act was created by initiative measure in 1922, an amendment to permit an increase in fees requires approval by the electors at the next general election,

as provided for by Chapter 1768, Statutes of 1959. A fee increase may then be provided for by legislative action.

The 1960-61 Budget provides for a continuation of the existing level of service. The board's workload is reflected in the following table:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61

<b>SUMMARY</b>				
<b>TOTAL EXPENDITURES</b>				
Support ( <i>Collection Agency Fund</i> ) -----	-	\$102,028	\$111,645	\$9,617 (9.4%)
Personnel man-years -----	-	10.2	10.3	0.1

## GENERAL ANALYSIS

The Collection Agency Licensing Bureau examines, licenses and regulates collection agencies, their officers and employees.

Pursuant to the provisions of Chapter 2159, Statutes of 1959, this agency was transferred to the Department of Professional and Vocational Standards from the office of the Secretary of State on September 18, 1959. The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. There is within this bureau a California Advisory Board of Collection Agencies which consists of 5 members appointed by the Governor for 4-year terms.

In addition to the transfer of this agency, Chapter 2159 extends the scope of the bureau's administration to include regis-

tration of employees of licensees, examination of financial accounts of licensees, and appointment of a conservator in specific instances. To accomplish these purposes, 2 auditors, 1 investigator, and 1 man-year of temporary help were added to the staff during the current fiscal year and extended in the budget year.

The following table indicates the bureau's workload:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Total licentiates ---	774	769	746	5,321	5,621
Applications received -----	-	-	-	4,500	200

a Composed of savings in salaries and wages, \$5,139; operating expenses, \$4,563; equipment, \$1,657.

## BOARD OF DRY CLEANERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS		ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
SUMMARY					
TOTAL EXPENDITURES					
Support (Dry Cleaners' Fund)		\$241,103	\$275,004	\$287,574	\$12,570 (4.6%)
Personnel man-years		22.2	23	23	—

## GENERAL ANALYSIS

This board, which consists of 7 members appointed by the Governor for 4-year terms, inspects and licenses dry cleaning plants and press shops and examines and licenses operators. The expenditures of this board are exceeding revenues to the extent that on June 30, 1961 the estimated surplus will be insufficient to maintain normal operations. Legislative consideration will be necessary to continue this program on a

solvent basis at the existing level of service, as is proposed for 1960-61. The agency workload is indicated by the following figures:

	Actual		Estimated	
	1956-57	1957-58	1958-59	1959-60
Total licentiates	21,678	21,593	20,863	20,650
Applications received	2,501	2,582	1,803	1,800

<sup>a</sup> Composed of savings in salaries and wages, \$3,300; operating expenses, \$2,962; and equipment, \$260.

## BUREAU OF FURNITURE AND BEDDING INSPECTION

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
<b>SUMMARY</b>				
<b>TOTAL EXPENDITURES</b>				
Support ( <i>Bureau of Furniture and Bedding Inspection Fund</i> )	\$313,202	\$353,914	\$373,493	\$19,579 (5.5%)
Personnel man-years	40.3	42.9	42.7	—0.2

## GENERAL ANALYSIS

The bureau licenses and regulates sellers and processors of overstuffed furniture and articles of bedding. An inspection service is maintained to insure truthful labeling of these goods. There is in the bureau an advisory board of 7 members appointed by the Governor for terms of 4 years. Chapter 1582, Statutes of 1959, provides that the chief of this bureau be appointed by, and serve at, the pleasure of the Governor, rather than under the appointment of the Director of the Department of Professional and Vocational Standards. This budget provides

for a continuation of the existing level of service. The agency workload is indicated by the following figures:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61

## GENERAL ANALYSIS

The Board of Medical Examiners consists of 10 members appointed by the Governor for 4-year terms. Within the board there is a chiropody examining committee of 5 members, a psychology examining committee of 7 members, and a physical therapy examining committee of 4 members. Each committee member is also appointed by the Governor for 4-year terms.

The board examines, licenses, and regulates physicians and surgeons, chiropodists, drugless practitioners, and midwives. Within the board, the chiropody examining committee reviews applications and examines applicants for licensing as chiropodists; the psychology examining committee examines and passes upon the qualifications of applicants for certification and registration as psychologists; and the physical therapy examining committee reviews applications and examines applicants for licensing as physical therapists, subject to approval by the board.

This budget provides 4 additional investigator positions and 1 clerk to handle the increased number of complaints assigned to investigation, and to reduce the back log of assigned complaints per investigator.

Agency workload is indicated by the following figures:

	Actual			Estimated

## GENERAL ANALYSIS

The Board of Nurse Examiners, which consists of 5 members appointed by the Governor for 4-year terms, examines, licenses, and regulates nurses and schools of nursing in California. The budget for 1960-61 provides 6 additional positions based on anticipated workload increases in number of licentiates, complaints, applications received and extended campuses. In addition to these, 1 supervising nursing education consultant, 1 nursing education consultant and 1 clerk have been provided in an effort to improve the quality of California schools of nursing.

The Board's workload is represented by the following figures:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
School of nursing-----	46	56	55	60	61

## GENERAL ANALYSIS

The Board of Pharmacy, which consists of 7 members appointed by the Governor for 4-year terms, examines, licenses and regulates pharmacists, pharmacies, manufacturers and wholesalers of drugs, and controls the sale of poisons and dangerous drugs.

1 additional supervising inspector position is proposed for the purpose of improving supervision over the Northern California field staff, so as to raise its production of inspections completed to a rate comparable to that of the Southern California staff.

Fund Condition: Current estimates indicate that expenditures will exceed revenues in the current fiscal year. Legislation will be necessary in the 1960 Legislative Session to maintain this program on a solvent basis. Agency workload is indicated in the following figures:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61

## GENERAL ANALYSIS

This bureau, under the immediate supervision of the Director of Professional and Vocational Standards, examines, licenses and regulates private detectives, adjusters, repossessors, and employees and officers of private detective agencies.

Under the provisions of Chapter 215S, Statutes of 1959, the scope of activities of this bureau was expanded to include licensing of an estimated 300 repossessors, and registration of 6,000 employees of private investigators, insurance adjusters, and repossessors. To accomplish the goals set by the Legislature, 3.8 additional positions, consisting of 1 special investigator, 2 clerks, and 0.8 man-year of temporary help, were added

to the staff during the 1959-60 fiscal year.

In addition, the chief of the bureau position, authorized by Chapter 2098, Statutes of 1957, was established. The 1960-61 Budget anticipates sharing this position between the operation of this bureau and the Collection Agency Licensing Bureau. Agency workload is indicated by the following figures:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Licenses -----	1,147	1,211	1,261	6,233	6,852

## GENERAL ANALYSIS

The Board of Vocational Nurse Examiners is composed of 9 members appointed by the Governor for terms of 4 years. This board establishes curriculums, examines, licenses, and regulates vocational nurses and psychiatric technicians in California. The budget reflects the new program for the regulation of psychiatric technicians, pursuant to Chapter 1851, Statutes of 1959. 5.1 positions are provided in the 1959-60 Budget and extended into 1960-61 for the purposes of this program. This staff is to handle the certification program; investigate applicants and complaints; and periodically inspect and consult with schools of psychiatric training. An estimated 12,000 psychiatric technicians will be eligible for certification and 6,500 applications

are expected during the current year. Sufficient revenues will be received from fees to finance this program in its entirety.

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Total Licentiates:					
Vocational nurse	11,223	12,312	13,603	14,853	15,103
Psychiatric technicians	-	-	-	5,000	7,500
Applications Received:					
Vocational nurse	1,390	1,735	1,698	1,750	1,750
Psychiatric technicians	-	-	-	6,500	3,500

<sup>a</sup> Composed of savings in salaries and wages, \$211; operating expenses, \$1,262; and equipment, \$4.

## GENERAL ANALYSIS

### Objectives

It is the duty of the commission to secure adequate and safe services at rates that are fair and reasonable for both the public and the privately owned utilities and transportation companies.

### Program and Performance

The Commission, which consists of 5 members appointed by the Governor for 6-year terms, hears matters relating to rates, charges, services, safety and affairs of the utilities and carriers under its jurisdiction. The Commission then determines intrastate rates and service of privately owned utilities and transportation companies. These include gas, electric, telephone and telegraph utilities; streetcars, trucks, buses, airlines and vessels transporting freight or passengers in intrastate commerce; and warehousemen, wharfingers, carloaders and pipeline operators. The Commission regulates the issuance of securities and other transactions relating to the capital structure of public utilities, and protects the public interest by appearing before federal agencies and courts as an advocate in interstate proceedings.

The activities of the Commission are reflected in the following statistics:

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Formal proceedings filed	1,394	1,493	1,394	1,500	1,500
Overall formal documents registered	6,896	7,591	7,146	8,000	8,000
Decisions and orders issued	2,066	1,916	1,991	2,200	2,300
Parties notified of hearings	17,838	16,026	20,210	18,000	18,500
Parties of record served with decisions	19,725	22,175	25,519	26,000	26,000

During the 1958-59 fiscal year utilities were authorized to increase their annual revenues an estimated \$31,029,204. This total is 76 percent below the amount of increased revenues authorized in the 1957-58 fiscal year. In contrast, there also were reductions of \$771,420 in gas, electric and telephone rates after annual surveys showed fast growing areas had reached population density which made possible classification in lower rate zones. Although utilities received rate increases, utility charges in California generally were among the lowest in the United States.

The commission has been confronted with the necessity of giving greater attention to appearances before federal agencies

to protect the interests of California. The out-of-state supply now makes up three-fourths of all natural gas sold in California. More than half the total operational expense of gas utilities is for the fuel itself, and neither California's utility companies nor the Public Utilities Commission has control over the price of imported gas. Forecasts indicate a continuing decline of gas supplied by California wells, which adds urgency to the need for close scrutiny of every matter affecting gas prices and active participation in every such Federal Power Commission proceeding. The commission has established, with approval of the Legislature, a staff of legal and technical experts whose primary duty is to safeguard the interests of California in this field. Augmentation of this staff is provided for in this budget.

Enforcement of minimum truck rates of for-hire carriers was continued to maintain stable transportation and nondiscriminatory charges for the public. Investigations of carrier's operations on charges of violations resulted in 53 formal decisions by the commission. The operating authority of three carriers was revoked for flagrant and wilful violations, and 33 other carrier's operations were suspended for a total of 143 days.

Since 1953, state funds in the amount of \$963,919 have been expended for improved warning devices at railroad highway grade crossings for a total of \$4,728,942 to make crossings safer for the public. Out of this total the railroads paid approximately half, with the cities and counties paying one-fourth, and the state one-fourth. A further contribution to safety resulted from legislation setting aside \$5,000,000 each year from the State Highway Fund to assist cities and counties in paying for grade separation structures to eliminate hazardous crossings.

Inspection of the mechanical safety of vehicles used by for-hire truck operators under commission supervision continued. The maintenance records of 781 carriers were checked and approximately 5,000 vehicles were inspected. It is estimated that 7,500 vehicles will be inspected in the 1959-60 fiscal year. During 1958 rail, bus and truck lines reported 947 fewer accidents than in 1957, with 145 fatalities instead of 191. Fatalities were the lowest in any of the past five years.

The commission is supported from both the General Fund and the Transportation Rate Fund. Activities supported by the Transportation Rate Fund are largely regulatory upon rail, truck and water carriers engaged in the transportation of property. The Transportation Rate Fund revenue is derived from a fee of one-third of 1 percent of the gross operating revenue earned by carriers from the transportation of property and from other related fees.

## ADMINISTRATION

### Objectives

The Administrative Division carries out the statutory duties provided for in the Public Utilities Code and maintains the general services necessary to the commission and its operating divisions.

### Program and Performance

This division is concerned with the docketing of official formal applications and cases; service of notices of hearing to interested parties; service of decisions and orders on parties of record; recording official actions; meeting with and providing information to public and private organizations; supervision of fiscal accounting; filing procedures; reproduction of papers; personnel processing; custody of official property; purchases and sales of publications.

In the 1958-59 fiscal year the administrative staff processed 1,991 decisions, the second largest number of proceedings disposed of in a single year. During the year 1,031 days of hearing were held, 20,210 interested parties were notified of public hearings, and 25,519 parties of record in the proceedings were served with decisions. Formal filings registered in the Docket office totaled 7,146. Due to further increases projected in 1960-61, this budget provides 3 additional clerical positions. 2 of these positions will be added to the Los Angeles clerical pool to perform overall commission workload in that office, and the third clerk will be established in San Francisco to process increased workload in the assistant secretary's office.

This budget provides for the payment of rent in the San Francisco, Los Angeles and Fresno state buildings.

## UTILITIES DIVISION

## Objectives

The Utilities Division assists the commission in insuring the public adequate electric, gas, telephone, telegraph, water and steam heat utility service and facilities at reasonable rates, without discrimination, as are necessary to promote the safety, health, comfort and convenience of the public, customers, and employees of utilities.

## Program and Performance

This division provides the technical and clerical staff to analyze and conduct studies in connection with the regulation of rates, service, facilities, safety, valuation, and certification matters relating to the public utilities.

The Utilities Division's assignment is accomplished through the development of factual information and the making of engineering, operating, rate, administrative, and other recommendations to the commission.

The division's workload during the 1958-59 fiscal year was distributed as follows: 34 percent of the work involved rate proceedings; 23 percent, formal proceedings other than rate; 9 percent, customers' service; 13 percent, administration of general orders; and 21 percent to other divisional work. As of the end of 1958, the plant value of major utilities amounted to almost

\$8 billion. There were 561 utilities as of June 30, 1959. A total of 549 formal decisions were issued by the commission on proceedings which required staff work by the Utilities Division during the past fiscal year. This represents an annual increase of over 16 percent in the number of formal decisions and is indicative of the increased growth and complexity of utility operation and regulation.

This budget provides for 7 additional positions in the gas producer cost branch. This program, established in the current year, provides for the commission's intervention and representation of California interests before the Federal Power Commission in gas and oil producer and pipeline corporation rate cases. 2 additional engineers are included to initiate studies of electric meter testing and rate differentials between rural and urban areas in order to formulate recommendations for the commission's action in these fields. There are in excess of 3.5 million electric meters in operation at the present time with no requirements established to maintain accuracy. In addition, 1 engineer and 1 clerk are provided for long-range gas studies relating to supply, storage, cost, and customer usage. This information will be of value to the commission in regulating the natural gas industry in California.

## UTILITIES FINANCE AND ACCOUNTS DIVISION

## Objectives

This division is charged with the review of applications for authorization to issue securities, with participation in financial aspects of rate proceedings, with making accounting examinations of books and records of carriers, with the review of annual and other financial reports, and with the supervision of the application of accounting procedures prescribed by the commission.

## Program and Performance

Formal proceedings involving rate increases, security issues and related matters utilize the major portion of the division's time and manpower. During the fiscal year 1958-59, the division

actively participated in 106 formal rate proceedings as compared with 103 proceedings during the fiscal year 1957-58; 88 during the fiscal year 1956-57; and 61 during the fiscal year 1955-56. In 1958-59 the commission, in considering applications involving the issuance of securities, authorized security issues aggregating \$570,877,139. This compares with authorizations totaling \$699,207,706 for the 1957-58 fiscal year, and \$639,840,021 for the 1956-57 fiscal year. In addition, 3,812 annual and other financial reports of utilities were filed with this division.

The division also accelerated its program of auditing motor carrier records to check the correctness of amounts of revenue reported as a basis for the payment of the quarterly fee.

**PUBLIC UTILITIES COMMISSION—Continued**

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
	58-59 (Filled)	59-60 (Auth.)	60-61 (Auth.)			

LEGAL DIVISION

Objectives

This function provides staff counsel and legal service to the commission.

Program and Performance

This function provides legal and advisory service, including the handling of all litigation involving the commission before courts and federal regulatory agencies; advising commission, staff, and the public on legal and procedural matters; reviewing all proposed commission orders and actions; reviewing technical staff's informal investigations to determine whether formal proceedings or court action should be recommended; providing staff counsel in certain proceedings before the commission; analyzing records and recommending action on petitions for rehearing; performing various miscellaneous functions.

Litigation is increasing. Proceedings before Federal Power Commission and Interstate Commerce Commission are important, complex, time consuming, and require much preparation and absence from office for protracted periods. The transportation enforcement program demands much time in review of possible violations, recommendations for proceeding before commission or courts, and preparation and handling of trials.

**EXAMINER DIVISION**

<b>Objectives</b>						
This function provides the hearing examiners to assure due process to those seeking formal relief from this agency.						
<b>Program and Performance</b>						
Examiners are assigned to all formal filings which require a decision of the commission. During the fiscal year 1958-59 a total of 1,394 formal filings were received. There were 1,031 days of hearings with 1,991 decisions being issued by the commission.						
Due to an upward trend in current filings, 1 additional technical examiner is provided in this budget.						
<b>SALARIES AND WAGES</b>

## GENERAL ANALYSIS

## Objectives

The basic objectives of the Department of Social Welfare are: (1) to assure that programs for assistance to needy persons are administered uniformly and humanely throughout the State in such a manner as to minimize distress, encourage self-respect and independence, and preserve family life; (2) to develop and strengthen services to children, to protect them, to prevent delinquency, and to provide substitute homes for children who cannot live in their own homes, and whenever possible, provide permanent homes through adoption; (3) to provide protection and care through family homes or institutions for aged persons who cannot live in their own homes; (4) to promote and develop methods to assure the most economical and effective means of administering the social welfare programs through other agencies.

## Program and Performance

Program responsibilities of the Department of Social Welfare are essentially those of developing policies and procedures for administering the broad range of public assistance, child welfare, and institutional licensing programs, and to supervise the administration of these programs by local and private agencies. Except for direct licensing responsibilities and reporting to courts on independent adoption petitions, the administration of these programs is discharged through other agencies, public and private.

Programs are carried out within the framework of state and federal laws. For administration of public assistance to the aged, children, blind, and disabled, the department is responsible for assuring to the Federal Government that these programs are administered uniformly and in accordance with federal standards in all counties of the State. In the allocation of the federal funds for child welfare services, the department functions as the agent of the Federal Government.

The public assistance programs provide direct financial aid and services to approximately 258,000 needy aged, 14,000 blind persons, 7,000 totally disabled, to 194,000 children and 55,000 adults in 70,000 families and to 11,900 children cared for in foster homes, for a total of approximately 510,000 persons.

Monthly, some 2,500 children needing homes are under study in a statewide adoption program. Another 2,800 children placed in adoptive homes are under supervision pending final approval of placement. Approximately 1,900 prospective adoptive parents are being studied by staff of 27 local public and private agencies to determine the suitability of their homes for adoptive placements.

Adoption services also include study and recommendations to the courts by state staff and county adoption agencies of approximately 5,100 active petitions per year for adoption of children placed independently by parents.

Leadership is given local communities to develop and strengthen child welfare services to help troubled parents and children by dealing with behavior problems and family relationships to protect children, prevent delinquency, and preserve family life.

Some 300 homes providing 24-hour care for the aged and children are licensed by the department under standards developed by it. Similarly, about 950 day nurseries are licensed by

the department. Local agencies, accredited by the department, license about 3,000 boarding homes for aged and 16,000 foster homes for children in accordance with department standards. In addition, private child placing agencies, with approximately 800 foster homes for children, license such homes under the department's supervision. Thus, at any one time, about 100,000 persons are directly benefiting from the department's licensing, placement and adoption activities.

Total expenditures for these programs involve over \$500,000, 000 a year in state, county and federal funds for assistance payments, administration and services.

These programs directly help over 600,000 people and must serve a wide range of individual problems. Their complexities are inherent in the basic differences in circumstances and conditions in which people are found, and the aim is to meet these wide ranges of need for financial help and for protective care and services. Wherever possible, the aim is to maintain or restore persons to a maximum degree of self-care or self-support.

The social work staff of the department is engaged primarily in functions directly related to administrative supervision of other agencies. These include, but are not limited to: (1) analysis of specific program problems; (2) development of program policies, procedures, and standards necessary for guidance of local agencies and to achieve appropriate standards of services; (3) review and evaluation of quality of performance in administering cases; (4) evaluation of organization, staffing, training and methods as a means of providing specific help in administration; (5) development of guides for administering various programs; (6) evaluating budget requests for staffing and equipment where state funds are provided; (7) conducting or assisting in establishing training programs; (8) assisting local agencies in community organization and interpretation; and (9) assisting local agency administrators with interagency and local governmental problems. In these functions, the social work staff is assisted by and works closely with department specialists in administration such as in research and statistics, administrative analysis, fiscal administration, training and personnel.

## Recent Administrative Accomplishments

Although the major portion of the department's activities was in connection with supervision and administration of on-going programs, the development of a legislative program and the review of legislative proposals originating outside of the department, significant progress was made in streamlining administration and strengthening programs for which the department is responsible.

Continued emphasis was placed on promoting decreasing dependency among Aid to the Blind recipients. Representatives of 17 county welfare departments participated in a statewide seminar on Aid to the Blind sponsored by the department. Valuable training was given in administration of the Aid to the Blind Program. Establishment of specialized units in county welfare departments to provide more skilled services to blind persons was further extended. Simplified procedures were devised for securing data on the program to guarantee extended medical care to those eligible.

<sup>a</sup> The summary of expenditures from state, federal, and county funds for social welfare programs administered by the department and county administration of child welfare services appears in the Local Assistance Budget, "Subventions for Social Welfare."

<sup>b</sup> Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	------------------------------	-------------------	----------------------	---------------------

## GENERAL ANALYSIS—Continued

## Recent Administrative Accomplishments—Continued

Methods for simplifying the administration of the Medical Care Program were developed and made operative. Demonstration projects were initiated and criteria developed to eliminate the prior authorization requirement in the program.

Studies were made to determine medical care needs in the Aid to Totally Disabled Program. Under guidance of the Advisory Committee on Medical Care, rules, regulations, procedures, etc., were developed to restrict benefits in order to maintain solvency in the Medical Care Trust Fund for the Old Age Security and Aid to Needy Blind Programs.

Administration was strengthened on several fronts. As a result of a management survey of the Department by the Organization and Cost Control Division, Department of Finance, the 1959-60 Budget for the department has been revised to reflect the inclusion of a new position of staff assistant to the director and a new position of special project supervisor together with two secretarial positions. These positions are also continued in the 1960-61 fiscal year. The additional position of special project supervisor will give continuing top level direction to special projects of major department-wide concern and provide leadership and close co-ordination of all other program research activities now located throughout the department. The staff assistant position will relieve the director and chief deputy director of administrative detail. These positions in addition to that of the chief deputy are being funded by the abolishment of six public assistant specialists I positions in the department. Efficiency and economy in methods and procedures in fiscal operations at the county level were developed and made operative through studies and reviews initiated by the State-County Committee on Fiscal Operations. Existing and proposed fiscal procedures were carefully evaluated and modified as required. Initiation of a program of furniture refurbishing within the department resulted in estimated savings of approximately \$50,000 over an original plan of replacement.

Comprehensive plans and long-range timetables were laid out for review of local agency statistical reporting. Improved methods for budgeting county adoption agencies were placed into effect. An experiment to improve budgeting methods for county welfare departments was initiated in order to provide a more accurate method of budgeting administrative expenditures. This budgeting plan is designed to measure the dollar cost of these services, provide funds for their accomplishment on the basis of volume of service units, and institute controls to insure that the administrative funds can be expended only if the services are performed.

Continued consultation was provided county welfare departments on a wide variety of administrative and organizational problems, including the installation of electronic data processing systems.

Development of clerical yardsticks based on workload volume for office service functions in the 4 offices of the department was completed and placed into effect. Further mechanization of the duplicating processes was continued resulting in the elimination of two positions. The Records Management Program continued to expand retention schedules making it possible to take care of additional and expanding programs without the purchase of additional filing cabinets. Value of cabinets released for expansion purposes last year represented a savings of approximately \$9,000 over the purchase of additional cabinets. As a result of this program, the department has not purchased file cabinets in over 10 years. Subject classification systems were expanded to include other filing units in the department. A variety of work simplification projects were undertaken covering fiscal processes, statistics and clerical procedures.

Personnel administration by county welfare departments is governed by the State Merit System administered by the department. New procedures for hearing appeals filed by applicants who were disqualified by the qualification appraisal boards in county merit system examinations were developed. Under this new procedure, hearings are held by appeal hearing panels where recommendation decisions are prepared for the State Social Welfare Board. Further expansion was realized on the decentralized testing program during the year. A very important

contribution of this program is that it practically eliminates provisional appointments due to the frequency of examinations. Position classification surveys were completed in 29 county welfare departments with 1,107 employees. Material change in organizational structures have occurred in several counties as a byproduct of this survey. The survey, including needed revisions to the position classification plan, will be complete by June 1960. Changes in minimum qualifications were made for the entrance class of social worker. This will greatly facilitate the administration of a single statewide examination for this class. A statewide committee was appointed by the director to study the problems of recruitment, training and utilization of employees of all county welfare departments. The bureau continued the review of the operations of county civil service systems. Personnel reviews were conducted in 3 separate counties. A basic study was completed to estimate staffing needs for county welfare departments. The estimate showed approximately 87 more social workers would be needed to reach the goal established for trained staff.

Support was given communities in developing new or improved services to children and parents. The primary emphasis was in developing child welfare programs in county welfare departments. Also, 58 persons received child welfare scholarships for graduate training in social work, and a number of staff development activities for child welfare staff were provided. In addition, there were 8 community projects including such plans as consultation to divorcing parents on planning for children, pediatric services for foster children, homemaker service, and joint recruitment of adoptive homes for older children, handicapped children and minority groups. Plans were laid to terminate the Intercounty Adoption Program during the year. However, the program was reactivated by the Legislature effective October 1, 1959.

Plans were initiated for a family visits program using volunteers to call on the aged and disabled in order to provide some companionship to persons without nearby friends or relatives. A comprehensive study was made of the characteristics and needs of aged persons in out-of-home care.

Transfer of the welfare field audit function from the Controller's office involved the establishment of policies, procedures, forms, training, etc., in order to make the program effective July 1, 1959, with a minimum of disruption to the counties.

A broad program of management development was initiated through a series of training conferences. This program was designed to increase the effectiveness of the program planning and administrative and supervisory activities through which the work of the department is carried out. A broad, skilled approach to the problem of helping county welfare departments increase the ability of their public assistance casework staff was initiated. Teaching outlines covering basic concepts used in the administration of public assistance were developed and tried out with experimental training groups from county welfare departments.

Making studies and surveys of various phases of welfare operations is one of the important ways the department carries out its responsibility for the supervision of local agencies. The department increased its ability to carry out this phase of its work efficiently and economically by designing and administering a training course on the technical aspects of making studies and surveys.

The department responded to the statewide work improvement effort by carrying out an extensive training program in work improvement methods. As a result of this program, a process was initiated which resulted in and is continuing to result in a steady flow of valuable suggestions for more effective and efficient departmental operations.

In addition, the department completed its plans for conducting comprehensive reviews of all aspects of county welfare administration.

Continued emphasis was given to simplifying administration of the Aid to Needy Children Program as well as to restore recipients to self-sufficiency and minimize dependency. Continued emphasis was placed on training county workers on use of protective services to children in homes in which questions are raised about the adequacy of the parents.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	------------------------------	-------------------	----------------------	---------------------

## GENERAL ANALYSIS—Continued

Departmental Objective and Work Emphasis Program—  
1960-61 Fiscal Year

The over-all objective of this department during the 1960-61 fiscal year will be in continuing to help conserve and protect human resources by preventing social breakdown, by providing protection and care for aged persons; by providing minimum standards of living for those who are unable to support themselves and their families; by encouraging their self-reliance and self-sufficiency through rehabilitation, vocational training, medical care and social services; and by restoring them to useful and productive activity in community life and to do this as efficiently as possible.

Administratively, the department will continue to review and evaluate current methods, procedures, and policies to assure the most economical and effective means of administration of the Social Welfare programs. Specifically, work emphasis on programs during the 1960-61 fiscal year will be as follows:

*Old Age Security*

This program will be concerned with 2 main areas of emphasis: (1) The problem of out-of-home care and (2) the concern of the Legislature with eligibility of noncitizens and with modification of processes for determining responsibility of relatives.

*Aid to Totally Disabled*

Emphasis in this program will be on implementing the medical care functional improvement program and upon studies to determine methods by which the program may be extended to cover:

- Needs not now met adequately (for example, attendant care).
- Seriously disabled dependent people not now eligible.

*Licensing*

Emphasis on this program will be in terms of obtaining uniformity of licensing practice among the departments of Social Welfare, Mental Hygiene and Public Health. In addition, questions as to how we can integrate medical services in this program, how we relate placement to the kinds of facilities available, and how we can establish rates of payment related to the kinds of care available in various facilities will be explored. Attention will be given to standards for administration of licensing functions by accredited local agencies.

*Adoptions and Child Welfare Services*

Emphasis will be placed on development of administrative standards for use to evaluate Adoption Program operations, and upon methods for control of questionable independent adoption placements and practices.

Emphasis on the use of Child Welfare services funds will be placed on the direct relationship between the use of such funds and the service needs of dependent families and children.

*Nonfederal Aid*

Analysis will be undertaken of the general assistance programs. Attention will be directed to:

- Evaluating uniformity of standards of eligibility and assistance.
- Characteristics of caseload.
- Unmet needs.

Purpose of the analysis will be to determine the relationship of the general assistance program to future development of the categorical aid and to problems of need not now covered.

An effort will be made to determine:

- The extent to which general assistance is being required to supplement needs of persons receiving categorical aids and for which provision should be made in the categorical aid programs.
- The extent to which general assistance is being directed to cover needs of persons now technically excluded from eligibility under categorical aid programs.
- The kinds of problems that will have to be faced if federal financing is modified to cover general assistance programs.

*Aid to Needy Children Program*

Emphasis on this program will be to find a way to interpret the findings which will come out of work of the Task Force to the various counties and to the people of the State. An effort to find a way to tie the responsibility of basic decisions to the worker which perhaps would involve long-range plans for making each case less dependent or for final independence of the case. Emphasis will also be placed on finding out what underlies the basic thinking of the various communities toward the Aid to Needy Children Program in order to know how to meet the problems of interpretation of program practices and objectives.

*Medical Care*

Major attention will continue to be given to the Medical Care Program. Utilization data will continue to be studied in relationship to medical needs, the development of more effective controls, requirements for future coverage and the stable financing of the program.

## 1960-61 Budget Request

In order to maintain minimum standards of operation within the department and to properly administer and service the various welfare programs as mandated under the laws of the State and to obtain and promote efficiency within the respective organizational units within the department, a total of 22 new positions are proposed in the 1960-61 fiscal year. These are summarized below:

	Pro- fes- sional	Cler- ical	Total	Cost
<b>A. Continuation of existing workload</b>				
Bureau of Management Analysis.....	1	—	1	\$8,112
Division of Medical Care.....	1	—	1	7,573
Area Operations (to 6/30/61)---	3	—	3	23,420
<b>B. Administrative workload</b>				
Research and Statistics.....	2	3.5	5.5	24,384
Bureau of Personnel.....	—	1	1	3,630
Bureau of Office Services.....	—	2	2	7,260
<b>C. Program workload</b>				
Aid to Totally Disabled.....	3	3	6	30,510
Clerical yardstick.....	—	3	3	10,890
<b>Totals</b> .....	<b>10</b>	<b>12.5</b>	<b>22.5</b>	<b>\$115,779</b>

Workload statistics in general indicate continuing increases in existing programs. These have been carefully prepared and reflect the lowest possible caseload projections which can be conscientiously estimated in view of increasing trends. On this basis, the overall budget for this department during the 1960-61 fiscal year represents the financial plan to provide minimum staffing and related expenditures to efficiently administer the current ongoing programs, which also provides for normal growth and price increases factors related to programs and workload projections.

2 professional positions are shown above in Research and Statistics: 1 is required for research in the field of Aid to Needy Children to determine why families are in a condition that necessitates Aid to Needy Children and what can be done to relieve this condition; and the other 1 is for research in the field of Medical Care and Aid to the Totally Disabled for studies of attendant care, medical care utilization, a sound actuarial basis for medical funds, and the determination of deposit rates for medical care local revolving funds.

In order to provide co-ordination between all State departments affected with the total complex problem of aging, it is proposed to add an executive director for an interdepartmental committee on aging, 2 research positions, a field position and 2 clerical positions.

board. The chief deputy director is appointed by the Governor.

The current year includes temporary help—special projects for the Aid to Needy Children case management project which is financed by federal grant funds. The operating expenses for this project in the budget year includes \$12,000 for consultant services, also from federal funds.

The administrative advisor's unit furnishes legal information and advice to the department and the Social Welfare Board, and conducts appeal hearings for the Social Welfare Board.

Medical consultants are placed in this unit since they report directly to the deputy director.

## DIVISION OF ADMINISTRATIVE SERVICES

## Objectives

This division is responsible for the development and execution of fiscal and administration policies, personnel management, research, management studies, training and housekeeping functions.

## Program and Performance

All equipment and operating expenses for the department, except some special activities, are included in this division.

The division chief is responsible for the supervision and co-ordination of the activities of the bureaus of the division. The fiscal officer is the supervisor of the Bureau of Administrative Accounting, Bureau of Fiscal Services, Bureau of Field Audits, and the Bureau of Office Services. The Bureau of Administrative Accounting maintains accounting, budgetary cost accounting, and property records of the department; maintains records of county estimates and expenditure statements; and compiles estimates and expenditure statements for submission to the Federal Government. The Bureau of Fiscal Services has general responsibility for the claims submitted by

the counties and other agencies; and makes field audits in relation to life care agreements; develops accounting systems recommended to counties. The Bureau of Field Audits performs field audits in relation to expenditures for welfare made by the counties. This function was transferred from the State Controller's Office by legislative action in the 1959-60 fiscal year. The Bureau of Office Services performs general housekeeping functions, operates the duplicating unit, stenographic pool, central files, mail section, and supply section. The Bureau of Personnel administers a merit system for counties not having a civil service system, supervises the operations of the county civil service system covering personnel engaged in the administration of public assistance and child welfare programs and performs the personnel work for the State Department. Research and Statistics is responsible for analysis of statistics for all operations of the department; for preparation of estimates and special studies; and for the preparation of departmental and statistical reports. The Bureau of Management Analysis is responsible for administrative progress reporting, reports control, forms control, and management and procedural

The budget proposes the continuation of the Intercountry Adoption Program established by Chapter 2050, Statutes of 1959. If federal legislation to extend the program after June 30, 1960, is not passed the budget will be adjusted administratively to provide for liquidation of the program.

analysis. The Bureau of Training is responsible for the development and administration of in-service training program for county and departmental personnel.

The additional position in the Bureau of Personnel represents the re-establishment of a clerical position eliminated in 1959-60 on the basis of estimated workload decrease which did not materialize. The additional position in the Bureau of Management Analysis represents the permanent extension of a

position established in 1959-60 on a one-year basis for the purpose of rendering assistance to counties in the field of electronic data processing. The three additional positions in Research and Statistics are based on clerical workload increase in filing, tabulating and statistical reporting. The two additional positions in the Bureau of Office Services represent clerical workload increase on the basis of existing yardsticks.

## GENERAL ANALYSIS

## Objectives

To encourage and assist citizen participation and action to make it possible for senior citizens to live with security, dignity, self-respect and usefulness; and to advise the Governor on the problems of aging are the responsibilities of this committee.

## Program and Performance

The committee of 8 is appointed by the Governor and is organized on a subcommittee basis with specialists from various state departments and citizens being members of the subcommittees.

The staff members of the committee consult with community organizations, interested groups, and the general public to encourage them in facing and solving common problems. A library has been developed which is used in the work with communities. A quarterly newsletter is prepared to summarize the developments and programs in gerontology.

The 1960-61 budget extends the same level of service as at present. A \$2,800 increase in out-of-state travel is proposed for the attendance by the committee members at the President's White House Conference on Aging.

<sup>c</sup> Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

<sup>d</sup> Expenditure figures include contributions to State Employees' Retirement Fund.

EDUCATIONAL ASSISTANCE DIVISION

GENERAL ANALYSIS

This division administers 2 programs of educational assistance, 1 for California veterans, the other for dependents of veterans who died or were totally disabled as a result of war service. Under both programs, the division provides educational counseling and assistance in securing admission to suitable institutions of learning. After acceptance into the program the students' grades are reviewed periodically and only those making satisfactory progress are continued.

Under the veterans educational assistance program, California veterans are provided with tuition fees plus a monthly maintenance and book allowance of \$50 to a maximum of \$1,000. Only

veterans whose federal benefits are no longer available are eligible for this program. In addition, veterans must show a legitimate need for further training. For workload and costs of the program see Education Assistance to Veterans, page 627.

The veterans dependents education program provides an allowance of \$20 monthly while attending high school and \$40 monthly while attending schools above the high school level to qualified veterans' dependents. For workload and costs of this program see Educational Assistance to Veterans' Dependents, page 627.

SERVICE AND CO-ORDINATION DIVISION

GENERAL ANALYSIS

The function of this division is to assist veterans and dependents of veterans in establishing rights to any privilege, preference, care, or compensation provided for by the laws of the United States or the State of California.

The headquarters and field service function provides for the determination of the eligibility of veterans to state benefits, including preference in civil service examinations. This function also provides advisory services to county service officers and performs a quarterly review of the service officers' activities. As of July 31, 1959, a total of 511,592 applications to establish California veterans eligibility had been approved and

132,376 veterans had established their eligibility for preference in civil service examinations.

The claims and rights function provides for the assistance to veterans in presenting and pursuing claims which the veteran may have against the United States as a result of war service. Prior to January 1, 1960, this service was provided by various veterans organizations on a contractual service. The increase in the expenditures of this activity in 1960-61 reflects the first full year in which the department will directly conduct this program.

1								
2	EDUCATIONAL ASSISTANCE							
3								
4	Educational Assistance to Veterans							
5								
6	This program, administered by the Educational Assistance							
7	Division pursuant to the provisions of Sections 981 to 981.8							
8	of the Military and Veterans Code provides the opportunity							
9	for California veterans to continue their education. The total							
10	assistance is limited to \$1,000 per California veteran. The sub-							
11	sistence is limited to \$40 per month based on actual attendance							
12	in school, plus school books and supplies as are necessary, not							
13	to exceed a total of \$50 per month. In addition, tuition costs							
14	are paid, provided the maximum of \$1,000 per veteran is not							
15	exceeded.							
16	Advanced professional and technical training which might							
17	otherwise be completely beyond the applicant's financial means							
18	is encouraged. While the low subsistence paid covers only a							
19	small part of the present-day cost of school attendance, it							
20	does serve as an incentive to continue in school and divert							
21	other income toward an educational goal.							
22	Only applicants whose federal benefits are no longer avail-							
23	able are accepted, therefore there is no duplication with fed-							
24	eral educational programs. In addition, veterans must show							
25	a legitimate need for further training and demonstrate the							
26	ability to successfully pursue the educational course requested.							
27	Once in training, the student's grades are reviewed periodi-							
28								
29								
30	Educational Assistance to Veterans' Dependents							
31								
32	The educational assistance to veterans' dependents program							
33	is administered by the Educational Assistance Division.							
34	By this program dependents of qualified veterans are given							
35	an opportunity to continue their education. The educational aid							
36	to widows and orphans is not limited as to total amount for							
37	each eligible; however, subsistence payments may not exceed							
38	\$480 per year on the basis of school attendance. Payments are							
39	limited to \$40 per month for college students, and \$20 per							
40	month for high school students, which by Department of Veterans							
41	Affairs policy represent amounts for subsistence only. Eligibles							
42	between the ages of 14 and 21 may file for and receive assist-							
43	ance until the course is completed or until 27 years of age is							
44	reached, whichever occurs first. The minimum age was lowered							
45	from 16 to 14 by Chapter 1577, Statutes of 1959. Assistance to							
46	widows is limited to not more than 4 years duration. The new							
47	federal program of assistance to dependents has reduced the							
48	rate of growth of this program, since the Department of Vet-

cally and only those making satisfactory progress are con-  
tinued. Division representatives also insure that the selected  
educational plans are financially sound. The veteran's entitle-  
ment is then budgeted as necessary. As a result of these  
policies, substantial savings are realized and the full \$1,000  
entitlement is seldom used, the average expenditure being  
approximately \$500.

The 1959 Legislature reduced the 1959-60 Fiscal Year  
Budget by \$250,000 on the basis that the department would  
terminate processing new applications from World War I  
veterans on July 25, 1959. However, an increase in enrollment  
of Korean veterans, together with a higher average cost per  
student, primarily due to an increase in tuitions at most  
schools, will partially offset the elimination of new World  
War II applications.

A deficiency of \$300,000 is proposed for the Veterans Educa-  
tion Program in the 1959-60 fiscal year. Without the deficiency  
students desiring to enroll for the first time in the 1960 spring  
semester cannot be accepted for assistance.

The amount proposed for the 1960-61 fiscal year is based  
on an estimated average enrollment of 7,500 veterans.

erans Affairs advises, in most cases, that the federal program  
be used first. Even with the federal benefit, continuation of the  
increased rate of enrollments experienced in recent years is  
expected. This is the result of a larger number of dependent  
becoming eligible each year due to the lower minimum age and  
higher birth rates during and since World War II.

A deficiency of \$189,563 is proposed for the program in the  
1959-60 fiscal year. \$56,500 of this amount is from the General  
Fund and \$133,063 is from the Veterans' Dependents' Educa-  
tion Fund. The additional amount required is primarily the  
result of lowering the age limit to 14.

Chapter 1744, Statutes of 1959, abolished the Veterans' De-  
pendents' Education Fund and placed its reserve and annual  
income of \$300,000 from oil royalties into the General Fund  
effective June 30, 1960.

The amount proposed for the 1960-61 fiscal year is based on  
an estimated average enrollment of 3,000 dependents.

by means of a contractual arrangement with the various vetera-  
nary organizations until December 31, 1959. Beginning January 1,  
1960, the activities will be performed by the Division of Service  
and Co-ordination.

cally and only those making satisfactory progress are continued. Division representatives also insure that the selected educational plans are financially sound. The veteran's entitlement is then budgeted as necessary. As a result of these policies, substantial savings are realized and the full \$1,000 entitlement is seldom used, the average expenditure being approximately \$500.

11	The home provides custodial, medical, and nursing care for	the purpose of conducting a nursing home for the aged. Under the terms of a contractual arrangement between the Department of Veterans Affairs and the lessee, the remaining members will be cared for in accordance with standards of care and service prescribed by the department. An average population of 4 members is estimated for the 1959-60 and 1960-61 fiscal years. Actual membership was 4 on September 1, 1959. No program or workload changes are reflected in this budget.

## GENERAL ANALYSIS

## Objectives

This 5-member nonsalaried commission, created by Chapter 430, Statutes of 1957, is appointed by the Governor to promote and provide for the welfare of and assist in the maintenance of the headquarters of Department of California, United Spanish War Veterans.

## Program and Performance

The program provides for the traveling expenses of the commission and for contractual services with the Department of California, United Spanish War Veterans. No program changes are reflected in the proposed budget.

41	<b>GENERAL ANALYSIS</b>				
42	<b>Objectives</b>				
43					
44	The department has responsibility for planning, constructing,				
45	and operating authorized state water projects; co-operates in				
46	water projects with federal and local government units; takes				
47	responsibility for averting, alleviating, or restoring damaged				
48	property during times of emergency resulting from storms and				
49	floods, and for declaring of an emergency from such causes;				
50	compiles basic data on water resources and water use; compiles				
51	data on diversions and stream flows on the Sacramento and San				
52	Joaquin Rivers and tributaries; performs maintenance work on				
53	the Sacramento River Flood Control Project; approves designs				
54	and supervises construction of all dams, except those federally				
55	owned, as regards their safety; supervises certain flood and				
56	storm damage repairs in which the State participates finan-				
57	cially; supervises certain public water districts; reviews federal				
58	reports on flood control and water supply projects; administers				
59	state filings on water and provides watermaster service; makes				
60	investigations of surface and underground water supplies;				
61	makes water quality investigations; licenses artificial weather				
62	control experiments and operations; administers interstate com-				
63	pacts relating to water; administers the Flood Control Fund to				
64	reimburse local agencies for their costs incurred by co-operation				
65	on federal flood control projects; represents the State on matters				
66	pertaining to the Central Valley Project; conducts engineering				
67	investigations for the California Districts Securities Commis-				
68	sion; supervises construction of hydraulic structures for other				
69	state agencies; has responsibility for investigating and correct-				
70	ing beach erosion; and in co-operation with other agencies,				
71	forecasts snowmelt and other runoff.				
72	The budget for the first time for this department is presented				
73	on a program basis in this part of the document and the usual				
74	organization budget with categories is shown in detail in the				
75	Appendix, in the Water Resources Revolving Fund.				
76	Budgets are presented herein by 7 major programs:				
77	General Administration—the management of departmental ac-				
78	tivities;				
79	Technical Co-ordination—departmentwide co-ordination of en-				
80	gineering, scientific, and technical specialties;				
81	California Water Planning Program—study and analysis of				
82					
83	<sup>a</sup> Detail distribution not available for 1958-59.				
84	<sup>b</sup> Reported as an expenditure in the construction budget.				
85					
86					

the needs and development of recommendations for water development projects;

California Water Development Program—construction of projects authorized by the Legislature;

Basic Data Program—collection, recording, and analysis of data bearing upon the quantity, quality, and availability of water;

Services to Other Agencies—studies, investigations, and construction for other agencies conducted on a reimbursable basis; and

Other Projects and Activities which includes certain statutory and regulatory activities, and other projects unrelated to, or not directly connected with, the major programs.

The detail of salaries and wages including new positions is shown in the organization budget in the Appendix.

## 1960-61 Program

\$34,000,000 in new appropriations are provided for the construction program of the Department of Water Resources.

\$21,400,000 of this will be for continuation of the railroad relocation work at Oroville. The appropriation includes \$4,600,000 for a bridge across the Middle Fork of the Feather River and \$1,500,000 for the Feather Falls Railway relocation. This appropriation will essentially complete the railroad relocation with the exception of minor amounts needed in 1961-62 for the purchase of rails and other materials at an estimated cost of less than \$1,500,000.

The budget includes an appropriation of \$8,400,000 for the Livermore Valley Canal and the Del Valle Reservoir of the South Bay Aqueduct Project. This facility will bring water into the Livermore Valley. Additional appropriations will be needed to conduct the water from Del Valle Reservoir down to Airpoint Reservoir located just east of Milpitas in the Santa Clara Valley.

Funds in the amount of \$4,000,000 are provided to construct the first reach of a subsidence feeder canal which will carry water from the Delta Mendota Canal parallel to the main canal

## DEPARTMENT OF WATER RESOURCES—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	------------------------------	-------------------	----------------------	---------------------

## 1960-61 Program—Continued

## GENERAL ANALYSIS—Continued

for the purpose of flooding certain areas subject to subsidence in order to prepare these areas for eventual construction of the main canal. This canal will ultimately go from the vicinity of the San Luis Reservoir to pumping plant No. VI. The canal will be designed to carry about 400 second-feet of water and will not be used for the delivery of water, other than to the subsidence areas, for state use.

\$120,000 is included to provide for site clearance and preparation necessary to the construction of the dam.

The total planning program is continued at the present level for 1960-61. There are increases in the Basic Data Program and decreases in the California Water Planning Program, which offset in terms of total program comparisons. There were reductions in the program as a result of legislative changes in the 1959-60 Budget Bill; however, subsequent special legislation resulted in augmentations that in effect restored the program when considered in its entirety.

The increases in the design and acquisition staff during the

1959-60 fiscal year subsequent to the final budget, were essentially as a result of the expanded Construction and Acquisition Program included in the final budget for which no corresponding adjustments were made at the time for staff and related expenses. These increases are carried forward into the 1960-61 fiscal year. No increases are included in the budget beyond the 1959-60 complement staff for expansion of the design work pending the final decision on the bond bill, Senate Bill No. 1106.

Appropriations for programs set forth in the State Operations section of this budget will be advanced to the Water Resources Revolving Fund for disbursement in accordance with Section 135 of the Water Code. Amounts so disbursed will be accounted and controlled within the Water Resources Revolving Fund by the State Controller and the department as scheduled in the Appendix of this Budget. These expenditures will be subsequently recorded in each appropriation involved.

Limitations on appropriation will be enforced through work order authorizations.

## PROGRAM SUMMARY

ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
-------------------	----------------------	---------------------

## GENERAL ADMINISTRATION

General Administration is the program involving direction and supervision of all departmental activities. This covers the area of management from the director and his staff, through the division chiefs and district engineer and their branch chiefs, to the section chief level; and/or to the point where project management costs can be identified with the specific project. The 1960-61 Budget provides for a departmental overhead charge to the various projects and activities to spread the costs of the general administrative functions. The overhead charge has been included in the cost of each project and activity.

## Explanation of Program Emphasis

There will be a general increase in administrative costs in the budget year due to expanded executive activity and improved administrative services to the engineering divisions and the district. The position of Deputy Director—Administration and Management, authorized by Chapter 1843, Statutes of 1959, was established during the current fiscal year. The deputy directs the activities of the department, with the reservation of supervision of several activities to the director. An additional line position of Chief Engineer, Department of Water Re-

sources, was also established during the current year, with supervision over the engineering Divisions of Resources Planning and Design and Construction and the Southern California district office.

For the balance of the current fiscal year, and the first half of 1960-61, there will be a substantial increase in the demands on the department for informational and educational material connected with the proposed bond issue of 1¼ billion dollars. The department has an obligation to furnish complete and dependable information so that the electorate may make a fully informed decision in November of 1960.

The Division of Administration will continue preparation for full-scale operation in anticipation of the administrative demands of major construction. Emphasis will be on the continuing transfer of administrative chores from the engineering divisions and district. In order to permit more active participation by the division chief in long-range planning and in the formulation of departmental policy, a position of assistant division chief is being requested in the current year to be responsible for and have full authority over the operations of the division.

## DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>TECHNICAL CO-ORDINATION</b>			
2				
3				
4	The planning, design, and operation of water development			
5	projects require the skills of a number of engineering, scientific,			
6	and technical specialties, such as applied nuclear engineering,			
7	power planning, recreation planning, economic, land and water			
8	use, mapping and surveying, geology, delineation, machine opera-			
9	tions, hydrology, meteorology, and water quality supervision.			
10	The activities in this group represent the department-wide co-			
11	ordination of these specialties. Co-ordination includes functional			
12	supervision, and studies leading to the establishment of depart-			
13	ment policy concerning each specialty, provision of consulting			
14	services, preparation of reports, and determination of operating			
15	procedures.			
16				
17	<b>Explanation of Program Emphasis</b>			
18				
19	The primary objective of power planning is to enable the			
20	State to formulate and adopt policies on power generation and			
21	marketing, and to develop plans for generating power and			
22	pumping aqueduct water. A high degree of co-ordination of data,			
23	methods, procedures, and policies is dictated by the fact that the			
24	department's power planning activities are closely related to			
25	the statewide electric utility industry and its regulatory agen-			
26	cies. The preparation of a formalized manual of methods and			
27	procedures for making power studies will be initiated in 1960.			
28	Studies of integrated power operation of the northern and south-			
29	ern California power markets, using electronic computers, will			
30	also be started.			
31	Recreation technical coordination provides staff assistance to			
32	program planning in order to facilitate the development of a			
33	comprehensive recreation plan in connection with construction			
34	projects. The 1960-61 program is increased over the preceding			
35	year to provide for the employment of personnel to collect, ana-			
36	lyze, and report on statewide data on recreation use, and to			
37	develop standards for design and operation of recreation facili-			
38	ties.			
39	Continuing economic studies coordination provides for review			
40	of state and federal legislation, preparation of drafts for policy			
41	statements regarding economic justification, cost allocation, mar-			
42	keting policies, and related topics, and supervision of the per-			
43	formance of service or supporting work assignments for other			
44	elements throughout the department. This work program will be			
45	continued at an increasing level during 1960-61: passage of			
46	Senate Bills 425 and 1106 at the 1959 Session has increased the			
47	economic studies workload.			
48	The land and water use program involves supervision and			
49	direction of studies in four areas: agricultural use of water,			
50	urban-industrial water use, soil-water movement, and land class			
51	and use. During the 1959 Session, Senate Bill 434 appropriated			
52	funds for expenditure in collection and analysis of rates of			
53	water use, and recurring land use studies to ascertain the			
54	changes in land use and effect of the changes upon water re-

a Program totals not available for 1958-59 and detail not available for 1959-60.

quirements. Management and staff activities directed to the accomplishment of these activities will be continued in 1960-61.

Mapping and surveying technical co-ordination will remain at approximately the same level of performance and expenditure in the 1960-61 fiscal year as in the preceding year, with the continuation of maintenance of a uniform and standardized mapping service for the department and the State.

Department-wide co-ordination of geologic investigation includes the dissemination of geologic information in forms most usable for engineering planning; the investigation of and reporting on geologic conditions to be considered in the design and construction of engineering structures and in the operation of ground water basins, the establishment of uniform standards and co-ordination of work on foundation investigations for dams, canals, tunnels, and other engineering structures, and investigation of ground-water occurrence, movement, recharge, and quality. During 1960-61 the activities will be slightly increased: in addition to continuing technical supervision, a portion of the time of 2 engineering geologists and a geophysicist will be required for special assignments.

No change in program is anticipated in the demand for technical co-ordination of drafting services.

Machine operations and engineering methods technical co-ordination is designed to speed completion of engineering, fiscal, and administrative reports by furnishing computer and data processing equipment and service. Investigation of the application of electronic machine computation and data processing to engineering problems, including the training and direction of specialized groups of engineers in analyzing and preparing complex engineering problems for machine computation or processing, will also continue at the same level in 1960-61.

Major objectives of hydrology methods co-ordination are the selection and development of reliable methods and techniques of hydrologic analysis and procedures, the review and appraisal of current research projects affecting usable water supply, and the appraisal of the scope of programs of collection of basic water data in the State. There will be a slight increase in ground water hydrology studies in 1960-61.

Meteorology co-ordination will continue at approximately the same level during the 1960-61 fiscal year as in the preceding year, with integration of the climatological data and snow survey programs into the work of the department as primary objectives. Meteorologic assistance will be rendered to other programs as needed.

Little change in rate of expenditure is anticipated in the co-ordination of water quality studies. The work program of this continuing activity will include besides technical supervision, attendance at state and regional water pollution control board meetings and legislative hearings, and participation in the Inter-departmental Water Quality Co-ordinating Committee and the Governor's Advisory Radiological Committee.

PROGRAM SUMMARY

CALIFORNIA WATER PLANNING PROGRAM

The California Water Planning Program is an intensive and continuing program of study of the needs for specific local and statewide water development projects, analysis of their economic justification and financial feasibility, where appropriate, and determination of the recommended priority of their construction, using the California Water Plan as a general guide. Such a program is necessary to enable the planning and construction endeavor to keep pace with the needs of a rapidly growing state. The population of the State is increasing at a rate exceeding 500,000 person per year. This increase demands the development of new sustaining supplies of water at the rate of some 750,000 acre-feet per year.

The California Water Planning Program is of necessity a long-range program, wherein works will be recommended for construction when and as they are needed, with due consideration to varying interests.

Explanation of Program Emphasis

Certain new investigations have been added in the current year through legislative action, and will carry forward into the 1960-61 fiscal year, the total program, however, continues at about the same level of activity. Specific instances of reduction are to be noted in local project investigations where principally editorial work and printing will be required on 8 investigations in 1960-61. In this same group, the Colusa Basin Investigation, initiated this year as a result of legislative action, will be completed. Elsewhere in the program, investigations which are in process are nearing completion or are going into phases requiring reduced expenditure for field operations.

LOCAL PROJECTS

Local Project Investigations

These studies are designed to assist local agencies, and assess the state interest relating thereto, in solving water problems locally, before the problems become so critical as to adversely affect economic growth of the State. This is accomplished as the needs arise and funds are made available, through a comprehensive basin-by-basin investigation throughout Central and Northern California (exclusive of the Upper Sacramento, Yuba, and Bear River basins) that will culminate in a plan to maximize benefits both statewide and locally from water resources development. The investigations include collection and analysis of basic data, selection and study of potential units for development, study and analysis of related physical, economic, and practical considerations pertinent to each area, and preparation and publication of a report on each investigation. In this connection full advantage is being taken of studies and data being made and collected under the department's program of Inventory of Water Resources and Requirements.

The program for 1959-60, by Legislative directive, is at a reduced level from preceding years. No additional basin studies

were initiated, and only 1 investigation, the Colusa Basin investigation, was added by the Legislature. During the current fiscal year the Shasta Valley, Upper Pit River, Upper Tule River, Shasta County, and Upper Feather River investigations will be completed. The work program for 1960-61 will consist of completing studies, and editorial work and printing of the related reports on the Mokelumne-Calaveras-Stanislaus River Basins, the Mariposa Area, Tuolumne County Water District No. 2, Southern Tuolumne County, and the Northeastern Counties Ground Water investigations. Editorial work and printing of the reports on the Cache Creek, Branscomb Project, and Alameda County investigations will also be accomplished during 1960-61. The Colusa Basin investigation will be completed and the report printed during the following fiscal year. The basin-by-basin investigative program will be continued during 1960-61 into the Upper Putah Creek Basin, the Madera Area, and the Dunsmuir-Mt. Shasta Area. These new investigations are scheduled to last 3 years.

a Program totals not available for 1958-59 and detail not available for 1959-60.  
b Additional expenditures of \$380,000 are included in the Federal Co-operative Program bringing the total mapping expenditures of the department to an estimated \$596,855 for 1960-61.

## DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>CALIFORNIA WATER PLANNING PROGRAM—Continued</b>			
2				
3				
4				
5	<b>North Coastal Area</b>			
6				
7	This is a long-range continuing investigation to formulate			basin-wide development plan. The work program for 1960-61
8	plans for multipurpose development of the waters of the streams			includes the continuation of studies necessary for the proper
9	in the North Coastal Area. The overall program envisages a			formulation of the optimum plan for comprehensive basin-wide
10	series of studies from which specific projects may be selected			development. It is anticipated that this investigation should be
11	for more detailed study. Projects will be designed to control			completed and a final report submitted in 1963.
12	floods, supply local demands for water, preserve and protect the			
13	fisheries, develop the power potential, and provide water for			
14	export to areas of deficiency throughout the State. The work			
15	program for fiscal year 1960-61 will consist of continuation of			
16	the generalized studies, and will include more detailed studies			
17	of proposed initial development on Middle Fork Eel River and			
18	Upper Trinity River, and associated Sacramento Valley works,			
19	to meet demands for water from the State water facilities.			
20				
21	<b>Upper Sacramento River Basin</b>			
22				
23	This investigation encompasses study of virtually all aspects			
24	of water development, utilization, and control to determine not			
25	only how water resources in the drainage basin of the Upper			
26	Sacramento River between Shasta Dam and Red Bluff can be			
27	developed to meet present and ultimate requirements in this area			
28	as well as in southerly areas of deficiency, but also the manner			
29	in which this goal can be achieved through a rational and eco-			
30	nomical sequence of staged construction. The work program for			
31	1959-60 is being directed toward developing the basic engineering			
32	and economic data necessary for proper formulation of a			
33				
34				
35				
36	<b>Salinity Control Barrier</b>			
37				
38	The Salinity Control Barrier Investigation in the Sacra-			
39	mento-San Joaquin Delta was initiated in 1953. Studies under			
40	Legislative direction have been made of several alternative bar-			
41	rier plans in the San Francisco Bay and Sacramento-San			
42	Joaquin Delta system, with the conclusion that the most feasible			
43	plan would be the Delta Water Project, a system of multipurpose			
44	works in the Delta. Advance planning studies of the Delta			
45	Water Project are required to confirm and refine design and			
46	operational criteria utilized previously, and adequately define ex-			
47	isting physical conditions to conclusively demonstrate the extent			
48	of future project effects. A report on the Delta Water Project			
49	will be prepared in January 1961.			
50				
51	<b>Delta Levees</b>			
52				
53	The broad objective of this study is to obtain extensive soils			
54	data, under field conditions, with which to develop realistic			
55	and prudent design criteria for a master levee system in the			
56	Sacramento-San Joaquin Delta as part of the Delta Water			
57	Project. These data are essential to the development of design			
58	criteria for construction of stable levees at minimum cost.			
59	Tentative location of sites for levee test lie in the central por-			
60	tion of the Delta in San Joaquin, Sacramento, and Contra			
61	Costa Counties.			
62	During 1959-60 the sites will be finally selected and prepared			
63	for materials placement. Instruments and fill materials will be			
64	placed and the data collection and analysis program will be			
65	initiated in the spring of 1960.			
66	During 1960-61, construction work on the levees will proceed			
67	as field conditions permit and the analysis of basic data will			
68	continue. The study should be completed in July 1961 for the			
69	principal tests and analysis, although periodic readings of			
70	certain instruments will be necessary throughout the period of			
71	settlement.			
72				
73	<b>Western Delta</b>			
74				
75	This investigation stems from the need to resolve differences			
76	between local interests, principally in Contra Costa County,			
77	the United States Bureau of Reclamation, and the department			
78				
79				
80				
81				
82				
83				
84

86				

## MAJOR PROJECTS

basin-wide development plan. The work program for 1960-61 includes the continuation of studies necessary for the proper formulation of the optimum plan for comprehensive basin-wide development. It is anticipated that this investigation should be completed and a final report submitted in 1963.

## Yuba and Bear River Drainage Basins

The department selected the Yuba and Bear River Basins for detailed investigation in 1956 because of their water potential and need for flood control. The 1957 Legislature memorialized the President and Congress by Joint Resolution to insure the construction of flood control works on the Yuba River at the earliest practicable date. Additional emphasis was placed on the investigation by the 1958 Legislature, with the directive that the department investigate and prepare plans for works on the Yuba River in the vicinity of Parks Bar Bridge. In addition to completing work on an initial major project for control of the lower Yuba River, plans are being formulated to meet needs for water in specific upstream areas within or adjoining the Yuba and Bear River Basins. An interim report on the investigation will be published early in 1960. The work program for fiscal year 1960-61 will be directed toward completion of studies previously initiated. The investigation is scheduled for completion, with a report programmed in 1963.

## CALIFORNIA AQUEDUCT PROJECTS

regarding the water requirements and methods of delivering water to areas in and adjacent to the western portion of the Delta. Serious questions have been raised regarding the general plan for the distribution of replacement water to areas which would be affected by a reduction in outflow of water for salinity repulsion due to operation of the Central Valley Project, the Feather River, and Delta Diversion Projects, and due to a relocation of the so-called hydraulic barrier to salinity intrusion which could be brought about by construction of the proposed Delta Water Project.

The program during fiscal year 1959-60 is being devoted primarily to the 3 objectives of determining water supply, water requirements, and the plan to supply replacement water. During fiscal year 1960-61, these studies will be continued, with principal emphasis on the allocation of costs and preparation of a report.

## Staging and Programming

This program will provide knowledge of the development potential and probable rate of growth of California, the associated need for water resources development, the most favorable sequence and timing of projects to meet these determined needs, and of the long-range funding requirements for water resources development. This program is statewide in scope.

During 1960-61 all data essential to this study will be collected in the eastern portions of Merced, Stanislaus and San Joaquin Counties, thereby completing the field program for the entire San Joaquin floor. Concurrently, hydrologic analyses, evaluation of the cost and extent of local supply facilities, layout of additional distribution facilities, and projection of future cropping patterns will be conducted in the same area. The information resulting from the data gathering program and the concurrent studies will be synthesized and the growth in demand for import water will be estimated and integrated into overall demand upon the Delta Pool. Studies will be implemented, also, in the Sacramento Valley to determine the probable pattern and chronology of development. In this connection these studies will take full advantage of data being obtained under the programs of the Inventory of Water Resources and Requirements and Central Valley Operation Studies.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	-----------------	-------------------	----------------------	---------------------

CALIFORNIA WATER PLANNING PROGRAM—Continued

CALIFORNIA AQUEDUCT PROJECTS—Continued

Central Valley Operation

This study is to determine the present magnitude and characteristics of Delta surpluses and to evaluate the effects of future developments within the watershed tributary to the Delta on the magnitude and chronology of these surpluses and on the exportable yield of projects dependent thereon.

During 1960-61, the comprehensive analysis initiated in the 1959-60 fiscal year of Delta surpluses and effects thereon of future developments will be continued. In addition operation studies of Central Valley storage and water supply with proposed imports from the North Coastal area will be undertaken. This program will consist of a large number of operation studies of existing and proposed Central Valley water development projects, with North Coastal imports, to determine the optimum scheduling of surplus water into the Central Valley. In addition, a land use survey will be initiated on the Sacramento Valley floor.

Sacramento Valley Seepage Investigation

This program has as its objectives evaluation of existing and probable future damage resulting from seepage of the Sacramento and Feather River systems and formulation of comprehensive plans to resolve existing and anticipated future seepage problems. Determination of existing seepage damages along the river system affected by the Feather River Project will provide the basis for determining the authenticity of claims for damages once the project has gone into operation and as a basis for allocation of costs of remedial works to the Feather River and subsequent projects.

Fiscal year 1959-60 constitutes the first year of a 4-year investigation. Study consists of surveys and analyses of river stages and associated seepage damages, effects of seepage on crop

yields, and of permissible cropping patterns and farm production costs. During 1960-61, these studies will be carried forward. In addition, geologic investigations of specific seepage problem areas will be undertaken. The survey of physical and economic damages will be completed and an interim report covering these two aspects will be initiated.

San Joaquin Valley Drainage Investigation

The program objective is the formulation of a comprehensive drainage plan to meet the needs of the entire San Joaquin Valley. A 4-year study was originally contemplated but it became apparent during the first year of the investigation that development of the plan, and the sizing and staging of the indicated drainage facilities could not be determined without detailed data covering land class, water quality, and geology as it affects the movement of ground water. The investigation period has been extended to 6 years, permitting a more thorough and competent analysis of the problem.

During the 1959-60 fiscal year the program emphasis is on precise definition of the areas of the valley where there is presently a drainage problem and determination of the cause; the development of an estimate of the optimum drainage requirement by decades until 2020 for the Tulare Lake Basin; and the preparation of an estimate of the cost of the facilities to handle the drainage requirements of the Tulare Lake Basin until the year 2020. The program will be continued in 1960-61 with the essential completion of the general data collection program covering the west side area of the San Joaquin Basin. The design and cost estimating activity will be intensified, as will the studies to determine the basis for cost allocation and repayment. A progress report will be published in January 1961.

OTHER INVESTIGATIONS

Inventory of Water Resources and Requirements

Chapter 61, Statutes of 1956, later codified as Section 232 of the Water Code, authorizes the department to make a comprehensive investigation of water resources and requirements. The objectives of the program are to determine the watersheds of the State and subdivisions thereof, the boundaries of which must be identified to present adequately data on water supply, use, and requirements, and water supplies available for export; the quantities of water originating in each watershed; the quantities of water reasonably required for ultimate beneficial use; the present diversions, imports and exports of water, together with the present uses of water, and the apparent claim of water rights attaching thereto; and the quantities of water potentially available for export from, or the deficiency of water supply in, each of the respective watersheds. The basic data requirements of the Staging and Programming Studies, and the Inventory of Water Resources and Requirements are similar in many respects; the 2 programs are closely co-ordinated to preclude overlap.

During 1959-60 land and water use studies are continuing with fieldwork in the Putah-Cache and American River Hydrographic Units. Land and water use reports will be completed for the Tule, Trinity, Yuba-Bear Rivers, Klamath River, Shasta-Scott Valleys, and Smith River Hydrographic Units. Stream gaging, water quality sample collection and analysis, meteorologic observations, consumptive use determinations, determination of water requirements for fish and wildlife, economic studies, and hydrologic studies will be continued in the North Coastal and Central Valley areas.

During 1960-61 land and water use studies will continue with fieldwork in the Sacramento Valley Northeast, Feather River, and either in Marin-Sonoma and Napa-Solano Hydrographic Units, or the Shasta-Lake Hydrographic Unit. Land and water use reports will be completed in the Eel River, Mad River, Redwood Creek, Russian River, Mattole River-Mendocino Coast,

Lost River-Butte Valley, and Sacramento Valley West Hydrographic Units. Work preliminary to the water supply and water requirements reports will be continued during 1960-61 in the North Coastal and Central Valley areas.

West Walker River

This investigation is to develop and outline projects for the utilization of small mountain lakes in the West Walker River Basin as storage reservoirs for the conservation of additional water for use in the area. Collation and analysis of data and preparation of a final draft of the report will be completed during fiscal year 1959-60. The final report will be published in 1960-61, following review and comment by interested parties.

Reclamation of California From Wastes—Southern California District

The reclamation of water from wastes study, carried in the 1959-60 fiscal year in the Data Program, is part of the 1960-61 California Water Planning Program, with the emphasis of feasibility reports rather than on basic data collection. The district conducts comprehensive and detailed surveys in metropolitan areas to determine the quantities of water available for reclamation and the quality which could be expected. These comprehensive surveys include studies of potential markets for reclaimed water, facilities for the reclamation and distribution of water, and preliminary estimates of the cost of water reclaimed. During 1960-61 the activity will be expanded to keep pace with the increasing discharge of waste water. The report on feasibility of reclamation of water from wastes in the San Diego metropolitan area will be completed, and field work initiated on a detailed study of the feasibility of reclaiming water from wastes in the Antelope Valley area.

LINE	PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>CALIFORNIA WATER PLANNING PROGRAM—Continued</b>			
2	<b>OTHER INVESTIGATIONS—Continued</b>			
3				
4				
5				
6	<b>Sea-Water Intrusion Studies—Southern California District</b>			
7				
8	This program is designed to secure geologic, hydrologic and			
9	water quality data essential for the detection and reporting on			
10	the extent and rate of sea-water intrusion and to formulate			
11	plans to halt and control sea-water intrusion. The 1960-61 fiscal			
12	year work program will continue at about the same level as in			
13	1959-60 with collection, analysis, and evaluation of water			
14	quality, geologic, and hydrologic data from areas of sea-water			
15	intrusion.			
16				
17	<b>Investigation of the Planned Utilization of Ground Water</b>			
18	<b>Basins—Southern California District</b>			
19				
20	This investigation is a comprehensive study of the major			
21	ground water basins of Southern California designed to formu-			
22	lation of a plan of operation to permit maximum utilization			
23	of these basins, and to permit coordination with water			
24	supplies imported from the Colorado River and Northern Cali-			
25	fornia.			
26	During 1959-60, the geologic investigation of the Los Angeles			
27	coastal plain will be completed, and the investigation of the			
28	hydrologic and operation studies of coastal Los Angeles County			
29	undertaken. The geologic investigation of the upper San Gabriel			
30	River Basin is scheduled for completion in 1960. The hydrology			
31	studies of the upper San Gabriel River Basin will commence			
32	during 1960-61 while geologic investigations of the Orange			
33	County coastal plain are carried out. The operational program			
34	for the ground water basins of coastal Los Angeles will be			
35	completed in 1960-61. This will be a continuing program aimed			
36	at maximum utilization of ground water basins in Southern			
37	California.			
38				
39	<b>Hydrologic Studies—Southern California District</b>			
40				
41	The objectives of this program are to provide the interpreta-			
42	tion and analysis of the basic hydrologic and related data			
43	needed to establish and facilitate methods and procedures for			
44	use in the district's investigation of the water resources of			
45	Southern California. During 1959-60 review will be made of the			
46	existing network of stream gaging stations in the Southern			
47	California District to determine the need for continuing the			
48	gaging stations in the existing network, and to establish new			
49	stations in areas where basic runoff data are critically required.			
50	Special emphasis will be placed on developing criteria for con-			
51	junctive operation of ground water basins of Southern Califor-			
52	nia with both local and imported supplies.			
53	The activity during the 1960-61 fiscal year will continue			
54	approximately at the same level as 1959-60. Work will be con-			
55	tinued in developing criteria for conjunctive operation of ground			
56	water basins in Southern California with emphasis on special			
57	or localized basins.			
58				
59	<b>Project Planning—Southern California District</b>			
60				
61	The primary objective of this program is to provide complete			
62	and detailed information on water resources and plans for water			
63	resources development to assist local areas in understanding and			
64	solving their water problems.			
65	During 1959-60, an investigation of the water resources and			
66	possible developments in Inyo-Mono Counties was initiated, as			
67	requested by Senate Resolution, but is limited to a reconnais-			
68	sance study of existing data and proposed developments since			
69	no funds were specifically appropriated. A study will be started			
70	in 1960-61 of flood control needs and plans for San Diego			
71	County for the purpose of developing a comprehensive master			
72	plan of flood control for the county. The city and county have			
73	agreed to match funds appropriated by the State for the in-			
74	vestigation. During 1960-61 work will be concentrated on			
75	evaluation of existing flood control works and analysis of the			
76	planning of other agencies, followed by an inventory and evalua-			
77				
78				
79				
80				
81				
82				
83				
84				
85				
86				

tion of historical floods. This work will be in preparation for the development of a master flood control plan.

**Vegetative Water Use Studies**

Vegetative water use data are needed to compute irrigation and drainage requirements and to determine attendant irrigation practices. The data are also essential to the solution of engineering problems involving surface and ground water hydrology and are used in solving legal problems relating to water rights. Activities are directed to field measurements of consumptive use of applied water by all types of vegetation, together with measurements of water quantities actually used and required for the irrigation of crops under varying climate, land, and water use conditions.

**Urban Related Water Use Studies**

The objective of the program authorized by Chapter 2090, Statutes of 1959, is to determine unit values of water use by various urban, industrial, and recreational demands throughout the entire State, subdivided by appropriate area, type of user, and function. Past and present unit values of water use must be known in order that trends in rates of use may be determined by means of time projections. The study of urban related water uses includes the collection and compilation of data on water requirements of the numerous groups of users. A large portion of the work involves the accumulation of data from public agencies and from private companies and individuals.

For the 1959-60 fiscal year the program is limited to acquiring only broad municipal water-use data and to initiating some comprehensive water-use studies in special areas. With greater emphasis on this work in the 1960-61 fiscal year, it is expected that more detailed studies will be initiated.

**Land and Water Use—Southern California District**

The periodic detailed program of studies of land and water use was initiated to provide information of the changing pattern of growth of population, industry, and agriculture, caused by economic, climatic, and other factors. This information is used to determine present, future, and ultimate water requirements as a basis for planning for importation and distribution of water in Southern California.

During the 1959-60 fiscal year, this activity is being continued at approximately its present level. It is expected to complete final reports on land and water use for the desert areas, the Upper Santa Ana River drainage area, and San Diego County. The principal field survey and office reduction of the resulting data for the San Luis Obispo and Santa Barbara Counties will be completed. Preliminary work for a field survey in the coastal portion of Los Angeles County will also be completed.

During 1960-61 field survey will be conducted to derive land use in Coastal Los Angeles County; preparation of the report should be completed during the year. It is also planned to complete the report of the San Luis Obispo and Santa Barbara Counties survey during the budget year.

**Unit Water Use—Southern California District**

This activity was established during 1959-60 pursuant to Chapter 2090, Statutes of 1959. Studies are being initiated during 1959-60 emphasizing urban water requirements. These studies will be continued during fiscal year 1960-61, in an endeavor to differentiate between the applied water requirements and consumptive requirements for water with particular respect to urban residential and various types of industry.

Also, during fiscal year 1960-61, it is planned to initiate studies to augment available knowledge regarding the consumptive use of agricultural crops in coastal areas of Southern California.

------	-----------------	-------------------	----------------------	---------------------

## CALIFORNIA WATER DEVELOPMENT PROGRAM

This part of the budget includes the staff and related expenses for the design, acquisition, and construction supervision activities necessary to the construction program. The design and acquisition staff are located organizationally in the Division of Design and Construction at Sacramento and Glendale. The construction supervision staff is organizationally in the Division of Design and Construction, but geographically located in the field at the construction site. Construction field offices have been established for the Upper Feather, Oroville, and the South Bay Aqueduct projects.

The expenditures for the Acquisition and Construction Super-

vision staff are included in the construction budget. While the expenditure detail is included in the construction budget it is necessary to show the same detail in the state operations budget to show a complete program herein and to provide an easy mechanism for integrating the program and organization budget which will be shown in the Water Resources Revolving Fund. This approach facilitates construction of the budget, it will aid in explanation of the budget, and will be of distinct advantage in subsequent administration of the program. This program was shown in the capital outlay section of the budget in 1959-60, page 863.

<sup>a</sup> Included in General Administration of the department and prorated to the projects and activities by the departmental overhead.

PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
-----------------	-------------------	----------------------	---------------------

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

Oroville Division

During fiscal year 1960-61, design and contract drawings and specifications will be prepared for the diversion tunnels. Final design work on the main dam embankment, intake structure, power conduits, and powerhouse structure will be 75 per cent completed. Model studies will be made of the diversion tunnel and power conduits. Model studies of the pump-turbine installation in the Oroville Power Plant will be made at a hydraulic machinery laboratory yet to be selected. Design studies on mechanical and electrical features of the project will continue and specifications will be written for designs as they progress.

Upper Feather Division

The major portion of the construction will be accomplished during the 1960 construction season from approximately April through October. Due to the high elevation of the location of the dam the contractor is unable to work during the winter.

San Luis Division

The San Luis features, consisting of San Luis Dam, San Luis Forebay, and Lower Los Banos Dam, will serve as regulating features for the San Joaquin Valley-Southern California Aqueduct. Design and construction of these features will be done by the department in co-operation with the U. S. Bureau of Reclamation. The design program has for its objective completion of design by 1963 when construction will begin.

South Bay Division

Design work on the project began in July of 1956. Plans and specifications have been completed for the first units of the project and contracts have been awarded for construction of the forebay features. Final designs will be completed by June 1961 for the entire project.

The work for 1960-61 will consist of detail design of the Livermore Valley Canal to Arroyo del Valle, and Del Valle Dam, Reservoir and appurtenant structures.

San Joaquin-Southern California Aqueduct Division

Design studies to determine the aqueduct alignment are in progress and will be completed in 1960 for the reach from the Delta to San Luis Reservoir. Final plans and specifications will be completed in July 1966 for all construction features of this

reach. Design studies, final design work, and specifications will be completed in 1967 to permit completion of construction from San Luis to the south portal of the Tehachapi tunnels in 1970. Preliminary design work, necessary for property acquisition will be carried on during 1960-61.

North Bay Division

This project has for its objective the supplying of supplemental urban and irrigation needs of potential service areas in the north bay counties.

During 1960-61, engineering surveys will be made to determine aqueduct location and place land ties. Data on foundation conditions and hydrologic characteristics of the drainage area will be gathered.

Coastal Aqueduct Division

Studies of the general alignment from Avenal Gap to Polonio Pass, and pumping studies will be completed during fiscal year 1959-60. Work in 1960-61 will include field surveys and establishment of control points, geologic mapping and sampling, and economic studies for the Antelope and Kettleman plains. Preliminary design of this reach of aqueduct will be completed sufficiently to establish alignment for right-of-way acquisition.

Aqueduct Subsidence Study

This program is supplying data for use in solving the serious problems of surface subsidence which occurs along some reaches of the San Joaquin Valley-Southern California Aqueduct. With the data obtained, construction procedure and canal liner design can be established.

Work along the aqueduct alignment in the San Joaquin Valley will be completed in 1959-60. Work at the Mendota test site will be continued into 1960-61 and exploratory drilling to supplement the test plot data will be started.

Regional Subsidence Exploration

This program provides design data to define the extent and magnitude of shallow land subsidence along the west side of the San Joaquin Valley. The work will continue during 1960-61 in the areas of the mudflow study, source area study, and aerial photographic interpretation.

## PROGRAM SUMMARY

ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
-------------------	----------------------	---------------------

## BASIC DATA PROGRAMS

## Explanation of Program Emphasis

The program of observing, collecting, analyzing, and reporting basic data is essential to water project development, flood control, and protection of water supply and its utilization. The department and other public agencies cannot accomplish their statutory and organizational directives without historical and current data concerning water supplies, water qualities, water uses, and water rights.

Basic data related to water are observed by many agencies, both public and private, with a scope and accuracy limited by their particular purposes. The department takes advantage of these limited data, and also gathers the additional data needed for the State's purposes of administration, planning, design, construction, and operation.

The basic data program is continuous. The water records of 1860 are being used with those of today. Today's record and tomorrow's record are the basis for future administration, planning, design, construction, and operation.

The 1960-61 Basic Data Program shows a change in program emphasis, with some projects being initiated, some studies accelerated, and other activities being discontinued or de-emphasized. A major shift is the transfer of hydrologic studies from the Basic Data Program to the California Water Planning Program in the Southern California District.

Future conditions (water quality), waste water reclamation certain aspects of the land and water use program, and the surface water measurement program are being de-emphasized. Work will be discontinued on the well standards investigations (Northern California), and on the water quality data compilation program in the Sacramento-San Joaquin Delta.

Programs receiving some emphasis are several water quality activities and ground water measurement. A new program of sedimentation studies will be initiated. There is some increase in the program for basic hydrologic data collection in the Southern California District due to conversion to machine processing.

## SURFACE WATER MONITORING

The objectives of the surface water monitoring program are to secure continuous and reliable water quality data, on a monthly basis, from a network of sampling stations located so as to be representative of all the major surface streams and lakes of the State, to study and interpret chemical, physical, and radiological information collected, and to detect changes in water quality and to alert the appropriate control agency (Regional Water Pollution Control Board, state and local health departments, State Department of Fish and Game) when adverse quality changes are detected. An additional objective

is to assemble and collate statistics from all sources for areas where water quality conditions are particularly critical.

With the exception of the Sacramento River Biochemical Oxygen Demand Study, the work program for 1960-61 will be a continuation of the 1959-60 program. The Sacramento River BOD study will be integrated into the Sacramento River Water Pollution Survey, approved by the Legislature in 1959. Other changes will include the addition, deletion, or relocation of sampling points as conditions warrant.

## GROUND WATER MONITORING

The objectives of the ground water quality monitoring program are to secure continuous and reliable water quality information on ground waters of the State, exclusive of the Southern California District, to study and interpret chemical, physical, and radiological information collected, to detect changes in ground water quality and to alert the appropriate regulatory agency (Water Pollution Control Board or state

and local health agencies), when adverse quality changes are detected.

The work program for 1960-61 will be a continuation of the 1959-60 program, with modification to be made to assure the maintenance of a comprehensive ground water monitoring program. Additional areas will be included as manpower and conditions permit.

## INVESTIGATIONS OF FUTURE WATER QUALITY CONDITIONS

Objectives are the determination of quality of the water that would be developed by export projects, including the effects of conjunctive operations of surface and ground water resources, and determination of the suitability of export water for beneficial purposes when used directly, as well as in conjunction with local surface and ground water supplies in the areas of deficiency. The area encompassed by these studies includes the areas of surplus water supplies in Northern California and the areas of deficient supply located generally in the southern portion of the State.

In 1959-60 detailed studies of the Sacramento Valley are being continued. The report "Water Quality—Feather River Project," is scheduled for completion during this year. During

1960-61 additional studies will be undertaken as time and funds are available: studies in the Sacramento Valley to determine effect of deep percolation of applied irrigation water upon quality of underlying ground water; effects of highly mineralized artesian ground water on surface water quality, and effects of irrigation return water upon the quality of ground and surface water; studies to determine a more rapid method for the development of correlation curves (flow vs. quality); and a comprehensive water quality study of the Middle El watersheds to ascertain the quality of exportable water and to evaluate the effects of these waters upon the quality of the Sacramento River.

## DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
BASIC DATA PROGRAMS—Continued			
WATER QUALITY INVESTIGATIONS OF PROBLEM AREAS			
The objective of this program is to determine the causes and sources of impairment to quality of waters in particular areas where such conditions exist or are threatened, and to recommend methods to remedy or prevent such conditions.		tify the sources of) degradation of surface or ground waters results from waste disposal practices of operators in the oil field.	
A final report on the water quality of Pajaro Valley, Santa Cruz-Monterey Counties, is scheduled for completion in 1959-60. Work will continue in co-operation with the United States Geological Survey in Kern County, to determine if (and iden-		Areas included in the program for 1960-61 are Shasta, Sutter, and Yuba Counties, and Salinas Valley, Monterey County; however, investigation in other areas may take precedence if such water quality problems are deemed more urgent.	
RECLAMATION OF WATER FROM WASTE DISCHARGES			
The program objective is to evaluate the quantity and quality of wastes presently being discharged to tidal waters and inland streams and rivers to determine the feasibility of re-using waters reclaimed from such wastes to supplement avail-		able surface and ground water supplies. Work will continue during the 1960-61 fiscal year at a somewhat lower level of activity than during 1959-60, with the completion of data collection in several investigations and preparation of reports.	
SACRAMENTO RIVER WATER POLLUTION SURVEY			
Objectives are to conduct an intensive investigation of water pollution conditions in the Sacramento River, to obtain detailed information regarding the quantity and quality of wastes presently discharged to the river, to obtain sufficient information regarding the entire broad spectrum of water quality characteristics to enable definition of existing water quality conditions, to detect pollution conditions, and recommend pollution abatement measures, to establish waste assimilation characteristics and capacity, to establish monitoring stations at key locations, and to establish a guide to the use of judgment and control in the continued maintenance of the quality of water supplies in the river.		1960. Following completion of field operations in the spring of 1961, detailed evaluation of the data and preparation of a final report will be initiated. A special support item will be submitted to continue financing of this work.	
This study started September 18, 1959, under authority of Chapter 1909, Statutes of 1959. Detailed plans for accomplishment of this study will be prepared in 1959-60. Since a water pollution survey of this extent and magnitude is unprecedented, a consultant, or a board of consultants, may be required to provide guidance to final details of the planning and to prosecution of the study. Actual sampling will commence early in		Applied nuclear engineering provides assistance in development of feasible and economical saline water conversion processes, and evaluation of applications of nuclear and other nonconventional types of energy in the form of heat or electricity to conversion of saline water and to pumping of large quantities of fresh water. Emphasis during the 1960-61 fiscal year will be on studies of the application of nuclear energy for pumping, as a source of heat and electricity, together with corollary studies of hazards, waste disposal, etc. The program will also include investigation of the engineering and economic feasibility of large-scale brackish water conversion of drainage water in the Tulare and Salton Sea areas. Contracts will be initiated with consultants and the University of California to investigate or assist in the development of one or more of the most promising conversion methods.	
SEDIMENTATION STUDIES			
Under a companion program the United States Geological Survey is gathering basic data on the characteristics and quantities of sediment transported by California streams. The objectives of the State's program are to initiate evaluation of the available sediment data to determine their adequacy for purposes of project selection and design, estimate the rate of sediment accumulation in reservoirs to permit adequate allowance of storage capacity for this factor and to establish eleva-		tions for outlet works to be used in design, and to estimate the effect of construction of reservoirs and diversion works upon stability of channels above and below the facilities.	
		Sedimentation studies will be initiated in an area of need not to be covered by the co-operative studies of the Geological Survey. In fiscal year 1960-61 this work will be largely of a preliminary and exploratory nature.	
GROUND WATER MEASUREMENT			
The objectives are the collection and processing of the depth-to-water measurements made in some 13,000 wells in northern and central California in co-operation with the U.S. Geological Survey, the U.S. Bureau of Reclamation and local agencies, and to gradually extend water level measurements and collection of other basic ground water data to all significant ground water basins in the State.		and other local agencies. Existing well grids will be expanded and new ones will be established in several areas. Additional basins are being included in the monthly key well observation program. During the 1960-61 fiscal year the activity will be continued with some expansion over the 1959-60 level. Principal additional work will comprise the incorporation of the well measurement programs currently conducted as part of the North-eastern Counties Ground Water Investigation into the sustaining activity of the unit.	
During the 1959-60 fiscal year the activity is being continued at its former level. Negotiations are continuing in an effort to extend the co-operative program to include additional counties			
STREAM GAGING OPERATION AND MAINTENANCE			
This activity is designed to provide detailed and accurate stream flow data of interest for local areas an data for refinement of record of general hydrology stations. This activity is concerned with the gathering of stream flow data at approximately 80 gaging stations. The locations of the stations are determined by the needs of specific data for project planning		and are co-ordinated with those of the Federal-State Co-operative Program.	
		The program for 1959-60 calls for continued operation of the established gaging stations plus the addition of 8 stations constructed during 1958-59. The 1960-61 program provides for operation of 10 new stations constructed during 1959-60 less approximately 6 stations to be discontinued in October 1960.	
SACRAMENTO RIVER TRIAL DISTRIBUTION			
The objectives of the Sacramento River Trial Distribution Program are to facilitate a negotiated settlement between the United States Bureau of Reclamation and the local water users along the Sacramento River and in the Delta regarding their respective entitlements to the use of water and, through contractual arrangements, to provide a supplemental water supply for these water users. The successful culmination of these negotiations is essential in order that federal appropriations for water development in California and progress on the California Water Development Program not be impaired by litigation. This will also protect the water users' interests, permit the Central Valley Project to operate as designed, and allow major develop-		ments of the State's water resources to proceed in an orderly manner.	
		The major recent work on this program has been to supply background data on hydrology and water rights developed under the Trial Distribution Program, and to assist in co-operative studies of water use and water rights as an aid to the Bureau of Reclamation and the local water users. A final agreement on contract terms may be reached between the Bureau of Reclamation and the local water users during the 1960-61 fiscal year. Continued activity by the Trial Distribution staff will be required during the 1960-61 fiscal year to provide background data and perform special studies to facilitate the negotiations.	

## DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>BASIC DATA PROGRAMS—Continued</b>			
2	<b>FEATHER RIVER TRIAL DISTRIBUTION</b>			
3	The objectives of the Feather River Trial Distribution Program are to obtain factual data for, and to conduct negotiations between, the State of California and the local water users along the Feather River. These negotiations are with regard to respective entitlements to the use of the natural water supply and to the provision of a supplemental water supply for the local water users after completion of Oroville Dam and other upstream works of the Feather River Project. Activities are closely co-ordinated with those of the Sacramento-San Joaquin Water Supervision Activity.			
4	The measurements of diversions and applied water were continued through the 1959 irrigation season to insure that adequate factual data will be available for future negotiations or contracts between the water users and the State.			
5	During the 1960-61 fiscal year, it is anticipated that negotiations will be under way between the State and the local water users. The staff of the Trial Distribution Unit will be called upon to supply background data and such other information as may be required to facilitate the negotiations.			
6	<b>SACRAMENTO-SAN JOAQUIN WATER SUPERVISION</b>			
7	The program objective is to collect and record all of the basic hydrographic data needed for the formulation of an agreement among the water users so that the natural water supply can be distributed to those entitled to receive it. This involves gathering of basic data relating to water supply and water utilization in the Sacramento and San Joaquin Valleys, measurement of flood flows and stages on major streams in the Central Valley, and the recording of tidal fluctuations in the Sacramento-San Joaquin Delta.			
8	The 1958-59 level of activity is being maintained during the 1959-60 fiscal year. Water supervision work is well stabilized with only minor changes in 1959-60 resulting from possible addition or deletion of a small number of points of diversion and gaging stations. The program for 1960-61 calls for a substantial reduction in the number of gaging stations and points of diversion.			
9	<b>CO-OPERATIVE SNOW SURVEYS</b>			
10	The snow survey provides as efficiently and accurately as possible sufficient data each year to forecast the spring and summer stream flow. The California Co-operative Snow Survey Program consists of regularly scheduled measurements at about 300 snow courses in mountainous areas of the State. Additional snow data are obtained from general area photographs, radio-active snow gages and photographs of aerial snow-depth markers. Co-operators in the California Co-operative Snow Survey Program assist in support of the program either with contributed funds or by participation in field work.			
11	During the 1959-60 fiscal year, all activities needed in the co-ordination of surveys, the maintenance program, the forecasting activities, and the publication of annual Water Conditions Reports are continuing as in preceding years. In addition, all snow measurement data is being checked and put on punched cards; snow courses are being reviewed and revised to standardize sampling point configuration; snow course maps are being redrawn and distributed; a summary of all historical snow data is being published; and a number of runoff forecast schemes are being reviewed and revised.			
12	During 1960-61, present activities will be continued and supplementary projects completed; all snow courses will be reviewed for correlation and measurement schedule suitability; individual watersheds will be reviewed for adequacy of present snow data collection program; aerial snow-depth marker and snow cover reconnaissance programs will be studied; new forecast schemes will be completed for streams not presently being forecast. A project will be started to investigate the effects of rainfall on snow.			
13	<b>CLIMATOLOGIC DATA</b>			
14	The primary objective of the climatologic data program is to gather, correlate, and maintain reliable weather data. The program includes: the evaluation of the adequacy of current climatological data-collection program in California; the promotion of increased weather data collection in record-deficient areas through co-operating agencies and individuals; keeping current map and tabular indexes of all climatological stations in and adjacent to California; and preparation of narrative summaries and tables of precipitation data for use in the Department's Water Conditions Reports. As part of the program, the State assists the United States Weather Bureau in its California data collection activities.			
15	During 1959-60, records of climatological data are being processed and programs augmented to develop machine methods for processing. The job of collecting, reviewing, and editing all evaporation records in California is being started. The work program carried on in 1959-60 will be continued at the same level during 1960-61.			
16	<b>BASIC HYDROLOGIC DATA COLLECTION—SOUTHERN CALIFORNIA</b>			
17	The objectives of the basic hydrologic data collection activity are the gathering and compilation of hydrologic information for use in the investigation, planning, and design of water resources developments in the Southern California District. During 1959-60 efforts are being made to expand the collection of data through co-operating local agencies in San Diego and San Luis Obispo Counties and the inland desert areas. In addition, a summary of water supply conditions in Southern California in 1957-58 will be computed and published. The processing of precipitation and water quality data by machine methods is being initiated. The field activities connected with weather modification studies in Santa Barbara and Ventura Counties are being done in the Southern California District during the 1959-60 fiscal year, which effort will conclude the studies.			
18	During the 1960-61 fiscal year, the program of collection, maintenance, and publication of basic hydrologic data will be continued at approximately the 1959-60 level; however, there will be increased activity in machine data handling. The program of converting data files to the State Well Numbering System must also be rapidly expanded in order that historical files may be processed by machines.			
19	<b>WATER QUALITY MONITORING—SOUTHERN CALIFORNIA</b>			
20	The work program for 1959-60 in Southern California will include monitoring surface water quality at about 150 sampling points and ground water quality at about 1,700 sampling points. District and contract laboratories will perform about 2,300 mineral analyses of water samples. Work will continue on the development of basic water quality characteristics of the surface and ground waters of Southern California.			
21	The intensified use of ground water and the increase in areal extent of such use in Southern California make it necessary to extend and intensify coverage of the ground water quality monitoring program during 1960-61. Results of the program must be evaluated to ascertain the effect upon water quality of increased pumping and of waste water discharges which may reach ground water bodies. All of this information is needed in the planning and scheduling of construction of the San Joaquin Valley-Southern California Aqueduct System to provide delivery of imported waters of suitable quality and adequate quantity to prevent irreparable loss or serious damage to Southern California's economically important ground water basins.			

## DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>BASIC DATA PROGRAMS—Continued</b>			
2	<b>WATER QUALITY INVESTIGATIONS—SOUTHERN CALIFORNIA</b>			
3	In the water deficient area of Southern California, the main-			
4	tenance of water quality is one of the basic objectives of any			
5	comprehensive water plan. The objectives of the program are to			
6	study the water quality problems of local areas and the problems			
7	of salt balance in ground water basins, and to investigate the			
8	water quality changes that may be expected under future condi-			
9	tions. In addition, these investigations provide a basis for the			
10	formulation of plans for the comprehensive development of the			
11	local water resources and the storage and distribution of im-			
12	ported water supplies.			
13	During 1959-60 special studies of problem areas will con-			
14	tinue. Emphasis will be placed on studies of salt balance in			
15	ground water basins. During 1960-61 the water quality in-			
16	vestigations will continue at about the same level as in 1959-60			
17	except for increased emphasis on salt balance studies.			
18	<b>RECLAMATION OF WATER FROM WASTES—SOUTHERN CALIFORNIA</b>			
19	The reclamation of water from wastes study, carried in the			
20	1959-60 fiscal year in the Data Program, is part of the 1960-61			
21	California Water Planning Program, with the emphasis of			
22	feasibility reports rather than on basic data collection. The			
23	district conducts comprehensive and detailed surveys in metro-			
24	politan areas to determine the quantities of water available for			
25	reclamation and the quality which could be expected. These			
26	comprehensive surveys include studies of potential markets for			
27	reclaimed water, facilities for the reclamation and distribution			
28	of water, and preliminary estimates of the cost of water re-			
29	claimed. During 1960-61 the activity will be expanded to keep			
30	pace with the increasing discharge of waste water. The report			
31	on feasibility of reclamation of water from wastes in the San			
32	Diego metropolitan area will be completed, and field work initi-			
33	ated on a detailed study of the feasibility of reclaiming water			
34	from wastes in the Antelope Valley area.			
35	<b>WELL STANDARDS INVESTIGATIONS—SOUTHERN CALIFORNIA</b>			
36	The report on recommended water well practices for the pro-			
37	tection of ground water quality in the West Coast Basin of			
38	Los Angeles County will be completed during 1959-60 and work			
39	for preparation of similar reports in other areas will be con-			
40	tinued. During 1960-61 the report on recommended water well			
41	standards in the Central Basin of Los Angeles County will be			
42	completed. Additional work on this program will be devoted to			
43	field and office work on water well standards for the Oxnard			
44	Plain Basin of Ventura County.

SERVICES TO OTHER AGENCIES

The department undertakes water studies, investigations, and construction for other agencies as work programs permit or as the Legislature directs. Such projects are financed on a completely reimbursable basis.

Studies may include development of data or information on questions related to water resources, investigations of water facilities at State institutions, design or review of plans for proposed water projects, and, as performed for the California-Nevada Interstate Compact Commission, all the administrative, legal, and engineering services required by that body.

The department is currently involved in the construction of 2 projects for other agencies. These are the construction

of the Lower San Joaquin River Flood Control Project for the Reclamation Board, and the construction of the Whale Rock Project for the Department of Finance and the city of San Luis Obispo.

Explanation of 1960-61 Program Emphasis

Construction will be well underway on the Lower San Joaquin River Flood Control Project. The Whale Rock Dam and appurtenant structures are estimated for completion during the year. Special studies for other agencies are difficult to determine in advance but the level of effort should remain approximately the same as in prior years.

SERVICES TO THE CALIFORNIA-NEVADA INTERSTATE COMPACT COMMISSION

The function of the Commission is to co-operate with a similar commission representing the State of Nevada in formulating and submitting to the Legislatures of both states for their approval an interstate compact relative to the distribution and use of the waters of Lake Tahoe, and the Truckee, Carson and

Walker Rivers. The department conducts the engineering investigations for and furnishes administrative, fiscal, clerical, and other services to the commission. This service is authorized annually by interagency agreement.

SERVICES TO THE KLAMATH RIVER COMPACT COMMISSION

The major purpose of the compact commission is to provide for the equitable distribution and use of the waters of the Klamath River between the two states. The department furnishes the services of an employee, and his related expenses, as execu-

tive director for the commission. This service is authorized annually by agreement. No change in the program is anticipated in 1960-61.

FLOOD CONTROL MAINTENANCE AREAS

Features of the Sacramento River Flood Control Project that are not a state responsibility must be maintained by local agencies, in accordance with federal regulations. However, if they so desire, the local agencies can request the State to perform this function for them with the local agencies reimbursing the State for the cost of work done.

The work program is similar for the 2 years, 1959-60 and 1960-61; performance of the necessary maintenance activities in 13 maintenance areas with an estimated 140 miles of levees, and possibly increased number of areas in the near future.

LOWER SAN JOAQUIN RIVER FLOOD CONTROL PROJECT

This project is being designed and constructed to provide flood protection along the San Joaquin River in Merced, Madera and Fresno Counties, from the mouth of the Merced River upstream to a point near the head of Gravelly Ford Canal. It is financed entirely by reimbursements from the Reclamation Board.

The authorized project area comprises the flood plain of the San Joaquin River and its tributaries and overflow channels between Friant Dam and the mouth of the Merced River. Construction of flood control works will be required only along a 125-mile reach from Gravelly Ford Canal to the lower project

limit. During 1959-60 construction plans and specifications will be completed and the contract awarded for Construction Unit Two, Stages I and II of the project. Acquisition work will be started for Construction Unit Three. Construction plans and specifications will be completed for the levee surfacing contract for Unit One, and Stage I, Unit Two, early in 1960-61. Completion of plans and specifications and award of contract for construction of Unit Three are also scheduled for 1960-61. Field surveys for rights-of-way and relocation of utilities will continue.

SPECIAL WATER QUALITY INVESTIGATIONS FOR WATER POLLUTION CONTROL BOARDS

The department supplies information to the respective boards required to evaluate and establish requirements for specific municipal and industrial waste discharges, and to formulate and adopt long-range plans and policies with respect to water pollution control within their regions. Investigations may include any or all of the following studies: collection, evaluation, and reporting of basic data on ground and surface water quality, geology, ground water hydrology, surface water flow, waste discharge practices, and quantities and quality of water.

The cost of these investigations to the department is reimbursed by the State Water Pollution Control Board under

provisions of an interagency agreement renewed annually.

Some 22 studies are being made for the boards during the 1959-60 fiscal year. Additional funds for investigational work during the year have been made available to the regional boards, but have not been specifically assigned. It is expected that these funds will be allocated as the need arises.

No information is available regarding special water quality investigations for the regional boards during 1960-61; however, the activity is expected to continue at about the same level as in 1959-60.

ENGINEERING SERVICES FOR THE ATTORNEY GENERAL'S OFFICE

The purpose of this program is to conduct engineering studies and reports for the Attorney General's Office in connection with litigation regarding the claims and pending lawsuits resulting from the floods of 1955.

It is anticipated that some of the cases in which the State is involved will be in court during fiscal years 1959-60 and 1960-61 and will require additional department services over 1958-59 activity.

## DEPARTMENT OF WATER RESOURCES—Continued

------	-----------------	-------------------	----------------------	---------------------

## SERVICES TO OTHER AGENCIES—Continued

## WHALE ROCK PROJECT—SOUTHERN CALIFORNIA DISTRICT

The Whale Rock Project is a joint venture between the City of San Luis Obispo and the State. Construction includes the Whale Rock Dam, appurtenant structures, and an 18-mile pipeline with 2 pumping plants.

Construction of the dam and appurtenant structures will be 60 percent completed and the pipeline and pumping plants partially completed by the end of the fiscal year 1959-60. During fiscal year 1960-61, all construction work on this project should be completed.

## SPECIAL PROJECTS FOR OTHER STATE AGENCIES—SOUTHERN CALIFORNIA

Work is performed in the Southern California district offices in connection with problems of water supply, flood hazards, water quality, and other related items, including some design and construction. The agencies most frequently involved are the

Department of Finance, Division of Forestry, Division of Architecture, Division of Beaches and Parks, Wildlife Conservation Board and the Division of Highways.

## PROGRAM EXPENDITURES DETAIL

## PROGRAM SUMMARY

	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
--	-------------------	----------------------	---------------------

## OTHER PROJECTS AND ACTIVITIES

Certain statutory and regulatory activities and projects otherwise differentiated from the Basic Data, Water Planning or Water Development programs are grouped herein.

## ADVISORY SERVICES FOR WATER POLLUTION CONTROL BOARDS

Objectives of these activities are to furnish information and technical advice for support of appropriate regulatory action by regional boards in establishing waste discharge requirements. The rapid population growth and industrialization of the State has caused continuing increase in waste discharges. Studies must be made to preclude the possibility of these wastes adversely affecting the quality of the waters of the State for domestic, irrigation, and industrial supply, recreation, fish and wildlife

propagation, and the wide range of other important uses.

During 1959-60 and 1960-61 activities under the category of assistance to the water pollution control boards will be continued and expanded because of the tremendous growth of industry and population moves and because of changes made in the water pollution control laws by the Legislature in 1959 (Chapter 1299).

## REVIEW OF FEDERAL REPORTS AND RELATED ACTIVITIES

The Department of Water Resources exercises the State's responsibility for the co-ordination, approval, and/or recommendations for changes of alterations of water resources development programs of federal agencies operating in California. The objective of this activity is to co-ordinate the planning activities of the various agencies, federal, state, and local, in order to achieve the optimum development and utilization of the water resources of the State. In its review of reports the State makes recommendations with respect to such aspects as project service areas, upstream development and protection, capacities of project facilities, water rights, sequence of construction, and other matters. The Watershed Protection and Flood Prevention

Act and the Small Reclamation Projects Act specifically require a favorable recommendation from the State as a prerequisite to consideration for federal financial assistance.

A moderate increase in this activity is anticipated in fiscal year 1959-60, but it is estimated that the workload in the 1960-61 fiscal year will be about the same as for the prior year in the Northern California office. In the Southern California district office, work will continue at the same level, with the exception that informal review of Army Corps of Engineers general design memorandums is expected to increase approximately 300 percent; peak periods will be handled by temporary transfer of personnel from other activities.

## DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>OTHER PROJECTS AND ACTIVITIES—Continued</b>			
2	<b>APPLIED NUCLEAR ADMINISTRATION</b>			
3				
4				
5				
6				
7	Applied nuclear engineering provides assistance in develop-			of hazards, waste disposal, etc. The program will also include
8	ment of feasible and economical saline water conversion processes,			investigation of the engineering and economic feasibility of
9	and evaluation of applications of nuclear and other nonconven-			large-scale brackish water conversion of drainage water in the
10	tional types of energy in the form of heat or electricity to con-			Tulare and Salton Sea areas. Contracts will be initiated with
11	version of saline water and to pumping of large quantities of			consultants and the University of California to investigate or
12	fresh water. Emphasis during the 1960-61 fiscal year will be on			assist in the development of one or more of the most promising
13	studies of the application of nuclear energy for pumping, as a			conversion methods.
14	source of heat and electricity, together with corollary studies			
15				
16	<b>SUPERVISION OF SAFETY OF DAMS</b>			
17				
18	This statutory function is a regulatory activity, its primary			over the 1959-60 activity. The number of dams under state
19	duty that of supervision of the safety of design, construction			supervision has increased beyond the capacity of the present
20	maintenance, repairs, alterations, and operation of all dams in			staff to handle. Additional services will be required on aspects
21	the State, except those controlled by the Federal Government.			of the investigations being conducted under the provisions of the
22	There will be some increase in the 1960-61 fiscal year program			Davis-Grunsky Act of 1959.
23				
24	<b>WATER RIGHTS AND WATERMASTER SERVICE</b>			
25				
26				
27	In the development of the State's water resources, adequate			Watermaster service was originally provided to reduce the
28	water rights must be acquired by each entity or individual con-			large amount of court litigation in water right disputes, with
29	structing a water development project; the acquisition of such			the State Watermaster acting as an impartial third party in
30	rights is also required of the State, if it is to construct and			distributing the water and in arbitrating disputes which are not
31	operate various water projects. It is imperative that the de-			covered by court decree. Service areas have been created through
32	partment be informed of all water rights being acquired through-			the years until there are currently 16 service areas being ad-
33	out the State. Water rights activity is divided into 3 categories:			ministered by 9 field watermasters, and 1 supervising water-
34	the filing and disposition of state applications; the completion			master. Cost of watermaster service is paid half by the water
35	of the water right applications for projects constructed by the			users and half by the State.
36	department; and the preparation and presentation at hearings			Water rights and watermaster service activities will remain
37	before the State Water Rights Board of material pertaining to			essentially the same in the 1960-61 fiscal year.
38	the California Water Plan.			
39

------	-------------------------------	-------------------	----------------------	---------------------

WORK IN CO-OPERATION WITH FEDERAL GOVERNMENT

Through the Department of Water Resources the State participates co-operatively with agencies of the Federal Government in various activities directed toward the accomplishment of mutual interest and to develop solutions to problems in which

there is a common concern. State funds are matched by the expenditure of equal or greater amounts by agencies of the Federal Government.

YUBA RIVER DEBRIS CONTROL PROJECT

The Yuba River Debris Control Project provides for the storage of over 300,000,000 cubic yards of mining debris in the Yuba River overflow area near Marysville, which would otherwise pass in some degree into the navigable channels of the Feather and Sacramento Rivers.

Plans for the work are prepared by the Corps of Engineers, of which the California Debris Commission is a part, and sub-

mitted to the Department of Water Resources for approval. Over \$1,000,000 of state funds have been appropriated for debris control. A budget request for \$60,000 is being made for the 1960-61 fiscal year to match an equal amount proposed to be appropriated by the Federal Government for the continuation of this work.

CO-OPERATIVE MAPPING PROGRAM

The Co-operative Mapping Program between the State of California and the U.S. Geological Survey was established with the enactment of Chapter 1424, Statutes of 1945.

Under this program topographic mapping of the State of

California is carried on by the U.S. Geological Survey with funds matched by the State. Areas to be mapped, scales of mapping and priority schedules are mutually decided upon by both participants.

SURFACE WATER INVESTIGATIONS

This is a continuing program of measurement of the discharge of surface streams of the State in co-operation with the U.S. Geological Survey. The program consists of approximately 385 stream gaging stations operated by the U.S. Geological Survey to provide data on water supply, runoff and diversions, at a cost of \$312,085. 20 additional stations are planned at a cost of \$60,000.

A recently initiated part of this program is the determination of flood runoff from small drainage areas of 10 square miles or less. 3 additional areas are to be added to the program in fiscal year 1960-61.

The program for development of an ultrasonic current velocity measuring device is continued at a cost of \$5,000.

IRRIGATION RESEARCH

Studies in co-operation with the Agricultural Research Service, U.S. Department of Agriculture, will be continued in 1960-61 to develop data on water uses and requirements and ground water recharge essential to water development planning. Specific studies will include (1) consumptive use of water by crops and native vegetation, improvement of irrigation practices, determination of evaporation and evapotranspiration rates, the con-

tribution of rainfall to the ground water supply; and (2) research studies of water conservation by artificial recharge of underground basins including determination of suitable test sites representative of large areas with divergent characteristics and measurement and evaluation of the effect of deliberate recharge upon the ground water supply.

GROUND WATER BASIN AND SUBSIDENCE STUDIES

This is a co-operative program with the U.S. Geological Survey for development of data on the ground water resources of California. Included are studies of the geology and hydrology of the San Joaquin ground water basin, \$42,000; investigation of land subsidence in the San Joaquin Valley to develop information required for planning of water facilities, \$43,000; measure-

ment of water levels in key wells in ground water basins of the State to provide a continuous record of ground water storage conditions, \$12,500; and basic data collection and observation-well measurement in Southern California desert areas, \$17,500. Total, \$115,000.

9					
10					
11	<b>GENERAL ANALYSIS</b>				
12	<b>Objectives</b>				
13	The State Water Rights Board, composed of 3 members ap-				
14	pointed by the Governor for 4-year terms, is charged with sole				
15	responsibility for administration of the following program out-				
16	lined in Division 2 of the Water Code, State of California:				
17	1. The appropriation of unappropriated water through the				
18	permit and license procedure.				
19	2. Investigation and assistance to the courts and parties in				
20	adjudication of water rights.				
21	3. Administration of the recordation of data relating primarily				
22	to use of ground water in the counties of Riverside, San				
23	Bernardino, Los Angeles and Ventura.				
24	4. Administration of the act authorizing the use of water				
25	from a nontributary source without loss of an existing				
26	right to ground water by failure to use water. This act is				
27	also restricted in operation to designated counties of south-				
28	ern California, and consists of registration of notices only.				
29					
30	<b>Program and Performance</b>				
31	During 1958-59 the board devoted 85 days of hearing time to				
32	applications of the United States Bureau of Reclamation, City				
33	of Fresno, and Fresno Irrigation District to appropriate water				
34	from the San Joaquin River. This hearing culminated in the				
35	adoption of Decision No. D-935 by the board on June 2, 1959.				
36	During the same period, the board also held hearings on				
37	applications by Monterey County Flood Control and Water				
38	Conservation District to appropriate water from San Antonio				
39	and Nacimiento Rivers; applications of the United States Bu-				
40	reau of Reclamation to appropriate waters of Trinity River;				
41	applications of California-Oregon Power Company and Pacific				
42	Gas and Electric Company to appropriate water from McCloud				
43	River; applications of certain districts in Mendocino and So-				
44	nomia Counties and the City of Ukiah to appropriate water from				
45	the Russian River System, and other miscellaneous water rights.				
46	During the 1959-60 year the board has continued and com-				
47	pleted the hearings on the McCloud and Russian Rivers. Hear-				
48	ings on the Sacramento River and the Sacramento-San Joaquin				
49	Delta have also commenced, as well as hearings on some 23				
50	applications to appropriate water from the Upper Tule River				
51	System. In addition to continuing to a conclusion the last men-				
52	tioned items, it is anticipated that hearings will be held on the

North and Middle Forks of the Feather River, Yuba River, Merced River and other miscellaneous water rights.

During the 1960-61 fiscal year it is anticipated that hearings may be initiated on the Kings, Kaweah, and Tule Rivers at and below Pine Flat, Terminus, and Success Dams; and on applications to appropriate water from Tulare Lake, Fresno Slough, and Tuolumne, Stanislaus, Cosumnes, and Kern Rivers, and other miscellaneous water rights matters.

From July 1, 1958, through June 3, 1959, the activities of the State Water Rights Board concerning appropriations of water are summarized as follows:

Applications received	633
Permits issued	428
Licenses issued	530
Applications canceled	107
Permits and licenses revoked	200
Orders allowing changes in point of diversion, place and purpose of use	151
Decisions rendered	27

6,253 annual notices and 355 first notices of ground water extraction and diversion were filed during the 1958-59 fiscal year. Filing of notices under both programs is a protection against loss of any prescriptive right which otherwise might accrue, and protection of rights which might otherwise be lost through nonuse where in-lieu water has been utilized to meet overdraft conditions.

The 1960-61 budget includes 3 new engineering positions and 5 clerical positions. 1 assistant hydraulic engineer is included to fulfill the workload needs of the Hearing Analysis Units. 1 assistant hydraulic engineer is provided to alleviate permit and license inspection workload and to secure adequate information for the Field Inspection Unit. 1 senior hydraulic engineer is provided in the applications, permit and license processing section to head the new unit and to assist in meeting the workload increases related to the handling of changes in permits and licenses.

5 clerical positions are budgeted to handle the increased workload resulting from the additional engineering activity.

## GENERAL ANALYSIS

## Objectives

Co-operates with the Corps of Engineers, United States Army, in construction of flood control projects through the acquisition of rights-of-way for such projects; acts as governing body for the Sacramento and San Joaquin Drainage District; approves construction of levee systems and flood channels; and fulfills such construction obligations as have been assumed by the State in its agreement with the Federal Government.

## Program and Performance

The agency program involves work on several projects as follows:

Sacramento River Flood Control Project:  
This project is divided into 2 parts: that relating to works authorized prior to 1941 which is called "Old Sacramento River Flood Control Project"; and that relating to works authorized subsequent to 1941 which is referred to as "Major and Minor Tributaries."

a Composed of savings in salaries and wages, \$17,944; operating expenses, \$18,755; equipment, \$964; and excess reimbursements, \$111,070.

## RECLAMATION BOARD—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	------------------------------	-------------------	----------------------	---------------------

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

## Old Sacramento River Flood Control Project:

The Old Sacramento River Flood Control Project received a federal appropriation of \$2,500,000 for the current fiscal year, which is one-half million dollars less than has been received in recent years for this project. The California Flood Control Conference, and the State Water Commission have gone on record as supporting an appropriation of \$3,000,000 for this project for the next fiscal year. The Corps of Engineers has indicated that it is capable of utilizing such an appropriation.

## Sacramento River—Major and Minor Tributaries Project:

Activity on the Major and Minor Tributaries Project has continued at an accelerated rate during the current fiscal year with a federal appropriation of \$1,010,000 being available for the current fiscal year. The California Flood Control Conference has endorsed an appropriation of \$1,500,000 for the next fiscal year, and the Corps of Engineers has indicated that it has the ability to expend this sum on the project.

One of the major units of work on this project would be through the City of Chico on Chico, Mud and Sandy Gulch. During the past year the corps has again reviewed this project and the alternate plan which would provide for the diversion of flood waters around the urban area of Chico. While no final decision has yet been reached, it appears likely that the District Engineer will recommend the adoption of the alternate route and that design work will be completed in the 1960-1961 fiscal year. In that event, the right-of-way acquisition will be commenced during this period so that construction may begin in the fall or winter of 1961. The adoption of the modified project will result in very substantial savings to the State of California and will provide a more desirable project for the City of Chico.

In lieu of proceeding with the Chico, Mud and Sandy Gulch Project during the current fiscal year, the corps is proceeding with the completion of work on the Cherokee Canal and will initiate work on Elder Creek. The Elder Creek Project will involve the modification of a number of bridges and the acquisition of approximately 50 parcels of right-of-way. It is therefore not anticipated that the delay on Chico, Mud and Sandy Gulch will result in any substantial reduction of workload during the current fiscal year. The corps has indicated that it will proceed with work on Willow Creek in Glenn County in fiscal year 1960-1961, which involves some 40 miles of levee and about 10 bridges. The acquisition of all of the right-of-way required for this project and the commencement of acquisition on Chico, Mud and Sandy Gulch will assure a high level of right-of-way activity in fiscal year 1960-1961.

## San Joaquin River Flood Control Project:

The project of flood control for the San Joaquin River between the mouth of the Merced River and the Stockton Deep Water Channel received an appropriation of \$665,000 for the current fiscal year, which is somewhat less than was originally anticipated, but is sufficient to continue construction by the Corps of Engineers at approximately the same level which has existed in the last two years. The California Flood Control Conference and the State Water Commission endorsed an appropriation of \$1,400,000 for this project for fiscal year 1960-1961. The Corps of Engineers has indicated that it is capable of utilizing this sum. A major unit of work will be commenced on this project during the 1960-1961 fiscal year involving between 35 and 40 bank protection sites lying on both banks of the San Joaquin River between Old River and the Stockton Deep Water Channel. It is anticipated that approximately 80 parcels of right-of-way will be necessary in connection with this unit of work.

The portion of the San Joaquin River Flood Control Project lying upstream from the mouth of Merced River, which is being constructed solely at State expense, is now under construction. During the past fiscal year, one \$2,000,000 contract was awarded and a substantial amount of work has been completed under this contract. Contract plans and specifications are presently being completed to provide for the awarding of either two or three additional contracts during the current fiscal year. The acquisition of right-of-way necessary for construction under these contracts is proceeding as rapidly as possible. It is planned that all right-of-way acquisition for the project will be completed prior

to July 1, 1961, and that the final construction contracts will be awarded during the fiscal year 1961-1962.

## Middle Creek Project:

The Corps of Engineers is proceeding with construction on the Middle Creek Project during the current fiscal year and anticipates that no additional appropriations will be needed to complete the project. While some minor difficulties have been encountered at the lower end of the project, it is believed that these will be resolved in the near future by the modification of the present construction contract to provide for a wider levee section and construction by light equipment.

The right-of-way acquisition for this additional work has been substantially completed and the only problems which should be encountered during the current fiscal year and in fiscal year 1960-61 are those which may arise in connection with construction or those relating to the operation and maintenance of the project. No additional funds are being sought for this project for fiscal year 1960-61.

## Calaveras River-Littlejohn Creek and Tributaries Project:

The plan of improvement and flood control on the Calaveras River-Littlejohn Creek and tributaries authorized by Section 12652 of the Water Code covered a project to be constructed on Bear Creek in San Joaquin County. For several years there has been discussion regarding the type of project which should be constructed on this stream. Local interests and the Corps of Engineers have now arrived at a general agreement as to this project, and the California Flood Control Conference and the State Water Commission have recommended that \$70,000 be appropriated during fiscal year 1960-61 for advance planning and design on this project. Discussion with Corps of Engineers indicates that construction plans will probably be completed early in 1961, which would require the commencement of right-of-way acquisition prior to July 1, 1961.

## Summary:

In summary, the federal appropriation for the current fiscal year totals approximately \$4,825,000, and recommendations have been made in fiscal year 1960-61 for appropriations totaling \$5,970,000. Based upon the estimates of the Corps of Engineers, it is expected that federal appropriations will be in the order of \$6,000,000 during the next 5 years.

Another area of work which continues to require the expenditure of substantial periods of time is that of pending litigation and claims against the Reclamation Board. Law suits have now been filed in the federal and state courts covering essentially all of the claims which were filed as the result of the 1955-56 floods. These actions are presently in the pleading stage and are likely to proceed to trial during the current and the next fiscal years. Also pending in federal court is an action against the United States for damages resulting from the closure of Shasta and Keswick Dams in May 1948, and the actions involving the gas and oil rights and leases which the Sacramento and San Joaquin Drainage District holds in the Rio Vista area. Recently a claim has been filed in the amount of \$105,000 for damage resulting to lands lying easterly of the mouth of the Colusa Weir, and this matter is undergoing investigation at the present time.

While a substantial portion of the engineering work in connection with this litigation is being handled by the Department of Water Resources, the attorney general's office and independent engineers, an increasing amount of time is being required by the engineering and legal staff of this agency. As these matters proceed toward trial, it is anticipated that the amount of time demanded of the personnel of this agency will increase and a serious problem is likely to exist during the periods of actual trial.

During the current fiscal year, there is \$50,000 available for expenditure in connection with this litigation over and above such time as the staff of the board may utilize in connection therewith. This amount was made available with the understanding that additional amounts might be necessary if cases proceed to trial during the current year. In the 1960-61 Budget a like amount is proposed. Additional amounts may be necessary if these cases are in trial.

## RECLAMATION BOARD—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (Filled)	59-60 (Auth.)	60-61 (Auth.)			
1	GENERAL ANALYSIS—Continued						
2	Program and Performance—Continued						
3	The Support Budget of this agency is largely established by						
4	the size of the local assistance appropriation. At the present						
5	time a plan of financial adjustment apportions all support costs						
6	between local assistance activities and support activities. During						
7	the current, immediate past, and next fiscal years, it is antici-						
8	pated that approximately 30 percent of the agency's activities						
9	will be on support matters and the remainder will involve local						
10	assistance activity.						
11	Based upon the anticipated federal program for the next						
12	fiscal year, and the proposed state program for the San Joa-						
13	quin project, the general level of activity for the next fiscal						
14	year will be slightly greater than it will be during the current						
15	fiscal year. The only increase in staff for the next fiscal year						
16	will be in the engineering section. It appears that adequate						
17	personnel will be available in the current year for the right-of-						
18	way and other sections of the agency, but backlogs will continue						
19	to exist in the engineering section as outlined above.						
20	The agency anticipates that it will acquire between 325 and						
21	350 parcels of right-of-way during fiscal year 1960-61. This						
22	is essentially the same number of parcels which were originally						
23	estimated for the current year. A re-estimate of the current						
24	year's acquisition program indicates that the number of par-						
25	cels to be acquired will be between 300 and 325. To date, in						
26	the current fiscal year, approximately 80 parcels of right-of-						
27	way have been acquired.						
28	The right-of-way acquisition for the San Joaquin Project						
29	between the mouth of the Merced River and Friant Dam has						
30	involved an unusual amount of difficulty for the number of						
31	parcels being acquired because of the extremely large size of						
32	the individual acquisitions. It is anticipated that the current						
33	year and the next fiscal year will involve additional acquisitions						
34	SALARIES AND WAGES

## COLORADO RIVER BOARD

Headquarters at Los Angeles

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
<b>SUMMARY</b>				
TOTAL EXPENDITURES				
Support (General Fund)-----	\$223,412	\$242,991	\$249,530	\$6,539 (2.7%)
Personnel man-years-----	22.8	20.3	19.6	—0.7

## GENERAL ANALYSIS

## Objectives

The Colorado River Board was created by Chapter 838, Statutes of 1937 for the purpose of protecting California's rights pertaining to the Colorado River. The board, and its staff, collects, compiles and analyzes engineering and legal data on the existing and proposed utilization of the Colorado River water supply, appears before congressional committees and interested federal agencies, and confers with representatives of other Colorado River Basin states regarding legislation and developments affecting California's rights and interests.

## Program and Performance

The board is composed of members appointed by the Governor representing each of the 6 agencies having rights to the use of water or power from the Colorado River. The 6 agencies are the Metropolitan Water District of Southern California, Department of Water and Power, City of Los Angeles, San Diego County Water Authority, Imperial Irrigation District, Coachella Valley County Water District, and Palo Verde Irrigation District.

Major phases of the board's work program as anticipated for the current fiscal year and the fiscal year 1960-61 are summarized as follows:

1. Preparation of legal and engineering material for appearances before congressional committees and for conferences with interested federal agencies, senators and congressmen, regarding legislation pending before the Congress affecting California's rights and interests on the Colorado River.

2. Exhaustive study of reports on proposed projects for development, control and utilization of water of the Colorado River System; analysis of engineering and financial aspects as required; and preparation of views and recommendations.

3. Collection, compilation and analysis of all available basic information on the water supply of the Colorado River System and present and future use thereof, with a view to ultimate determination of:

a. The long time average water supply available for beneficial use.

b. Unit rates and total requirements of beneficial consumptive use of water for agricultural, industrial, domestic, and municipal purposes.

4. Collection and study of repayment and crop data on existing and proposed developments.

5. Detailed analysis of the operations of existing and proposed projects to determine their efforts upon the water supply available to the lower basin and upon the rights of California.

6. Studies relating to the legal and engineering aspects of the administration of the Upper Colorado River Basin Compact, Mexican Water Treaty, Colorado River Storage Project Act, and other relevant statutes, regulations and court decrees.

7. Conferences with the California state agencies, representatives of other states, and federal officials concerning particular phases of the program.

8. Engineering studies and research needed in connection with the suit, Arizona v. California, et al., before the United States Supreme Court.

<sup>a</sup> Composed of savings in salaries and wages, \$9,361; operating expenses, \$11,209; equipment, \$274; and increase in reimbursements, \$203,719.

<sup>b</sup> Composed of savings resulting from an increase in reimbursements.

<sup>c</sup> Water Code, Section S661, states that money from sale of lands shall be abated to appropriation from which land was purchased. This sale to Division of Highways was for land purchased under Chapter 918, Statutes of 1937, Joint Navigation Fund.

## GENERAL ANALYSIS

## Objectives

The major purposes of this compact are, with respect to the water resources of the Klamath River Basin:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation and control thereof for various purposes, including, among others: the use

of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wildlife and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

<sup>a</sup> Composed of savings in salaries and wages, \$20,901; operating expenses, \$29,963; equipment, \$2,765; and excess reimbursements, \$13.

<sup>b</sup> Composed of savings in salaries and wages, \$4,420, and operating expenses, \$997.

------	------------------------------	-------------------	----------------------	---------------------	------------------------

## GENERAL ANALYSIS—Continued

## Objectives—Continued

B. To further intergovernmental co-operation with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of water among the two states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

## Program and Performance

The commission was created effective September 11, 1957, with the passage of an act of the Congress of the United States consenting to the provisions of that certain compact designated as the "Klamath River Basin Compact between the States of Oregon and California." The Legislature of the State of California ratified and approved the compact by Chapter 113, Statutes of 1957.

The compact provides that the commission consist of 3 members. The Director of the Department of Water Resources represents the State of California. The representative of the State of Oregon is the State Engineer. The federal representative is appointed by the President. The representative of the United States serves as chairman of the commission without vote. The commission has entered into a service agreement with the Department of Water Resources for the services of the executive director, including all necessary clerical, stenographic or related services required in the performance of his duties.

California's share of the expense of the commission together with the State of Oregon's share is deposited in a trust account from which all expenses are paid. The original appropriation of \$12,000 was made by Chapter 113, Statutes of 1957. The remaining balance in this appropriation will be completely expended during 1959-60. To meet the 1959-60 expenditure program an additional \$2,343 has been appropriated from the General Fund and also deposited in a trust account. The commission is requesting an additional \$572 which together with remaining balances will finance California's share of the joint Oregon-California-United States expenditure program through 1960-61.

Support (General Fund)	\$79,485	\$101,928	\$94,840

## GENERAL ANALYSIS

## Objectives

The California-Nevada Interstate Compact Commission of California was created by Chapter 1810, Statutes of 1955. Its function is "to co-operate with a similar commission representing the State of Nevada in formulating and submitting to the legislatures of both states for their approval an interstate compact relative to distribution and use of the waters of Lake Tahoe and the Truckee, Carson and Walker Rivers." The commission consists of the State Engineer and 6 other members, appointed by the Governor, from electors residing, owning property or engaged in business in the areas comprising the Basins of the Truckee, Carson, and Walker Rivers and Lake Tahoe. The chairman of the commission is selected by the members.

## Program and Performance

As the result of nearly 4 years of extensive study of the many problems relating to water which face this interstate area, and of analyzing the many possible solutions to these problems, the commission is now approaching the position of being able to negotiate specific terms with the Nevada Commission. The California Commission fully expects these efforts will result in a compact equitable to both sides by the originally estimated date of 1962.

Both state commissions must work towards having a completed draft of the compact ready for legislative review and approval by 1962, and must also insure that items in the proposed compact which deal with federal interests are acceptable to the Federal Government.

The 1960-61 program provides that the commission shall:

1. Make final studies of the effect which various allocations of water under consideration by the commissions may have upon the respective water needs of the two states;
2. Prepare maps which may be incorporated by reference into the compact and which will delineate the several areas to which compact provisions may apply;
3. Enlist the aid of other state or federal agencies relative to problems of water pollution control, fish protection, recreational needs, preservation of Indian rights and other specialized matters which must be considered in the compact;
4. Prepare reports and other substantiating data which will be needed in presenting the proposed compact to various public agencies and groups in order that the understanding and approval of these groups and agencies may be secured.

## GENERAL ANALYSIS

## Objectives

The state board formulates statewide policy for control of water pollution, administers statewide programs for financial assistance for sewerage construction and programs for research, prepares an annual budget for activities of all the boards, publishes a biennial progress report, and reviews actions of any regional board which may fail to take appropriate action to correct cases of pollution or nuisance. The 9 regional boards have the following principal responsibilities: to formulate and adopt long-range plans and policies for abatement and prevention of water pollution; prescribe and enforce waste discharge requirements; investigate sources of water pollution or nuisance; and co-ordinate the interests of other agencies. They also recommend sewage treatment projects needing financial assistance.

## Program and Performance

The current program for the state and regional water pollution control boards is continued for the 1960-61 fiscal year with more emphasis on rigorous enforcement made possible through amendment of the Water Pollution Control Act. 5-year budget planning was initiated during 1958-59 (plans developed by all boards in 1959-60) for the purpose of forecasting program changes and significant increases in the workload budget. The workload of establishing, checking, and enforcing waste discharge requirements began a steady rise in 1957 and has shown a sharp increase as a result of 1959 legislative amendments. These amendments, which increased the regional boards from 5 to 7 members each, also gave the boards more

enforcement power through provision for issuance of cease and desist orders, and for summary abatement action. The boards may now prescribe requirements for existing discharges in addition to new or changed discharges. Enforcement proceedings now require more precise investigation, discharge requirements, and abatement action which all result in increased workload for the boards and staffs.

The boards administer the federal grant program under Public Law 660 for sewerage construction by communities. Allocations to California have been about \$2 million each year beginning in 1956-57. This provides for grants limited to 30 percent of the construction cost of a project with a maximum of \$250,000. Each year applications request grants totaling several times the available funds. Priority is based on water pollution control needs determined by the regional boards and on financial needs found by the state board. Actual grants are made by the United States Public Health Service upon certification of priority by the state board.

The 1960-61 Budget includes 2 engineering positions for the San Francisco Bay Regional Board and 1 engineering position for Central Valley Regional Board to meet workload. 1 engineering position has been included for Lahontan Regional Board to provide technical assistance and relieve workload in the region. 1 clerical position has been abolished in North Coastal Regional Board due to insufficient clerical workload and 1 clerk has been added to provide clerical assistance for the proposed new engineering positions in the San Francisco Bay Regional Board.

<sup>a</sup> Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

## RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

## Objectives

A program of applied research in the field of water pollution control is conducted to provide technical data to assist the boards in properly discharging their responsibilities under the law.

## Program and Performance

This research is carried out through special projects under contractual arrangements with various organizations and individuals. A basic program has been supported at the state level since 1950. The program was expanded in 1956-57 using

federal funds under Public Law 660. The federal program grants are scheduled to terminate after the 1960-61 fiscal year, in which case the research program will be cut back to the state level of support in 1961-62.

Beginning in 1956-57, under the expanded program, greatest emphasis has been placed on research in the field of waste disposal in the marine environment. This was scheduled as approximately a 5-year program which would begin phasing-out during 1960-61. The largest project in the current program is the oceanographic survey of the continental shelf area of southern California started in 1956-57. This project, conducted

<sup>a</sup> Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

## WATER POLLUTION CONTROL BOARD—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (filled)	59-60 (Auth.)	60-61 (Auth.)			
1	RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL—Continued						
2	Program and Performance—Continued						
3	by the Allan Hancock Foundation of the University of Southern						
4	California, is obtaining biological, chemical and physical data						
5	of representative marine areas in relation to waste discharges.						
6	2 additional oceanographic studies, started in 1957-58 and						
7	continuing through 1960-61, are: (1) contract with the Univer-						
8	sity of California Institute of Marine Resources for determina-						
9	tion of the effect of wastes on kelp, co-ordinated with kelp						
10	studies of the Department of Fish and Game, and (2) contract						
11	with Humboldt State College for a north coastal oceanographic						
12	survey of marine areas currently unaffected by waste discharges						
13	but subject to future pollutional loading. In 1958-59, a 1-year						
14	project was undertaken by the University of California for						
15	development of tracer techniques in flushing of wastes in bays						
16	and estuaries. Also contracted with the University in 1958-59,						
17	and to be completed in 1959-60, is a project for development						
18	of bioassay techniques for assessing effects of toxic wastes on						
19	the marine environment.						
20	In 1959-60, the biennial project for continuation of the study						
21	of leaching from the Riverside sanitary landfill dump was con-						
22	tracted with the University of Southern California. This main-						
23	tenance-type project has been resumed every 2 years since						
24	the original investigation was completed in 1954. It will proba-						
25	bly be terminated at the completion of the 1959-60 fiscal year.						
26	Depending upon the amount of federal funds available, and						
27	with consideration of the results and recommendations from						
28	previous research studies, the state board in 1960-61 will con-						
29	tinue to sponsor investigations in the field of submarine out-						
30	fall research including the 3 projects started in 1956-57						
31	and 1957-58 plus 1 additional project (proposed to be started						
32	in 1959-60): the collation, evaluation and presentation of tech-						
33	nical data relative to the marine disposal of liquid wastes.						
34	Because the submarine outfall research program is scheduled						
35	to phase-out in 1960-61, it is proposed that research will be						
36	started during 1960-61 in 2 new areas of water pollution						
37	control, namely, (1) revision of State Board Publication No. 3,						
38	"Water Quality Criteria," and (2) groundwater studies.						
39	The increase in this program for the 1960-61 fiscal year						
40	results primarily from the request of the San Francisco Bay						
41	Regional Board for \$115,500 to continue the comprehensive						
42	investigation of San Francisco Bay and contiguous estuarial						
43	waters. The regional board, in formulating waste discharge						
44	requirements to protect fisheries resources and other beneficial						
45	uses of bay waters, has found existing information to be in-						
46	adequate with respect to: (1) physical, chemical and biological						
47	descriptions of waters and sediments of the bay; (2) scientific						
48	data necessary to accurately define environmental conditions						
49	needed to maintain well-balanced populations of fisheries re-						
50	sources; (3) reliable methods for assessing the general condi-						
51	tion of the biological environment; and practical techniques						
52	and methods for field application of tracers.						
53	The regional board proposed this in 1957-58 as at least a						
54	3-year study costing approximately \$400,000. A "reduced area"						
55	investigation of South San Francisco Bay was started in 1957-						
56	58 at a cost of \$6,500 and was continued in 1958-59 at an						
57	expenditure of \$22,082. In 1959-60, the comprehensive study						
58	was commenced under Chapter 1909, Statutes of 1959, which						
59	appropriated \$83,000 to the University of California to start						
60	the study. \$115,500 has been included in the budget for the						
61	continuation of the comprehensive study during 1960-61 to be						
62	performed by the University of California.						
63	OPERATING EXPENSES						
64	San Francisco Bay Comprehensive Investigation	\$22,082	—	\$115,500			
65	Submarine outfall surveys and research	190,550	\$188,746	187,000			
66	Investigation of pollution by leaching from dumps	—	5,000	5,000			
67	Totals, Research in Technical Phases of Water						
68	Pollution Control	\$212,632	\$193,746	\$307,500			
69	General Fund	101,082	80,146	194,500			
70	Federal Fund	111,550	113,600	113,000			
71	FIELD AND LABORATORY SERVICES BY OTHER AGENCIES						
72	Program and Performance						
73	To prevent duplication or overlapping activities, necessary						
74	field and laboratory work is performed by state and other agen-						
75	cies best qualified to render the required technical services. Such						
76	service consists of studies of the pollution effects of sewage and						
77	industrial wastes; providing technical information necessary						
78	for prescribing and checking discharge requirements; determin-						
79	ing effects of drainage wells, dumps, and other wastes on ground						
80	waters; and special investigations as required.						
81	The 1960-61 Budget provides generally for the continuation						
82	of the present level of service with minor increases attributable						
83	to increased activity resulting from the enactment of Chapter						
84	1299, Statutes of 1959.						
85	OPERATING EXPENSES

## Los Angeles World Trade Center Authority

## GENERAL ANALYSIS

Chapter 2400, Statutes of 1957 provided for an advance to the Los Angeles World Trade Center Authority. The amount appropriated is to be repaid to the General Fund out of the proceeds from the sale of the first revenue bonds sold by the au-

thority under the provision of the World Trade Center Authorities Act.

Availability of the appropriation made by Chapter 2400, Statutes of 1957, terminates September 1960 in accordance with Section 16304, Government Code.

14	GENERAL ANALYSIS			
15	The annual report of the State Personnel Board on matters			
16	relating to civil service personnel has been submitted. This			
17	report considered salaries for comparable service in private			
18	employment and in other governmental agencies, internal salary			
19	relationships between state classes, and the maintenance of			
20	salary adjustment costs within appropriation limitations.			
21	The report recommends a 5 percent general adjustment of			
22	state salaries as of July 1, 1960, to bring state salaries in line			
23	with rates paid by other governmental jurisdictions and private

11				
12	<b>GENERAL ANALYSIS</b>			
13	To provide funds for various state agencies for unseen contingencies for which no appropriation or insufficient appropriation has been made by law. Amounts as necessary are allocated to agencies by the Department of Finance upon finding of need.		000. Allocations for emergency fire suppression (\$700,000), increases in grants to counties for care of persons suffering from tuberculosis (\$612,700), and increased cost of educational assistance to veterans and veterans' dependents (\$356,500) are the principal factors creating this deficiency need.	
14	Unusually heavy demands upon this appropriation during the current year will require a deficiency appropriation of \$1,325,-

BOND INTEREST AND REDEMPTION

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
1	SUMMARY				
2	TOTAL EXPENDITURES				
3	Debt service (General Fund)-----	\$3,813,060	\$8,612,763	\$14,449,088	\$5,836,325
4	Debt service (Olympic Bond Fund) a-----	32,313	38,500	37,375	-1,125
5	Totals -----	\$3,845,373	\$8,651,263	\$14,486,463	\$5,835,200
6	GENERAL ANALYSIS				
7	Objectives				
8	To pay interest and redemption charges on state general obligation bonds.				
9	Program and Performance				
10	The State Construction Program Bond Act of 1955 and the State Construction Program Bond Act of 1958 provide in total \$400,000,000 to meet part of the building construction requirements for the departments of State Government which are financed primarily from general revenues.				
11	Sales of \$50,000,000 each were made in December 1958, March 1959, and January 1960. Additional sales of \$50,000,000 are tentatively scheduled for September 1960 and March 1961. The sales are planned to provide the funds to meet cash requirements for the projects in process of construction.				
12	Interest and redemption charges on highway bonds are withheld from motor vehicle license fees revenue for payment when due.				
13	Interest and redemption charges on bonds issued for construction of state and university buildings, and for acquisition of areas for state park purposes were paid from funds which were set aside from General Fund Surplus and placed in the Bond Sinking Fund of 1943. The funds required to meet all debt service payments to final maturity were set aside, however \$5,000,000 was transferred to the State Highway Fund to be used as a loan to the Golden Gate Bridge and Highway District,				
14	to be repaid from toll revenues. Chapter 2071, Statutes of 1959, provided that the State Controller shall transfer \$5,000,000 from the Motor Vehicle Transportation Tax Fund to the General Fund if federal legislation is enacted providing for apportionments of federal aid funds for the National System of Interstate and Defense Highways for the fiscal years ending June 30, 1961, and June 30, 1962, in amounts not less than the amounts provided for in the Federal Aid Highway Act of 1956. The enactment of the 1-cent federal tax increase will not provide the necessary funds to permit this \$5,000,000 transfer to the General Fund to be accomplished.				
15	Sufficient money has been transferred to the State Building Interest and Sinking Fund to retire the outstanding Sacramento State Building Bonds.				
16	Debt service requirements for the school building bonds are considered as local assistance and are reported under the local assistance part of the budget.				
17	These debt service charges do not include the cost of bonds issued for the San Francisco Harbor or the Veterans Farm and Home Loan program. Though they are general obligation bonds, the charges are primarily obligation of the utility funds and are paid from the respective funds. These funds are reported in the appendix section of the budget. No debt service requirements are anticipated on Small Craft Harbor Bonds during 1960-61.				
18	EXPENDITURE BY ISSUE	ACTUAL 1958-59	ESTIMATED 1959-60	ESTIMATED 1960-61	
19	First Highway of 1909:				
20	Interest-----	\$48,000	\$32,000	\$16,000	
21	Redemption-----	400,000	400,000	400,000	
22	Second Highway of 1915:

## STATE BUILDING PROGRAM

## SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1960-61

LINE	AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS		
		FROM GENERAL FUND	FROM STATE CONSTRUCTION PROGRAM FUND †	FROM OTHER FUNDS
1	The following table summarizes the proposed new appropriations for the 1960-61 fiscal year for the State Building Program by			
2	departments. Detailed explanation and description of each project is contained in the following agency detail budget.			
3				
4				
5	Department of Agriculture:			
6	Acquire site and construct inspection station—Beaumont	\$116,300	-	-
7	Acquire site and construct inspection station—Gorman	88,700	-	-
8	Minor construction and improvements	28,000	-	-
9	Totals, Department of Agriculture	\$233,000	-	-
10	Department of Corrections:			
11	Medical Facility:			
12	Provide additional domestic water supply	\$300,000	-	-
13	Men's Colony—East Facility:			
14	Equip new medium security facility and employees' activity building	2,275,000	-	-
15	Institution for Men:			
16	Construct additional boiler	118,000	-	-
17	Equip addition to reception-guidance center	105,000	-	-
18	Equip dormitory addition (Tehachapi)	17,000	-	-
19	State Prison at San Quentin:			
20	Construct chapel (Phase II)	242,400	-	-
21	Construct addition to boiler	224,000	-	-
22	Equip isolation-segregation building	32,400	-	-
23	Equip chapel (Phase I)	11,300	-	-
24	Correctional Training Facility:			
25	Construct addition to industries warehouse	92,300	-	-
26	Construct addition to dairy	80,000	-	-
27	Equip addition to north facility administration building	6,500	-	-
28	Deuel Vocational Institution:			
29	Equip reception-guidance center (300 capacity)	141,100	-	-
30	Conservation Center:			
31	Construct conservation center—Lassen County (partial cost)	9,006,486	-	-
32	Construct conservation center branch—Tuolumne County	1,039,300	-	-
33	Construct conservation center branch—Mono-Inyo Counties	1,077,900	-	-
34	Institution for Women:			
35	Equip sixth cottage	65,000	-	-
36	Minor construction and improvements	607,647	-	-
37	Totals, Department of Corrections	\$15,441,333	-	-
38	Department of the Youth Authority:			
39	Northern California Reception Center and Clinic:			
40	Construct living unit	\$357,300	-	-
41	Equip living unit	11,635	-	-
42	Enlarge commissary and clothing distribution room	140,450	-	-
43	Equip commissary and clothing distribution room	12,700	-	-
44	Fricot Ranch School for Boys:			
45	Equip living unit	16,225	-	-
46	Equip additional classrooms	9,830	-	-
47	Fred C. Nelles School for Boys:			
48	Construct two living units	583,000	-	-
49	Construct cottage alterations	185,200	-	-
50	Equip cottage alterations	2,200	-	-
51	Construct library and classroom buildings	439,200	-	-
52	Equip library and classroom buildings	23,620	-	-
53	Construct field shower and dressing facilities	116,000	-	-
54	Equip field shower and dressing facilities	4,070	-	-
55	Construct food service building	643,200	-	-
56	Construct visiting and control unit	260,100	-	-
57	Equip visiting and control unit	3,325	-	-
58	Equip arts and crafts and music building	28,675	-	-
59	Equip two living units	26,060	-	-
60	Paso Robles School for Boys:			
61	Construct special treatment center	159,400	-	-
62	Equip special treatment center	18,840	-	-
63	Construct physical education building	171,200	-	-
64	Equip physical education building	725	-	-
65	Preston School of Industry:			
66	Equip living unit	7,000	-	-
67	Youth Training School:			
68	Construct vocational shop addition	284,250	-	-
69	Construct academic school addition	76,300	-	-
70	Construct hospital addition	60,800	-	-
71	Equip new school	483,185	-	-
72	Ventura School for Girls:			
73	Construct two living units	880,500	-	-
74	Construct additional vocational shops	183,800	-	-
75	Construct gymnasium addition	76,700	-	-

3				
4	GENERAL ANALYSIS			
5	The work of this department is of a regulatory and service			
6	nature. It is headquartered in Sacramento and has offices, field			
7	crews, advisors and consultants operating throughout the			
8	State. A major portion of the department's responsibility is			
9	accomplished in co-operation with the 56 offices of the county			
10	agriculture commissioners and consists of protection of plants			
11	and animals from infectious diseases, pest animals, weeds and			
12	injuriously insects and the prevention of the introduction and			
13	spread of crops and livestock pests and diseases.

## GENERAL ANALYSIS

The 5-year building program of this department is designed to provide facilities which will meet the anticipated population growth and ultimately permit housing of inmates in accordance with the following standards:

For cell buildings—1 bed and 1 prisoner per cell.

For dormitory—1 bed per 50 square feet.

The program also includes rehabilitation of the older prisons and elimination of unsafe facilities. The rated capacities shown on the following chart are computed on the above standards with 75 percent of the hospital, isolation and segregation beds being included.

The projected population is based on an anticipated court commitment rate of 80 per 100,000 population in the 18-49 age group for adult male felons.

The 1960-61 major construction program is primarily directed toward an expansion of capacity to meet the needs of an increasing inmate population and to progress toward the goals set forth above. Additional construction to increase rated capacity is proposed, including the 1,200-inmate capacity California Conservation Center in Lassen County, the 160-inmate capacity Conservation Center Branch in Tuolumne County and the 160-inmate capacity Conservation Center Branch in the Mono-Inyo area.

Utilities and auxiliary buildings are proposed to meet the requirements at the various institutions to handle the increasing

inmate population. These facilities include construction of an additional boiler at California Institution for Men at Chino, construction of a chapel (phase II) and construction of an addition to the boiler plant at San Quentin is proposed to continue the major rehabilitation at the oldest and largest prison provision for additional domestic water supply at the Medical Facility, construction of addition to the dairy at Soledad, and construction of an addition to the industries warehouse at the Correctional Training Facility, Soledad. Also included in the major Capital Outlay program are numerous items for equipment for projects previously authorized. These include equipment for the new California Men's Colony, East Facility, Los Padres; the equipment for the Reception-Guidance Center, Chino; equipment for the sixth cottage, Institution for Women; equipment for Briggs Hall, California Institution for Men, Tehachapi; equipment for the isolation-segregation building at San Quentin; equipment for the chapel, first phase, San Quentin; equipment for the addition to the north facility administration building, Correctional Training Facility, Soledad; and equipment for the Reception-Guidance Center addition at Tracy.

1960-61 minor construction program proposes essential projects at the older institutions as well as projects to correct deficiencies and provide improvements in the physical plants at all institutions.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

## Medical Facility

classification and recommendation for institutional placement. In general, a higher degree of custodial supervision is exercised over these inmates.

The institution is located in Solano County, about 2 miles south of Vacaville, and consists of 903 acres of land, of which approximately 100 acres are to be used for inmate and employee building areas.

The construction program contains 1 major project, the construction of a water filter plant, lines and pump station, which is necessary if the institution is to get water from Monticello Dam, and minor construction projects totaling \$19,220 to correct operational deficiencies and to improve the physical plant.

<sup>a</sup> From General Fund unless otherwise indicated.

**Men's Colony—West Facility**

The Men's Colony is located at Los Padres which is 5 miles west of the city of San Luis Obispo. The West Facility is a minimum security facility utilizing the hospital section of the Army installations at Camp San Luis Obispo to provide capacity for 1,350 inmates in open barracks type wooden buildings. The program has been designed especially to handle the

older inmates. It is planned to continue operations in this facility after the activation of the new medium security East Facility.

The construction program for 1960-61 totals \$73,109 in minor projects to construct an inmate activity building, to correct operational deficiencies and to improve the physical plant.

**Men's Colony—East Facility**

The Men's Colony is located at Los Padres, which is 5 miles west of the city of San Luis Obispo and approximately 12 miles east of Morro Bay on the north side of State Highway No. 1. The East Facility of the Men's Colony is a new medium security institution which is planned for an immediate capacity of 2,400 inmates with possible future expansion to 3,000 in-

mates. The construction of the 2,400 capacity is authorized with the basic utilities constructed so that the planned 600-man minimum security unit could be added with a minimum of change. Construction is scheduled for completion in April 1961, therefore the proposed budget includes \$2,275,000 for the initial equipment.

**STATE BUILDING PROGRAM****PROPOSED 1960-61 EXPENDITURES <sup>a</sup>**

Equip new medium security facility and employees' activity building	—	—	\$2,275,000
This project is provided for the purchase of the equipment for the new 2,400 capacity institution, including an employees' activity building, which is being constructed from funds authorized from previous appropriations.			

**ESTIMATED 1958-59 AND 1959-60 EXPENDITURES <sup>b 1</sup>**

## State Prison at Folsom

This is a maximum security prison with emphasis upon industrial and work programs. The total rated capacity is 2,253 inmates including 1,947 in the institution and 306 in camps. The capacity of the institution will be increased by 72 in May 1960 with the completion of the honor dormitory. The capacity of the camps will be increased by 230 by the 1960-61 fiscal year with the opening of one 80-man camp in May 1960, a 40-man mobile camp in July 1960, another 80-man camp in January 1961, and an increase of 30 in existing camps. This will bring the total rated capacity to 2,555 in the 1960-61

fiscal year including 2,019 in the institution and 536 in camps.

The original construction was completed in 1858 and is located on 1,700 acres of land about 2 miles northeast of the city of Folsom. Modernization and rehabilitation of some of the older facilities at Folsom is needed and will be considered in master planning which is authorized. The construction program consists of minor projects totaling \$182,910 of which \$45,050 is for equipment to replace items lost in a recent fire, and \$137,850 to correct deficiencies and to improve the physical plant.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES<sup>a</sup>

## Minor Projects:

Construct hearing and counseling rooms—adjustment center	-	-	\$16,250
Replace main kitchen area floors (1st of 2 increments)	-	-	13,000
Construct vocational greenhouse	-	-	8,900
Install fire protection in Industries Building No. 1	-	-	8,300
Install emergency lighting facilities	-	-	5,000
Remodel offices in Administration Building	-	-	6,100
Construct sewage effluent holding ponds	-	-	8,450
Construct industries display building	-	-	8,000
Install fire hydrants	-	-	5,000
Install fire escapes	-	-	10,000
Equip conservation camp	-	-	6,000
Equipment to replace fire loss	-	-	45,060
Equip vocational shops (final of 3 increments)	-	-	42,850

ESTIMATED 1958-59 AND 1959-60 EXPENDITURES<sup>b</sup>

Construct additions to Honor Dormitory	\$255,907	\$27,165	-
Equip Honor Dormitory Addition:			
General Fund	-	12,470	-
Capital Outlay and Savings Fund	12,530	-	-
Construct Industrial Warehouse:			
General Fund	-	4,400	-
Capital Outlay and Savings Fund	15,490	-	-
Extend telephone system (General Fund)	-	1,800	-
Construct industries office building (Capital Outlay and Savings Fund)	—17,315 <sup>e</sup>	-	-
Construct Filtration Plant:			
General Fund	-	1,377	-
Capital Outlay and Savings Fund	23	-	-

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>b</sup> Major projects from State Construction Program Fund unless otherwise indicated.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

<sup>e</sup> Unexpended balances previously reported as expended in a prior year.

5	<b>State Prison at San Quentin</b>			
6	This is a close-medium security prison with extensive industrial activities as well as extensive educational and treatment programs. The institution has a rated capacity of 3,291 including a capacity of 546 in camps. The activation of the 101-capacity isolation-segregation building, an 80-capacity conservation camp and a 40-capacity mobile camp will bring the total capacity to 3,512 including 666 in camps in 1960-61.			
7	The institution is located on 404 acres adjacent to San Francisco Bay in Marin County about 3 miles southeast of the City of San Rafael.			
8	The major capital outlay projects which are being presented in this budget are the initial steps in the master plan for improving and rehabilitating the physical plant at San Quentin.

17				
18	Construct chapel (Phase II)-----	-	-	\$242,400
19	This project will complete the chapel program. The existing chapels are in buildings which will be razed in the modernization and rehabilitation of this prison.			
20	Construct addition to boiler plant-----	-	-	224,000
21	This project will provide required additional steam capacity for this institution. It will also permit replacement of one of the existing boilers.			
22	Equip isolation-segregation building-----	-	-	32,400
23	Funds for this building were appropriated in the 1957-58 Budget, and construction is well advanced. Provision is made for the necessary equipment so that the building, which will house 101 inmates, may be opened. The completion date for this project is June 1960.			
24	Equip chapel (Phase I)-----	-	-	11,300
25	Funds were appropriated for this project in the 1957-58 Budget. Construction is now well advanced and equipment money is included in this budget to place the chapel in operation upon completion.			
26	Minor Projects:			
27	Replace furniture factory roof—2d of 2 increments-----	-	-	17,360
28	Install additional lighting in west block and main yard-----	-	-	7,630

2				
3				
4				
5	This is a medium security institution with agricultural, industrial, academic, and vocational training programs. It is			
6	located on 936 acres of land in the Salinas Valley about 4			
7	miles north of the town of Soledad.			
8	The central facility consists of permanent reinforced concrete			
9	construction and was completed with a rated capacity of 1,527			
10	inmates in December 1951. A temporary barracks-type facility			
11	with rated capacity of 272, but an administrative population			
12				
13	<b>STATE BUILDING PROGRAM</b>			
14				
15	<b>PROPOSED 1960-61 EXPENDITURES <sup>a</sup></b>			
16				
17	Construct addition to industries warehouse-----	-	-	\$92,300
18	This project will provide approximately 7,500 square feet of			
19	storage space which will be utilized for handling raw and			
20	finished materials for the industries program. This project			
21	is connected directly to the activation of the Industries			
22	Building No. 3, and will be needed as soon as the paper			
23	converting industry is initiated.			
24	Construct addition to dairy-----	-	-	80,000
25	This project will add processing and refrigerated storage space,			
26	together with equipment necessary, to produce and process			
27	the milk for the Correctional Training Facility and part or			
28	all of Agnews State Hospital requirements. It will provide			
29	training and productive employment of 20 additional in-			
30	mates. These items are needed to bring the present facilities			
31	up to desired standards for the volume of milk now being			
32	handled.			
33	Equip addition to north facility administration building-----	-	-	6,500
34	To provide equipment to operate a previously authorized project			
35	which will be completed in 1960-61.			
36	Minor Projects:			
37	Replace dishwashing machines-----	-	-	12,000
38	Convert dairy and slaughterhouse boilers to gas operation-----	-	-	9,000
39	Pave roads, recreation areas and parking areas (1st of 3 in-			
40	crements)-----	-	-	9,000
41	Construct emergency lighting facilities-----	-	-	5,000
42	Install sawdust exhaust system in furniture refinishing and re-			
43	pair shop-----	-	-	5,000
44	Alteration and improvement projects under \$5,000-----	-	-	17,000
45				
46	<b>ESTIMATED 1958-59 AND 1959-60 EXPENDITURES <sup>b</sup></b>

## GENERAL ANALYSIS

The Capital Outlay program of the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population and the gradual increase in rate of commitment from the counties. The demand for additional capacity is being alleviated to some extent by a program of encouraging improvements in juvenile law enforcement and probation, increased use of county juvenile homes and camps through both maintenance and construction subsidies, and increased use of parole.

The major projects in the Capital Outlay program for the 1960-61 year consist of (a) the acquisition of a site for the Northern California Youth Center (b) the preparation of working drawings for this institution for the initial central services unit and the first 400-ward unit.

A new living unit for boys and commissary addition are included for the Northern Reception Center-Clinic; projects at

Fred C. Nelles School include major alterations to a living unit with an increase in its capacity, a visiting and control center, an academic school addition, physical education facilities, a new kitchen and dining room and 2 new 50-boy living units.

At Paso Robles School a physical education building and a special treatment program office building are included; at Youth Training School an academic school and vocational shop additions and a hospital addition are provided.

At Ventura School for Girls 2 50-girl living units, additions to the academic school and vocational shops, and a recreation room addition to the gymnasium are included.

Minor construction projects are budgeted for all existing institutions with the exception of the Conservation Camps for Boys, Youth Training School and Ventura School for Girls. Minor projects provide for necessary alterations, improvements and small scale additions.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

## Northern California Youth Center

The Northern California Youth Center to be located in Northern California, is the first of 2 youth centers with the other planned to be located in Southern California. With the exception of additions to the Northern Reception Center all of the department's capacity requirements for Northern California in the next 20-25 years will be provided here. It is anticipated that 12 400-ward institutions served by 1 central administrative and

business services unit will be constructed on a large site. While each 400-ward institution's treatment program will be complete and self-contained, the overall supervision, business services, maintenance, feeding, hospital care and communications will be provided by the central unit. Thus the operational economies of a large institution are expected with the program benefits of small 400-ward units.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Site acquisition-----	-	-	\$700,000
This project will provide for the purchase of a site for a youth center in northern California.			
Working drawings—central services unit and initial 400-ward institution-----	-	-	200,000
This project will provide working drawings for the initial central services unit and the first 400-ward institution.			
<b>TOTAL EXPENDITURES, CAPITAL OUTLAY (General Fund)</b> -----	-	-	\$900,000

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

## Paso Robles School for Boys

The Paso Robles School for Boys is located near Paso Robles in San Luis Obispo County. The school site covers 203 acres and the institution occupies an area of approximately 40 acres. The facilities have a capacity of 455 plus hospital and detention capacity of 39. All buildings are of single-story reinforced brick

construction with radiant heating. Each cottage houses 50 boys and contains both single rooms and a dormitory.

The 1960-61 program includes the construction and equipment of a special treatment unit and a physical education building.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Construct special treatment center -----

This project will provide office and clinical facilities for the special treatment staff.

Equip special treatment center -----

Construct physical education building -----

This project will provide needed facilities to adequately meet the school's physical education program.

Equip physical education building -----

## Minor Projects:

Academic school addition -----

Construct 2 residences -----

## Ventura School for Girls

The present physical facility of Ventura School for Girls was built in 1916 in Ventura County. It consists of 2-story cottage-type housing units with a capacity of 216 including 30 hospital and detention beds. A new institution is presently under construction approximately 20 miles from the present

site, and will be available for occupancy in the 1961-62 fiscal year. The projects funded through the 1960-61 Budget will provide for a capacity of 400 plus 14 hospital beds and 50 detention beds.

## SUMMARY—Continued

## DEPARTMENTAL ADMINISTRATION

Funds for acquiring sites for 4 new state colleges in Alameda County, Orange County, Stanislaus County, and the North Bay area were appropriated by Chapter 1681, Statutes of 1957. As there was no organization set up for any of these colleges, the appropriations were originally shown as a part of Departmental Administration of the Department of Education.

Since that time sites for 3 of the colleges have been selected and by the beginning of 1960-61 administrations for the colleges in Alameda, Orange, and Stanislaus Counties will have been

established. Therefore, expenditures for Capital Outlay purposes are shown in the budgets of the respective schools.

The site for the North Bay institution has not been selected and no college organization is proposed for 1960-61. Only the appropriation for site purchase for this college continues to be shown as a part of Departmental Administration. It is expected that a site will be selected and purchased for this school during 1959-60.

## STATE COLLEGES

## Enrollments

The construction programs for the 14 existing state colleges are based on a projected enrollment of 88,200 regular students (FTE) in 1962-63. This enrollment estimate is an increase of 27,590 over the 60,610 regular students (FTE) anticipated in 1960-61. This differs from enrollment projects for support budget purposes where full-time equivalents of all students are considered. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate many times that of the growth of the population as a whole.

These enrollment trends have been estimated from statistics

on prior experience of the progression of students from high schools to the colleges and through the various collegiate-level grades. The data include a compilation of the numbers of students by county of origin in order to allow a reasonably accurate distribution of students by college or university area. The projections also assume a continual increase in the percentage of population attending college in tax-supported institutions.

The following table outlines actual enrollments of regular students in the state colleges from 1957-58 to 1958-59 and estimated enrollments from 1959-60 through 1962-63.

Full-time Equivalent Enrollments of Regular Students<sup>1</sup>—1957-63

## Capacity

The basic unit for measuring classroom student capacity is the student station. The stations are weighted depending upon whether they are in lecture rooms, activity rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements, and weighting, based upon the time of required attendance per unit of student credit in each type of classroom, is given each student station.

The weighting is predicated on utilization standards which fix practical maximum utilization at 30 hours per week for lecture rooms, 25 hours per week for activity rooms and 20 hours per week for laboratories. Lecture rooms must be occupied an average of 75 percent of student station capacity each hour of use, while activity rooms and laboratories must be occupied

an average of 85 percent of student station capacity each hour of use.

The categorization of a room as lecture, laboratory, or activity can shift from year to year depending on its planned use. For example, a large enrollment in art courses will result in the shifting of lecture classrooms to art activity classrooms. These shifts can result in changes in the measured capacity of any given college plant from 1 school year to the next.

A fourth categorization is that of earned capacity. This is the capacity that results from actual enrollments in courses that use rooms which cannot be measured in terms of student stations. The best example of this type of capacity is the gymnasium.

The existing and funded capacity of the various college plants based on planned 1962 use is shown below.

<sup>e</sup> Unexpended balances previously reported as expended in a prior year.

<sup>1</sup> Includes FTE of physical education and production activities (earned FTE).

<sup>2</sup> These campuses will be operating in rented facilities during this time.

<sup>3</sup> Off-campus centers not included for Capital Outlay purposes.

## DEPARTMENT OF EDUCATION—Continued

## STATE COLLEGES—Continued

## Summary of Capacity—Existing and Funded—Available in the Fall of 1962

COLLEGE	LECTURE	ACTIVITY	LABORATORY	EARNED	TOTAL
Chico State College	1,554	649	231	347	2,781
Fresno State College	4,965	555	403	586	6,509
Humboldt State College	1,187	309	367	102	1,965
Long Beach State College	7,112	1,150	930	562	9,754
Los Angeles State College of Applied Arts and Sciences	3,120	991	510	209	4,830
Orange County State College	300	198	18	-	516
Sacramento State College	3,095	409	399	215	4,118
San Diego State College	6,100	672	905	511	8,188
San Fernando Valley State College	2,098	844	588	162	3,692
San Francisco State College	4,708	1,345	459	193	6,705
San Jose State College	8,599	1,971	894	1,048	12,512
California State Polytechnic College:					
San Luis Obispo Campus	3,429	96	879	299	4,703
Kellogg-Voorhis Campus	1,686	34	488	212	2,420
Totals	47,953	9,223	7,071	4,446	68,693

The total 1962 existing and funded capacity of 68,693 FTE is short 19,507 FTE of the needed capacity to house enrollments anticipated in 1962-63. The construction projects included in the budget for 1960-61 will include a total capacity of 13,403 FTE. Projects for which working drawings only are requested will provide 11,683 FTE. However, these projects for which working drawings only are provided will not be ready for occupancy before the fall of 1963 so that this apparent excess of capacity of 5,579 FTE is necessary to house enrollments anticipated in 1963-64.

## Status of Presently Authorized Capacity and 1960-61 Governor's Budget Provisions

1962-63 enrollment of regular students (FTE)	Enrollment	Capacity
1962 existing and funded capacity	88,200	-
1960-61 proposed projects (construction)	-	68,693
1960-61 proposed projects (working drawings)	-	13,403
Totals	88,200	93,779

## PROJECTS PROPOSED FOR FINANCING IN 1960-61

The total Capital Outlay program for the state colleges, including the California Maritime Academy, is \$42,496,323. Funds for major construction projects total \$39,890,330 or 93.9 percent of the total. The balance is composed of projects for the purchase of equipment, \$1,349,955, and minor construction projects of \$1,256,038.

The Capital Outlay program is summarized below by the type of project together with a general explanation of the projects. Additional detail is included in the budgets for the individual colleges.

## New Colleges

Projects totaling \$2,477,005 are included which will provide for the orderly development of the 3 new campuses of Stanislaus State College, Orange County State College and the State College for Alameda County. Funds for site acquisition are available from previous appropriations and sites have been selected by the State Public Works Board. The projects in the 1960-61 Budget will provide for working drawings and site development that will be required during 1960-61.

## Science and Engineering Facilities

The increased importance of science and engineering programs has resulted in an expanded enrollment in these areas, necessitating an expansion of existing facilities. Included in this budget are 3 projects (2 at California State Polytechnic College, San Luis Obispo Campus, and 1 at San Diego State College) totaling \$7,594,000 which is 19 percent of the total major Capital Outlay program. These 3 projects will provide for 1,658 FTE in science and engineering.

## Agriculture Facilities

2 projects at California State Polytechnic College (1 at the San Luis Obispo Campus and 1 at Kellogg-Voorhis) costing \$1,271,000 or 3.5 percent of the total major Capital Outlay program are included in the budget. The agriculture classroom

building at the Kellogg-Voorhis Campus will provide total capacity of 396 FTE.

## Physical Education Facilities

There are 5 projects included in the budget to provide physical education facilities. The project for San Fernando Valley State College is an augmentation of a project previously authorized by the Legislature. Of the 4 others, 2 are additions to existing gymnasiums (Fresno and San Jose State Colleges) and 2 are for outdoor physical education facilities at San Diego and San Jose State Colleges. The 5 projects provide 479 FTE capacity. Construction of physical education projects is 12.3 percent of the total major capital outlay program.

## Other Instructional Facilities

A total of \$15,720,610 or 39.7 percent of the major capital outlay program constituting other instructional facilities will provide additional capacity of 21,390 FTE. These projects, located on almost every one of the campuses, are classroom buildings to provide the lecture, activity and laboratory capacity required to serve the increasing enrollments. 6 of these projects providing 8,978 FTE of the total of 21,390 FTE capacity are funded for working drawings only. This is because it will take a full year to complete the working drawings and construction funds will be funded in a subsequent budget.

## Libraries

The funds for the construction of a library at Humboldt is included in the budget. The cost of this project is \$1,166,000 or 3 percent of the total of major construction expenditures.

## Cafeterias

A cafeteria costing \$1,278,000 is included for San Diego State College.

## DEPARTMENT OF EDUCATION—Continued

## STATE COLLEGES—Continued

## Administration Buildings

The construction of 2 new administration buildings (California State Polytechnic College—San Luis Obispo and Kellogg Voorhis campuses) and the remodeling of an existing building (Chico State College) are included in the 1960-61 Budget. These projects, totaling \$3,899,900, or 9 percent of the total major construction expenditures, are required to house the increasing administrative and business functions of the colleges. The 2 new facilities are so designed that the business functions can be expanded into the classroom space which is provided with an initial capacity of 1,163 FTE which is required to meet the 1962-63 enrollments.

## Site Acquisition

4 projects are included to purchase land for future construction. The total of \$1,660,500 is 4.1 percent of the total of major Capital Outlay expenditures. 1 of these projects will provide a site for future parking at San Diego State College. The other projects are for buildings that will be funded for construction within the next 2 years at Chico, Humboldt and San Jose State Colleges.

## Parking Facilities

A Capital Outlay parking program is included in the amount of \$1,004,600. This expenditure will provide 3,500 additional parking spaces for students and employees and automatic parking controls at a number of colleges, also, 1 project will provide working drawings for a multi-storied parking facility at Los Angeles State College. The number of additional parking spaces is summarized as follows:

College	1960-61 Parking Program
Chico	200
Fresno	200
Humboldt	200
Long Beach	1,800
Los Angeles	200
Los Angeles	(2,500) *
San Diego	400
San Fernando Valley	200
California Polytechnic College:	
Kellogg Voorhis	100
San Luis Obispo Campus	200
	<hr/> 3,500

\* Working drawings only for multi-story facility.

## Equipment

In addition to the major construction program, \$1,349,995 is included in this budget for equipping buildings and facilities funded either in 1959-60 or prior which are scheduled for completion in 1960-61. The total cost of this equipment is 3.1 percent of the total Capital Outlay program.

## Minor Capital Outlay

The final portion of the Capital Outlay program is a total of \$1,256,038 which is included in this budget for projects for minor Capital Outlay including a number of equipment projects for new instructional programs. The total of minor Capital Outlay projects is 3 percent of the total Capital Outlay program.

## SPECIAL SCHOOLS

The Department of Education administers 6 special schools—2 for the education of deaf children, 2 for the cerebral palsied children, 1 for the education of blind children and 1 orientation center for the adult blind.

1 major project only is proposed for 1960-61. The school for cerebral palsied children in Southern California now oc-

cupies rented quarters in Altadena. It is proposed to construct a new facility similar to the Northern California school on a site adjacent to the campus of Los Angeles State College which is to be purchased with funds provided in the 1959-60 Budget. This will give the 2 schools a capacity of approximately 32 residents each.

## State College for Alameda County

The State College for Alameda County was established by Chapter 1681, Statutes of 1957, with an appropriation of \$1,650,000 for site acquisition and improvements. In addition \$830,108 was appropriated by the Budget Act of 1958 for construction, improvements and equipment.

The college opened in rented facilities in September of 1959 with an FTE of 140, and 700 FTE is estimated for the 1960-61 year. A site in the hills, east of Hayward, was chosen by the Public Works Board on December 17, 1959, and occupancy of this permanent site is scheduled for the fall of 1963.

Site acquisition and development at a cost of approximately

\$3,000,000 will be carried on in the current year. State appropriations for these purposes total \$2,400,000. Expenditures necessary for site acquisition and development in excess of the \$2,400,000 available from state sources will be provided from local resources which have pledged up to \$740,000 for the purchase and development of a site of 150 useable acres.

This budget includes projects for working drawings for the initial permanent facilities and equipment for science and business curricula which will be offered in the fall of 1960 in rented facilities.

## Chico State College

Chico State College, established in 1889, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The college is located on a site totaling 111 acres in the city of Chico, and additional land is being acquired for classroom buildings and a site for a college farm. Projects currently under construction include: a humanities building, a physical science and agriculture building, swimming pool, a men's gymnasium, and the remodeling of the science building.

An enrollment of 3,700 regular students (FTE) is anticipated in 1962-63. Presently existing and funded capacity totals 2,781 (FTE). The 1960-61 program will add 976 (FTE) capacity.

Construction projects in the 1960-61 Budget include partial remodeling of the administration building, construction of the education-psychology building, and a parking lot to provide 200 additional parking spaces. The purchase of additional land is necessary for future construction including a corporation yard and engineering building and provision is made in this budget to acquire the needed area.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

61	Remodel administration building—Phase I .....	—	—	\$104,500
62	This project will provide additional space for the business and student personnel functions to accommodate the growth of the college.			
63	Construct education-psychology building .....	—	—	1,052,000
64	This project will provide additional lecture, activity, and auxiliary facilities for 976 FTE.			
65	Working drawings for music building .....	—	—	75,000
66	This project will provide working drawings for a future music building for a college of 4,500 FTE.			
67	Site acquisition for corporation yard and engineering building .....	—	—	453,000
68	This project will provide for the purchase of a site for a future corporation yard and engineering building.			
69	Construct surface parking .....	—	—	45,000
70	This project will provide for 200 additional parking spaces for students and employees.			
71	Minor Projects:			
72	Enlarge electrical services—men's gymnasium .....	—	—	32,000
73	Initial complement of equipment for engineering program .....	—	—	49,060
74	Alteration and improvement projects under \$5,000 .....	—	—	14,270

## Long Beach State College

This college was established in 1948 as an upper division liberal arts college, and beginning in the fall of 1953, the college was authorized to offer lower division courses. In the fall of 1951 it was moved to a permanent 320-acre site donated by the City of Long Beach.

An enrollment of 13,000 regular students (FTE) is estimated for 1962-63. Presently existing and funded capacity totals 9,754

(FTE) including the administration and engineering buildings which are now under construction.

This budget includes the construction of a classroom building for 1,618 FTE, working drawings for a second classroom building to contain 2,705 FTE and a parking program which will provide 1,800 additional parking spaces for students and employees.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES<sup>a</sup>

Construct classroom building No. 5			\$1,014,000
This project provides for the construction of a classroom building for 1,618 FTE and auxiliary facilities.			
Working drawings for classroom building No. 6			143,300
This project provides for the preparation of working drawings for a classroom building and auxiliary facilities with a capacity of 2,705 FTE.			
Construct surface parking			405,500
This project provides for 1,800 additional parking spaces for students and employees.			
Equip industrial arts building—2d increment			11,920
To equip the industrial arts building financed by the Budget Act of 1958.			

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

<sup>e</sup> Unexpended balances previously reported as expended in a prior year.

**Orange County State College**

Orange County State College will be located on a permanent site of 238 acres in the vicinity of Fullerton. Funds for site acquisition were appropriated by Chapter 1681, Statutes of 1957, and the Budget Act of 1958, Item 333.1. This college offered courses in rented facilities in 1959-60 and temporary facilities are being constructed with funds appropriated by the Budget Act of 1958, Item 333.1. The temporary facilities are planned for 500 students (FTE) and will be constructed on the

permanent site. They will be ready for occupancy in the fall of 1960.

This budget includes \$550,000 for working drawings for the initial building with a capacity of 1,783 students (FTE). This building is planned so that it will serve a future enrollment of 1,240 students (FTE) in science. In addition, projects are included for site development and for the equipment for the temporary facilities.

**STATE BUILDING PROGRAM****PROPOSED 1960-61 EXPENDITURES<sup>a</sup>**

Site development	—	—	\$828,400
This project will provide for the necessary site development of the permanent campus.			
Working drawings for science building	—	—	550,000
This project will provide for working drawings for the first permanent building with a capacity of 1,783 (FTE).			
Equip temporary buildings	—	—	195,905
This project will provide equipment for the temporary facilities funded by the Budget Act of 1958.			

**ESTIMATED 1958-59 AND 1959-60 EXPENDITURES<sup>b</sup>**

## San Diego State College

San Diego State College offers courses in general education, teacher training, industrial arts, and vocational education. Major growth during recent years has occurred in sciences and business administration, both at the graduate and undergraduate level. The college is located on a 268-acre site within the City of San Diego. An enrollment of 9,500 regular students (FTE) is anticipated for 1962-63. Presently existing and funded capacity totals 8,188 FTE. This includes projects now under construction

which are an engineering building, education building, men's gymnasium and science building addition. This budget includes the construction of a life science and psychology building with a capacity of 1,014 (FTE), a cafeteria and outdoor physical education facilities. The parking program includes an additional 400 parking spaces for students and employees as well as additional land for future parking.

## STATE BUILDING PROGRAM

## PROPOSED 1960-61 EXPENDITURES a

Construct life science and psychology addition	—	—	\$3,923,200
This project will provide for the construction of a life science and psychology addition for 1,014 FTE. It includes classrooms, faculty offices, and auxiliary facilities.			
Construct outdoor physical education facilities	—	—	647,750
This project will provide for outdoor physical education facilities to serve an enrollment of 11,400 FTE.			
Equip outdoor physical education facilities	—	—	9,330
Construct surface parking	—	—	90,000
This project will provide an additional 400 parking spaces for students and employees.			
Site acquisition for surface parking	—	—	27,500
This project will provide an additional site for future parking.			
Construct cafeteria	—	—	1,278,000
This project will provide for a cafeteria of 560 seats and will bring the seating capacity to the standard of a state college of 10,600 FTE.			
Equip corporation yard	—	—	12,980
This project will equip the corporation yard funded by the Budget Act of 1959.			
Minor Projects:			
Purchase and install X-ray machine	—	—	19,410
Construct sidewalk and landscaping along Montezuma Avenue	—	—	20,700
Relocate and remodel temporary buildings	—	—	22,800
Provide sun control for education building	—	—	11,550
Steam line alteration	—	—	19,250
Alteration and improvement projects under \$5,000	—	—	13,287

## ESTIMATED 1958-59 AND 1959-60 EXPENDITURES b

Equip administration building addition	—	\$9,900	—
General Fund	—	22,500	—
Equip education building addition	—	22,000	—
General Fund	—	22,000	—

21	<b>San Fernando Valley State College</b>			
22				
23	San Fernando Valley State College became a separate college	This budget includes working drawings for a classroom building of 4,669 FTE capacity, scheduled for completion in the fall of 1963, which will be required to serve the rapidly increasing enrollments. In addition, this budget includes additional funds necessary for the construction of the college gymnasium and a parking program for additional parking spaces for students and employees.		
24	on July 1, 1958, by authority of Chapter 2265, Statutes of 1957.			
25	The campus, located in Northridge, contains 245 acres. An enrollment of 6,300 regular students (FTE) is anticipated for 1962-63. Presently existing and funded capacity totals 3,692			
26	(FTE) including projects currently under construction which			
27	are the cafeteria, speech-drama building and physical education			
28	building.			
29

31	<b>STATE BUILDING PROGRAM</b>			
32				
33	<b>PROPOSED 1960-61 EXPENDITURES <sup>a</sup></b>			
34				
35	Working drawings for classroom building No. 1-----	—	—	\$358,960
36	This project will provide for working drawings for a classroom			
37	building and related auxiliary facilities of 4,669 FTE			
38	capacity.			
39	Construct and improve surface parking-----	—	—	98,600
40	This project will provide parking controls and 200 additional			
41	parking spaces for students and employees.			
42	Construct gymnasium-----	—	—	1,314,900
43	This project will augment the appropriations of Chapter 1,			
44	Statutes of 1958, and provide the total amount necessary			
45	for the construction of the gymnasium.			
46	Equip fine arts building—2d increment-----	—	—	16,920
47	This project will provide equipment for the home economics cur-			
48	riculum to be housed in the fine arts building which was			
49	financed by the Budget Act of 1957.			
50	Equip speech-drama building-----	—	—	137,015
51	This project will equip the speech-drama building financed by			
52	the Budget Act of 1957.			
53	Equip cafeteria-----	—	—	122,620
54	This project will equip the cafeteria financed by the Budget			
55	Act of 1958.			
56	Equip library—2d increment-----	—	—	77,150
57	This project will provide additional equipment for the library			
58	financed by the Budget Act of 1957.			
59	Equip science building—2d increment-----	—	—	36,440
60	This project will provide equipment for the instructional pho-			
61	tography facilities to be housed in the science building			
62	financed by the Budget Act of 1957.			
63	Minor Projects:			
64	Initial complement of equipment for engineering program-----	—	—	16,850
65	Equipment for foreign language listening laboratory-----	—	—	20,250
66	Equipment for statistics laboratory center-----	—	—	25,285
67	Equipment for psychology lab—fine arts building-----	—	—	15,450

## San Jose State College

San Jose State College was established in 1870, and is a fully accredited 5-year college offering programs in general education and teacher training. The college is located on a 107-acre site in the City of San Jose. The enrollment estimate of regular students for 1962-63 is 13,300 (FTE). Presently existing and funded capacity totals 12,512 (FTE). Projects currently funded or under construction include a library addition, music building addition, engineering building, speech and drama building addition, residence halls, education building, outdoor

physical education facilities, aeronautics building, and a multi-storied parking facility.

Additional facilities proposed in this budget include the construction of an audio-visual addition for 46 (FTE), police-military science building for 850 (FTE), women's gymnasium addition for 205 (FTE), and an outdoor physical education facility. In addition, \$1,000,000 is provided for the purchase of additional land for planned expansion.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Construct audio-visual addition-----	-	-	\$390,400
Equip audio-visual addition-----	-	-	57,860
This project will provide for the enlargement of the central audio-visual facility and provide teaching stations for 46 FTE.			
Construct police-military science building-----	-	-	1,941,500
This project will replace temporary capacity which will be lost due to the construction of the women's gymnasium addition. It will provide a total capacity of 850 FTE and auxiliary facilities.			
Site acquisition-----	-	-	1,000,000
The project will provide for the acquisition of land for proposed buildings.			
Construct women's gymnasium addition-----	-	-	2,096,000
This project will provide indoor physical education facilities for women and provide for lecture and activity capacity of 205 FTE.			

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

## Stanislaus State College

Funds for site acquisition for a new state college in Stanislaus County were appropriated by Chapter 1681, Statutes of 1957. On December 9, 1959, the State Public Works Board selected a site of 220 acres approximately 1 mile north of the

City of Turlock to be the permanent home of this college. Stanislaus State College will begin operation in rented facilities in 1960-61. The 1960-61 program proposes an additional \$200,000 to provide funds to continue the development of this college.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Site acquisition, construction, improvements and equipment .....	-	-	\$200,000
This project will provide for the initial development of this college.			

ESTIMATED 1958-59 AND 1959-60 EXPENDITURES <sup>b</sup>

Site acquisition .....	-	\$400,000	-
<b>TOTAL EXPENDITURES, CAPITAL OUTLAY</b> .....	-	\$400,000	\$200,000
General Fund .....	-	-	\$200,000
State Construction Program Fund <sup>d</sup> .....	-	400,000	-

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>b</sup> Major projects from State Construction Program Fund unless otherwise indicated.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

26				
27	California State Polytechnic College, established in 1901,			
28	provides occupational education at the collegiate level in agri-			
29	culture, engineering, and the arts and sciences.			
30	The campus at San Luis Obispo is located on a 2,838-acre			
31	site and including existing and currently funded buildings has			
32	a capacity of 4,703 regular students (FTE). An enrollment of			
33	6,000 (FTE) is anticipated for 1962-63. In order to meet this			
34	increase in enrollment, the 1960-61 Budget includes an English			
35	and speech building 544 (FTE), engineering building 604			
36	(FTE), physical science addition 40 (FTE), administration-			
37	classroom building 172 (FTE), and agricultural units. A park-			
38	ing program is included which will provide 200 additional			
39	parking spaces for students and employees.

5				
6	<b>California School for the Deaf, Berkeley</b>			
7	This residential school, with a capacity of 500, educates			
8	mentally normal deaf children from elementary through high			
9	school grades with special emphasis on language concepts. The			
10	1960-61 Capital Outlay program proposes only 3 minor proj-			
11	ects; 2 to plan or improve existing facilities and 1 new fa-			
12	cility.			
13	The largest project is for a new swimming pool for the ex-			
14	clusive use of the School for the Deaf. The pool in the old			
15	gymnasium, built in 1915, is shared with the Blind School. The			
16	2 schools have long since outgrown the single pool. The old			
17	pool will be used for a physical education program for the blind			
18	pupils with the addition of the proposed new pool for the deaf			
19	pupils.

## UNIVERSITY OF CALIFORNIA

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	
1					
2	The University operates on 7 major campuses and a number				
3	of experiment stations. Major campuses are situated at Berke-				
4	ley, San Francisco, and Davis in northern California; and at				
5	Los Angeles, La Jolla, Riverside, and Santa Barbara in south-				
6	ern California. Los Angeles includes a general and medical				
7	campus, and San Francisco a medical campus.				
8	The 1960-61 Capital Outlay program for the University totals				
9	\$52,228,435 from state funds, distributed by campus as follows:				
10					
11	<i>Campus</i> <span style="float:right"><i>Total</i></span>				
12	Statewide -----	\$2,181,449			
13	Berkeley -----	14,740,186			
14	Davis -----	6,088,900			
15	La Jolla -----	5,879,440			
16	Los Angeles -----	10,490,909			
17	Los Angeles Medical Center -----	1,240,098			
18	Riverside -----	901,078			
19	San Francisco Medical Center -----	10,085,875			
20	Santa Barbara -----	533,000			
21	Field stations -----	87,500			
22					
23	Totals -----	\$52,228,435			

The University no longer receives any money from the Fair and Exposition Fund as it did in prior years. Contract overhead funds have been applied to other projects and the expenditure from that source is not shown for 1960-61.

In general the projects included in the 1960-61 program provide for: classrooms, and facilities for operation of such classrooms, which are required to accommodate student enrollment at time of completion of project; site acquisitions and development for classrooms and capacity facilities for operation of such classrooms if the project requested cannot be placed on existing site; research facilities related to the teaching staff and post graduate students; auxiliary facilities required for operation of existing facilities, which if omitted would seriously hamper efficient operations.

Enrollment projections upon which this budget is based are as follows:

	Actual	Actual	FULL-TIME EQUIVALENT STUDENTS			
	Fall 1958	Fall 1959	Estimated Fall 1960	Estimated Fall 1961	Estimated Fall 1962	Estimated Fall 1963
Berkeley -----	19,198	20,100	21,900	24,100	26,000	27,750
Davis -----	2,341	2,550	2,900	3,200	3,600	3,950
La Jolla (Scripps Institute) -----	53	50	50	50	100	100
Los Angeles (excluding Medical) -----	15,673	16,300	17,600	19,500	21,350	23,050
Los Angeles Medical -----	601	600	600	650	650	1,100
Riverside -----	991	1,550	2,000	2,350	2,600	2,800
San Francisco -----	1,534	1,550	1,600	1,600	1,650	1,950
Santa Barbara -----	2,710	3,150	3,800	4,350	4,700	5,000
Totals -----	43,101	45,850	50,450	55,800	60,650	65,700

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

## STATEWIDE

Preliminary plans -----	-	-	\$1,122,100
To provide funds for the preparation of preliminary plans and cost estimates for University projects for inclusion in the 1961-62 Governor's Budget, and for general planning studies.			
Acquire, remodel, and equip California Farm Bureau Federation Building for University Extension Administration -----	-	-	480,954
To provide third payment on building contiguous to Berkeley campus to house administration of University Extension, and to remodel and equip it for its new uses.			
Alter and equip Ford plant for off-campus storage building—statewide -----	-	-	375,000
To provide for alteration and equipment for Ford plant which is to be acquired for use as an off-campus storage building from funds already available.			

## MT. HAMILTON

Auxiliary equipment for 120-inch telescope, step 3 -----	-	-	73,920
To provide 3d step of equipping 120-inch telescope with spectrographic and other auxiliary equipment.			
Construct and equip staff apartment building -----	-	-	89,475
To prepare working drawings for, construct, and equip 4-unit apartment building to house astronomers and other staff.			
Minor Projects:			
Mt. Hamilton, provide recording microphotometer -----	-	-	40,000
South Coast Field Station—For undeveloped 80 acres, level and install irrigation system -----	-	-	48,000
Hopland Field Station—construct sheep barn, hay storage shed, and feeder shed -----	-	-	35,000
Tulelake Field Station—provide electrical improvements -----	-	-	4,500

<sup>a</sup> From General Fund unless otherwise indicated.

14	Working drawings for alterations to Hearst Mining Building	-	-	21,500
15	To prepare working drawings for improvements to the Hearst			
16	Mining Building to (1) convert for new occupancy the			
17	space vacated in the move of paleontology to the new			
18	earth sciences building, and (2) make the building as			
19	a whole more effectively usable for teaching and research			
20	in mineral technology and related fields.			
21	Construct chemistry unit 1 (additional cost)	-	-	1,981,000
22	To complete construction of a classroom, laboratory, and			
23	office building for teaching and research in chemistry.			
24	Original funds provided in Budget Act of 1958.			
25	Construct utilities	-	-	352,500
26	To prepare working drawings for and construct additions to			
27	utilities as required for expanding campus plant.			
28	Construct engineering unit 1	-	-	5,000,000
29	To construct building with classrooms, laboratories, and offices			
30	for teaching and research in nuclear engineering, indus-			
31	trial engineering, aeronautical sciences, and mechanical			
32	and design engineering.			
33	Construct LeConte Annex	-	-	3,383,470
34	To construct a building with classrooms, laboratories, and			
35	offices for teaching and research in physics.			
36	Complete altering and equipping third floor of Mulford Hall	-	-	154,403
37	To prepare working drawings for, construct, and equip im-			
38	provements to area in Mulford Hall vacated in the move			
39	off-campus by the California Range and Experiment Sta-			
40	tion, to make area effectively usable for teaching and			
41	research in genetics.			
42	Construct greenhouses on Oxford Tract	-	-	755,500
43	To prepare working drawings for and construct agricultural			
44	greenhouses to replace greenhouses which must be cleared			
45	from site of future biochemistry building.			
46	Land acquisition	-	-	242,000
47	To purchase sites for campus expansion to accommodate esti-			
48	mated enrollments as the parcels become available.			
49	Transfer Stephens Union and Eshleman Hall to academic use	-	-	1,620,000
50	To provide for the release of 2 centrally located buildings now			
51	occupied by student activities and to make these available,			
52	after release, and after alteration (through later appro-			
53	priation) for teaching and research in the social sciences.			
54	Minor Projects:			
55	Gymnasium for men—alter room 18 to consolidate storage and			
56	equipment issue facilities, and to release issue room for			
57	use as laboratory	-	-	6,300
58	Forest products laboratory—provide improvements to controlled			
59	environment room	-	-	21,000
60	Forest products laboratory—construct water cooling tower	-	-	8,800
61	Doe Library—install instructional exhibit facilities in wide cor-			
62	ridors of third floor for department of art	-	-	13,600
63	Life sciences building—rehabilitate rooms 2556 and 2558 for			
64	department of physiology	-	-	13,200
65	Botanical gardens—construct 2 greenhouses	-	-	12,000
66	Forest products laboratory—construct storage shed	-	-	8,800
67	Provide electron microscope for inter-department use	-	-	57,000
68	Life sciences building—replace ammonia refrigeration system			
69	with freon system	-	-	20,000
70	Improve lighting in various buildings	-	-	50,000
71	Life sciences building—alter rooms 1030 and 2040 for increased			
72	effectiveness as botany teaching laboratories	-	-	8,800
73	LeConte Hall—construct lead shield around fume hood for pro-			
74	tection from radioactivity	-	-	7,700
75	Hesse Hall—replace roof membrane over room 240 and install			
76	rollaway metal door in north wall of room 240	-	-	6,300
77	Cowell Hospital—provide auxiliary electrical generator	-	-	42,000
78	Agriculture Hall—develop room 204 as a teaching laboratory	-	-	5,000
79	Botanical gardens—install new electrical distribution system	-	-	10,500
80	Men's gymnasium—alter rooms 5-B, 5-C, and 5-D to provide ex-			
81	panded class areas	-	-	4,000
82	Sprout Hall—provide ventilation for room 108	-	-	9,000
83				
84				
85				
86

2				
3	PROPOSED 1960-61 EXPENDITURES—Continued			
4				
5	BERKELEY CAMPUS—Continued			
6	Minor Projects—Continued			
7	Doe Library—rehabilitate men's washrooms-----	-	-	\$20,000
8	Blodgett Experimental Forest—construct garage, workshops, and			
9	storage shed-----	-	-	49,500
10	Cowell Hospital—replace steam lines-----	-	-	21,000
11	Life sciences building—rehabilitate room 3545 for department of			
12	bacteriology-----	-	-	6,900
13	Life sciences building—remodel rooms 2024 and 2024-A and put			
14	display cabinets in corridor-----	-	-	17,000
15	Men's gymnasium—alterations and repairs to swimming pools---	-	-	21,000
16	Life sciences building—refurnish room 3530 for bacteriology---	-	-	32,500
17	Various buildings—rehabilitation of 4-KV switches-----	-	-	27,500
18	Strawberry Canyon—storm damage prevention—step 1-----	-	-	50,000
19	Hesse Hall—purchase and install main electrical panel, room			
20	120, for engineering-----	-	-	6,000
21	Poultry-botanical garden—rehabilitate gas line-----	-	-	7,000
22	Gill Tract—remodel headhouse No. 1 for agriculture-biological			
23	control-----	-	-	11,200
24	Donner Laboratory—alteration and extension of teaching labora-			
25	tories rooms 315, 317, 321-----	-	-	14,400
26	Richmond field station—enlarge towing channel and building---	-	-	23,000
27	General campus—repair water pressure valves various buildings			
28	Life sciences building—increase distilled water facilities---	-	-	10,000
29	Life sciences building—install mezzanine floor and ventilation,			
30	room 5093, zoology-----	-	-	22,500
31				31,600
32				
33	DAVIS CAMPUS			
34	Construct general campus utilities-----	-	-	770,600
35	To prepare working drawings for and construct utility im-			
36	provements required by campus expansion; work includes			
37	utility extensions to site of biological sciences unit 2,			
38	provision of reservoir, pumps, and water distribution			
39	system, and improvements to storm drain system.			
40	Construct biological sciences unit 2-----	-	-	3,867,000
41	To construct building with classrooms, laboratories, and offices			
42	for teaching and research in plant pathology, bacteriology,			
43	zoology, and genetics.			
44	Construct classroom unit 2-----	-	-	1,325,000
45	To prepare working drawings for and construct building with			
46	classrooms, laboratories, and research in the social			
47	sciences, languages and literature, agricultural economics,			
48	mathematics, education, psychology, and the arts; tem-			
49	porary housing of campus administrative activities will			
50	release space in library-administration building for			
51	urgently needed expansion of library.			
52	Minor Projects:			
53	Complete remodeling of psychrometric chamber for animal			
54	husbandry-----	-	-	16,000
55	Construct access roads to new residence hall unit 4-----	-	-	17,500
56	Food technology building—repair equipment in pilot plant-----	-	-	30,000
57	Poultry husbandry building—provide sun control-----	-	-	3,400
58	Remodel barn on Hopkins Tract for animal husbandry-----	-	-	21,900
59	Provide improvements to building on Hopkins Tract for better			
60	use as poultry husbandry field headquarters-----	-	-	3,200
61	Provide drinking fountains in older campus buildings-----	-	-	11,000
62	Dairy industry building—correct health and safety hazards-----	-	-	17,200
63	Provide sump and return flow line in area E-4 for control of			
64	run-off water from irrigation experiments-----	-	-	6,100
65				
66	LA JOLLA CAMPUS			
67	Construct and equip school of science and engineering building			
68	unit 1-----	-	-	3,836,940
69	To construct and equip first unit for the teaching and research			
70	activities of the new school of science and engineering.			
71	Working drawings for school of science and engineering building			
72	unit 2-----	-	-	219,000
73	To prepare working drawings for the second unit for the teach-			
74	ing and research activities of the new school of science			
75	and engineering.			
76	Construct services for school of science and engineering building			
77	units-----	-	-	1,665,500
78	To prepare working drawings for and construct first step of			
79	utilities, heating plant, corporation yard, and site develop-			
80	ment related to the new school of science and engineering.			
81

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	STATE BUILDING PROGRAM—Continued			
2				
3				
4	PROPOSED 1960-61 EXPENDITURES—Continued			
5				
6	LA JOLLA CAMPUS—Continued			
7	Land acquisition for laboratory unit 4-----	-	-	\$108,000
8	To provide for increase in estimated cost of property required			
9	for proper development in relation to laboratory unit 4.			
10	Budget Act of 1959, Item 341(n) appropriated \$172,000			
11	which is inadequate.			
12	Minor Projects:			
13	Alter and improve library building to provide additional book-			
14	stacks, a receiving and workroom area, and better heating			
15	and ventilation-----	-	-	50,000
16				
17	LOS ANGELES CAMPUS			
18	Equip engineering unit 3-----	-	-	722,919
19	To equip engineering unit 3 funded in the Budget Act of 1958.			
20	Equip altered areas in physics building-----	-	-	68,640
21	To equip areas in physics building vacated by botany for use			
22	by physics, construction of the alterations having been			
23	funded in the Budget Act of 1959.			
24	Construct additions to campus electrical system-----	-	-	367,300
25	To prepare working drawings for and provide expanded power			
26	capacity for the existing electrical substation, construct			
27	a new electrical substation in the north campus area, and			
28	make alterations of switchboards and distribution systems			
29	to handle the increased power load of the campus.			
30	Construct addition to chemistry-geology building-----	-	-	4,215,800
31	To construct addition to chemistry-geology building with			
32	classrooms, laboratories, and offices for teaching and re-			
33	search in chemistry and geology.			
34	Construct north-campus library-----	-	-	3,900,000
35	To construct library building to provide expanded book ca-			
36	capacity for main collections, provide reading rooms and			
37	ancillary library facilities, and permit reallocation of			
38	areas in present main library building for balance in			
39	meeting library needs.			
40	Complete Franz Hall addition and alter and equip areas in			
41	Franz Hall-----	-	-	426,500
42	To complete items in Franz Hall Addition project (for psy-			
43	chology) and to alter and equip Franz Hall to integrate			
44	its facilities with those of the addition.			
45	Working drawings for physics unit 2-----	-	-	203,200
46	To prepare working drawings for an annex to the physics			
47	building with classrooms, laboratories, and offices for teach-			
48	ing and research in physics.			
49	Construct addition to cyclotron building-----	-	-	77,150
50	To prepare working drawings for and construct an addition			
51	to the cyclotron building to house a 50 Mev cyclotron.			
52	Minor Projects:			
53	Provide cement lining, "in place," for maintenance of all unlined			
54	water mains 4 inches or more in diameter-----	-	-	63,800
55	Life sciences building—equip rooms 4126 and 4128 for bacteri-			
56	ology research laboratory-----	-	-	5,000
57	Home economics building—convert rooms 2201, 2201A, and 2211			
58	into laboratories for nutrition research-----	-	-	28,000
59	Royce Hall—convert classroom to language laboratory-----	-	-	50,000
60	Moore Hall—provide acoustical treatment and remodeling of			
61	lecture hall room 100-----	-	-	43,000
62	Ornamental horticulture area—alter and repair building A for			
63	plant pathology-----	-	-	29,800
64	Law building—convert room 233 into 3 faculty offices-----	-	-	5,500
65	Subtropical horticulture greenhouses—provide smog-removal			
66	equipment-----	-	-	35,500
67	Correct effects of settling of court on northwest corner of music			
68	building-----	-	-	5,000
69	Royce Hall—replace switchboard and portion of stage floor----	-	-	47,500
70	Engineering building A—provide partitions about 2 areas to			
71	control noise in teaching area-----	-	-	7,300
72	Art building—provide ventilation for inside basement rooms of			
73	west wing of building-----	-	-	31,000
74	Music building—complete unfinished area in basement-----	-	-	40,000
75	Chemistry building—replace corroded fume hoods-----	-	-	118,000

1	STATE BUILDING PROGRAM—Continued			
2				
3				
4	PROPOSED 1960-61 EXPENDITURES—Continued			
5				
6	LOS ANGELES MEDICAL CENTER			
7	Equip altered areas in medical center to serve neuropsychiatric			
8	institute	-	-	\$132,000
9	To equip expanded facilities in the medical center to meet de-			
10	mand for services from operations of new neuropsychiatric			
11	institute.			
12	Equip research laboratories of neuropsychiatric institute	-	-	224,343
13	To equip the research areas of the new building for the neuro-			
14	psychiatric institute.			
15	Construct west medical heating plant	-	-	230,355
16	To construct heating plant on west medical campus.			
17	Construct parking structure	-	-	546,000
18	To provide matching funds for non-State funds to prepare work-			
19	ing drawings for and construct a parking structure for 889			
20	cars.			
21	Minor Projects:			
22	Hospital—complete rooms A6-229 and A6-230 in conjunction			
23	with activation of neuropsychiatric institute	-	-	18,400
24	Expand food service facilities in cafeteria area	-	-	41,000
25	Convert rooms 32-077 and 32-075D to offices, classroom, and			
26	storage facilities for school of nursing	-	-	48,000
27				
28	RIVERSIDE CAMPUS			
29	Equip health service building	-	-	103,482
30	To equip health service building funded in the Budget Act of			
31	1959.			
32	Construct and equip alterations to physical education building	-	-	26,000
33	To prepare working drawings for, construct, and equip altera-			
34	tions to areas in physical education building to be vacated			
35	by the student health service, to make areas effectively			
36	usable for physical education.			
37	Equip physical education facilities	-	-	16,896
38	To equip physical education outdoor facilities funded in the			
39	Budget Act of 1959.			
40	Construct utilities	-	-	226,300
41	To prepare working drawings for and provide electric service			
42	through the main meter to health service buildings, resi-			
43	dence hall, and new corporation yard, and extend water			
44	and sewer lines to health service building.			
45	Working drawings for humanities building	-	-	100,400
46	To prepare working drawings for building with classrooms,			
47	laboratories, and offices for languages and literature, art,			
48	music, and drama; building will include laboratory-theater			
49	for dramatic art.			
50	Construct general campus site improvements	-	-	250,000
51	To prepare working drawings for and construct site improve-			
52	ments, including roads, walks, and general campus lighting.			
53	Minor Projects:			
54	Physical sciences building—install fume hood in room 2268-A	-	-	5,500
55	Library building—install enclosures for noise control and addi-			
56	tional working areas, and provide additional bookstacks	-	-	38,500
57	Provide improvements to campus electrical system for safety	-	-	43,000
58	Construct storehouse for department of vegetable crops	-	-	20,000
59	Construct storage and service facility for entomology spray and			
60	dust equipment	-	-	21,000
61	Construct glasshouse addition to headhouse 16 for college of			
62	letters and science	-	-	50,000
63				
64	SAN FRANCISCO CAMPUS			
65	Construct and equip alterations to U. C. Hospital	-	-	652,000
66	To make alterations to and equip space in U. C. Hospital to			
67	provide clinical laboratories and other facilities to support			
68	hospital bed areas.			
69	Construct health sciences instruction and research unit 1	-	-	8,883,275
70	To construct building with facilities for medical and health			
71	sciences instruction and research.			
72	Land acquisition	-	-	430,000
73	To purchase sites for campus expansion.			
74	Minor Projects:			
75	Construct rear service road and ramp to medical research			
76	building	-	-	6,300
77	Moffitt Hospital—modify acid and glass washing facilities for			
78	clinical laboratories	-	-	13,000
79	Provide enclosures and window modification for suicide deter-			
80	rence	-	-	47,500
81				
82				
83				
84

6	SAN FRANCISCO CAMPUS—Continued			
7	Minor Projects—Continued			
8	Moffitt Hospital—alter refuse and linen chutes to prevent flow of			
9	contaminated air into hospital areas	-	-	\$40,000
10	Moffitt Hospital—expand telephone exchange	-	-	10,300
11	Add afterburner to campus incinerator to reduce smog production	-	-	3,500
12				
13	SANTA BARBARA CAMPUS			
14	Construct utilities	-	-	186,400
15	To prepare working drawings for and construct electric sub-			
16	station addition, augment electrical distribution system,			
17	extend utilities to classroom and office unit 2, and install			
18	electroliers in selected areas of campus.			
19	Construct and equip alterations to science unit 1	-	-	86,000
20	To prepare working drawings for, construct, and equip altera-			
21	tions to 3 areas in science unit 1 to be vacated by bio-			
22	logical sciences, to make space effectively usable as a			
23	physics teaching laboratory, laboratory service room, and			
24	shop; project also includes relocation of biological sci-			
25	ences laboratory.			
26	Construct general campus site improvements	-	-	160,000
27	To prepare working drawings for and construct campus ap-			
28	proach road.			
29	Minor Projects:			
30	General electrical improvements—replace overhead wiring with			
31	underground wiring, increase electric panel capacities	-	-	35,600
32	Construct greenhouse and lathhouse for biological sciences	-	-	25,000
33	Construct additional animal house facilities for departments of			
34	biology and psychology	-	-	40,000

25	Construct and equip residence hall unit 2 (partial cost)---	2,496,957	-	-
26				
27	Minor Projects: <sup>c</sup>			
28	Enlarge 4 K.V. feeder system of campus main electrical system	-	60,000	-
29	Convert to academic and administrative use part of storehouse			
30	building and residence at 2620 Bancroft Way, 2222 Piedmont			
31	Avenue, and 2232 Piedmont Avenue-----	-	45,000	-
32	Engineering building—alter attic (room 500) to provide effective			
33	storage facilities-----	-	18,500	-
34	Life sciences building—alter refrigeration room and laboratory			
35	room 3521 for department of bacteriology-----	-	9,500	-
36	Alteration and improvements projects under \$5,000-----	-	2,650	-
37	Hearst Mining Building—install ventilation for safety in pres-			
38	sure-volume-temperature laboratory (room 238)-----	10,000	-	-
39	Wheeler Hall—improve ventilation system-----	15,000	-	-
40	Old chemistry building—rehabilitate laboratory facilities in room			
41	246, using experimental installation of stations newly de-			
42	signed to achieve greater space utilization-----	37,000	-	-
43	Engineering building—partition and develop photogrammetry lab-			
44	oratory and 2 offices in room 7-----	8,500	-	-
45	Install smog-control equipment on virus laboratory greenhouses---	11,000	-	-
46	Life sciences building—remodel laboratory in room 2030 for in-			
47	struction in botany-----	15,000	-	-
48	Gilman Hall—rehabilitate electrical distribution system-----	35,000	-	-
49	Remodel areas in mechanics building-----	45,000	-	-
50	Alteration and improvement projects under \$5,000-----	3,500	-	-
51				
52	<b>Expenditures From Fair and Exposition Fund</b>			
53				
54	Equip room 50 of home economics building as nutrition re-			
55	search laboratory-----	-	23,000	-
56	Alter and modernize room 307 of Agriculture Hall—entomology			
57	and parasitology-----	8,000	-	-
58	Install ventilating hood and drying chamber in room 115 of Mul-			
59	ford Hall-----	9,000	-	-
60	Construct storage shed for organic solvents and chemical rea-			
61	gents at forest projects laboratory-----	11,500	-	-
62	Install root temperature tanks in plant pathology greenhouse---	20,000	5,200	-
63	Remodel service-storage building—Gill Tract-----	5,000	-	-
64	Expand distilled water facilities in home economics building-----	9,000	-	-
65	Remodel 3d floor of Mulford Hall for department of genetics---	36,000	-	-
66	Alteration and improvement projects under \$5,000-----	1,250	-	-
67				
68	<b>DAVIS CAMPUS</b>			
69	Construct physical sciences unit 1-----	-	1,592,890	-
70	Construct general campus utilities—step 2-----	75,000	724,500	-
71	Fair and Exposition Fund-----			
72	Food technology building—completion of fast-freezing unit-----	47,700	-	-
73	Fair and Exposition Fund-----			
74	Construct auditorium-----	1,290,800	30,300	-
75	Fair and Exposition Fund-----			
76	Poultry husbandry building—complete environmental			
77	control facilities-----	350,000	-	-
78	Fair and Exposition Fund-----			
79	Physical education fields and facilities-----	77,500	-	-
80	Fair and Exposition Fund-----			
81				
82	<sup>c</sup> Minor projects for 1958-59 from Capital Outlay and Savings Fund and for 1959-60 from General Fund unless otherwise indicated.

26	Alter vacated horticulture annex building for department of art	-	13,200	-
27				
28	Expenditures From Fair and Exposition Fund			
29				
30	Install irrigation facilities in A-7a for department of animal hus-			
31	bandry	-	11,500	-
32	Complete equipment for 3 controlled growth chambers for depart-			
33	of agronomy	-	17,000	-
34	Convert room 218 of home economics building into teaching			
35	laboratory for foods and low temperature storage	-	30,500	-
36	Repair runways at university airport	-	16,800	-
37	Bring electric wiring in campus buildings up to code, step 2	-	26,400	-
38	Alteration and improvement projects under \$5,000	-	8,000	-
39	Construct storage laboratory building for landscape management	20,000	-	-
40	Install irrigation facilities in field A-3 and B-2 for viticulture	5,600	-	-
41	Dairy industry creamery—repair and bring up to health stan-			
42	dards	31,600	-	-
43	Install laboratory benches (4) in rooms 150D, 150E, and 150F			
44	of food technology building	12,100	-	-
45	Construct extension of headhouse No. 31 for vegetable crops	12,000	-	-
46	Install walls for building which houses aseptic glass packing line			
47	for food technology	5,250	-	-
48	Develop reserve book reading room	20,000	-	-
49	Install pipelines (1.5 miles) and water troughs in field C-2 for			
50	animal husbandry	20,000	-	-
51	Bring electric wiring up to code in campus buildings, step 1	25,000	-	-
52	Install hood and alter rooms 255 and 256 in home economics			
53	building	7,000	-	-
54	Replace and improve fencing for animal husbandry	18,500	-	-
55	Alteration and improvement projects under \$5,000	3,700	-	-
56				
57	LA JOLLA CAMPUS			
58	Land acquisition for laboratory unit 4		172,000	-
59	Preliminary and working drawings for institute of technology			
60	and engineering	-	450,000	-
61	Construct and equip laboratory unit 3:			
62	<i>State Construction Program Fund</i>	1,893,000	187,000	-
63	<i>Capital Outlay and Savings Fund</i>	-	63,000	-
64	Equip laboratory unit 2	240,460	-	-
65	<i>Capital Outlay and Savings Fund</i>			
66				
67	Minor Projects: c			
68	Construct temporary office building	-	30,000	-
69	Construct sea water reduction facility for isotope laboratory	-	10,000	-
70	Rehabilitate aquarium floor to remedy sea water seepage and			
71	inadequate drainage	7,950	-	-
72	Building T-16—install fire sprinkler system, construct exterior			
73	fire escape, apply fireproofing material to exterior	11,660	-	-
74	Library building—make alterations to provide for stack expansion			
75	and install additional stacks	12,000	-	-
76				
77	c Minor projects for 1958-59 from Capital Outlay and Savings Fund and for 1959-60 from General Fund unless otherwise indicated.

7	LOS ANGELES CAMPUS			
8	Equip Franz Hall Addition:			
9	State Construction Program Fund	-	\$195,000	-
10	Capital Outlay and Savings Fund	-	65,000	-
11	Construct utilities, roads and walks to north campus area	-	626,234	-
12	Construct tennis courts and site development	-	191,631	-
13	Working drawings for chemistry-geology building addition	-	212,660	-
14	Construct alterations to physics building, step 2	-	295,335	-
15	Working drawings for north campus library unit 1	-	346,400	-
16	Equip botany building	\$45,000	-	-
17	Fair and Exposition Fund			
18	Equip physics building	35,000	-	-
19	Capital Outlay and Savings Fund			
20	Equip geology building addition for geophysics	86,800	-	-
21	Capital Outlay and Savings Fund			
22	Equip service yard expansion—step 1	55,000	-	-
23	Capital Outlay and Savings Fund			
24	Graduate school of business administration building	4,285,000	-	-
25	Construct social sciences unit 1	5,436,700	-	-
26	Construct theatre arts unit 1	2,573,000	-	-
27	Construct and equip psychology clinic school addition:			
28	State Construction Program Fund	55,000	-	-
29	Capital Outlay and Savings Fund	1,500	-	-
30	Complete alterations to and equip Moore Hall	205,000	-	-
31	Capital Outlay and Savings Fund			
32	University elementary school—step 2 completion—kindergarten-			
33	nursery unit	135,000	-	-
34	Construct engineering unit 3	5,639,500	-	-
35	Extend utilities, roads and walks to west campus—step 1	614,000	-	-
36	Residence hall unit 2—plans	98,000	-	-
37	Construct and equip residence hall unit 2 (partial cost)	2,328,300	-	-
38				
39	Minor Projects: c			
40	Complete unfinished room B-246 in music building	-	40,000	-
41	Temporary building 3-L (theater arts)—alter building to pro-			
42	vide room for motion picture projection and rehearsal	-	9,800	-
43	Chemistry-geology building—expand library by removing wall			
44	and utilizing corridor space	-	10,200	-
45	Extend service road south of service yard to Gayley Avenue	-	43,000	-
46	Alter space of office of architects and engineers in administra-			
47	tion building	-	15,000	-
48	Replace inadequate and deteriorated primary electrical switch-			
49	gear and feeder cables	76,530	-	-
50	Home economics building—convert room B-107 for housing rats			
51	for nutrition research	20,000	-	-
52	Correct settling on north side of engineering building	10,000	-	-
53	Alteration and improvement projects under \$5,000	300	-	-
54				
55	Expenditures From Fair and Exposition Fund			
56				
57	Subtropical horticulture area—subtropical horticulture—increase			
58	electrical capacity and install facilities for precooling studies			
59	of fruits	7,500	-	-
60	Ornamental horticulture area—plant pathology—construct and			
61	install plant beds in field area north of plant pathology			
62	greenhouse, including paved walks and steam line	8,000	-	-
63	Subtropical horticulture area—subtropical horticulture—pave			
64	soil-bin area and parking strips, extend access road to West-			
65	wood Boulevard, and install barriers and gates	11,000	-	-
66	Plant physiology—botany—provide and install desmologification			
67	equipment in greenhouses	20,000	-	-
68	Ornamental horticulture area—landscape area	20,000	-	-
69	Alteration and improvement projects under \$5,000	5,100	-	-
70				
71	LOS ANGELES MEDICAL CENTER			
72	Alter existing facilities to serve neuropsychiatric institute	-	116,411	-
73	Working drawings for basic science unit 2	-	656,000	-
74	Construct utilities and site development on west medical campus	-	332,000	-
75	Install heat-deflecting devices in medical center	109,600	-	-
76	Capital Outlay and Savings Fund			
77	Vivarium ventilation in medical center	275,000	-	-
78	Capital Outlay and Savings Fund			
79	Alterations to medical center for accommodation of			
80	neuropsychiatric unit	14,000	-	-
81	Capital Outlay and Savings Fund			
82				
83	c Minor projects for 1958-59 from Capital Outlay and Savings Fund and for 1959-60 from General Fund unless otherwise indicated.

7	LOS ANGELES MEDICAL CENTER—Continued			
8	Minor Projects: c			
9	Medical center—mount power transformers on vibration			
10	insulators on A level above radiation physics division		\$20,000	-
11	Waterproof and flash exterior	\$45,000	-	-
12	Medical center—general—install furnishings, including benches			
13	and chairs, essential for utilization of outside court areas	10,000	-	-
14	Hospital—install electronic eye to control doors and elevators			
15	9, 10, 15, 16	9,000	-	-
16	Alteration and improvement projects under \$5,000	8,600	-	-
17				
18	MT. HAMILTON			
19	Auxiliary equipment for 120-inch telescope—steps 1 and 2	100,000	83,000	-
20				
21	Minor Projects: c			
22	Rehabilitate and modify old photographic building	-	9,000	-
23	Provide additional apartment in unfinished area of dormitory			
24	building	10,500	-	-
25				
26	RIVERSIDE CAMPUS			
27	Construct and Equip Administration Building:			
28	State Construction Program Fund	1,293,600	56,905	-
29	Capital Outlay and Savings Fund	-	14,300	-
30	Construct and equip alterations to social sciences-humanities			
31	building	-	90,425	-
32	Construct and Equip Physical Sciences Building Addition:			
33	State Construction Program Fund	1,613,595	257,439	-
34	Capital Outlay and Savings Fund	-	64,000	-
35	Construct and equip alterations to physical sciences building	-	45,867	-
36	Install air conditioning in physical sciences building	-	249,750	-
37	Construct electrical improvements—step 1	-	65,000	-
38	Construct physical education fields and facilities—step 2	-	250,000	-
39	Construct health services building	-	350,000	-

## DEPARTMENT OF EMPLOYMENT

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>GENERAL ANALYSIS</b>			
2				
3				
4				
5	The Capital Outlay program for the Department of Employment has heretofore been financed from the Department of			
6	Employment Contingent Fund. In 1960-61 it is proposed to fund			
7	the major part of the program from funds made available to the			
8	California Department of Employment under Section 903 of			
9	the Social Security Act, as amended (Reed Act). Enabling			
10	legislation (Chapter 1814, Statutes of 1959) was enacted in the			
11	1959 legislative session which so authorizes the use of such			
12	funds, after appropriation by the Legislature. The Federal			
13	Bureau of Employment Security will provide a rental grant to			
14	the Department of Employment which will be used to amortize			
15	the cost of the building projects over a number of years. The			
16	amortization payments will be returned to the Unemployment			
17	Trust Fund and therefore, there will be no reduction in funds			
18	available for benefits. A total of \$13,351,082 of Reed Act allocations			
19	is now in the Unemployment Fund. If these funds are to			
20	be used for administrative purposes, under federal law they must			
21	be appropriated within 5 years of the date credited to the Unemployment			
22	Fund.			
23	An appropriation of \$160,700 is proposed from the Department			
24	of Employment Contingent Fund as the proposed construction			
25	of additions to existing buildings in Eureka, Redding,			
26	Salinas, Long Beach, Inglewood and Riverside will necessitate			
27	substantial alterations to existing buildings. The Bureau of			
28	Employment Security will not provide rental grants to amortize			
29				
30				
31	<b>STATE BUILDING PROGRAM</b>			
32				
33	<b>PROPOSED 1960-61 EXPENDITURES \$</b>			
34				
35	Site acquisition, parking lot and future building expansion, Eureka	-	-	\$125,000
36	This project will provide for the further expansion of this building			
37	and provide off-street parking for the public.			
38	Site acquisition, parking lot and future building expansion, Redding	-	-	130,000
39	This project will provide for further building expansion in the			
40	future and also provide an adequate off-street parking area			
41	for the public.			
42	Site acquisition, parking lot and future building expansion, Inglewood	-	-	125,000
43	This project will provide for further building expansion at a			
44	future date and provide adequate off-street parking area for			
45	the public.			
46	Site acquisition, parking lot and future building expansion, Chico	-	-	60,000
47	This project will provide for further future building expansion			
48	and provide off-street parking for the public.			
49	Site acquisition, parking lot and future building expansion, Hollywood	-	-	100,000
50	This project will provide for further future building expansion			
51	and will also provide an adequate off-street parking area for			
52	the public.			
53	Site acquisition for building addition for existing Los Angeles			
54	Employment Building	-	-	500,000
55	This project will provide for future growth and will also provide			
56	adequate off-street parking in this highly congested area.			
57	Site acquisition, parking lot and future building expansion, Riverside	-	-	185,000
58	This project will provide adequate off-street parking for the			
59	public and will provide for further building expansion at a			
60	future date.			
61	Site acquisition, parking lot and future building expansion, San Bernardino	-	-	90,000
62	This project will provide a site for a future building and will			
63	also provide additional off-street parking for the public.			
64	Site acquisition, parking lot and future building expansion, Bakersfield	-	-	80,000
65	This project will provide off-street parking for the public and			
66	will also provide for further building expansion at a future			
67	date.			
68	Site acquisition, parking lot and future building expansion, Santa Barbara	-	-	100,000
69	This project will provide off-street parking for the public, and			
70	will also provide space for the future expansion of the			
71	building.			
72	Site acquisition, parking lot and future building expansion, Indio	-	-	50,000
73	This project will provide off-street parking for the public, and			
74	will also provide for further expansion of the building.			
75				
76				
77				
78				
79				
80				
81				
82	\$ From Unemployment Trust Fund (Reed Act) unless otherwise indicated.			
83				
84				
85				
86				

these costs if funds made available under the Reed Act are used for alterations. If, however, the alteration work is paid for from funds appropriated from the Department of Employment Contingent Fund, the Bureau of Employment Security will provide rental grants to amortize the costs, thereby ultimately returning to the Contingent Fund the amount expended.

The 1960-61 Capital Outlay program of the department may be divided into the following major categories, consisting of:

1. Construction of additions to 6 existing buildings to provide facilities required by growth in the respective communities served by such offices.
2. Land acquisition adjacent to 15 existing Department of Employment buildings to provide for future expansion and adequate parking facilities.

This proposed program is essential to protect the investment of the State in the existing land and/or structures. Buildings previously constructed were built with the expectation that they would be outgrown within 10 years. This has been true in a number of locations. In others, the accelerated growth in the communities has made the buildings inadequate in less than a 10-year period. In the light of these developments and forecasts of the future it is imperative that additional land be acquired for future expansion and to provide adequately for off-street parking for the public.

## DEPARTMENT OF EMPLOYMENT—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	STATE BUILDING PROGRAM—Continued			
2	PROPOSED 1960-61 EXPENDITURES—Continued			
3				
4				
5				
6	Site acquisition, parking lot and future building expansion,			
7	Stockton	-	-	\$225,000
8	This project will provide sufficient parking for the public, and			
9	will also provide for future expansion of the building.			
10	Site acquisition, parking lot and future building expansion, Salinas	-	-	75,000
11	This project will provide off-street parking and will provide for			
12	further building expansion.			
13	Site acquisition, parking lot and future building expansion,			
14	Fullerton	-	-	40,000
15	This project will provide for further building expansion, and			
16	will supplement the amount of off-street parking.			
17	Site acquisition, parking lot and future building expansion, Santa			
18	Rosa	-	-	100,000
19	This project will provide an adequate off-street parking area for			
20	the public, and will also provide for building expansion.			
21	For construction of building addition, Eureka	-	-	270,000
22	The employment building in Eureka was occupied in July 1954.			
23	Growth in the area since that date has increased work-			
24	loads to the point where an additional 9,000 gross square			
25	feet must be provided in order to adequately house the oper-			
26	ations until 1969.			
27	For working plans and alterations to existing Eureka building---	-	-	55,700
28	<i>Department of Employment Contingent Fund</i>			
29	This project will cover the cost of alteration to the existing			
30	building made necessary by the construction of the Eureka			
31	building addition.			
32	For construction of building addition, Redding	-	-	177,393
33	The employment building in Redding was occupied in February			
34	1952. Area growth since that date with the resulting in-			
35	creased workloads makes necessary the provision of an			
36	additional 6,015 net square feet in order to adequately			
37	house the operations until 1969.			
38	For construction of building addition, Salinas	-	-	190,500
39	The Salinas employment building was occupied in March 1953.			
40	Growth in the area since that date has resulted in in-			
41	creased workloads which make necessary the provision of			
42	an additional 5,000 net square feet in order to adequately			
43	house the operations until 1969.			
44	For construction of building addition, Long Beach	-	-	173,300
45	The Long Beach employment building was occupied in October			
46	1951. Growth in the area since that date has been substan-			
47	tial and as a result workloads have increased to the point			
48	where an additional 5,955 gross square feet is needed in			
49	order to relieve overcrowded conditions and to provide for			
50	a minimum of future expansion.			
51	For construction of building addition, Inglewood	-	-	242,000
52	The Inglewood employment building was occupied April 1955.			
53	Growth in the area since that date has been substantial and			
54	as a result an additional 10,010 net square feet must be pro-			
55	vided in order to adequately house the operations until 1969.			
56	For construction of building addition, Riverside	-	-	228,200
57	The Riverside employment building was occupied in 1951. Growth			
58	in the area since that date has resulted in increased work-			
59	loads which make necessary provision of an additional 7,295			
60	net square feet of building area in order to adequately house			
61	the operations until 1969.			
62	For alterations to building, Riverside	-	-	52,000
63	<i>Department of Employment Contingent Fund</i>			
64	Preliminary plans for fiscal year 1961-1962	-	-	10,000
65	Preliminary plans for cost estimates on employment projects for			
66	inclusion in the 1961-62 Governor's Budget.			
67	Minor Projects: <sup>h</sup>

## State Fair and Exposition

Chapter 1071, Statutes of 1957, appropriated \$3,747,843 in 1957-58 and a like amount in 1958-59 from the General Fund together with the proceeds from the sale of present facilities, and Chapter 1072, Statutes of 1957, authorized the State Public Works Board to issue either certificates or revenue bonds in the amount of \$6,500,000 annually for a period of 2 years, to finance the construction of buildings and facilities for a new State Fair.

This budget does not anticipate expenditures of any funds from these sources on the new fair site in the 1960-61 fiscal year although it is proposed to extend the availability of these appropriations through the Budget Act.

Provision is made for replacement of the jockeys' room and some critical deferred maintenance projects at the old fairgrounds.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Construct jockeys' building	—	—	\$61,900
This building will replace the inadequate facility now in use for jockeys awaiting races.			
Minor Projects:			
Deferred maintenance	—	—	37,000

ESTIMATED 1958-59 AND 1959-60 EXPENDITURES <sup>a</sup>

Program development for new State Fair	\$32,821	\$17,000	—

## Sixth District Agricultural Association

The present facility is located in Exposition Park, in Los Angeles, and contains permanent exhibits in the fields of industry and science with particular emphasis on the resources of California. During the 1959-60 fiscal year, an exhibit addition was constructed to provide permanent exhibit space to house electronics, health, mechanical, physics, and chemistry exhibits. The addition also provided briefing rooms for school children, a Board Room, and shop and service facilities. The proposed new atomic energy exhibit addition will provide facilities for display of permanent and changing atomic energy exhibits, designed to demonstrate to the public peaceful uses of atomic energy.

It is proposed to renovate the existing National Guard Armory which is owned by the Association to make it suitable for the development of the Space Age Museum pursuant to Section 86.6 of the Agricultural Code which authorized the museum. Additional funding required to complete the renovation will be provided through private sources.

Minor projects include: (1) rehabilitating an existing portion of the museum known as Animal Industry Hall to bring the area up to minimum safety standards and to provide suitable exhibit area for installation of a modern chicken incubator exhibit which will be donated to the museum; (2) preliminary design for a valuable collection of mechanical arts specimens transferred without cost to the museum by the Los Angeles County Museum; (3) preliminary design for the Hall of Health Exhibit which is to be constructed by private funds and endowed for continuing operation and maintenance; (4) and Phase II of the museum parking lot expansion program that began during the 1959-60 fiscal year. Total minimum capacity needed to accommodate museum visitors is estimated at 500 cars. This second phase will provide for an additional 250 cars. The entire parking lot is to be placed on a pay parking system as soon as it is constructed.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Construct atomic energy building	-	-	\$200,000
To house a permanent exhibit on the peaceful uses of atomic energy which will be funded through the Atomic Energy Commission.			
Remodel armory for space age museum	-	-	125,000
Sixth District Agricultural Association Fund			
To provide for renovation of existing armory to make facility tenable for development of Space Age exhibits.			
Minor Projects:			
Alterations to animal industries hall	-	-	27,900
Prepare preliminary design for hall of health exhibit	-	-	10,000
Prepare preliminary design for mechanical arts exhibit	-	-	10,000
Museum parking lot expansion—Phase II	-	-	35,600

ESTIMATED 1958-59 AND 1959-60 EXPENDITURES <sup>j</sup>

Addition to exhibit building	-	\$670,600	-
Acquisition and Improvement of Sites for Parking Facilities:			
State Beach and Park Fund	\$1,510,399	254,838	-
Repayment of Loans for Purchase of Parking Facilities:			
General Fund	-189,736	-170,624	-148,620
State Beach and Park Fund	-25,063	-128,096	-148,628
Preliminary plans—addition to exhibit building	2,500	-	-
Sixth District Agricultural Association Fund			
Construct and install aviation exhibit	-	100,000	-

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>j</sup> From State Fair and Exposition Fund unless otherwise indicated.

## DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>GENERAL ANALYSIS</b>			
2				
3				
4				
5	This statewide traffic law enforcement agency functions			
6	through a Sacramento headquarters, with field offices strategi-			
7	cally located on major highways throughout the State. The			
8	department operates approximately 1,500 mobile units with			
9	nearly 2,600 uniformed officers. Its jurisdiction is limited to			
0	streets and highways outside incorporated areas.			
1				
2				
3	<b>STATE BUILDING PROGRAM</b>			
4				
5	<b>PROPOSED 1960-61 EXPENDITURES <sup>k</sup></b>			
6	Purchase of site for Fresno office .....	-	-	\$30,000
7	For purchase of site to replace existing leased facilities. Excess			
8	property is available from the Division of Highways. Present			
9	leased facilities are poorly located.			
0	Construct cafeteria—Sacramento Headquarters Building .....	-	-	275,000
1	To construct cafeteria to provide eating accommodations for			
2	employees of new headquarters building. No other facilities			
3	are located within a reasonable distance of the planned			
4	building.			
5	Construct area office building—Merced .....	-	-	115,000
6	To construct new office building. This is necessary due to reloca-			
7	tion of freeway. Division of Highways land has been made			
8	available.			
9	Working drawings—Fresno .....	-	-	10,000
0	Highway Patrol presently occupies 2 separate facilities which			
1	are poorly located.			
2	Incorporation with city sewer district—Highway Patrol Academy			
3	area .....	-	-	120,450
4	The growth of state facilities on the Meadowview Road site			
5	makes improved sewage disposal imperative.			
6	Minor Projects:			
7	Construct safety fencing at Highway Patrol Academy .....	-	-	48,000
8	Alterations and improvements to motorcycle storage area .....	-	-	15,000
9	Repair training academy road network .....	-	-	10,000
0	Construct walls around police range .....	-	-	20,000
1	Construct skid pan—emergency vehicle operations course .....	-	-	15,000
2	Construct carparks—San Francisco office building .....	-	-	27,500
3	Alteration and improvement projects under \$5,000 .....	-	-	9,025
4				
5				
6	<b>ESTIMATED 1958-59 AND 1959-60 EXPENDITURES <sup>k</sup></b>			
7	Purchase of site for Alta substation .....	-	\$10,000	-
8	Construct Sacramento headquarters office building .....	-	1,184,500	-
9	Working drawings for Alta substation .....	-	6,000	-
0	Enlarge accident investigation area at Highway Patrol Academy ..	-	33,000	-
1	Alteration and improvement projects under \$5,000 .....	-	4,200	-
2	Purchase site for Merced area office .....	-	15,000	-
3	Working drawings for relocation of Sacramento headquarters .....	-	30,000	-
4	Working drawings for Merced area office .....	\$1,000	3,000	-
5	Construct automotive shop .....	273,200	69,800	-
6	Equip automotive shop .....	5,591	1,409	-
7	Alterations to Los Angeles office .....	-	4,300	-
8	Construct valley zone office .....	-14,800 <sup>e</sup>	-	-
9	Construct high-speed driver course at training academy .....	-26,020 <sup>e</sup>	-	-
0	Purchase coastal zone office site .....	150,107	-	-
1	Construct Yuba City office .....	30,670	-	-
2				
3	<b>TOTAL EXPENDITURES, CAPITAL OUTLAY (Motor</b>			
4	<i>Vehicle Fund)</i> .....	\$419,748	\$1,361,209	\$694,975

<sup>e</sup> Unexpended balances previously reported as expended in a prior year.<sup>k</sup> From Motor Vehicle Fund unless otherwise indicated.

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates 8 hospitals for mentally ill patients, 4 hospitals for mentally retarded patients, and 2 hospitals housing both mentally ill and mentally retarded patients. These hospitals are distributed throughout the entire State. In addition provision was made in the 1957-58 Capital Outlay Budget to bring utility connections

to a site acquired for a new hospital for the mentally ill in the San Fernando Valley. However, based on population and patient forecasts, it does not now appear that additional mentally ill bed capacity will be needed for several years and the unexpended balance of funds appropriated for site development have been reverted.

<sup>d</sup> Expenditures from bond funds not included in budget totals.  
<sup>e</sup> Unexpended balances previously reported as expended in a prior year.

## GENERAL ANALYSIS—Continued

The Langley Porter Neuropsychiatric Institute which was established for teaching and research, and the necessary clinical provisions connected with these functions is operated by the department in conjunction with the University of California Medical School at San Francisco. Construction of a similar facility, the Neuropsychiatric Institute as part of the Los Angeles Medical School of the University, has been authorized and is expected to be activated during the 1960-61 fiscal year.

As of June 30, 1959, 34,577 beds were available for an actual mentally ill population of 36,771, with overcrowding of 2,194 patients. By June 30, 1960, 36,257 beds will be available for an estimated patient population of 36,771, which will reduce the overcrowding to 514 patients. An additional 348 beds will become available by the end of the 1960-61 fiscal year, at which time it is estimated that overcrowding of mentally ill patients will amount to but 166. The tables that follow are set forth in detail, actual and estimated population, and indicate the latest estimates of availability of presently funded and proposed capacity.

Additional mentally retarded patients are admitted as bed capacity and related treatment buildings become available, and a moderate amount of overcrowding occurs in order to fully utilize the facilities. As of June 30, 1959, 10,413 beds were available. These beds, together with those presently funded, will provide a total bed capacity of 11,537 by June 30, 1960. No change in the number of beds for this purpose is anticipated during the 1960-61 fiscal year. The tables that follow include population and capacity estimates for the mentally retarded.

The Langley Porter Neuropsychiatric Institute has a rated capacity of 117 beds. The similar facilities to be completed at the Neuropsychiatric Institute at the Los Angeles Medical School of the University of California during the 1960-61 fiscal year will have a capacity of 188 beds. Thus, a total institute capacity of 305 beds will be available.

A number of major projects are proposed in this budget chief of which are the enlargement of Cottage G at Stockton State Hospital, the construction of an acute hospital annex at Porterville State Hospital, and the construction of a research building at Pacific State Hospital. It is anticipated that the state appropriation for this latter building will be matched by federal funds. Other projects provide for necessary remodeling, service facilities, equipment for projects nearing completion and essential improvements at the various hospitals. These projects are explained in more detail in the budgets of the various hospitals. Essential minor construction projects are included to correct deficiencies and to improve the physical plant. These projects are also detailed in the individual budgets.

## Neuropsychiatric Institute at University of California, Los Angeles

This institute is being constructed as a wing of the Medical School at University of California at Los Angeles to operate as a teaching and research center as well as to provide care and treatment for patients with early curable types of mental dis-

orders. The proposed project for the 1960-61 fiscal year is for the purchase of the balance of the equipment necessary for the activation of this facility during the 1960-61 fiscal year.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Equip addition to Medical Center on University of California at Los Angeles campus to provide facilities for a neuropsychiatric institute—additional equipment  
To provide the additional equipment necessary for the hospital wing funded by the Budget Act of 1955—partial cost.

- \$750,000

## Camarillo State Hospital

This hospital for the mentally ill had a rated bed capacity of 6,281 as of June 30, 1959. Projects to be completed during the 1959-60 fiscal year will result in a net reduction of 39 beds leaving a total capacity of 6,242 beds. The major program proposed for the 1960-61 fiscal year provides for remodeling and

modernization of wards, additional water development, the construction of a chapel and related facilities (partially funded), and equipment for the chapel facilities. Minor construction projects totaling \$169,360 are included to correct deficiencies and to improve the physical plant.

### STATE BUILDING PROGRAM

#### PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Remodel and modernize wards	-	-	\$226,900
This project consists of alterations and additions to wards to provide facilities more nearly conforming to present-day hospital standards. All necessary and related mechanical and electrical work is included.			
Water development, phase II	-	-	219,000
To install one 1,000,000-gallon water storage tank and a new well and pump including the prefabrication of a steel pump-house on a concrete slab. All necessary fill, grading, electrical and mechanical services are included.			
Construct chapel building and related facilities	-	-	514,000
Equip chapel building and related facilities	-	-	49,200
To construct chapel facilities including an educational unit and to provide necessary and appropriate equipment. This project is partially funded by Item 374, Chapter 600, Statutes of 1957.			
Minor Projects:			
Renovation of wards 4 and 5	-	-	18,500
Repair and replace main kitchen, water, gas and sewer lines	-	-	20,800
Replace sewage plant filter unit	-	-	5,500
Install silo	-	-	14,000
Install laundry lint collectors	-	-	6,400
Install additional main water line valves	-	-	7,300
Modernize patients' ward lighting systems	-	-	8,300
Install fire protection sprinklers—receiving and treatment basement	-	-	16,000
Install fire protection sprinklers—administration basement	-	-	9,000
Construct and equip additional classrooms—children's unit	-	-	36,600
Alteration and improvement projects under \$5,000	-	-	26,960

<sup>a</sup> From General Fund unless otherwise indicated.

## Metropolitan State Hospital

This hospital for the mentally ill had a rated bed capacity of 3,696 as of June 30, 1959. The activation of a new 200-bed ward building during 1960-61 will increase the total bed capacity of the hospital to 3,896. The major construction program proposed for the 1960-61 fiscal year provides for remodeling and mod-

ernizing wards, equipment for the remodeled and modernized wards and the construction of additional water storage facilities. Minor construction projects totaling \$128,660 are included to correct deficiencies and to improve the physical plant.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

61	Remodel and modernize wards 19-21-----	-	-	\$216,700
62	Equip remodeled and modernized wards 19-21-----	-	-	8,700
63	This project consists of alterations and additions to wards together with necessary additional equipment items to provide facilities more nearly conforming to present day hospital standards. All necessary and related mechanical and electrical work is included.			
64	Additional water storage facilities-----	-	-	90,800
65	This project consists of erecting a 750,000-gallon capacity water storage tank. Modifications of the existing telemetering system are also included.			
66	Minor Projects:			
67	Eliminate fire and safety hazards-----	-	-	10,000
68	Modernize bathing facilities, wards-----	-	-	25,000
69	Install grease interceptor at main kitchen-----	-	-	21,000
70	Install thermostatic temperature-----	-	-	9,200
71	Extend visual call system-----	-	-	10,000
72	Construct visitors' parking area-----	-	-	10,460
73	Construct curbs and sidewalks-----	-	-	5,000
74	Alterations to wards 5 and 6-----	-	-	5,000
75	Install an additional extractor in laundry-----	-	-	10,400
76	Alteration and improvements projects under \$5,000-----	-	-	22,600

<sup>a</sup> From General Fund unless otherwise indicated.

5	<b>Napa State Hospital</b>			
6	This hospital for the mentally ill had a rated capacity of			
7	5,077 on June 30, 1959. Ward adjustments during the current			
8	year will result in a reduction of 35 beds while the activation			
9	of a new juvenile unit during the budget year will add 216			
10	beds. The resultant bed capacity on June 30, 1961, will be			
11	5,258. The major construction program proposed for the 1960-61			
12	fiscal year provides for the construction of a new chapel			
13	(partially funded by a previous appropriation), remodeling and			
14	modernization of wards, remodeling of serving areas and equip-			
15	ment for various projects as explained below. Minor construc-			
16	tion projects totaling \$66,190 are included to correct deficiencies			
17	and to improve the physical plant.

## Patton State Hospital

This hospital for the mentally ill had a rated bed capacity of 3,830 on June 30, 1959. The activation of 2 new ward buildings will provide an additional 1,072 beds, while other ward adjustments will result in a decrease of 62 beds during the 1959-60 fiscal year. A further reduction of 68 beds, resulting from ward adjustments, will occur during the 1960-61 fiscal year, leaving

a rated bed capacity of 4,772 by June 30, 1961. The major construction program proposed for the 1960-61 fiscal year provides for remodeling and modernization and equipping of wards. Minor construction projects totaling \$135,250 are included to correct deficiencies and to improve the physical plant.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Remodel and modernize ward 15	-	-	\$229,200
Equip remodeled and modernized ward 15	-	-	7,000
This project consists of alterations and additions to ward 15 together with necessary additional equipment items to provide facilities more nearly conforming to present day hospital standards. All necessary and related mechanical and electrical work is included.			
Remodel and modernize wards G and 16—additional cost	-	-	172,000
This project is to provide additional funds required for the remodeling and modernization of wards G and 16 to provide facilities more nearly conforming to present day hospital standards. All necessary and related mechanical and electrical work is included.			
Minor Projects:			
Eliminate fire and safety hazards	-	-	20,000
Modernize ward kitchens	-	-	20,500
Repair steam boiler	-	-	19,000
Install grease interceptor at main kitchen	-	-	16,250
Demolition of ward and garage building	-	-	5,000
Install lawn irrigation system	-	-	8,000
Replace water steam and condensate lines	-	-	15,000
Install metal awnings	-	-	8,700
Alteration and improvement projects under \$5,000	-	-	22,800

## Stockton State Hospital

This hospital for the mentally ill had a rated bed capacity of 3,697 on June 30, 1959. Miscellaneous ward adjustments during the current year will add 10 beds resulting in a bed capacity on June 30, 1960, and during the budget year, of 3,707. The major construction program proposed for the 1960-61 fiscal year provides for the construction of an addition to Cottage G,

the construction of a maintenance equipment warehouse with related equipment, the construction of a property warehouse with related equipment, alterations to Cottage F, the enlargement of day rooms and providing equipment for the professional building. Minor construction projects totaling \$90,700 are included to correct deficiencies and to improve the physical plant.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Construct addition to cottage G .....	-	-	\$2,500,000
This project is to enlarge cottage G to provide a unit housing 150 female and 150 male bedridden geriatric patients. All necessary and related mechanical and electrical work is included.			
Enlarge day rooms in cottage E .....	-	-	270,000
This project provides for the construction of 2 2-story additions to cottage E to provide additional day room area in accordance with current standards of treatment and care. All necessary and related mechanical and electrical work is included.			
Construct maintenance equipment warehouse .....	-	-	171,350
Equip maintenance equipment warehouse .....	-	-	9,200
This project is to provide a building to serve as a central engineering supplies warehouse together with related additional equipment items. All necessary and related mechanical and electrical work is included.			
Construct property warehouse .....	-	-	98,500
Equip property warehouse .....	-	-	1,310
This project is to provide a building of approximately 10,000 square feet to serve as a central property warehouse. Miscellaneous equipment items as required are also provided. All necessary and related mechanical and electrical work is also included.			

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>a</sup> Expenditures from bond funds not included in budget totals.

## Fairview State Hospital

This is a new hospital for the care and treatment of the mentally retarded with the first patients having been received in January of 1959. The rated bed capacity of this facility as of June 30, 1959, was 756. Additional units being activated during the current year will add an additional 1,190 beds, increasing the total capacity of the hospital during the budget year to

1,946 beds. The major construction program proposed for the 1960-61 fiscal year provides for equipment items for the furnishing of new buildings which were funded in prior budgets. Minor construction projects totaling \$94,600 are included to correct deficiencies and to improve the physical plant.

## STATE BUILDING PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Equip ward buildings	—	—	\$371,000
This project is to provide additional equipment items necessary to furnish 5 new ward buildings with a capacity of 700 beds which were funded in 1959-60.			
Equip library, occupational therapy, canteen, and barber shop	—	—	110,000
This project is to provide additional equipment items necessary to furnish the new units which were funded in 1958-59.			
Minor Projects:			
Construct perimeter fence	—	—	30,600
Install street lighting system	—	—	18,500
Complete covered passages	—	—	35,000
Alteration and improvements projects under \$5,000	—	—	10,500

<sup>a</sup> From General Fund unless otherwise indicated.

<sup>d</sup> Expenditures from bond funds not included in budget totals.

## MILITARY DEPARTMENT

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	GENERAL ANALYSIS			
2				
3				
4				
5	The Capital Outlay program of the Military Department is			
6	comprised of the construction of armories, warehouses, rifle			
7	ranges, and other facilities essential to the organization, train-			
8	ing, and morale of the California National Guard and the Cali-			
9	fornia Air National Guard. The long-range construction pro-			
10	gram would provide armories and other facilities to house and			
11	train all units.			
12	Since the 1951-52 fiscal year the Federal Government under			
13	Public Law 783, Eighty-first Congress, has participated in			
14	the construction of armories on a cost-sharing basis. Federal			
15	funds have been made available on the basis of up to 75 per-			
16	cent of qualifying phases of the construction.			
17	In addition to federal participation in the construction of			
18	armories, certain facilities such as: motor vehicle storage build-

22	PROPOSED 1960-61 EXPENDITURES <sup>a</sup>			
23				
24	Construct Central Office Building for the California Highway Pa-			
25	trol and the Military Department. (Partial cost.)	-	-	\$1,263,000
26	This project will provide necessary space to house the Military			
27	Department staff in a new building on Meadowview Road			
28	in Sacramento which will be shared with the California			
29	Highway Patrol. The amount included is the Military De-			
30	partment's portion of the cost of the building.			
31	Construct California Air National Guard base food service fa-			
32	cilities, North Highlands	-	-	130,600
33	This project will provide adequate feeding facilities for Air Na-			
34	tional Guard personnel in this unit.			
35	Preparation of plans and supervision of construction of projects			
36	financed by the Federal Government	-	-	100,000
37	To provide funds for architectural and engineering services in-			
38	volved in the design and construction of facilities, the con-			
39	struction of which is financed from federal funds.			
40	Minor Projects:			
41	Roof repairs to various armories	-	-	15,000
42	Replacement hot water system at Los Angeles-Hope Street			
43	armory	-	-	9,000
44	Survey of armory sites and title insurance	-	-	7,768

## DEPARTMENT OF MOTOR VEHICLES

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	GENERAL ANALYSIS			
2				
3				
4	This department, headquartered in Sacramento, functions			
5	through a network of field offices located in all population centers			
6	throughout the State. During the budget year the department			
7	will register and collect the taxes and fees on approximately			
8	8,800,000 vehicles, and issue new and renewed drivers' licenses			
9	to about 3,300,000 applicants.			
10	Continued population growth has caused many of the present			
11	facilities to be inadequate. This budget provides for state-owned			
12	office buildings in locations where existing facilities are in-			
13				
14				
15	STATE BUILDING PROGRAM			
16				
17	PROPOSED 1960-61 EXPENDITURES *			
18				
19	Purchase of site for Pasadena office building-----	-	-	\$250,000
20	The present leased facilities are inadequate for the present staff			
21	of employees. The off-street parking is insufficient to handle			
22	the volume of daily traffic to the office.			
23	Purchase of site for North Hollywood office building-----	-	-	280,000
24	The present leased facilities are inadequate for the present office			
25	staff. The parking area is inadequate and cannot accommodate			
26	the volume of daily traffic to this office.			
27	Purchase of site for Santa Ana office building-----	-	-	200,000
28	The present leased facilities are inadequate for the present office			
29	staff. The parking lot is inadequate for the volume of daily			
30	traffic to this office.			
31	Purchase of additional parcels for Los Angeles office parking area	-	-	85,000
32	The Public Works Board has previously approved purchase of 10			
33	of the 14 parcels to expand the Los Angeles parking area.			
34	Acquisition of the 4 remaining parcels will complete the			
35	purchase and provide the area needed for public and em-			
36	ployee parking.			
37	Construct office building--San Jose-----	-	-	280,000
38	The present facility does not have an adequate area for off-			
39	street parking and on-street parking is not available. The			
40	office is overcrowded and adequate facilities are not avail-			
41	able for the staff or the public. With the growth of City			
42	of San Jose, the new location will be more centrally located.			
43	Construct office building--Stockton-----	-	-	210,000
44	Off-street parking facilities are not available at the existing			
45	leased location. Searches indicate that it is not possible to			
46	obtain adequate rental facilities.			
47	Construct office building--San Bernardino-----	-	-	190,000
48	This department is presently occupying quarters under terms			
49	of a Department of Finance lease, pending completion of			
50	a state-owned facility. The department's original quarters			
51	were sold in 1958 to the Division of Highways as they			
52	were inadequate, and the property was urgently needed by			
53	Highways. The present quarters were intended only as an			
54	interim location, and are inadequate for extended occupancy.			
55	Minor Projects:			
56	Grade, fill, pave, provide bumpers and fence and prepare Los	-	-	40,000
57	Angeles parking lot for use-----			
58				
59				
60	ESTIMATED 1958-59 AND 1959-60 EXPENDITURES *

## DEPARTMENT OF FISH AND GAME

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	GENERAL ANALYSIS			
2				
3				
4	The proposed 1960-61 Capital Outlay Budget provides for			
5	projects in the amount of \$568,472. The major construction			
6	projects provide for additional rearing facilities at the San			
7	Joaquin Hatchery which will permit closure of the less econom-			
8	ical Sequoia Hatchery. In addition the facilities will provide			
9	production of fingerlings to facilitate the Lake Tahoe Fisheries			
10	Study. Also included in major construction projects are funds			
11	to replace a temporary utility building with an office, shop, and			
12	garage building at the Mojave River Hatchery. At the Mt.			
13	Shasta Hatchery funds are provided for the replacement of a			
14	rotted wooden floor in hatchery building "E" and the replace-			
15				
16				
17	WILDLIFE CONSERVATION PROGRAM			
18				
19	PROPOSED 1960-61 EXPENDITURES <sup>m</sup>			
20				
21	Construct additional rearing facilities at San Joaquin Hatchery----	-	-	\$102,000
22	To provide 12 rearing ponds, 4 rotary screens, 12 stationary			
23	screens and a 500-gallon planting truck at the San Joaquin			
24	Hatchery. This will enable the Sequoia Hatchery to be			
25	closed. Cost of raising catchable trout is \$1 per pound at			
26	Sequoia as compared to \$0.57 per pound at San Joaquin. 6			
27	of the rearing ponds are necessitated by the Tahoe Fisheries			
28	Study initiated in the 1960-61 fiscal year.			
29	Construct shop and garage at Mojave River Hatchery-----	-	-	60,000
30	To replace existing temporary utility building and replace with a			
31	combination shop, office, public restroom, storeroom, and			
32	garage building. Existing building erected in 1947 to serve as			
33	a temporary refrigeration and food preparation building.			
34	Remodel hatchery at Mt. Shasta Hatchery-----	-	-	70,000
35	Replace rotted studs and mud sill and provide concrete floor in			
36	Hatchery E. Replace 148 wooden troughs constructed in			
37	1915 with aluminum troughs. Existing floor in hatchery is			
38	rotted to the extent that it is dangerous to walk on. Wooden			
39	troughs leak badly and require extensive maintenance each			
40	year.			
41	Minor Projects:			
42	Region I—Headquarters:			
43	Devil's Garden Unit:			
44	Construct storage building-----	-	-	2,420
45	Region I—Inland Fisheries:			
46	Cedar Creek Hatchery:			
47	Construct staff housing additions-----	-	-	6,900
48	Darrah Springs Hatchery:			
49	Construct truck and equipment shelter-----	-	-	8,000
50	Red Bluff Screen Shop:			
51	Repair ladder at Ward Dam Diversion, Mill Creek, Tehama			
52	County-----	-	-	5,000
53	Fish Screens, Perforated Plate at Following Locations:			
54	Thomas Creek (Flournoy No. 1)-----	-	-	2,725
55	Thomas Creek (Flournoy No. 2)-----	-	-	2,725
56	Thomas Creek (Bookin Ditch)-----	-	-	2,000
57	Cedar Creek Falls-----	-	-	2,725
58	Yreka Screen Shop:			
59	Fish Screens, Perforated Plate at Following Locations:			
60	Old Hurman Kirt Ditch-----	-	-	1,400
61	Cottonwood Creek, Siskiyou County (Cardoze Ditch)-----	-	-	1,500
62	Shasta River (Watson Ditch)-----	-	-	1,500
63	Shasta River (Flocks Ditch)-----	-	-	1,500
64	Shasta River (Roberts Ditch)-----	-	-	1,500
65	Region I—Game Management:			
66	Honey Lake State Game Area:			
67	Construct Dakin Unit check station-----	-	-	950
68	Region II—Headquarters:			
69	Region II Warehouse:			
70	Remodel warehouse-----	-	-	3,500
71	Region II—Inland Fisheries:			
72	Central Valley Hatcheries:			
73	Rewire hatchery-----	-	-	7,500
74	Elk Grove Screen and Ladder Shop:			
75	Rewire shop-----	-	-	1,500
76	Stream Flow Maintenance:			
77	Construct Wheeler Lake saddle dam, Alpine County-----	-	-	1,200
78	Construct Winnemucca Lake saddle dam, Alpine County-----	-	-	1,300
79	Nimbus Hatchery:			
80	Surface parking area-----	-	-	9,333

## Wildlife Conservation Board

Continuation of the acquisition, construction, and improvements of wildlife conservation projects is planned. The \$9,000,000 appropriated by Chapter 1327, Statutes of 1947, the \$3,000,000 in revenue provided by Chapter 1401, Statutes of 1951, and the revenue of \$750,000 each fiscal year provided by subsequent legislation such as Chapter 1313, Statutes of 1955,

and Chapter 1828, Statutes of 1959, has been allocated to projects by the Wildlife Conservation Board. The budget reflects the actual and estimated expenditure of funds previously allocated to specific projects by the Wildlife Conservation Board, and estimated expenditures from revenue.

## WILDLIFE CONSERVATION PROGRAM

PROPOSED 1960-61 EXPENDITURES <sup>a</sup>

Fish hatchery and stocking projects .....	—	—	\$50,000
For construction and equipping of facilities for fish hatching and stocking.			
Warm water and other fish projects .....	—	—	702,561
For the acquisition and development of additional warm water fish lakes in various parts of the State.			
Flow maintenance and stream improvement projects .....	—	—	87,239
For the construction of small dams to provide stream flow during summer months and for stream clearance. This will improve the fishing on many miles of streams.			
Fish screen and ladder projects .....	—	—	15,000
To prevent loss of fish through water diversions and to permit passage of fish over stream obstructions.			
Waterfowl projects .....	—	—	266,790
For the acquisition and development of waterfowl management areas to provide for duck depredation control and public hunting.			
General projects .....	—	—	444,123
For the preservation and restoration of wildlife and to provide roads, trails, and parking areas to assist in access to ocean beaches and fishing and hunting areas.			
Special projects .....	—	—	5,000
For projects evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.			

<sup>a</sup> From Wildlife Restoration Fund unless otherwise indicated.

## Division of Beaches and Parks

The major responsibility of the Division of Beaches and Parks continues to be the acquisition and development program initiated by the 1956 and 1957 Legislatures. This program was developed to meet critical deficiencies in the recreational resources of the State. It was funded to a great extent with revenue received from impounded tideland oil money. Continuing revenues from the State Lands Act Fund have also been made available. Legislation enacted during the 1957 General Session provided for a revenue level of \$12,000,000 annually to support the division and to supplement acquisition and development resources. These moneys were to be transferred from the revenues of the State Lands Act Fund. Except for the fiscal year 1958-59 estimates indicate that the total funds available for transfer will be insufficient to provide the revenue level previously anticipated on a continuing basis. As a result, the State Beach and Park Fund is currently overappropriated. It will be noted that estimated expenditures for the current and budget years will exhaust the resources of the fund during the budget year. This depletion has resulted primarily because revenues to the fund have not held at the authorized \$12,000,000 revenue level.

Although all the areas included in the 5-year plan are incorporated in this budget, the time-consuming task of consummating an acquisition program of this magnitude may reasonably be expected to extend over a period of several years. The sequence of acquisition is to be determined by the Park Commission.

Programs in the 1956 legislation are subject to review by the State Public Works Board.

The proposed budget year acquisition program in addition to providing for continuation of acquisition under 1956 and 1957 legislation also proposes acquisition of a major area adjacent to the Golden Gate of San Francisco Bay. This area is expected to be declared surplus by federal authorities and should be acquired at the time it thus becomes available.

The major construction program proposed is directed primarily toward the expansion of facilities at existing parks and beaches so that the benefits from these expenditures may be realized as quickly as practicable. There are, however, several instances of initial development of state parks and beaches to provide recreational areas in regions of the State now seriously deficient in such facilities or to provide relief from overcrowded conditions at existing state parks.

The minor construction projects proposed are for the most part required to correct deficiencies in the facilities of various units of the State Park System; to provide facilities for improved utilization of existing parks and beaches, and to repair or replace deteriorated facilities.

In addition to the above, the budget anticipates continuation of collateral programs such as riders' and hikers' trails; the historic ship program, and the Redwood Highway relocation. Provision is also made for expenditure of the balance of funds available for a state park in San Francisco.

## BEACHES AND PARKS ACQUISITION AND IMPROVEMENT PROGRAM

REAL PROPERTY ACQUISITION<sup>o</sup>

## PROPOSED 1960-61 EXPENDITURES

San Francisco Golden Gate Beach.....	—	—	\$250,000
Both shores of the Golden Gate have a remarkable recreation and historic potential. The change of military tactics and weapons has led the Army to declare some 260 acres of these lands surplus and indications are that other areas will follow. Acquisition of the present surplus lands will be the initial units of a major park project of about 4,000 acres and 60,000 feet of ocean frontage uniquely located in close proximity to the population masses of the Bay area.			

<sup>d</sup> Expenditures from bond funds not included in budget totals.

<sup>o</sup> From State Beach and Park Fund unless otherwise indicated.

<sup>1</sup> A non-revenue fund. Neither the revenue nor the expenditures are included in the overall budget totals.

25				
26	<b>PROPOSED 1960-61 EXPENDITURES °</b>			
27				
28	Twin Lakes Beach State Park:			
29	Sanitary facilities and parking area-----	—	—	\$326,400
30	This is the State's share of a co-operative project for the con-			
31	struction of small craft harbor facilities by the Santa			
32	Cruz Port District and the Corps of Engineers. The Sani-			
33	tary facilities and the parking area are for the use of the			
34	beach area which is contiguous to the small craft harbor			
35	project.			
36	Hearst San Simeon State Historical Monument:			
37	Roads and parking-----	—	—	96,000
38	Office building-----	—	—	130,500
39	This project consists in part in the reconstruction of the 3			
40	most critical sections of the only road to the Hearst			
41	Castle. The road was not originally constructed for con-			
42	centrated use; it has no base and lacks proper drainage			
43	facilities. This will accomplish approximately 20 percent			
44	of the total job to be done to put the road in good condi-			
45	tion. In addition present facilities provide no waiting			
46	room, permanent public contact or office service for ap-			
47	proximately 2,000 persons who will visit the castle each			
48	day during the summer season. Due to strong winds from			
49	the ocean and complete lack of any sunshades it is very			
50	undesirable for persons waiting for many hours for their			
51	scheduled castle tour. It is planned to add a building			
52	which will provide facilities for visitor orientation, lounge,			
53	waiting areas and a monument office.			
54

## DISTRIBUTION OF MINOR PROJECTS BY LOCATION

## Analysis

The Riding and Hiking Trail, authorized by Chapter 112, Statutes of 1946, was to be a 3,000-mile statewide loop. This was later amended to authorize secondary trails after completion of the statewide loop.

From State Beach and Park Fund unless otherwise indicated.

Chapter 1536, Statutes of 1955 authorized lateral trails concurrently with the statewide loop to accelerate the program and provide for more effective use.

## Analysis

No further construction is proposed for the budget year.

## ESTIMATED 1958-59 AND 1959-60 EXPENDITURES °

Establishment and development of a statewide system of roadside rests -----	\$10,613	-	-
<b>TOTAL EXPENDITURES (Roadside Rests) -----</b>	<b>\$10,613</b>	<b>-</b>	<b>-</b>

## ACQUISITION AND RESTORATION OF HISTORIC SHIPS

## Analysis

Because of the part played by the early day sailing and steam schooners in the development of California, this project was established to create a fitting monument. These schooners

are to be displayed in the San Francisco Bay area. The expenditures are for restoration and rehabilitation to make them ready for exhibit purposes.

## ESTIMATED 1958-59 AND 1959-60 EXPENDITURES °

Historic ships -----	\$102,114	\$243,236	-
<b>TOTAL EXPENDITURES (Historic Ships) -----</b>	<b>\$102,114</b>	<b>\$243,236</b>	<b>-</b>

## ACQUISITION, DEVELOPMENT, AND IMPROVEMENT OF STATE PARK IN SAN FRANCISCO

## Analysis

This project includes the acquisition and development of a site for a state park to be located in the City of San Francisco. Budget Act of 1956, Item 400.2, appropriated \$2,000,000 for

this purpose. Budget Act of 1958, Item 417, transferred \$276,000 from this appropriation to augment an appropriation made for the acquisition and restoration of historic ships.

PROPOSED 1960-61 EXPENDITURES FROM  
PRIOR APPROPRIATIONS °

Acquisition of real property and development of a state park in San Francisco -----	-	-	\$400,000
---	---	---	-----------

° From State Beach and Park Fund unless otherwise indicated.

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1				
2				
3				
4				
5				
6	<b>Division of Forestry</b>			
7	The proposed capital outlay program for the 1960-61 fiscal			
8	year includes funds for the acquisition of land at Crystal Creek			
9	Conservation Camp, Pine Grove Conservation Camp, and Ben			
10	Lomond Conservation Camp. Additional land is needed at Cryst-			
11	al Creek to provide for the expansion of the leaching field. It is			
12	proposed to purchase the Ben Lomond and Pine Grove Conserva-			
13	tion Camp sites which are now under lease. Funds are also pro-			
14	vided for the continuation of the program of acquiring other			
15	strategically located sites for division facilities including a new			
16	site for the San Diego County Ranger Unit.			
17	Construction projects include funds for the replacement of			
18	the office and messhall of the Shasta County Ranger Unit			
19	Headquarters located at Redding; replacement of messhall and			
20	barracks at the Oroville Ranger Unit; construction of an addi-			
21	tion to the District I Headquarters at Santa Rosa to relieve			
22	overcrowding of personnel and provide space for additional per-			
23	sonnel as necessitated by the conservation camp program; the			
24	construction of Washington Ridge Conservation Camp to house			
25	Department of the Youth Authority wards; and the construc-			
26	tion of 2 additional conservation camps each designed to			
27	accommodate 80 inmates as a continuation of the joint pro-			
28	gram with the Department of Corrections.			
29	Minor projects provide for 3 additional employee residences			
30	to be constructed in remote areas where housing is not now			
31	available; approximately \$210,000 in construction projects suit-			
32	able for conservation camp inmate labor; funds for the con-			
33	struction of 5 equipment buildings at different locations; various			
34	radio facility improvements; 5 recreation room additions at con-			
35	servation camps; and various water and power improvements at			
36	forest fire stations throughout the State.			
37				
38	<b>STATE BUILDING PROGRAM</b>			
39				
40	<b>PROPOSED 1960-61 EXPENDITURES <sup>a</sup></b>			
41				
42	Purchase of land for conservation camps.....	-	-	\$34,000
43	Purchase of 3 sites. 1 is an addition to the Crystal Creek Con-			
44	servation Camp site in Shasta County for expansion of			
45	leaching field, 1 is for purchase of Ben Lomond Conservation			
46	Camp site in Santa Cruz County which site is now under			
47	lease, and 1 is for purchase of Pine Grove Conservation			
48	Camp site in Amador County which site is now under lease.			
49	Purchase of land for county headquarters.....	-	-	46,230
50	San Diego Ranger Unit Headquarters in San Diego County.			
51	Present site is in congested city area and not adequate to			
52	expand.			
53	Sites for Lookouts and Forest Fire Stations:			
54	Various locations.....	-	-	44,770
55	To provide funds for continuation of the program of acquiring			
56	strategically located fire control stations and lookout sites.			
57	Engineering, planning and inspection services.....	-	-	121,256
58	To provide 8 technical positions, a survey crew, 3 clerical posi-			
59	tions, and operating expenses required in connection with			
60	the division's Capital Outlay program.			
61	Construct Redding Ranger Unit (Shasta County) Headquarters...	-	-	113,450
62	To replace inadequate and deteriorated office and messhall and			
63	modernize electrical system. Old structures do not warrant			
64	further repairs as termites and dry rot have caused con-			
65	siderable damage. Modernization and expansion of the pres-			
66	ent overloaded electrical system will permit the State to			
67	operate at minimal electric power rates.			
68	Equip Redding Ranger Unit (Shasta County) Headquarters.....	-	-	3,490
69	Construct Oroville Ranger Unit (Butte County) Headquarters...	-	-	123,060
70	To replace existing deteriorated messhall and barracks building			
71	constructed in 1937. Present structure does not justify the			
72	expenditure of funds for remodeling to meet needs. Existing			
73	building is inadequate in size to handle the normal traffic			
74	through the station.			
75	Equip Oroville Ranger Unit (Butte County) Headquarters.....	-	-	2,940
76	Construct addition to District I Headquarters (Santa Rosa).....	-	-	50,700
77	To provide additional space in the Santa Rosa Headquarters			
78	building to relieve a general overcrowding of personnel and			
79	provide space for additional personnel such as the conser-			
80	vation camp program coordinator.			
81	Equip addition to Santa Rosa Headquarters.....	-	-	1,820
82	Construct Washington Ridge Conservation Camp.....	-	-	578,042
83	The second phase of the program for this camp in Nevada			
84	County is provided. Funds are for the construction of an			
85	80-man conservation camp to house Department of the			
86	Youth Authority wards. Crews from this camp will be			
87	available for fire fighting and conservation projects.			
88	Equip Washington Ridge Conservation Camp.....	-	-	113,513
89	Two (2) 80-man Conservation Camps:			
90	Working drawings.....	-	-	45,620
91	Site development.....	-	-	240,210
92	Construction.....	-	-	1,127,600

<sup>a</sup> From General Fund unless otherwise indicated.

7	Division of Small Craft Harbors			
8	CONSTRUCTION OF HARBOR FACILITIES BY DIVISION OF SMALL CRAFT HARBORS			
9	<p>Section 5823 of the Public Resources Code authorizes the Division of Small Craft Harbors to "prepare plans for, and acquire, construct, develop, and improve, small craft harbors, facilities in connection therewith, and connecting waterways." It is contemplated that this authorization will be used only when there is no local responsible agency to construct and operate a harbor, and where the need is great from the standpoint of safety. Such harbors are commonly known as harbors of refuge.</p> <p>In the 1960-61 fiscal year the agency proposes execution of the initial phase of an estimated \$4,000,000 harbor project at Shelter Cove in Humboldt County. This project was approved by Chapter 1875, Statutes of 1959. Shelter Cove is 39 nautical miles north of the Noyo River and 54 miles south of Humboldt Bay. The cove lies under the southern face of Point Delgada and affords some shelter in northwesterly weather, but the cove is exposed and dangerous with south and west winds. Landings can be made, with caution in favorable weather on the single beach along the northern shore of the cove. A county road connects with U.S. Highway 101 at Garberville, 24 miles east. A county airstrip is located on the point and plans have been made for improving and lengthening the present runway. Limited supply facilities are in existence at Shelter Cove to provide for the demands of transient craft using the cove.</p> <p>The legislation requires that construction funds for this project be made available in the amount of \$460,000 contingent upon the execution of an agreement that the County of Humboldt will take over the Shelter Cove project within a 3-year period. The county is to assume total responsibility of maintenance, operation, and further development of this harbor project on the date the total amount appropriated is expended, or at the termination date of the availability of the appropriation, whichever is earlier. The agreement will provide for the repayment by the County of Humboldt of the money expended by the State, such repayment to start not more than 6 years from the date the money is expended, or from the termination date of the availability of the appropriation, whichever is earlier, including interest at 3 percent, and extending not more than 20 years from said earlier date.</p>

3	Special Deposit Fund				500,000	3,367,000	-	—3,367,000

## GENERAL ANALYSIS

The California Olympic Commission was established by Chapter 124, Statutes of 1955, which became effective on June 18, 1955, with the awarding of the VIII Olympic Winter Games to Squaw Valley by the International Olympic Committee. The commission is composed of 5 members appointed by the Governor. The duties of the commission are to provide facilities for the 1960 Winter Games with the funds made available by the State; to encourage and assist participation in these games by persons from all parts of the world; to co-operate to the fullest extent with the Government of the United States and with other persons, corporations and agencies concerned with staging the winter games in California in 1960; and to engage in such other activities as may be necessary or desirable to make the holding of the games in California a success.

Chapter 1069, Statutes of 1957, provides that all facilities constructed by the California Olympic Commission shall be transferred to the Division of Beaches and Parks, Department of Natural Resources, for inclusion in the state park system as soon as practicable after the completion of the games and in no event no later than June 30, 1960.

The commission has negotiated a master contract with the Organizing Committee, VIII Olympic Winter Games, Squaw Valley, California, U.S.A., 1960, Incorporated, the organization appointed by the United States Olympic Committee and authorized by the International Olympic Committee to stage the games.

By the enactment of Public Law 85-365 in 1958 and H. R. 7454 in 1959, the Congress of the United States has authorized an advance of \$3,500,000 to the Organizing Committee for construction of an ice arena on U.S. Government land. The land is occupied by the commission under a Thirty-year-term Special Use Permit. The Congress has also authorized the expenditure of up to \$900,000 in federal funds for the lending of military support to the staging of the VIII Olympic Winter Games, and the Defense Department and its components are actively lending such support.

With the exception of the figure skating rink, all competition facilities for the games were tested under competitive conditions during the trial events staged in Squaw Valley in February 1959, and were found to be of excellent quality and in full compliance with Olympic standards.

## GENERAL ANALYSIS

The proposed expenditure program for highway construction is related to the increased rates and fees which were to have expired in the 1959-60 fiscal year for motor vehicle fuel and

diesel fuel taxes and for motor vehicle registration and weight fees, but which were extended by the 1959 Legislature.

### Recapitulation of Proposed Expenditures and Obligations for Construction of State Highways for 1960-61 Fiscal Year, Showing Allocation of Construction Funds by County Group

EXPENDITURE CATEGORY	NORTHERN COUNTY GROUP	SOUTHERN COUNTY GROUP	TOTAL
Major construction and improvement projects	\$113,550,000	\$143,969,000	\$257,519,000
Thin blanket program and deferred seal coat	3,500,000	1,500,000	5,000,000
Traffic stripe, pavement markings, and signs	675,000	825,000	1,500,000
Construction engineering	15,500,000	13,000,000	28,500,000
Minor improvement and betterment	450,000	350,000	800,000
Rights-of-way	49,315,000	72,472,304	121,787,304
Preliminary engineering and design	16,500,000	15,000,000	31,500,000
Grade crossings	2,250,000	2,750,000	5,000,000
Contingencies	2,810,194	2,550,210	5,360,404
Totals, Reconditioning, Resurfacing and Construction of State Highways <sup>a</sup>	\$204,550,194	\$252,416,514	\$456,966,708
State aid county highways, federal, and matching funds <sup>b</sup>	2,999,215	1,254,985	4,254,200
Totals, Expenditures Subject to Allocations Under Section 188, Streets and Highways Code	\$207,549,409 (45%)	\$253,671,499 (55%)	\$461,220,908 (100%)

<sup>a</sup> Excludes honor camp construction which is not subject to allocation by county group pursuant to Section 188.7, Streets and Highways Code.

<sup>b</sup> Included in county group allocation pursuant to Section 2210.5, Streets and Highways Code.

4	Alameda	5	Orchard Avenue to 0.1 mile south Gresel Street; grade and pave	3.6	\$690,000
5	Alameda	5	MacArthur Freeway—0.3 mile west Grand Avenue to 14th Avenue; grade, pave and structures	1.7	5,000,000
6	Alameda	5	San Pablo Avenue to Broadway; grade, pave and structures	1.1	8,000,000
7	Alameda	69	Fifth Avenue Overhead to Linden Street; landscape	1.5	35,000
8	Alameda	5	Hegenberger Road to Fallon Street; grade, pave and structures	5.6	4,800,000
9	Alameda	69, 7	0.3 mile south of El Cerrito Overhead to 0.3 mile south of Jefferson Avenue; landscape	2.6	280,000
10	Alameda	75	Broadway Tunnel—additional 2-lane bore	1.1	10,000,000
11	Amador	34	Dry Creek Bridge No. 26-07; bridge and approaches	-	110,000
12	Butte	3	Big Chico Creek to 0.3 mile north of Lindo Channel; functional planting	1.8	10,000
13	Butte	3	20th Street to 1st Street in Chico; pave and curbs	1.3	200,000
14	Butte	3	Main Street in Grimes to Sycamore; grade and pave	6.1	250,000
15	Butte	3	Ridge Road to Carquinez Bridge; functional planting	8.0	25,000
16	Butte	75	Orinda Road to west of Sunnybrook Drive; landscape	1.7	125,000
17	Butte	75, 107	East of Pleasant Hill Road to Walden Road and Creekside Drive; landscape	4.5	350,000
18	Del Norte	1	2.6 miles to 1.1 miles south of Oregon state line; grade	1.5	770,000
19	El Dorado	11	Sportsmans Hall to Strawberry, 4 locations; chain change areas; grade and pave	-	85,000
20	El Dorado	11	Riverton to Meyers, 6 locations; truck passing lanes; grade and pave	-	300,000
21	El Dorado	11	Washington Street to Railroad Crossing; grade, pave and structures	2.7	3,240,000
22	El Dorado	93	Morgan Grade to Cool (portions); grade and pave	-	50,000
23	Fresno	4	0.4 mile south of Highland Avenue to 0.3 mile north of Chestnut Avenue; grade, pave and structures	9.7	7,724,000
24	Fresno	138	4.0 mile south of Belmont Avenue to Route 41 (portions); grade and pave (State's share) (co-op. \$11,000)	0.9	169,000
25	Humboldt	1	1.0 mile south of Meyers Flat to Meyers (portions); grade and structure	-	1,915,000
26	Humboldt	1	Chadd Creek; culvert and channel change	-	43,000
27	Humboldt	1	1.8 mile north of Route 35 to 0.3 mile north of Fortuna; grade and structures	-	910,000
28	Humboldt	1	0.2 mile south of Loleta Drive to 1.2 miles north of White Slough (portions); grade, pave and structures	3.7	2,590,000
29	Humboldt	35	Little Larabee and Butte Creeks; bridges and approaches	0.6	137,000
30	Humboldt	35	9.6 to 11.1 miles east of Bridgeville (portions); grade, pave and structures	0.4	65,000
31	Lake	49	St. Helena Creek to Middletown; grade and pave	4.2	625,000
32	Lassen	29	0.4 mile south of Baxter Creek to 2 miles north of Milford; grade, pave and structures	11.9	1,345,000
33	Lassen, Modoc	73	0.8 mile south of Modoc County Line to 0.5 mile north of County Line; grade, pave and structures	1.3	125,000
34	Marin	56	Mile 6.0 "A" to Mile 11.6 "B" (portions); drainage and pave	0.5	120,000
35	Marin, Sonoma	56	0.4 mile south of Marin County Line to Bodega Bay (portions); grade, drain and pave	9.6	230,000
36	Mariposa	65	Coulterville to Bear Valley (portions); grade and pave	2.0	100,000
37	Mariposa	65	Flyaway Gulch Bridge No. 40-20; bridge and approaches	-	30,000
38	Mendocino	1	North city limits of Willits to 1.6 miles northerly (portions); grade and pave	0.9	175,000
39	Mendocino	16	2.8 miles to 3.7 miles east of Hopland; grade and pave	0.9	95,000
40	Mendocino	56	1.5 miles south to Navarro River Bridge; grade and pave	1.5	410,000
41	Mendocino	56	Big River Bridge No. 10-146; bridge, approaches and temporary con- nections	0.6	735,000
42	Merced	4	1 mile south of Merced to 2.0 miles north of Merced; grade and structures	5.1	7,400,000
43	Merced	122	1.4 miles to 2.3 miles east of Lincoln Road; grade and pave	0.9	75,000
44	Monterey	2	1.7 miles south to 1.3 miles north of Greenfield; grade, pave and structures	4.0	1,955,000
45	Monterey	56	Willow Creek Bridge No. 44-66; bridge and approaches	0.5	510,000
46	Monterey	56	Anderson Canyon Bridge No. 44-49; grade, pave and culvert	0.6	425,000
47	Monterey	56	Carpenter Street to south city limits of Monterey; landscape	0.8	160,000
48	Napa	8, 49	Imola Avenue to 0.1 mile north of Old Sonoma Road; grade, pave and structures	0.5	400,000
49	Napa	102	0.9 mile east of Pope Valley Road to Monticello Dam Relocation (portions); grade and pave	-	50,000
50	Nevada	83	Junction of Route 38 to 1.9 miles north of Hobart Mills; grade, pave and structures (State's share) (U.S.B.R. share \$440,000)	6.9	610,000
51	Placer	3	Washington Street Underpass; revise illumination	-	60,000
52	Plumas	21	Route 83 to Willow Creek; grade, pave and structures	4.3	1,450,000
53	Sacramento	3	Route 98 to Marconi Avenue; grade, pave and structures	2.1	704,000
54	Sacramento	4	1.8 miles south of Florin Road to "U" Street; grade, pave and structures	7.6	5,470,000
55	Sacramento	11	55th Street to 0.2 mile east of 65th Street; grade and pave	0.8	90,000
56	Sacramento	11	Power Inn Road to Zinfandel Drive; traffic signals, 6 intersections (State's share)	-	180,000

**REASONS FOR REVISIONS**

- <sup>1</sup> Savings—funds in excess of project requirements.
- <sup>2</sup> Project deferred.
- <sup>3</sup> Decrease due to change in scope of work.
- <sup>4</sup> Decrease, project or portion of project financed from other funds.
- <sup>5</sup> Additional project to install or revise traffic regulatory or safety devices.
- <sup>6</sup> Additional project to alleviate hazardous conditions.
- <sup>7</sup> Additional funds required because of low budget estimate or higher construction costs.
- <sup>8</sup> Additional funds required because of revision of design standards or scope of work.
- <sup>9</sup> Additional project to improve deficient roadway or structure.
- <sup>10</sup> Additional project to improve drainage.
- <sup>11</sup> Additional project to improve traffic service.
- <sup>12</sup> Additional project to relieve traffic congestion.
- <sup>13</sup> Additional project to improve traffic safety.
- <sup>14</sup> Additional project to construct weighing facilities or loadometer stations.
- <sup>15</sup> Additional project to replace a deteriorated or destroyed structure.
- <sup>16</sup> Additional project to repair a deteriorated roadway or structure.
- <sup>17</sup> Additional project to provide for roadway delineation.
- <sup>18</sup> Additional project or funds, work deferred from prior year.
- <sup>19</sup> Additional project to stabilize slide area or remove underground water.
- <sup>20</sup> Additional project to repair bridge foundations.
- <sup>21</sup> Additional project to protect roadway surface.
- <sup>22</sup> Additional project, State's share of highway relocation for dam, canal and levee construction.
- <sup>23</sup> Additional funds to cover increases in project costs.
- <sup>24</sup> Additional project for erosion control.
- <sup>25</sup> Additional project to acquire materials for use on construction.
- <sup>26</sup> Additional project to place roadway in acceptable condition for relinquishment.
- <sup>27</sup> Additional project, storm damage repair.
- <sup>28</sup> Project financing revised to single fiscal year budget.
- <sup>29</sup> Additional project, required by freeway agreement.
- <sup>30</sup> Additional project to comply with legislative action.
- <sup>31</sup> Additional project to comply with Coast Guard regulations.
- <sup>32</sup> Additional project to protect roadway.

**REASONS FOR REVISIONS**

<sup>1</sup> Savings—funds in excess of project requirements.

<sup>2</sup> Project deferred.

<sup>3</sup> Decrease due to change in scope of work.

<sup>4</sup> Decrease, project or portion of project financed from other funds.

<sup>5</sup> Additional project to install or revise traffic regulatory or safety devices.

<sup>6</sup> Additional project to alleviate hazardous conditions.

<sup>7</sup> Additional funds required because of low budget estimate or higher construction costs.

<sup>8</sup> Additional funds required because of revision of design standards or scope of work.

<sup>9</sup> Additional project to improve deficient roadway or structure.

<sup>10</sup> Additional project to improve drainage.

<sup>11</sup> Additional project to improve traffic service.

<sup>12</sup> Additional project to relieve traffic congestion.

<sup>13</sup> Additional project to improve traffic safety.

<sup>14</sup> Additional project to construct weighing facilities or loadometer stations.

<sup>15</sup> Additional project to replace a deteriorated or destroyed structure.

<sup>16</sup> Additional project to repair a deteriorated roadway or structure.

<sup>17</sup> Additional project to provide for roadway delineation.

<sup>18</sup> Additional project or funds, work deferred from prior year.

<sup>19</sup> Additional project to stabilize slide area or remove underground water.

<sup>20</sup> Additional project to repair bridge foundations.

<sup>21</sup> Additional project to protect roadway surface.

<sup>22</sup> Additional project, State's share of highway relocation for dam, canal and levee construction.

<sup>23</sup> Additional funds to cover increases in project costs.

<sup>24</sup> Additional project for erosion control.

<sup>25</sup> Additional project to acquire materials for use on construction.

<sup>26</sup> Additional project to place roadway in acceptable condition for relinquishment.

<sup>27</sup> Additional project, storm damage repair.

<sup>28</sup> Project financing revised to single fiscal year budget.

<sup>29</sup> Additional project, required by freeway agreement.

<sup>30</sup> Additional project to comply with legislative action.

<sup>31</sup> Additional project to comply with Coast Guard regulations.

<sup>32</sup> Additional project to protect roadway.

AERONAUTICS COMMISSION

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	
1	The 1960-61 Capital Outlay program for the Aeronautics Commission provides for the acquisition of Blue Canyon Emergency Airport which is located in Placer County adjacent to U.S. Highway 40. In recent years the airport has been operated by the Federal Government both as an emergency airport and a weather station. In 1958 the Federal Government decided to maintain the weather station only. The Aeronautics Commission, rather than let the airstrip deteriorate, leased the property in order to provide emergency facilities to persons flying in the area. The property is owned jointly by the U.S. Forest Service and a private party, the latter's parcel becoming available for sale to the general public sometime after June 30, 1960. The acquisition involves a total of 75 acres which includes the actual runway area and approach zones to inhibit encroachment.

1	<b>Veterans' Home of California</b>			
2				
3				
4				
5	The Veterans' Home, a 2,415-bed facility is located in Napa			
6	County. It is a home for aged and disabled, honorably discharged			
7	former members of the armed forces. The site of the home is on			
8	a hillside with both single and 2-story buildings and a 4-story			
9				
10	hospital. Most of the structures of the institution have been			
11	replaced in recent years or are in good condition. No major con-			
12	struction projects are included in the 1960-61 Budget. The			
13	minor projects requested are to alter or repair existing facilities.

The Capital Outlay budget includes funds for the California Water Development Program, the local projects assistance program, and minor construction for departmental facilities.

1959 legislation defined the Water Development Program as the extensive construction program necessary to develop, convey and deliver water to the areas within the State where existing water supplies cannot now or will not in the future be able to meet the demands of continuing population growth and related agricultural and industrial development.

The construction budget for the California Water Development Program includes funds for construction contracts, acquisition of property, and related state operations costs of construction, supervision and acquisition. The other state operations costs of the California Water Development Program, the staff and related expenses for design and related functions, are included in the state operations budget, financed from the California Water Fund.

The work schedule for fiscal year 1960-61 for the California Water Development Program includes the construction or completion of existing construction contracts and the letting of additional contracts for construction of facilities required to be relocated in the Oroville division; completion of the Frenchman Dam; continued work on the first unit of the South Bay Aqueduct, and the awarding of contracts for construction of additional units of the aqueduct. The budget includes funds to initiate construction of works for supplying water to the subsidence areas in the San Joaquin Valley to facilitate construction of the main aqueduct. Design work will be continued during 1960-61 to the extent necessary to meet scheduled availability of funds for construction or to furnish such design data as are necessary for property acquisition.

Funds have been appropriated to acquire a major portion of the rights-of-way, on which the facilities will be constructed. This program will proceed as rapidly as possible to limit the

necessity to pay for new improvements to the land and to have such land available when needed to proceed with construction.

The acquisition program will provide for land acquisition on a substantial portion of the San Joaquin Valley-Southern California Aqueduct, particularly in the vicinity of the west side state highway where joint acquisition with the Division of Highways will be conducted. Rights-of-way for the major highway and railroad relocations at Oroville will be acquired. The program for rights-of-way purchase on the Oroville Reservoir site and associated features will continue. On the South Bay Aqueduct, right-of-way work will be geared to the progress of design and to construction deadlines.

The 1958 and 1959 Budgets have included funds for cooperation with the Federal Government in the construction of multipurpose projects which include flood control. Provision is made in the 1960-61 Budget for state participation in 2 multipurpose projects: the Black Butte and New Hogan projects.

Funds were appropriated in the 1959 Budget to provide for state participation in federal construction of a sea water conversion plant. Construction of the plant will begin in 1959-60 and is planned for completion in 1960-61.

Pursuant to Chapter 1751, Statutes of 1959, the Davis-Grusky Act, \$15,000,000 was appropriated from the California Water Fund to provide state financial assistance to public agencies for the construction of water projects to meet local requirements in which there is a statewide interest, by making grants or loans or both. Procedures are now being established for the administration of this program. No expenditures are shown in the budget for this program for 1959-60 or 1960-61 due to the fact that proposed projects must be approved for assistance, based on the determination that the project substantially conforms to the California Water Plan, is engineeringly feasible, economically justified, and, if a loan is proposed, that there is reasonable assurance that the public agency can repay it.

## PROPOSED 1960-61 EXPENDITURES AND ESTIMATED 1958-59 AND 1959-60 EXPENDITURES

## CALIFORNIA WATER DEVELOPMENT PROGRAM

## OROVILLE DIVISION

The Oroville Division projects will provide flood control to the area downstream from Oroville, an irrigation supply for the Feather River Service Area, a firm supplemental water supply available in the Delta for exportation to Southern California and to the San Joaquin Valley, and will generate power for sale or for operation of the project.

The Oroville Division consists of the Oroville Dam, Reser-

voir, and Power Plant and the Thermalito Diversion Dam, Reservoir, Power Canal, Forebay, Power Plant, and Afterbay. Relocation of roads, railroads, and utilities must precede the construction of these features. Preliminary design work on these features is underway and the first steps in the relocation construction are in progress. Completion of the entire project is estimated by December 1968.

1	PROPOSED 1960-61 EXPENDITURES AND ESTIMATED 1958-59 AND 1959-60 EXPENDITURES—Continued			
2	CALIFORNIA WATER DEVELOPMENT PROGRAM—			
3	Continued			
4	OROVILLE DIVISION—Continued			
5	Project Statements			
6	Western Pacific Railroad Relocation			
7	Construction of the Oroville Dam on the Feather River necessitates the relocation of the Western Pacific Railroad which currently operates through the limits of the proposed reservoir. The relocation begins in Oroville near the mouth of the Feather River Canyon and will extend 22.94 miles to the point of juncture with the existing line at the North Fork Bridge. The relocation requires the construction of 5 tunnels and 3 bridges. The West Branch Bridge is a combination railroad and highway structure including 1 deck for State Highway-U.S. 40 Alternate relocation. The total estimated cost of the Western Pacific Railroad relocation exclusive of the combined facility, the West Branch Bridge, is estimated to be \$44,567,000. An appropriation of \$14,804,400 is included in the 1960-61 Budget. To continue the relocation an additional appropriation of approximately \$1,100,000 will be required to complete the relocation of the Western Pacific Railroad.			
8	The 1960-61 Budget includes funds for construction of the Western Pacific grading and appurtenant structures between Oroville and Pentz, a distance of 14.3 miles. Funds are also provided for the replacement of a line for the Western Union Telegraph Company, the placing of the communications and signal system for the railroad and construction of the Poe siding, the construction of the road bed sub base, laying of rail, ties and ballast, and the purchase of miscellaneous rails and materials.			
9	Tunnel No. 1 is the last of the 5 tunnels required for relocation of the railroad, to be placed under contract. Construction will begin in fiscal year 1960-61. It is estimated that the tunnel will be excavated for its full length of approximately 2,825 feet and concreting operations will be initiated during 1960-61. The balance of the contract work will be completed during the succeeding fiscal year.			
10	In August of 1959, a contract was awarded for the construction of Tunnels 2 and 3 and the railroad grade between Tunnels 2 and 3 and Tunnels 3 and 4. It is estimated that on June 30, 1960, an access road to the site will be completed, construction of culverts and roadbed grading between tunnels will be approximately 65 percent complete, and the tunnel excavation will be approximately 50 percent complete. The balance of the contract work will be completed during fiscal year 1960-61.			
11	In May of 1957 a contract was awarded for the construction of tunnels 4 and 5. On June 30, 1959 all excavations for both tunnels had been completed and lining of the arch in tunnel 4 was 90 percent completed. The balance of the contract work, which consists of placing the concrete arch in tunnel 5 and the invert in tunnels 4 and 5 and the forming and constructing of head walls and retaining walls at tunnel portals will be completed during the fiscal year 1959-60. The total estimated cost of tunnels 4 and 5 is estimated at \$11,000,000.			
12	In April 1958 a contract was awarded for the construction of the railroad bridge to cross the Feather River in the vicinity of Oroville. On June 30, 1959 all construction work had been completed and erection of bridge steel was approximately 85 percent completed. The balance of the contract work consisting of the remaining steel erection and placing of the concrete deck will be completed by about February 1960. The total estimated cost of the Feather River Bridge is \$1.4 million.			
13	In January of 1958 a contract was awarded for the construction of a multiple concrete arch railroad bridge on the North Fork of the Feather River at the outlet of tunnel 5. On June 30, 1959, structure excavation for piers and abutments had been completed. Construction of the piers and placing the concrete in the central arch was essentially completed. The balance of the contracted work which consists of placing the concrete in the outside arches and the vertical walls and the laying of the deck will be completed during the fiscal year 1959-60. The total estimated cost of the North Fork Bridge is \$1.8 million.			
14	Feather Falls Railway Relocation			
15	Negotiations are in progress with the owners of the railway to furnish them with a trucking facility to move the lumber that is presently moving over the existing railroad. This alternative is being pursued in lieu of the more costly relocation of the existing facilities.			
16	Clearing Oroville Dam and Spillway Site			
17	The dam and spillway sites which encompass approximately 400 acres of land will be cleared to prepare the site for a large amount of precise construction layout and tunneling works. The clearing work will be done during the fall and winter of 1960.			
18	West Branch Bridge			
19	An agreement with the Division of Highways to award a contract for the construction of the West Branch Bridge, and to provide engineering services to the contractor during the construction period, has been negotiated. In October 1959, a contract was awarded for the construction of the bridge. During the balance of the fiscal year, it is estimated that the contractor will complete the clearing of the site, place all footing concrete, and complete the placing of concrete in the approach piers and abutments. Additional work on pier construction will be initiated. During fiscal year 1960-61, it is anticipated that the contractor will complete the placing of concrete in piers, complete the approach deck, and begin erection of the truss. The balance of the contract work will be completed during the succeeding fiscal year.			
20	Middle Fork Bridge			
21	A contract will be let during fiscal year 1960-61, for the construction of a 1,640-foot suspension type county road bridge over the Middle Fork of the Feather River. Access to the site and initial substructure work will be completed during this fiscal year. The balance of contracted work will be completed during the ensuing 18 months.			
22	Property Acquisition			
23	Acquisition of the Highway 40 Alternate rights-of-way and Western Pacific Railroad rights-of-way between Oroville and Pentz overhead will be nearly completed in 1959-60. Some minor right-of-way acquisition will extend into 1960-61 on these relocations. Work will continue in acquiring the lands and improvements included in the Oroville Reservoir site, the Diversion Reservoir below the main dam, the Thermalito Power Canal, the Thermalito Forebay and Afterbay and the area which will supply materials for the fill-type Oroville Dam.			
24	The disposal of mining claims, county and U.S. Forest Service roads and power and telephone line relocations and the relocation of two cemeteries from the Oroville Reservoir area will be accomplished in 1960-61.			
25	Highway Relocation			
26	The contract relocation of State Highway 21 between Wicks Corner and Jarbo Gap consisted of grading and surfacing 13.6 miles highway and 2.6 of railroad roadbed grading adjacent to a section of the highway. This work was completed in August, 1959. Additional grading and surfacing will be required for the approaches to the west branch bridge. This work will be contracted for when the bridge is completed.			
27	Construction Supervision			
28	Construction supervision, and testing and inspection of materials will be required during the 1959-60 and 1960-61 fiscal years for projects constructed under contract.

23	UPPER FEATHER RIVER DIVISION			
24	A contract for the construction of the Frenchman Dam was awarded in September 1959. During the balance of the fiscal year relocation of roads around the reservoir site, clearing and preparing the dam foundation, and construction of the outlet works will be completed.			
25	Placing of earth fill materials in the dam section will be initiated during fiscal year 1959-60. It is intended that the contractor complete the balance of the work by December, 1960.			
26	Right-of-way Acquisition			
27	Negotiations are proceeding to acquire private lands in the Antelope Abbey Bridge, Dixie Refuge, and the Frenchman sites during fiscal year 1959-60 and will continue into 1960-61. Agreements for use permits of public lands required by these projects are presently being negotiated.

3	CALIFORNIA WATER DEVELOPMENT PROGRAM—			
4	Continued			
5				
6	NORTH BAY AQUEDUCT DIVISION			
7				
8				
9	This project is designed to provide a supplemental water supply			
10	for the urban and irrigation needs of potential service areas in			
11	the north bay counties. During 1960-61 the right-of-way require-			
12	ments for the reach from Calhoun Cut to Cordelia Junction will			
13	be determined. Engineering surveys will be made to determine			
14	aqueduct location and place land ties.			
15				
16	Right-of-way Acquisition			
17				
18	State operations cost .....	—	—	\$16,484
19				
20	TOTAL EXPENDITURES, NORTH BAY AQUEDUCT			
21	DIVISION .....	—	—	\$16,484
22				
23				
24	SOUTH BAY AQUEDUCT DIVISION			
25				
26	The South Bay Aqueduct will divert water from the San			
27	Joaquin-Southern California Aqueduct near the Delta Pumping			
28	Plant to serve northern Santa Clara County, the "Bayside" and			
29	Livermore Valley portions of southern Alameda County, and the			
30	Livermore Valley portion of Contra Costa County.			
31	During the period prior to construction of the San Joaquin-			
32	Southern California Aqueduct, water would be taken from the			
33	Delta-Mendota Canal via temporary facilities comprising approx-			
34	imately 2 miles of canal and a small pumping plant delivering			
35	water to the South Bay Pumping Plant Forebay.			
36	The system will include the South Bay Pumping Plant, ap-			
37	proximately 50 miles of canals and pipelines, 2 tunnels totaling			
38	approximately 1.3 miles in length, and 3 reservoirs.			
39	The South Bay Pumping Plant will lift the water to Dyer			
40	Pass at elevation 783 feet, from where it will flow by gravity via			
41	Dyer Canal and Altamont Pipeline to Livermore Valley. The			
42	main aqueduct would extend around the southeast end of Liver-			
43	more Valley, thence via La Costa Tunnel, Sunol Valley Siphon,			
44	Mission Tunnel, and Mission Pipeline to the terminal at Air-			
45	point Reservoir, east of Milpitas. Del Valle Reservoir, south of			
46	Livermore, would provide regulatory storage, while the Doolan			
47	Branch, terminating in Doolan Canyon Reservoir, would serve			
48	northern Livermore Valley.			
49	In October 1959 a contract was awarded for the first unit of			
50	the South Bay Aqueduct which includes the canal from the Delta-			
51	Mendota Canal to the Forebay Reservoir, the low lift pumping			
52	plant and the Forebay Dam. Additional contracts for supplying			
53	pumps and motors and construction of conveyance facilities from			
54	the Forebay to Livermore Valley will be awarded during fiscal			
55	year 1959-60. During fiscal year 1960-61 contracts for the con-			
56	struction of the aqueduct from Altamont Pass Road in Livermore			
57	Valley to the Del Valle Reservoir and for the construction of			
58	Del Valle Dam will be awarded.			
59	During fiscal year 1959-60 negotiation for acquisition of right-			
60	of-way required for Del Valle Dam and Reservoir and for the			
61	aqueduct from the intake to Airpoint Reservoir will proceed.			
62	Acquisition of all lands required along the main aqueduct will be			
63	completed and negotiations for lands required for the Doolan			
64	Branch Aqueduct and Doolan Canyon Dam and Reservoir will			
65	proceed during fiscal year 1960-61.			
66				
67	Construction, Livermore Valley Canal and Del Valle Reservoir			
68				
69	Estimated program accomplishment .....	—	\$310,000	\$1,640,000
70	Contractual liability for subsequent years .....	—	—	6,039,800
71	Less amount reported as expenditure in 1956-57 fiscal year .....	—	—310,000	—
72				
73	Totals .....	—	—	\$7,679,800
74				
75	Construction, Delta Mendota Canal and Livermore Valley			
76				
77	Estimated program accomplishment .....	—	\$1,290,000	\$3,190,000
78	Contractual liability in subsequent years .....	—	4,450,000	—
79	Less amount reported as expenditure in 1959-60 fiscal year .....	—	—	—3,190,000
80				
81	Totals .....	—	\$5,740,000	—

## DEPARTMENT OF WATER RESOURCES—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	PROPOSED 1960-61 EXPENDITURES AND ESTIMATED 1958-59 AND 1959-60 EXPENDITURES—Continued			
2	CALIFORNIA WATER DEVELOPMENT PROGRAM—			
3	Continued			
4	SOUTH BAY AQUEDUCT DIVISION—Continued			
5	Right-of-way Acquisition			
6	Right-of-way -----	-	\$234,037	\$278,695
7	State operations cost -----	-	95,963	84,305
8	Totals -----	-	\$330,000	\$363,000
9	Construction Supervision			
10	Estimated program accomplishment -----	-	\$142,212	\$332,888
11	Transfer to Water Resources Revolving Fund for completion of			
12	projects -----	-	-	507,679
13	Totals -----	-	\$142,212	\$840,567
14	TOTAL EXPENDITURES, SOUTH BAY AQUEDUCT			
15	DIVISION -----	-	\$6,212,212	\$8,883,367
16	SAN JOAQUIN VALLEY-SOUTHERN CALIFORNIA			
17	AQUEDUCT DIVISION			
18	This project will convey water to Southern California from the			
19	Delta through the San Joaquin Valley.			
20	The proposed San Joaquin-Southern California Aqueduct crosses			
21	areas of known subsidence. Construction of a feeder canal to supply			
22	water required in the consolidation of the soils which are subject			
23	to subsidence will be constructed prior to the construction of the			
24	main canal. Initial construction of these feeder canal facilities will			
25	begin in fiscal year 1960-61. During subsequent years the feeder			
26	canal facilities will be extended ahead of the main canal con-			
27	struction into areas of known subsidence.			
28	Right-of-way acquisition will proceed as rapidly as final design			
29	of the aqueduct fixes the boundary of lands to be acquired. Initial			
30	emphasis is being placed on acquiring the lands required from the			
31	Delta to San Luis Reservoir during fiscal year 1959-60. During			
32	fiscal year 1960-61 the major emphasis will be in the acquisition			
33	of lands in the reach from San Luis Reservoir to Southern Kern			
34	County line.			
35	Construction, Subsidence Facilities, San Luis Reservoir to			
36	Panoche Creek			
37	Estimated program accomplishment -----	-	-	\$800,000
38	Contractual liability in subsequent years -----	-	-	3,004,000
39	Total -----	-	-	\$3,804,000
40	Construction Supervision			
41	Estimated program accomplishment -----	-	-	\$55,592
42	Transfer to Water Resources Revolving Fund for completion of			
43	projects -----	-	-	235,467
44	Total -----	-	-	\$291,059
45	Right-of-way Acquisition			
46	Aqueduct from the Delta to San Luis Reservoir:			
47	Right-of-way -----	-	\$50,000	\$1,380,000
48	State operations cost -----	-	295,540	232,752
49	Total -----	-	\$345,540	\$1,612,752
50	Aqueduct from San Luis Reservoir to Southern Kern County:			
51	Right-of-way -----	-	-	626,000
52	State operations cost -----	-	-	106,179
53	Total -----	-	-	\$732,179
54	Extension of Aqueduct to Southern California:			
55	Right-of-way -----	-	1,530,000	3,936,700
56	State operations cost -----	-	120,000	516,259
57	Total -----	-	\$1,650,000	\$4,452,959
58	TOTAL EXPENDITURES, SAN JOAQUIN VALLEY—			
59	SOUTHERN CALIFORNIA AQUEDUCT DIVISION -----	-	\$1,995,540	\$10,892,949

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	PROPOSED 1960-61 EXPENDITURES AND ESTIMATED 1958-59 AND 1959-60 EXPENDITURES—Continued			
2	CALIFORNIA WATER DEVELOPMENT PROGRAM—			
3	Continued			
4	SAN LUIS DIVISION			
5	The San Luis features, consisting of San Luis Dam, San Luis			
6	Forebay, and Lower Los Banos Dam, will serve as regulating fea-			
7	tures for the San Joaquin Valley-Southern California Aqueduct.			
8	Design and construction for these features will be done by the			
9	department in co-operation with the United States Bureau of			
10	Reclamation. The design program has for its objective completion			
11	of design by 1963 when construction will begin.			
12	Right-of-way Acquisition			
13	Right-of-way -----			
14	State operations costs -----			
15	Total -----			
16	TOTAL EXPENDITURES, SAN LUIS DIVISION -----			
17	FEDERAL-STATE PROJECTS			
18	SEA WATER CONVERSION PLANT			
19	To be built by the Federal Government at Point Loma, San			
20	Diego County. The sea water conversion plant will consist of 2			
21	distinct parts: an atomic reactor and the distillation plant. The			
22	Atomic Energy Commission will contract for design and construc-			
23	tion of the atomic reactor and the Office of Saline Water will con-			
24	tract for design and construction of the distillation plant. The			
25	State's financial participation in the project will be split between			
26	the costs of the reactor and the distillation plant. The design of			
27	the distillation plant will be completed during 1959-60, and the			
28	plant will be constructed during 1960-61. Most of the design work			
29	for the reactor will be completed during 1959-60, and clearing,			
30	grading, and excavation will be started. The construction of the			
31	reactor should be completed by the end of 1960-61.			
32	BLACK BUTTE AND NEW HOGAN DAMS			
33	Early construction and participation in the federal-state pro-			
34	gram will require agreement by the State to repay the conserva-			
35	tion features of the Black Butte and New Hogan Projects. These			
36	projects, though multipurpose, are primarily flood control in			
37	character for which they are urgently needed.			
38	The Black Butte Project is presently under construction by the			
39	United States Army Corps of Engineers. The State's share in this			
40	project will be approximately \$7,300,000 for which it will receive			
41	the right to all water conservation benefits in addition to the flood			
42	control provided by the project without reimbursement. Water			
43	conserved by this project will be utilized for service in the local			
44	areas as the demand there grows and the surplus will be used as a			
45	source of supply for the Delta Pool.			
46	New Hogan on the Calaveras River is a similar project, but not			
47	yet under construction. The State's share of this project is expected			
48	to be \$6,440,000.			
49	The department is now negotiating with the U.S. Department			
50	of Interior and contracts should be consummated between the			
51	State and the United States within the budget year.			
52	Federal Co-operative Sea Water Conversion Plant			
53	Design and construction -----			
54	State operations cost -----			
55	Engineering Studies -----			
56	Totals -----

2	CALIFORNIA WATER DEVELOPMENT PROGRAM—			
3	Continued			
4	BLACK BUTTE AND NEW HOGAN DAMS—Continued			
5	Federal Projects—Flood Control and Conservation			
6	Black Butte on Stony Creek-----	-	\$7,300,000	-
7	New Hogan on Calaveras Creek-----	-	6,440,000	-
8	Total-----	-	\$13,740,000	-
9	TOTALS, FEDERAL-STATE PROJECTS-----	-	\$13,953,350	\$1,336,500
10	STATE BUILDING PROGRAM			
11	PROPOSED 1960-61 EXPENDITURES <sup>a</sup>			
12	Construct core storage and tool and supply building-----	-	-	\$175,000
13	To construct storage facilities at the Bryte Laboratory for core			
14	samples from drilling sites and to provide storage for heavy			
15	drilling and related equipment.			
16	Construct warehouse and shop-----	-	-	113,000
17	To construct a warehouse at the Bryte Laboratory site for			
18	storage of laboratory equipment and provide additional machine			
19	and carpenter shop working space.			
20	Minor Projects:			
21	Construct office building for laboratory administrative offices and			
22	the Fluid Mechanics Laboratory-----	-	-	24,800
23	Construct laboratory shop building-----	-	-	12,000
24	Construct laboratory parking lot-----	-	-	5,000
25	Construct concrete laboratory storage building-----	-	-	5,000
26	Improvements to concrete laboratory building-----	-	-	7,200
27	Improvements to Hydraulic Laboratory-----	-	-	
28	University of California, Davis-----	-	-	10,000
29	Construct addition to Soils Laboratory Building-----	-	-	2,500
30	Alteration and improvement projects under \$5,000-----	-	-	8,500
31	ESTIMATED 1958-59 AND 1959-60 EXPENDITURES <sup>b</sup>			
32	Improve revetment, left bank of Sacramento River above Colusa--	\$61,158	\$23,842	-
33	Capital Outlay and Savings Fund-----			
34	Minor Projects: <sup>c</sup>			
35	Construct survey cabin at Sonora Pass-----	-	5,200	-
36	Restore Cache Creek settling basin, weir-----	6,740	83,260	-
37	Install auxiliary sump pump, pumping Plant No. 2-----	-	25,000	-
38	Replacement of controls in switch gear, pumping Plant No. 2--	5,287	4,717	-
39	Construct snow survey cabin at Snow Mountain-----	-	5,300	-
40	Construct and equip laboratory building-----	39,996	-	-
41	Alteration and improvement projects under \$5,000-----	-	1,000	-
42	TOTAL EXPENDITURES, STATE BUILDING PROGRAM-----	\$113,181	\$148,319	\$363,000
43	Capital Outlay and Savings Fund-----	113,181	-	-
44	General Fund-----	-	148,319	363,000
45	TOTAL EXPENDITURES, CAPITAL OUTLAY-----	\$299,013	\$46,031,094	\$47,026,770
46	General Fund-----	219,563	1,127,319	363,000
